ORDER IN COUNCIL

THE CANADA GAZETTE.

Ottawa, Saturday, June 25, 1898.

[3324]

AT THE GOVERNMENT HOUSE AT OTTAWA

SATURDAY, DECEMBER 18, 1897.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

His Excellency, by and with the advice of the Queen's Privy Council of Canada is pleased to create a 'Geographic Board' to consist of one member for each of the Departments of the Geological Survey, Railways and Canals, Post Office, and Marine and Fisheries, such member, being appointed by the Minister of the department; of the Surveyor General of Dominion Lands, of such other members as may from time to time be appointed by Order in Council, and of an officer of the Department of the Interior, designated by the Minister of the Interior, who shall act as secretary of the Board; and to authorize the Board to elect its chairman and to make such rules and regulations for the transaction of its business as may be requisite.

His Excellency is further pleased to order and direct, that all questions concerning geographic names in the Dominion which arise in the departments of the public service shall be referred to the Board, and that all departments shall accept and use ir their publications the names and orthography adopted by the Board.

JOHN J. McGEE,

Clerk of the Privy Council.

Extract from O. in C. dated Dec. 14, 1899.

'That the Order in Council constituting the Board be amended by giving to the government of the Northwest Territories and to each Province the right to nominate one of their officials as a member of the Board who shall advise the Board with reference to names in his Province, provided that the several governments undertake to be guided by the decisions of the Board.

MEMBERS OF THE GEOGRAPHIC BOARD OF CANADA

Chairman

WM. P. Anderson, Chief Engineer, Department of Marine and Fisheries.

Secretary

A. H. Whitcher, Department of the Interior.

Executive Committee.

- D. B. Dowling, Geologist, Geological Survey, Department of Mines.
- C. O. Senécal, Geographer and Ch. Draughtsman, Geol. Survey, Dept. of Mines, James White, Secretary, Commission of Conservation.

Members.

- W. H. Boyd, Topographer, Geological Survey, Department of Mines.
- E. Deville, Surveyor-General of Dominion Lands.
- A. G. Doughty, Dominion Archivist.
- E. V. Johnson, Inspecting Engineer, Department of Railways and Canals.
- Wм. Smith, Secretary, Post Office Department.

Provincial Representative Members.

(Order in Council, December 14, 1899.)

Prince Edward Island-

Hon. M. McKinnon, Provincial Secretary, (ex-officio), Charlottetown, P.E.I.

British Columbia-

WM. FLEET ROBERTSON, Provincial Mineralogist, Victoria, B.C.

Saskatchewan-

John A. Reid, Deputy Provincial Treasurer, Regina, Sask.

GEOGRAPHIC BOARD OF CANADA

BY-LAWS.

I-Officers of the Board.

The officers shall consist of a chairman (who shall be elected by ballot), of an executive committee of three to be nominated by the chair and approved by the Board, all of whom shall serve for one year or until their successors shall be chosen, and of the secretary.

II-DUTIES OF OFFICERS.

- (a.) The chairman shall preside at the meetings and shall certify to the decisions of the Board. He shall appoint all committees not specially named by the Board. In his absence the Board shall have power to elect a temporary chairman.
- (b.) The secretary shall keep minutes of the proceedings of the Board and shall record the decisions rendered, or other action of the Board upon cases submitted to it, with reference to the papers filed in each case. He shall maintain files of the original papers, or copies of them, that may be presented in each case, conveniently arranged for reference. He shall, under the instructions of the Board, conduct the general correspondence and shall receive communications presented for the consideration of the Board.
- (c.) The executive committee shall receive through the secretary all communications requiring decision by the Board, shall investigate the questions presented, and after securing information from all available sources, shall report to the Board with recommendations regarding them.
- (d.) Before dealing with any name within a province represented upon the Board, such name shall be submitted to the representative of said province for examination and report.
- (e.) Upon the receipt of a communication submitting place-names for the consideration of the Board, it shall be the duty of the secretary, after preliminary submission to the executive committee, to transmit at once a copy of such communication, together with any papers relating thereto, to the member of the Board for the province affected, and also, in the case of coast names appearing on admiralty charts, to the hydrographer of the admiralty.
- (f) So soon as the report of the provincial representative, and in the ease of chart names, the report of the hydographer, are received, the secretary shall immediately submit the whole correspondence to the executive committee who shall promptly prepare the names for submission to the Board.
- (g). The secretary shall enter upon every record submitted for the consideration of the Board, the recommendation of the provincial representative, and, if any, the recommendation of the hydrographer.

III-MEETINGS.

The Board shall hold regular meetings on the first Tuesday in each month. Special meetings may be called by the chairman or by the executive committee. Five members of the Board shall constitute a quorum, but on the written request of any member, filed with the secretary of the Board within a month from the date of a meeting, any decision adopted at such meeting shall be reserved for approval by a

majority of the full Board. The affirmative vote of a majority of all the members of the Board shall be required for the final decision in any case. All motions presented for the consideration of the Board shall be submitted in writing.

IV-REPORTS.

The Board shall publish its decisions on geographic names, after each meeting, in the Canada Gazette and in bulletins, the same to be consolidated in a general report of the Board's work, to be issued after the 30th of June in each year.

V-AMENDMENTS.

These by-laws may be amended at any regular or special meeting, by a majority vote of all the members of the Board, provided that copies of the proposed amendment have been sent by the secretary to the members of the Board at least twenty days previous to the time the vote is taken.

RULES OF NOMENCLATURE.

- 1. When the priority of a name has been established by publication, particularly when such publication has occurred in any standard or authoritative work or works, that name should, if possible, be retained.
- 2. When names have been changed or corrupted, if not too firmly established by local usage or otherwise, the original forms should be restored.
- 3. In cases where what was evidently originally the same word, appears with various spellings sanctioned by local usage or otherwise, these various spellings when applied to different features should be regarded as in effect different names, and as a rule it is inadvisable to attempt to produce uniformity.
- 4. As a rule the first published name should be retained, but where a choice is offered between two or more names for the same place or locality, all sanctioned by local usage, that which is most appropriate and euphonious should be adopted.
- 5. The possessive form should be avoided whenever it can be done without destroying the euphony of the name or changing its descriptive application. Where the possessive form is retained, the apostrophe should be dropped.
 - 6. It is desirable to avoid the use of hyphens to connect parts of Indian names.
- 7. Names consisting of more than one word may be connected by hyphens or combined in one word as may be advisable.
 - 8. It is desirable to avoid the use of the words city and town as parts of names.
- 9. The form 'canyon' may be used instead of 'cañon,' but the latter is preferable.
- 10. The term 'brook' is considered preferable to 'creek' for designating small streams, and will be adopted in cases where the latter has not become too firmly fixed.
- 11. The Board suggests that the initial letters of generic or descriptive parts of geographical names, when used in reports or other documents, should not be capitals.
- The use of alternative names should be discontinued where possible or not inconvenient.
- 13. Geographical names in a foreign country should be rendered in the form adopted by that country, except where there are English equivalents already fixed by usage.
- 14. French names in Canada are to be spelt, accented, hyphenated, &c., according to the rules of the French language.
- 15. In cases where names already exist, and have been published in both English and French form and have been sanctioned by long usage, no attempt shall be made to abolish either form, but both may be recognized and published in the Board's lists of decisions and it shall be deemed correct to use either form in official documents in either language. In all other cases any duplication of form shall be discouraged and preference shall be given to the form which has priority of origin, whether this be English or French.
- 16. In English text and map printing, the use of hyphens for composite French names, though it is recommended, shall not be considered obligatory.
- 17. The spelling of native geographical names should represent, approximately, the true sounds of the words as pronounced in the native tongue. In the orthography of names of Indian origin in the province of Quebec, the rules of the Board, based on those of the Royal Geographical Society, are preferable to French practice as being simpler and in accordance with international usage, and shall be followed in the case of new names.
- 18. Where a generic descriptive term, such as Cape. Bay, River, &c., is added to a name, it is permissible to translate such term into French for use in French

publications, or into English for use in English publications, if it can be done without producing a mixture of English and French.

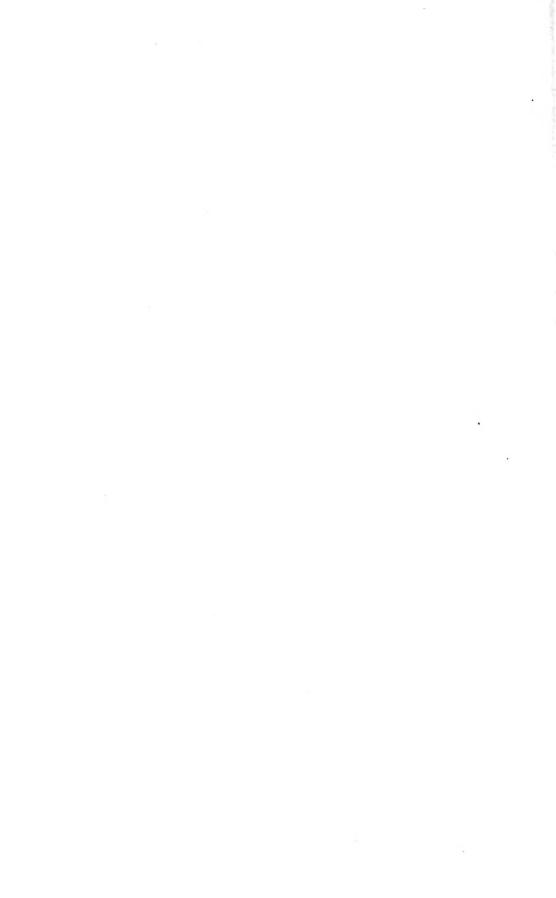

19. The Board adopts the rules of the Royal Geographical Society for the orthography of geographical names, of which the broad features are as follows:—

- (a) The vowels are to be pronounced as in Italian and the consonants as in English.
- (b) Every letter is pronounced, and no redundant letters are introduced. When two vowels come together each one is sounded, though the result, when spoken quickly, is sometimes scarcely to be distinguished from a single sound, as in ai, au, ei.
- (c) One accent only is used, the acute, to denote the syllable on which stress is laid. This is very important, as the sounds of many names are entirely altered by the misplacement of this 'stress.'

The following amplification of the foregoing rules explains their application:

SESSIONAL PAPER No. 21a

Letters.	Pronunciation and Remarks.	Examples.
а е	ah, a as in father. eh, a as in fate.	Java, Banana, Somali, Bari. Tel el Kebir, Oleleh, Yezo, Madina, Levuka, Peru.
i	English e; i as in ravine; the sound of ee in beet. Thus, not Feejee, but	Fiji, Hindi.
o u	o as in mote	Tokyo.
	employed for this sound. Thus, not Zooloo, but All rowels are shortened in sound by doubling the following conson- ant.	Zulu, Sumatra. Yarra, Tanna, Mecca, Jidda
	Doubling a vowel is only necessary when there is a distinct repetition of the single sound.	Nuulua, Oosima.
ai	as in aisle, or English i as in ice	Shanghai.
au 40	ow as in how	Fuchau. Macao.
aw ei	when followed by a consonant or at the end of a word, as in law is the sound of the two Italian vowels, but is frequently slurred over,	Cawnpore.
b	when it is scarcely to be distinguished from ei in the English $eight$ or ey in the English $they$. English b .	Beirut, Beilul.
c	is always soft, but is so nearly the sound of s that it should be seldom used. If Celebes were not already recognized it would be written Selebes.	Celebes.
еh	is always soft as in church	Chingchin.
b f	English d . English f . ph should not be used for the sound of f .	II-lean N. e.
g h	Thus, not $Haiphong$, but is always hard. (Soft g is given by j)	Haifong, Nafa. Galapagos.
	is always pronounced when inserted. as in what; better rendered by hw than by wh , or h followed by a	
j k	vowel, thus $Hwang ho$, not $Whang ho$, or $Hoang ho$. English j . D ; should never be put for this sound. English k . It should always be put for the hard c .	Hwang ho, Ngan hwei. Japan, Jinchuen.
,,	Thus, not Corea, but	Korea.
kh gh l	The Oriental guttural	Khan. Dagh, Ghazi.
m n	As in English.	
ng	has two separate sounds, the one hard as in the English word <i>finger</i> , the other as in <i>singer</i> . As these two sounds are rarely employed in the same locality, no attempt is made to distinguish between them.	
p.	As in English.	
ph th	As in loophole, stands both for its sound in thing, and as in this. The former is most	Chemulpho, Mokoho.
1	common. should never be employed; qu (in $quiver$) is given as kw	Bethlehem, Kwangtung.
r	When qu has the sound of k as in $quoit$, it should be given by k .	
s		
sh	As in English	
t v	As in Euglish.	
w		Sawakın.
y y	is always a consonant, as in yard, and therefore should never be used	Kikuyu.
	as a terminal, i or e being substituted as the sound may require. Thus, not $Mikindany$, but not $Kwaly$, but	Mikindani. Kwale.
z zh	English 2	Zulu. Muzhdaha.
zn	The French j, or as s in treasure. Accents should not generally be used, but where there is a very decided emphatic syllable or stress, which affects the sound of the word, it should be marked by an acute accent.	Muzhdaha. Tongatábu, Paiáwon, Sar- áwak.
	•	

DECISIONS

In the following list of names, those approved by the Board are printed in black type. Names, and different forms of the same name, which have been discarded are also given; the former being printed in *italics* and alphabetically arranged with the adopted names, but the latter, when nearly like the adopted forms, are not repeated.

A

Abatagush; bay, at the south end of lake Mistassini, Mistassini district, Que.

Aberdeen; mount, northeast of mount Lefroy, Alta. (Not Hazel peak.)

Abbika. See Apika.

Abbott: pass, near mount Lefroy, Alta., and B.C.

Abbott; mount, south of Glacier station, Kootenay district, B.C.

Abbott Corners; post office, Missisquoi county, Que. (Not Abbotts Corners.)

Abitibi; lake and river, south of James bay. The boundary line between Ontario and Quebec passes through the lake. (Not Abitibbi, Abittibi, nor Abittibbi.)

Abloviak; bay, east shore of Ungava bay, Ungava. (Not Ablorialik.)

Aboushagan; river, Westmorland county, N.B. (Not Abouchagan, Aboushagan, Aboushagin, nor Abougoggin.)

Abraham. See Abram.

Abram; lake, north of Minnitaki lake, Kenora district, Ont. (Not Abraham nor Abram's.)

Acheninni; lake, on Grassberry river, central Saskatchewan. (Not Blackfeet.)

Achiaa. See Sachigo.

Active: pass, between Galiano and Mayne islands, in the southern portion of the strait of Georgia, B.C. (Not Plumper's.)

Acton Corners: post office, Grenville county, Ont. (Not Acton's Corners.)

Actonvale: town, Bagot county, Que. (Not Acton Vale.)
Adam; lake, west of Fluke lake, Kenora district, Ont.

Adams; creek, branch of Bonanza creek, Klondike river, Yukon.

Adelaide: island, northeast of Grenadier island, St. Lawrence R. Leeds county, Ont. Admiral. See Saltspring.

Admiralty: group of islands, St. Lawrence R., south of Gananoque, Leeds Co., Ont.

Adstock; township and village, Beauce county, Que.

Advance; reef, off Michael point, Manitoulin island. Manitoulin district. Ont.

Affleck; lake, northwest of Rosamond lake, Kenora district, Ont.

Afton; mount, south of mount Abbott, Selkirk mountains, Kootenay district, B.C. Agawa; bay, islands, point, and river, Manitoulin district, Ont. (Not Aguawa.)

Agnes; lake, west of lake Louise, Alta. (Not The Goat's Looking Glass.)

Agotawekami; lake, southeast of Abitibi lake, Abitibi district, Que.

Aguawa. See Agawa.

A. H. Ward. See Ward.

Ahwillgate. See Awillgate.

Aiabewatik; lake, east of Anzhekumming lake. Kenora district, Ont.

Ainslie; shoal, south of Girouard point, Manitoulin island, Manitoulin district, Ont. Airy; mount, east of mount Stanley, Kootenay district, B.C.

Aishihik; lake, and river tributary to the Dezadeash, southwestern Yukon.

Akolkolex; river, tributary to Columbia river, between Revelstoke and Arrowhead, Keotenay district, B.C. (Not Akotkolex.)

Akos: lake, at head of Kamachigama R., Montcalm Co., Q. (Not Akonse nor Akoncy.)

Akotkolex. (See Akolkolex.)

Akpatok: island, Ungava bay, Ungava.

Akpatok. See Aukpatuk.

Akuinu; river, tributary to Athabaska river, Alta. (Not A-kew-i-new.)
Akuling; inlet, north shore of Hudson strait, Franklin. (Not A-ku-ling.)
Akwatuk; bay and river, south of Big river, Ungava. (Not Aquatuk.)

Albanel; lake, east of Mistassini lake, Mistassini district, Que. (Not Little Mistassini nor Mistassinis.) Mistassini lake and the lake called in recent years 'Little Mistassini' or 'Mistassinis.' were explored in 1762 by Père Charles Albanel, a Jesuit missionary, when on his way from L. St. John to Hudson bay ria Rupert river. Père Albanel gave his name to the smaller lake and it is so named on the maps of Laure 1732, Bellin 1755, D'Anville 1755 and others from 1763 to 1794. In view of this evidence and the recommendation of the advisory member of the Board representing the province of Quebec, the previous decision has been revised.

Albert; canyon, creek, glacier, peak, and snowfield, east of Illecillewaet river, Kootenay district, B.C.

Albert; port, Huron county. Ont.

Albert; town, in Albert county, N.B. (Not Hopewell Corner.)

Albert. See Anderson.

Aldborough; post office and township, Elgin county, Ont. (Not Aldboro.) Albury; post village, Ameliasburg township, Prince Edward county, Ont.

Alcott; creek, flowing northeasterly into Chitek river, central Sask. (Not Rat.)

Aldridge; lake, west of Obowanga river, Thunder Bay district, Ont.

Alemek. See Lamek.

Alexander; railway station, slough, and village, Manitoba. (Not The Big slough.) Alexandra; lake, Smellie township, Kenora district, Ont.

Alexis; creek and lake, tributary to Chilcotin river, also Alexis Creek, post office, Cariboo district, B.C.

Alford; post office and railway station, Brant county, Ont. (Not Alford Junction.)

Alford Junction. See Alford.

Algernon: rock, in St. Lawrence river, southeast from 'Stone Pillar,' below Goose island, L'Islet county, Que. (Not Roche à Veillons nor South.)

Alice: lake, northeast of Bow lake, Alta.

Alki: creek, tributary to Klondike river. Yukon.

Allan; lake, east of Wallace river, and river tributary to Saulteux R., central Alta.

Allan; point, south of Dorval, Jacques Cartier county, Que. (Not Marion.)
Allan Corners; post office, Chateauguay county, Que. (Not Allan's Corners.)

Allan Mills; post office. Lanark county, Ont. (Not Allan's Mills.)

Allanwater; river, emptying into Wabakami lake. Thunder Bay district, Ont.

Allen; island, west of Beekman peninsula, Franklin.

Allgold: creek, tributary to Klendike river, Yukon.

Alligator; lake and mountain, north of Watson river, southern Yukon.

Alma; creek, tributary to Klondike river, Yukon.

Alsek: river, formed by the junction of the Dezadeash and Kaskawulsh, Cassiar district, B.C., and Yukon. (Not Alseck nor Altsek.)

Alukpaluk; bay, southeast shore of Ungava bay, Ungava.

Alwin; rock, west of Bigsby island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

SESSIONAL PAPER No. 21a

Amazon. See Milton.

Ameliasburg; township, Prince Edward county, Ont. (Not Ameliasburgh.)

Amherst; island, in lake Ontario, Addington county, Ont. Amik: lake, south of Minnitaki lake, Kenora district, Ont.

Amiskwi: peak, at headwaters of Amiskwi R. Rocky Mts., Kootenay district, B.C. Amiskwi: river, tributary to Kicking Horse river, Kootenay district, B.C. (Not

Beavertail nor North Branch of Kicking Horse river.)

Amy: point, at north end of Gribbell island, Coast district, B.C.

Anaham. See Anahim.

Anahim; creek, tributary to Chilcotin river, also lake and Indian Reserve, Cariboo district, B.C. (Not Anaham.)

Anamebini; river, tributary to Severn river, Kecwatin. (Not Anamabine.)

Anderson; channel, east of Beekman peninsula, Franklin.

Anderson; lake, southwest of Seton lake, Lillooet district, B.C.

Anderson: mount, south of Wheaton river, southern Yukon,

Anderson: point N.E. entrance to Washow bay. L. Winnipeg, Man. (Not Albert.) Anderson. See Henderson.

Anderson Corners; post office, Huntingdon county, Que. (Not Anderson's Corners.) Anale veak. See The Vice-President.

Anesty. See Anstey.

Ange Gardien de Rouville. See Canrobert.

Ann; point, Upper Arrow lake, Kootenay district, B.C. (Not Lone Tree.)

Anne: point, opposite Massasauga point, Hastings county, Ont.

Annette; lake, north of mount Temple, Alta.

Annie; lake, north of the 'big bend' of Wheaton river, southern Yukon.

Annimwash; bay, in L. St. Joseph, and lake north of L. St. Joseph, Keewatin,

Anse-au-Vallon; village, Gaspé county, Que. (Not L'Anse-à-Valleau.)

Anstey; arm, creek, lake, and river. Shuswap lake, Yale district, B.C. (Not Anesty.)

Anstey; mount, Selkirk range, Kootenay district, B.C.

Anstruther; lake and township, Peterborough county, Ont. (Not Eagle.)

Ant. See Deacon.

Anticline; mountain, between headwaters of Nordenskiöld R. and L. Laberge, Yukon. Antler; creek, tributary to Souris river, southern Man, and Sask. (Not South Antler.)

Antonio; point, southerly extremity of Maurelle island, Coast district, B.C.

Annk; river, tributary to Stikine river. Cassiar district, B.C.

Anvil; mountain, between Cottonwood and Dease rivers, Cassiar district, B.C.

Anwatan; lake, east of Grand lake Victoria, Pontiac county, Que.

Anzhekumming; lake N.E. of Manitou L., Kenora district, Ont. (Not Upper Manitou.)

Apeganau; river, tributary to Burntwood river, Keewatin. (Not Muddy Water.)

Apika; brook, flowing into head of L. Timiskaming, Pontiac county, Que. (Not Abbika.)

Apussigamasi; lake, on Burntwood river, Keewatin. (Not Appussigamalsin.)

Aquatuk. See Akwatuk.

Arbutus: rock, south of cape Hurd, Bruce county. Ont.

Arbutus. See Saddle.

Arcand: bay, in Ottawa river, west of Montebello, Ottawa county, Que. (Not Arcans, Cardinal's nor Charlebois.)

Arcans. See Arcand.

Archibald; bay, north shore of Hudson strait. Franklin.

Arcs (lac des); lakes, south of Bow river, Rocky Mountains park, Alberta.

Ardoise. See L'Ardoise.

Argyle: creek, tributary to St. Mary river, Kootenay district, B.C.

Argyle; islands, northwest of Burke island, Bruce county, Ont.

Arignole. See Orignal.

Arkansas; creek, tributary to Dominion creek. Indian river, Yukon.

Ark-e-leenik. See Thelon.

Arkell. See Kusawa.

Arlington; lakes and mountain, west of the west fork of Kettle river. Yale, B.C.

Arm; islands, Southgate group, Queen Charlotte sound, Coast district, B.C.

Arm; river, flowing into the southern portion of Last Mountain lake, southern Sask.

Armstrong; lake, Redditt township, Kenora district, Ont.

Arnet: island, southwest of Stone island, Clayoquot sound., Vancouver I., B.C.

Aroma; lake, northeast of Tramping lake, Sask.

Arostook; river, tributary to St. John river, Victoria county, N.B. (Not Arostook.) Arosen; island, in Ottawa river, west of Montebello. Ottawa county, Que. (Not

Arouson, Rousseau nor Roussin.)

Arrow: lake and river, tributary to Pigeon river, Thunder Bay district, Ont.

Arrowsmith: mount, southeast of Alberni, Vancouver island, B.C.

Arrowwood. See Rosebud.

Arthuret: village, Victoria county, N.B. (Not Arthurette.)

Arthur Land. See Ellesmere.

Arthur Seat: mountain near Nahlin river, Cassiar district, B.C. (Not Arthur's.)

Arva. See Medway.

Ascot: post office, Sherbrooke county, Que. (Not Ascot Corner.)

Ash; brook, northeast of Nozheiatik lake, Kenora district, Out.

Ash; lake, Redditt township, Kenora district, Ont.

Ash. See Lynedoch.

Asham: point, southwest of Peonan point, lake Manitoba, Man.

Ashby; lake and township, Addington county, Ont. (Not Island lake.)

Ashe; inlet, south shore of Big island, Hudson strait, Franklin.

Ashe; lake, northeast of Blaine lake, central Sask.

Asheigamo; lake, S. of L. Hill, Kenora district, Ont. (Not Tasheigama nor Bass.)

Asheweig: river, tributary to Winisk river, S.E. Keewatin. (Not West Winisk.)

Ashton; point, Douglas channel, opposite Maitland island, Coast district, B.C.

Ashuapmuchuan; lake, and river, Lake St. John county, Que.

Asinitchibastat; lake, west of Chibougamau lake, Abitibi district, Que. (Not Asinitchastat.)

Asipimocasi. See Magusi.

Asippitti; river, tributary to Burntwood river, Keewatin.

Askitichi; łake, headwaters of Ashuapmuchuan river, Chicoutimi county, Que.

Askow. See Bow..

Askwahani. See Eskwahani.

Aspasia; island, southwest of Grenadier island, St. Lawrence R., Leeds county, Ont.

Aspatagoen. See Aspotogan.

Aspotogan; harbour, mountain, peninsula, and post office, Lunenburg county, N.S. (Not Aspatagoen.)

Aspy; bay and river, Victoria county, N.S. (Not Aspec.)

Assiniboine; mount, Alta, and Kootenay district, B.C.

Assinkepatakiso; lake, near Atikwa lake. Kenora district, Ont.

Assiwanan; lake, at headwaters of St. Maurice river, Champlain county, Que. (Not Asiwawanan.)

Astounder; island, southwest of Axeman island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Asulkan; brook, falls, glacier, pass, and ridge, Selkirk Mts., Kootenay district, B.C.

Atem. See Atim.

SESSIONAL PAPER No. 21a

Athabaska; lake, in Alta. and Sask. (Not Athabasca.)

Athabaska: river, also Athabaska Landing, post settlement, Alta. (Not Athabasea.)

Athapapuskow; lake, west of Cranberry lake, Keewatin. (Not Athapuscow.)

Athol; bay, Athol township, Prince Edward county, Ont. (Not Little Sandy.)

Atic-a-make. See Atikameg.

Atik: river, tributary to Migiskan river, below Millie lake, Abitibi district, Que. (Not Atikosipi.)

Atikameg; lake, north of The Pas, Keewatin. (Not Atic-a-make.)

Atikmahik: lake, northeast of lake Timiskaming, Pontiac county, Que.

Atikonak; lake and river, near height of land, south of Hamilton river, Ashuanipi district, Que. (Not Attikonak.)

Atikosipi. See Atik.

Atikwa; lake, southeast of Dryberry lake, Kenora district, Ont. (Not Deer.)

Barrett; rock, east of entrance to Prince Rupert harbour, Coast district, B.C.

Barrette: lake, Methuen township, Peterborough county, Ont.

Barrie; beach, at east entrance to Halifax harbour, Halifax county, N.S. (Not Stony.)

Barrie: lake. Redditt township. Kenora district, Ont.

Barrière; lake, an expansion of the upper Ottawa river, Pontiae county, Que. Barrington; lake, northwest of Kawaweogama lake, Thunder Bay district, Ont. Bartibog; P.O., river, and railway station, Gloucester county, N.B. (Not Bartibogue.) Barwell; mount, between the upper waters of Fisher creek and Sheep river, Alta. Basin; lake, northwest of Lenore lake, central Sask.

Basin of Mines. See Minas basin.

Basket; lake, south of Minnitaki lake, Kenora district, Out.

Bason. See Bouleau.

Basauia. See Pasquia.

Bass; islands (3), Admiralty group, St. Lawrence river, Leeds county, Ont. (Not Seven Pines.)

Bass. See Asheigamo.

Bass. See Cassidy.

Basswood; lake, Int. houndary, Rainy River district, Out. (Not Whitewood.)

Bastion; island, in southern portion of Atlin lake, Cassiar district, B.C.

Batchawana; bay, island, river, and village, Algoma district, Ont. (Not Bachewanaung nor Batchewana.)

Bath; ereek and glacier, near Stephen station, Alta. (Not Noores.)

Bathing. See Royal.

 $21a - 2\frac{1}{3}$

Bathurst; island, east of Melville island, Franklin.

Bathurst. See Grenadier.

Battersby; island, Brock group, St. Lawrence R., Leeds Co., Ont. (Not Burntstone.)

Battle; brook, tributary to Incomappleux river, Kootenay district, B.C.

Battle; lake, on Battle river, Alta. (Not Battle River lake.)

Battle: mountain, west of Alexis creek, Cariboo district, B.C.

Battle; river, flowing into the Saskatchewan at Battleford, Alta. and Sask.

Battleford; town, central Saskatchewan.

Baudet; river, Glengarry county, Ont., also post village and river, Soulanges county,

Que. (Not Beaudet, Bôdet, Rivière Beaudette nor River Beaudette.)

Baumgardt: island, at entrance to Landon bay, St. Lawrence river, Leeds county, Ont.

Baxter: river, emptying into Waswanipi lake, Abitibi district, Que,

Baxter Harbour; post office, King's county, N.S. (Not Baxter's Harbour.)

Bayfield; river and town, Huron county, Ont.

Bayfield; shoal, west of Abraham head, east of Kingston, Frontenae county, Ont. (Not Bolivia.)

Bayley; bay, eastern extreme of Basswood luke, Int. boundary, Rainy R. district, Ont.

Baynes. See Maxwell.

Bays; lake of, Ridout township, Muskoka district, Ont.

Bayside; post village, Sidney township, Hastings county, Ont.

Bay Verte. See Baie-Verte.

Bazan: bay, north of Cordova channel, Vancouver island, B.C.

Beacon. See Inukshuktuvuk.

Beady: ereck, near outlet of Dease lake Cassiar district, B.C.

Beament; island, southeast of Cavalier island, Bruce county, Ont.

Bear: creek, tributary to Klondike river, Yukon.

Bear: river, Annapolis and Digby counties, also Bear River post office, Digby county, N.S. (Not Hébert.)

Bear. See Great Bear.

Bear. See Lorrain.

Bear. See Mansfield.

Bear. See Morin.

Bear. See Mistaya.

Bear. See Suskwa.

Bear. See Wapawekka.

Bearbrook; post office, Russell county, Ont. (Not Bear Brook.)

Bearwood; lake, Brudenell township, Renfrew county, Ont.

Bearwood: lake, Brudenell, township, Renfrew county, Ont.

Bear-grease; river, upper Ottawa river, near O'Sullivan lake, Montealm county, Que.

Bear Lake river. See Deschambault.

Beaton; mount, on boundary line, in great bend of Tatshenshini river, Cassiar district, B.C., and Yukon.

triet, B.C., and Yukon.

Beatrice: cape, E. side of Lower Arrow L., Kootenay district, B.C. (Not cape Horn.)

Beatrice; lake, west of Sloean lake, Kootenay district, B.C.

Beatty; point, in upper portion of Prince Rupert harbour, Coast district, B.C.

Beaubien; lake, east of Silver lake, Kenora district, Ont.

Beaumont; harbour, north shore of Hudson strait, Franklin.

Beaupré; ereek ,tributary to Bow river, Alta.

Beaurivage; island, Admiralty group, St. Lawrence R., Leeds Co., Ont. (Not Buck's.)

Beaver; glacier, mountain, and river, Selkirk mountains, Kootenay district, B.C.

Beaver; lake, south of Atlin lake, Cassiar district, B.C.

SESSIONAL PAPER No. 21a

Reaver: river, tributary to Churchill river, central Alberta and Saskatchewan.

Beaver. See Beaverdell.
Beaver. See Beaverhill.
Beaver. See McFarlane.
Beaverdam. See Castor.

Beaver-dam. See Wuskwatim.

Beaverdell: creek, tributary to west fork of Kettle river, also village, Yale district, B.C. (Not Beaver creek.)

Beaverfoot; range of mountains and river, near Leanchoil sta.. Kootenay district, B.C.

Beaverhill: creek and lake, east of Edmonton, Alta. (Not Beaver.) Beaverhouse: lake, McVittie township, Nipissing district, Ont. Beaverhouse: lake, southwest of Eagle lake, Kenora district, Ont.

Beaverlodge; river, tributary to Wapiti river, west of Grande Prairie, Alta. (Not Beaver Lodge.)

Beavertail. See Amiskwi.

Becaguimec: lake and river, Carleton and York counties, N.B. (Not Beccaguimec nor Peckagomique.)

Bécancour; lake, Thetford township, Megantic county, Que.

Becher; bay, southern coast of Vancouver island, B.C. (Not Becher.)

Beck; island, west of Stone island, Clayoquot sound, Vancouver island, B.C.

Becker; creek, tributary to Wheaton river, southern Yukon.

Beckington; lake, southeast of Harris lake. Thunder Bay district, Ont. Becroft; point, at south entrance to Weller bay, Prince Edward county, Ont.

Beddingfield. See Malahat.

Bedford: harbour, north shore of Hudson strait, Franklin.

Bedlington: custom house, Int. boundary, Kootenay district, B.C. (Not Rykerts.)

Bedrock: creek, tributary to Sixtymile river, Yukon. Bee: peak, east of Taku arm, Cassiar district, B.C.

Beech: point, Fitzwilliam island, Manitoulin district, Ont.

Beecher. See Becher.

Beechridge; post village, Argenteuil county, Que. (Not Beech Ridge.)

Beechwood: village and railway station. Carleton county, N.B. (Not Bumfrau.)

Beechy: head, southern coast of Vancouver island. B.C.

Reeghados. See Pachena.

Beekman; peninsula, south of entrance to Cumberland sound, Franklin.

Begbie: mount, southwest of Revelstoke, Kootenay district, B.C.

Belabourer; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Bélanger: bay and point, near Girouard point, Manitoulin district, Ont. (Not West Belanger.)

Bélanger; post office, Laval county, Que. (Not Village Bélanger.)

Bélanger: river, flowing into L. Winnipeg. Keewatin. (Not Black nor Little Black.) Belas. See Lepreau.

Belcher: mount. Saltspring island, southeast coast of Vancouver island, B.C.

Bell: mount, sonth of Wheaton river, southern Yukon.

Bell; river, flowing from the height of land near Grand lake Victoria and emptying into Mattagami lake, Abitibi district, Que.

Bellamy; post village and railway station, Leeds county, Ont. (Not Bellamy's.)
Belle-Vallée; post office, St. Johns county, Que. (Not Belle Vallée nor Bellevalle.)
Belliveau; cove and village, Digby county, N.S. (Not Belliveau Cove nor Belli-

reaux Core.)

Belliveau: village, Westmorland county, N.B. (Not Beliveau.)

Bells Corners; post village and Ry. station, Carleton Co., Ont. (Not Bell's Corners.)

Belmina; post village, Wolfestown township, Wolfe county, Que. Bending; lake, at head of Big Turtle river, Kenora district, Ont.

Bennett; lake, B.C., and Yukon.

Bennett; mount, northwest of Stupart bay, Hudson strait, Ungava. Benson; creek, tributary to the north fork of Klondike river, Yukon,

Benson; lake, in Skead township, Nipissing district, Ont. Benson; mount, west of Nanaimo, Vancouver island, B.C.

Benson; point, South bay, Manitoulin island, Manitoulin district, Ont.

Chaloupe. See Shallop.

Chamberlain: island, north shore of Hudson strait, Franklin. (Not Crete.)

Chambly; village, Chambly county, Que. (Not Chambly Basin.)

Champagne; island and point, east of Shipman point, St. Lawrence R., Leeds Co., Ont.

Chancellor; peak, east of Leanchoil station, Kootenay district, B.C.

Chandindu: river, tributary to Yukon river, between Dawson and Cudahy, Yukon.

Channel; point, northeast side of Cockburn island, Manitoulin district, Ont.

Channel; rock, off northwest side of Fitzwilliam island, Manitoulin district, Ont.

Chantler: post office, Welland county, Ont. (Not Chantler's.)

Chantry: island, southwest of Saugeen river, Bruce county, Ont. The surrounding shoal bank is named after the island.

Chaperon; mountain, Blackwater range of the Rockies, Kootenay district, B.C.

Chapleau; lake, Tp. 14, Rgs. 10 & 11, W. 2 M. southwestern Sask.

Charlebois. See Arcand.

Charles; island, in Hudson strait, Ungava. (Not Katutek.)

Charles; point, west side of Prince Rupert harbour. Coast district, B.C.

Charlo; village, Gnysborough county, N.S. (Not Charlo Cove nor Charlo's Cove.) Charlo's Cove. See Charlo.

Charlotte; lake, Brudenell township, Renfrew county, Ont.

Charlton; bay, northeast of Leask point, Manitoulin island, Manitoulin district, Ont. Charwell; point, east of Peter lightstation, Prince Edward county, Ont. (Not Gull.)

Chase; island, Frobisher bay, Franklin.

Chase; railway station, Vancouver island, B.C. (Not Chase River Crossing.)

Chase; river, south of Nanaimo, Vancouver island, B.C.

Chase Rierr Crossing. See Chase.

Chassepot; rock, S. of Tremayne bay, southern coast of Digby I., Coast district, B.C. Chateauguay. See Lalonde.

Chaudière: falls and portage, between Namakan and Rainy lakes, international boundary, Rainy River district. Ont. (Not Kettle.)

Chaudière. See Koochiching.

Cheakamus; river, tributary to Squamish river, New Westminster district, B.C. Chebistuanonekau; river, upper waters of Waswanipi river, Abitibi district, Que.

Chegoggin; point and post village. Yarmouth county. N.S. (Not Ceogoggin nor Chagoggin.)

Chehalis; creek, flowing into Gladys bay, Cassiar district, B.C. (Not Chehalis.)
Chemainus; bay, lake, railway station, river, and village, in the southeast portion of Vancouver island, B.C. (Not Horse Shoe bay.)

Chemainus. See Kulleet.

Chematogan; channel, between Squirrel and Walpole islands, L. St. Clair, Lambton county, Ont. (Not Blind.)

Chemung; lake and post office, Peterborough Co., Ont. (Not Chemong nor Shemong.) Cheney; post village and railway sta., Russell Co., Ont. (Not Cheney Station village.) Chency Station, See Chency.

Chensagi; river, emptying into Gull lake, Abitibi district, Que. (Not Tshensagi.)

Cheops: mount, Selkirk mountains, Kootenay district, B.C.

Cherry: island, southeast of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Cherry; lake, northwest of Lost lake, Kenora district, Ont.

Cherry; point, southeast of Cowiehan harbour. Vancouver island, B.C.

Cherry. See Robert. Cherry. See St. Helena.

Cherub; mountain, Selkirk range. Kootenay district. B.C.

Cheslatta; lake, south of Français lake, Coast district, B.C. (Not Chestatta.) Cheticamp; island, river, and town, Inverness county, N.S. (Not Chetican.)

Cheverie; ereek and village, Hants county, N.S. (Not Chiverie.)

Chiblow: lake, in Montgomery and Scarfe townships, Algoma district, Ont. (Not Macoming.)

Chibougamau: lake and river, south of Mistassini lake, Abitibi district, Que. (Not Chibougamou nor Chibougamoo.)

Chichester; island, northwest of Grenadier I., St. Lawrence river, Leeds county, Ont,

Chicot: river, Two Mountains county, Que. (Not Petit Chicot.)

Chidley: cape, at entrance to Hudson strait, Ungava. (Not Chudleigh.) Chief; island, near north end of lake Timiskaming, Pontiac county, Que.

Chief Mountain. See Waterton.

Chiefs: point, Amabel township, Bruce county, Ont.

Chieftain; hill, between Watson and Wheaton rivers, southern Yukon.

Chignecto; bay, between Cumberland county, Nova Scotia, and Albert and Westmorland counties. New Brunswick. (Not Chignecto channel.)

Chikobi; lake, on N. side of Guyenne township, Abitibi district, Que. (Not Chikobee.)

Chikoida; mountain and river, Nakina river, Cassiar district, B.C.

Chilako; river, trib. to Nechako R., Cariboo district, B.C. (Not Chilaceo nor Mud.)

Chilanko; river, trib. to Chilcotin R., Cariboo and Coast districts, B.C. (Not Chilaneo.) Chilca. See Chilko.

Chilcate. See Chilko.

Chilcotin; lake, river, and village, Cariboo and Lillooet districts, B.C.

Chilko; lake and river, tributary to Chilcotin river, Cariboo, Coast, and Lillooet districts, B.C. (Not Chilco nor Chilcote.)

Chimney; ereek, flowing into Fraser R., W. of Williams lake, Cariboo district, B.C. Chimney. See Bridge.

Chimney Island (point). See Patterson.

Chimo; post, Koksoak river, Ungava. (Not Fort Chimo.)

China; butte, creek, and ridge, east of the W. fork of Kettle river, Yale district, B.C.

China; cove and reef ,near Wreck point, entrance to Georgian bay, Bruce Co., Ont. China Hat. See Klemta.

Clio; bay and point, Kitimat arm, Coast district, B.C.

Cloudyke. See Klondike.

Cloyah. See Kleiya.

Club: island, southwest of Rockport, St. Lawrence river, Leeds county, Ont.

Cluster; rocks, Oyster harbour, east coast of Vancouver island, B.C.

Clyde Corners; post office. Huntingdon county, Que. (Not Clyde's Corners.)

Coac. See Koak.

Coachman; head, east side of Mahone bay. Lunenburg county, N.S. (Not Covey.)

Coal; creek, lake, and ridge, north of Watson river. Yukon.

Coal: creek, tributary to Yukon river, below Fortymile, Yukon.

Coal. See Kirby.

Coast, island, west of Ridley island, Coast district, B.C.

Coast: range of mountains, in western part of British Columbia. (Not Cascade.)

Cobalt: lake and town, Nipissing district, Out.

Coban; river, tributary to Waswanipi R., below Otchi-k R., Abitibi, Que. (Not Cabane.)

Cobb: lake, Russell county, Ont. (Not The lake.)

Cobble Hill; post office and railway station, west of Saanich inlet. Vancouver I., B.C.

Cocagne; harbour, island, river, and town. Kent county, N.B. (Not Cocaigne.)

Cochrane: river, flowing into Deer lake, south of Island lake, Keewatin.

Cock. See South Fowl.

Cockburn; island, Manitoulin district, Ont.

Cockburn: island, Brock group, St. Lawrence river, Leeds county, Out. (Not Picnic.)

Cockmagun. See Cogmagun.

Cockmigon. See Cogmagun.

Cockscomb; mountain, near the headwaters of Jumpingpound creek, southern Alberta. Coehill; P.O. and Ry. sta., Hastings county, Ont. (Not Coe Hill ner Coe Hill Mines.)

Coffee; river, tributary to Bell river, Abitibi district, Que. (Not Brownwater.)

Coffey: post office. Huntingdon county. Que. (Not Coffey's Corners.)

Coffey's Corners. See Coffey.

Cogle; pass, at head of St. Mary river, Kootenay district, B.C.

Cogmagnn; river. Hants county, N.S. (Not Cockmagnn, nor Cockmagnn.)

Colborne. See Colburne.

Colbourne. See Colburne.

Colburne; passage between Piers island and Saanich peninsula, southeast coast of Vancouver island, B.C. (Not Colborne nor Colbourne.)

Cold: brook, tributary to Gizzard river, Abitibi district. Que.

Cold; lake, north of Beaver river, central Alberta and Sa-katchewan.

Cold. See Kissis-ing.

Coldbrook; post office and railway station, Kings county, N.S. (Not Cold Brook Station, P.O.)

Cold Brook. See Colebrooke.

Coldstream: river, flowing into lake St. Francis, Beauce and Megantic counties, Que.

Coldwater; river, emptying into east end of L. Superior, Algema district, Ont. (Not Blind.)

Coldwater. See Bow.

Cole: point, northwest point of Big island, bay of Quinte, Prince Edward county, Ont, (Not Cole's.)

Colebrooke; settlement, south of Campbellton, Restigouche county, N.B. (Not Coldbrook, nor Cold Brook.)

Coleman; cove and harbour, west of entrance to St. Margaret bay, Lunenburg county, N.S. (Not Coleman's.)

Coleman: island, Sagemace bay, lake Winnipegosis, Manitoba,

Coleraine; railway station, township, and village, Megantic county, Que. (Not Colraine nor Coleraine Station post office.)

Collie; mount, northwest of mount Balfour, Rocky mountains, Kootenay district, B.C. Collie. See Yoho.

Collier; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Collver.)

Collins; shoal. Oyster harbour, east coast of Vancouver island, B.C.

21a-33

Collinson; point. Active pass, strait of Georgia. New Westminster district, B.C.

Colmer; cape, at entrance to Crooks inlet. Hudson strait, Franklin.

Colombe. See Coleraine. Colombe. See Coulombe.

Colquhoun; island, in St. Lawrence river, below Cornwall, Glengarry county, Ont. (Not Colquhon nor Colquhouns.)

Columbia; river, Kootenay district, B.C.

Comb; islands and river, E. side of Hudson bay, Ungava. (Not Comb Hills I. and R.)

Commandant. See Papineau.

Commerall; point, south side of Raft cove, northwest coast of Vancouver island, B.C. Commerell. See, Sutil.

Commissioners; lake, Lake St. John county, Que. (Not Commissioner.)

Compass; lake, Burleigh township, Peterborough county, Ont.

Cone; hill, near mouth of Clinton creek, Yukon.

Cone; mountain, near Stikine river, north of Scud river, Cassiar district, B.C. Cone; mountain, north of Spray mountains, Rocky Mountains Park, Alta.

Cose; point, on the west side of lake Evans, Abitibi district, Que. Conn Mills; village, Cumberland county, N.S. (Not Conn's Mills.)

Connolly, mount, between Mackenzie sound and Sutlej channel, Coast district, B.C. (Not Conolly.)

Conrad; mining camp, west shore Windy arm, Tagish L., Yukon. (Not Courad City.) Conrad; mount, east of Windy arm of Tagish lake, Cassiar district, B.C., and Yukon. Conran; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Refugee.)

Consecon; lake and village, east of Weller bay, Prince Edward county, Ont.

Consolation, creek, emptying into Gladys lake, Cassiar district, B.C.

Consolation; valley, east of Moraine lake, Alta.

Conspicuous peak. See Empress mountain.

Constance; island, between Georgina and Hill islands, St. Lawrence river. Leeds county, Ont. (Not Bowes.)

Contact; brook and lake, southeast of File lake, Keewatin. Cony; creek, near mount Woden, Kootenay district, B.C.

Cook; island, northeast of Grenadier island. St. Lawrence river, Leeds county, Ont.

Cook: lake, Britton township, Kenora district, Ont.

Cook: point below Rockport, Leeds county, Out. (Not Cary nor Cook's.)

Cook; railway station. Halidmand county. Ont. (Not Cook's.)

Coolen. See Coonan.

Coonan; cove, Shag bay, Halifax county, N.S. (Not Coolen.)

Cooper; lake, an expansion of Marten river, Mistassini district, Que.

Cooper; mount, near Hutshi lakes, Yukon.

Cooper; point, south shore of Okisollo channel, Coast district, B.C.

Copean; river, tributary to Red Deer river, eastern Sask.

Copeland; mount, Gold range, northwest of Revelstoke, Kootenay district, B.C.

Copeway; lake, Lake township, Hastings county, Out.

Copper; creek, tributary to Hackett river, Cassiar district, B.C.

Copper; island in southern portion of Atlin lake, Cassiar district, B.C.

Copper. See Zymoetz.

Cognihalla; lakes, mountain, and river, Yale district, B.C. (Not Coquahalla.)

Corbay. See Corbeil.

Corbeil: point, northern entrance to Batchawana bay, Herrick township, Algoma, district, Ont. (Not Corbay.)

Corbin; pass and peak, north of Illecillewact, Kootenay district, B.C.

Cordero: channel N. of Sonora and Thurlow Is., Coast district, B.C. (Not Cardero.)

Josef Cordero was the draughtsman of Galiano's expedition in the "Sutil" and
"Mexicana," 1792. Walbran's Coast names, B.C.

Cordova: bay, southeast coast of Vancouver island, B.C. (Not Cormorant.)

Cordova. See Saanichton.

Corisande; bay, east shore of lake Huron, Bruce county, Ont

Cormorant: lake, northwest of Moose lake, Keewatin.

Cormorant. See Cordova.

Corn; island, southeast of Gananoque, St. Lawrence river, Leeds county. Ont.

Corn: lake, Redditt township, Kenora district, Ont.

Corn. See Broughton.

Cornet; ground, southwest of Greenough point. Bruce county, Ont.

Corn island shoals. See Broughton.

Cornwall; island, north of Grinnell peninsula, Franklin. (Not North Cornwall.)

Cornwallis; island, west of Devon island, Franklin.

Cornwall Park; a summer resort on east extremity of Big island, bay of Quinte, Prince Edward county, Ont.

Coronation; mountain, north of Chemainus river. Vancouver island, B.C.

Corral: ereek, tributary to Bow river, east of Laggan, Alta.

Corsair; mountain, N.E. of Blackwater range of the Rockies. Kootenay district, B.C.

Corsair; reef, west of Reid point. Bruce county, Ont Corwin; valley, north of Bennett lake, southern Yukon.

Dease; lake and river, tributary to Liard river. Cassiar district, B.C.

Deathdealer; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

DeBeaujeu (île); island, St. Lawrence river, Soulanges county, Que. (Not Grande île aux Erables.)

Debert; river and village, Colchester county, N.S. (Not DeBert.)

Debert. See Masstown.

Deception; bay, S. shore Hudson strait, Ungava. (Not Foster's Harbour nor Shedlui,)
DeCewville: post village and Ry, station, Haldimand Co., Ont. (Not Decewsville.)

Decker: lake, on telegraph trail, south of Babine lake, Coast district, B.C.

DeCourcy; group of islands, Pylades channel, southeastern coast of Vancouver island, B.C. (Not DeCourcey.)

Deep. See Canyon.

Deepwater; lake, northeast of lake Timiskaming. Pontiac county, Que.

Deer; island, 12 m. N. W. from Gull harbour, L. Winnipeg, Man. (Not Punk.)

Deer. See Atikwa. Deer. See Georgina.

Deer. See Punk.

Deer Park; mountain, post office, and landing to important mining district, east of Lower Arrow lake, Kootenay district, B.C. (Not Deer mountain.)

Defot; mount, also creek, Dease river, Cassiar district. B.C. Delany; lake, southeast of Lount lake, Kenora district. Ont.

Delap Cove; village, Annapolis county, N.S. (Not Delap's Cove.)

Delisle; river, Glengarry county, Ont. (Not Deliap's Cove.)

Deltaform; mountain. Bow range of the Rockies, Alta. and Kootenay district, B.C.

Delthore; mount, Gravel river, Mackenzie, N.W.T.

Delusion; bay, in southern portion of Digby island, Coast district, B.C.

Demaniel: creek, flowing into Sooke harbour. Vancouver island. B.C.

Demers; a peak of the Valhalla mountains, Kootenay district, B.C. (Not DeMers.)

Demoiselle; cape and creek, Albert county, N.B. (Not D'Moiselle, Cap de Moselle, nor Cape de Moiselle.)

Denise; arm, northeast arm of Morse basin, east of Kaien island, Coast district, B.C.

Denmark; lake, south of Atikwa lake, Kenora district, Ont.

Dennis; mount, also pass, south of mount Stephen, Kootenay district, B.C.

Dennis. See Denys.

Dent; mount, north of Blaeberry river, Rocky mountains, Kootenay district, B.C.

Denver: creek, tributary to St. Mary river, Kootenay district, B.C.

Denver; mount, west of Slocan lake, Kootenay district, B.C.

Denys: river, Inverness county, N.S.; also River Denys P.O., River Denys Road P.O., River Denys Station, P.O. (Not Dennis.)

Departure; bay, north of Nanaimo, Vancouver island, B.C.

DeRottenburg; island, Brock group, St. Lawrence, R., Leeds Co., Ont. (Not Bluff.)

Derry; post office, Peel county, Ont. (Not Derry West.)

Derry West. See Derry.

DeSalaberry; island, St. Lawrence river, Beauharnois county, Que. (Not Grand.) **Descanso**; bay, Gabriola island, strait of Georgia, B.C. (Not Knight not Rocky.)

Deschaillons; seigniory and post village, Lotbinière county, and island in Richelieu river, Richelieu county, Que. (Not d'Eschaillons, des Chaillons, Eschaillons, St. Jean Deschaillons, nor St. Jean-Baptiste Deschaillons.)

Deschambault; lake, and river flowing from Wapawekka lake, central Saskatchewan.
(Not Bear Lake river.)

Deschênes: post office, Ottawa county, Que. (Not Deschenes Mills.)

Deschesnes Mills. See Deschêsnes.

Deseronto: town, Tyendinaca township, Hastings county, Ont.

Desert; point, N.E. end of Great Duck island, Manitoulin district, Ont. (Not Sand.)

Deseticaux See Azatika. Despair. See Espoir.

Despatch. See Dispatch.

Desolation. See Ten Peaks.

Desolation. See Wenkehemna.

DeStein; point, west of Russell arm, Prince Rupert harbour, Coast district, B.C.

Deville; mount, northwest of Ottertail station, Rocky Mts., Kootenay district, B.C. Devils Head; mountain, in the Rocky Mountains park, Alberta. (Not Devil's Head.) Devil's Head (lake). See Minnewanka.

Devil's Pine. See Ghostpine.

Devizes; lake, west of Barrington lake, Thunder Bay district. Ont.

Devon; island, northwest of Baffin island, Franklin. (Not North Devon.)

DeWatteville; island, southeast of the Brock group, St. Lawrence river, Leeds county, Ont. (Not Guide.)

Dewdney: mount, Porcupine river, Yukon.

Dezadeash; lake, and river tributary to the Alsek, southwestern Yukon.

Dez Amecane. See Azatika.

Diamond; island, west of Jubilee island, north shore of Hudson strait, Franklin.

Diamond; lake, Herschel township, Hastings county, Ont.

Diana; bay, west of Cape Hopes Advance, Hudson strait, Ungava. Dibble; creek, tributary to Bull river, Kootenay district, B.C.

Dickey; lake, Lake township, Hastings county, Ont. (Not Dickey's.)

Dickinson Landing; post village, Stormont county, Ont. Not Dickenson's Landing nor Dickinsons's Landing.)

Dickson; hill, south of Wheaton river, southern Yukon.

Dinghy; island, between Barge and Deathdealer islands, Lake Fleet group, St. Lawrence river, Leeds county, Ont. (Not 34g.)

Dinorwic; lake and railway station, Kenora district, Out. (Not Little Waligoon.)

Dion; creek, tributary to Yukon river, near Dawson, Yukon.

Dirt. See Chip.

Dirtywater. See Houghton.

Discovery; lake, east of Minnitaki lake, Kenora district, Ont. . .

Discovery. See Plumber.

Disella; lake, south of Chismaina lake, Yukon.

Dispatch: island, in Columbia river, near south end of I'pper Arrow lake, Kootenay district, B.C. (Not Despatch.)

Division: mountain, east of Schwatka river, southern Yukon.

Dixie; mount, also lake, east of Atlin lake, Cassiar district, B.C.

Dixie. See O'Donnel.

Dixon; lake, Limerick township, Hastings county, Ont. (Not Dixon's.)

Dixon Corners: post village. Dundas county, Ont. (Not Dixon's Corners.)

Dobbs; island, N. of Gordon island, St. Lawrence R., Leeds county, Ont. (Not Hay.)

Doctor: island, S.E. of Tar island, St. Lawrence R., Leeds Co., Ont. (Not Doctor's.)

Doctor; island, south shore of Hudson strait, Ungava.

Doctor; island, between Russell island and Tobermory harbour, at entrance to Georgian bay, Bruce county, Ont.

Doctor; lake, on Churchill river, Sask.

Dodd; narrows, between Mudge and Vancouver islands, B.C.

Dodge; cove. W. of Parizeau Pt., Digby L. Prince Rupert harbour, Coast district, B.C. Dodge; island, north of Parizeau point, Prince Rupert harbour, Coast district, B.C. Dog; island, also Dog Island lightstation, opposite Scal cove, north shore of Lennox

passage, Richmond county, N.S. (Not Seal.)

Doghead; point, the northeastern point of entrance to the narrows of lake Winnipeg,
Man. (Not East Doghead.)

Dognose; creek, tributary to Klondike river, Yukon.

Dog's Head. See Whiteway.

Dogtooth; mountains, Selkirk range, Kootenay district, B.C.

Dokdaon; creek, tributary to Stikine R., near Clearwater R., Cassiar district, B.C. Dokis; island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Dollis; creek, tributary to Tatshenshini river, southwestern Yukon. Dolomite; lake, south of Reed lake, Keewatin. (Not Limestone,) Dolomite; pass, peak, and stream, Rocky mountains, Alberta.

Dombourg; islet, in St. Lawrence river, near Pointe-aux-Trembles, Portneuf county, Que. (Not Donbour nor Frechette.)

Dome; mountain, west of Cudahy, near international boundary, Yukon.

Dome: mountain, near lake Evans, Abitibi district, Que.

Dominick; lake, Rugby township, Kenora district, Ont. (Not Dominic.)

Dominion; bay and point, south shore of Manitoulin island, Manitoulin district, Ont.

Dominion; creek, tributary to Indian river, Yukon. Don; lake, west of Favel lake, Kenora district, Out.

Donald. See McDonald.

Donaldson; island, east of Sooke inlet, Vancouver island, B.C. (Not Secretary.)

Geographical Society for many years.

Finger; mountain, west of Bennett lake, Yukon.

Finlayson: arm, southern portion of Saanieh inlet. Vancouver island, B.C.

Finlayson; lake and river, near head of Pelly R., Yukon. (Not Tle-tlan-a-tsoots.) Finlayson; mount, S. of Finlayson arm, Vancouver island, B.C. (Not Leading peak.)

Fiord; bay, Separation lake, Kenora district, Ont. Fir; river, tributary to Red Deer river, eastern Sask.

Fire: valley, west of Lower Arrow lake, Kootenay district, B.C.

Fish. See Gap.

Fish. See Incomappleux.

Fish. See Murphy.

Fish. See Norbury.

Fishbasket; river, emptying into Weibikwei lake, Keewatin. Fisher: bay, northwest of Wakeham bay, Hudson strait, Ungaya.

Fisher: bay, northeast of Juner Duck island, Manitoulin district, Ont. Fisher: creek, tributary to Wild Horse river, Kootenay district, B.C.

Fisher; creek, tributary to Sheep river, southern Alberta.

Fisher: harbour, north of Big island, Hudson strait, Franklin.

Fisher: island, Brock group, St. Lawrence river, Leeds county, Out.

Fisher; lake, east of Dryberry lake, Kenora district, Ont.

Fisher: lake. Pontiac county, Que.

Fisher; mount, east of Kootenay river, Kootenay district, B.C.

Fisher: peak. southwestern Alberta.

Fisher; range of mountains, east of Kananaskis river, southern Alta. (Not Fisher's.)

Fisherman; cove, at the north end of Gill island, Coast district, B.C.

Fishing: islands, extending from Chiefs point to Pike point, Bruce county, Ont. (Not Gherheto.)

Fishing: lakes (4), on Qu'Appelle river, southeastern Sask.

Fishtail: lake, Harcourt township, Haliburton county, Ont. (Not Fish Tail.)

Fitzwilliam; channel and island, entrance to Georgian bay, Manitoulin dist., Out.

Five-finger: rapid, in Lewes river, below Nordenskiöld river, Yukon. Flat; creek, tributary to Illecillewaet river, Kootenay district, B.C.

Flat; creek, tributary to Klondike river, Yukon.

Flat: point, east entrance to Sydney harbour, Cape Breton county, N.S. (Not Low.) (To avoid confusion with Low point and Low Point post office, Inverness county.)

Flat. See Ridley.

Flatland; harbour, island, and reef, west of Pie island, Thunder Bay district, Ont.

Fleet; point. Nanaimo harbour, east coast of Vancouver island, B.C.

Fleming; island, southeast of Port Dover, Halifax county, N.S. (Not Fleming's.)

Fleming; peak, Hermit range of the Selkirks, Kootenay district, B.C.

Flemming; brook, tributary to Little R., Gloucester Co., N.B. (Not S. Br. of Little R.)

Fletcher: island, in Frobisher bay, Franklin.

Fletcher; lake, in McClintock township, Haliburton county, Ont. (Not Fletcher's.)

Flint: lake, north of Kakagi lake, Kenora district, Ont.

Float; creek, tributary to Ottertail river, Rocky mountains, Kootenay district, B.C.

Float. See Downie.

Florence: river, tributary to Klondike river, Yukon.

Flowerpot: island, east of Cove island, at entrance to Georgian bay, Bruce county, Out. (Not Flower Pot.)

Fluke: lake, west of Cliff lake, Kenora district, Ont.

Foam; lake, Tps. 31 & 32, R. 12, W. 2 M., southeastern Sask.

Foamfall; river, tributary to Ashuapmuchuan river, Chicoutimi county, Que,

Fog: lake, west of Manitou lake, Kenora district, Ont.

Folden: post office, Oxford county, Out. (Not Folden's Corners.)

21a-4

Folden's Corners. See Folden.

Follé: mountain, between Watson and Wheaton rivers, southern Yukon.

Footprint; lake and river, N. of Threepoint L., Keewatin. (Not Squirrel nor Weir.)

Fording; river, tributary to Elk river, Kootenay district, B.C.

Foreleg; bay, in Atikwa lake, Kenora district, Ont. (Not Little Jackfish.)

Forest; lake, west of Whitney lake, Kenora district, Ont.

Foresters; island, in the bay of Quinte, Prince Edward county, Ont. (Not Captain Jonn's island.)

Fork; lake, Tp. 63, R. 11, W. 4 M., eastern Alta.

Fork: river, tributary to Mossy river, south of L. Winnipegosis, Man.

Forks; lake, on Churchill R., below Stanley mission, Sask. (Not Rapid River lake.) Forsyth; island, Admiralty group, St. Lawrence R., Leeds county, Ont. (Not Quarry.)

Fort Chimo. See Chimo.

Fort Chipewyan. See Chipewyan.

Fort Dunvegan. See Dunvegan.

Fort Edmonton. See Edmonton.

Fort Frances; village and H. B. Co. post, on Rainy river, Rainy River district, Ont. (Not Fort Francis.)

Fort Fraser. See Fraser.

Fort James. See Fort St. James.

Fort Lennor. See Noix.

Fort McKay. See McKay.

Fort Macleod. See Macleod.

Fort McMurray. See McMurray

Fort Nelson; river, tributary to Liard river, Cariboo district, B.C. (Not Nelson.)

Fort St. James; H. B. Co. post, Mining Record office, and P. O., near the outlet of Stuart lake, Coast district, B.C. (Not Fort James.)

Fort St. John; H. B. Co. post, on Peace river, Cariboo district, B.C.

Fort Selkirk. See Selkirk.

Fort Severn: See Severn.

Fort Smith; H. B. Co. post, also post settlement, on Slave river, northern Alberta.

Fort Wallace; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Fort William; city, Thunder Bay district, Ont.

Fortymile; river and town, Yukon. (Not Forty Mile.)

Fossil: mountain, southwest of mount Douglas, Rocky mountains. Alta.

Foster's. See Deception.

Fosthall; creek, west side of Upper Arrow lake, Kootenay district, B.C.

Fourchu; harbour, Cape Breton county, N.S. (Not Fourché nor Fourchou.)

Four-mile. See Lakit.

Fournier; post village, Prescott county, Ont. (Not Fournierville.)

Fowl; point and portage, international boundary. Thunder Bay district, Ont.

Fox; mount, also glacier, in the Selkirks, B.C.

Fox; island, Weller bay, Ameliasburg town-hip, Prince Edward county, Ont.

Fox; island, in lake Simcoe, York county, Ont. (Not Snake.)

Fox: islands, Gordon bay, Franklin. (Not West Fox.)

Fox; land, southwest portion of Baffin island, Gordon bay, Franklin, (Not Fex, Foxe nor Luke Fex.)

Fox. See Gordon.

Foxe. See Fox.

Framboise; village, Richmond county, N.S. (Not Frambois.)

Français; lake, south of Babine L., Cariboo and Coast districts, B.C. (Not François.)

Frances: lake and river, southeastern Yukon.

Frnaces Smith; shoal, entrance to Key harb., Georgian bay, Parry Sound dist., Ont.

Francisco; point, southeast end of Quadra island, Coast district, B.C.

François. See Français.

Frank; lake, south of N. T. Ry., northeast of L. Nipigon, Thunder Bay district, Ont.

Frank Clark. See Clark.

Franklin. See Shawanaga.

Franktown; post village and railway station, Lanark county, Ont. (Not Frankstown.)

Fraser; lake, Carlow town-hip, Hastings county, Out. (Not Fraser's.)

Fraser; lake, H. B. Co. post, and telegraph station, south of Stuart lake, Cariboo dis-

trict, B.C. (Not Nalta lake, nor Fort Fraser post and station.) Fraser: point, southerly coast of Digby island, Coast district, B.C.

Fraser; reach, northeast of Princess Royal island, Coast district, B.C.

Fraser; river, central and southern British Columbia.

Fraser. See Frazer.

Frazer; creek and lake, S. of L. Nipigon, Thunder Bay district, Out. (Not Frazer.) Frazer: island, Becher bay, southern coast of Vancouver island, B.C. (Not Fraser.)

Fréchette; bay, bank, and point, near Misery bay, Manitoulin district. Ont.

Fréchette. See Dombourg.

Freda. See Freya.

Frederick; lake, Halifax county, N.S. (Not Pine Wood.) Frederick: lake, west of Kusawa lake, southwestern Yukon.

Frederick: point, E. coast of Digby L. Prince Rupert harbour, Coast district, B.C.

See Freemen.

Freemen; lake, and river tributary to Athabaska river. Alta. (Not Freeman's.)

Freestone. See Gregory.

Frenchman: bay, Ontario county, Ont. (Not Pickering harbour.)

Frenchman; lake, Tp. 64, R. 10, W. 4 M., eastern Alberta.

Frenchman; river, in southern Saskatchewan. (Not White Mud.)

Freshfield; mount, north of Blaeberry river, Rocky Mts., Kootenay district, B.C.

Fresno; creek, tributary to Yukon river, below Dawson, Yukon.

Freya; a spur of the Valhalla mountains, Kootenay district, B.C. (Not Freda.)

Friday; creek, branch of Sulphur creek. Indian river. Yukon.

Friday; lake, southwest of Lorrain town-hip, Nipissing district. Ont.

Frigate; mountain, N.E. of Blackwater range of the Rockies, Kootenay district, B.C.

Fritz; landing, on east side of Lower Arrow lake, Kootenay district, B.C.

Froatsburn; post office. Dundas county, Ont. (Not Froatburn nor Froathburn.)

Frobisher: bay, in S.E. portion of the district of Franklin. (Not Lumly inlet, &c.)

Frobisher; post office and railway station, southeastern Sask. (Not Frobyshire.)

Frog: lake, and Frog Lake Indian reserve, eastern Alberta.

Frostfish; cove, in N.E. portion St. Margaret bay, Halifax Co., N.S. (Not Frost Fish.) Froude; bay, northeast of McKim bay, Manitoulin island, Manitoulin district. Ont.

Fuller; lake, south of Chemainus, Vancouver island, B.C. (Not Howe.)

G

Gabarus; bay, cape, and P.O., Cape Breton Co., N.S. (Not Gabarus nor Gabarouse.)

Gabriel; island, Frobisher bay, Franklin, (Not Gabriell.)

Gabriel; strait, between Resolution 1, and mainland, Frank. (Not Tudjakdjudusirn.)

Gabriola; island, passage, and reefs, east of Nanaimo, B.C.

Gaetz; eove, east side of Mahone bay. Lunenburg county, N.S.

Gage. See Ninemile. Gage. See Simcoe.

Gainsborough; creek, tributary to Souris R., Manitoba and Sask. (Not North Antler.)

Gainsborough; township, Lincoln county, Ont. (Not Gainsboro.)

 $21a - 4\frac{1}{2}$

Gale. See Peter.

Galena; bay, at north end of Upper Arrow lake, Kootenay district, B.C. (Not Thumb.)

Galena; creek, tributary to Yukon river, below Indian river, Yukon.

Galiano; island, and Galiano gallery near Deseanso bay, Gabriola island, strait of Georgia, New Westminster district, B.C. (Not Malaspina's gallery.)

Galiano. See Nigei.

Galloway; rapids, between Morse and Wainwright basins, southeast of Kaien island, Coast district, B.C.

Galloway; settlement, Kent Co., N.B. (Not Galway, New Galway, nor New Galloway.)

Gallows; point, south extreme of Protection island, southeast coast Vancouver island, B.C. (Not Execution.)

Galop; canal, island, and rapids, St. Lawrence river, Dundas county, Ont. (Not Gallop, Gallops, Gallops, Galoup, nor Galloup.)

Galway. See Galloway.

Gamskagamik; lake, south of lake Hill, Kenora district, Ont. (Not Painkiller.)

Gaotanaga; lake, west of Grand lake Victoria, Pontiae county, Que.

Gap; creek, tributary to Maple creek, southwestern Saskatchewan. (Not Fish.)

Garden; island, N.E. of Du Vernet Pt., Digby L. Prince Rupert harb., Coast dist., B.C. Garden; island, north of Wolfe island, St. Lawrence river, Frontenae county, Ont.

Garden Island; lake, north of Matchimanitou lake, Abitibi district, Que,

Garden: river, tributary to the Saskatchewan, east of Birson, Sask. (Not Sucker.)

Junction; mountain, on south branch of Sheep river, southern Alberta.

Junnusuksoak; inlet, east shore of Ungava bay, Ungava. Juno; point, south of Pine Tree harbour, Bruce county, Ont.

Jupiter; river, south side of Anticosti I., Saguenay county, Que. (Not Observation.)

Jupiter. See Shallop.

\mathbf{K}

Kabagukski; lake, south of Sasakwei lake, Kenora district Ont. (Not Mud.)

Kabakwa; lake. Stanhope township, Haliburton Co., Ont. (Not Kah-bah-bah-quah.)

Kabania; lake, west of Attawapiskat lake, Keewatiu.

Kabikwabik; lake, south of Minnitaki lake, Kenora district, Ont. (Not Kabikwab nor Kapikwabikok.)

Kabistachuan: bay, in the southern portion of Mistassini lake, Mistassini district, Que. (Not Cabistachuan.)

Kabitotikwia; lake and river, draining into Kaiashk bay, L. Nipigon, Thunder Bay district, Ont. (Not Kabitotiquia.)

Kabitotiquia. See Kabitotikwia.

Kabitustigweiak. See Butler.

Kabona; lake, south of Matchimanito lake, Abitibi district. Ont.

Kagianagami; lake, north of Ogoki river, Thunder Bay district, Ont.

Kag-ish-a-bog-a-mog. See Kasshabog.

Kagiwiosa, lake, east of Dinorwic lake, Kenora district, Ont.

Kaha; creek, tributary to Keshin river, Cassiar district. B.C. (Not Kahak.)

Kah-bah-bah-quah. See Kabakwa.

Kah-mini-ti-gwa-quiack. See Bluffy.

Kah-shah-gah-wig-e-mog. See Kashagawi.

Kahtate; river, tributary to lower part of Stikine river, Cassiar district, B.C.

Kahuch. See Katonche.

Kah-wah-she-be-mah-qoq. See Kushog.

Kahwambejewayamog. See Kawagama.

Kaiashk; bay and river, W. shore of L. Nipigon, Thunder Bay dist., Ont. (Not Gull.) Kaiashkomin; lake, north of Wabigoon lake, Kenora district, Ont. (Not Bad Rice.)

Kaien; island, Prince Rupert harbour, Coast district, B.C. (Not Kai-en.)

Kaiete; point, at east entrance to Lama passage, Coast district, B.C. (Not Calete, Ki-ette, nor Kyeet.)

Kaijick Manitou. See Baptiste.

Kaikaquabick. See Reception.

Kains. See Cain.

Ka-its-siks. See Kasiks.

Kajakanikamak; lake, southeast of Abitibi lake, Pontiac county, Que.

Kajoualwang. See Najwalwank.

Kakabonga: lake and river, east of Grand lake Victoria. Pontiac county, Que (Not Kakebonka.)

Kakagi; lake, E. of Sabaskong bay, L. of the Woods, Kenora dist., Ont. (Not Crow.)

Kakashe; river, tributary to Kapitachuan river, Montealm county, Que.

Kakebonka. See Kakabonga.

 $21a - 5\frac{1}{2}$

Kaketsa; mountain, south of Egnell, Cassiar district, B.C. (Not Koketsa.)

Kakinagimak; lake, south of Churchill river and east of Pelican narrows, Sask. (Not Kakinokumak.)

Kakinnozhans; lake, near Manitou lake, Kenora district, Ont.

Kakinokumak. See Kakinagimak.

Kakinookama. See Margaret.

Ka-koot. See Kakut.

Kakuchuya: river, tributary to Dudidontu river, Cassiar district. B.C.

Kakut: lake and river, in the Birch hills, south of Dunvegan, Alta. (Not Ka-koot.)

Ka-lik-took-duag. See Crooks.

Kalzas; lake, between Macmillan and Stewart rivers, Yukon.

Kama; bay and Ry, station, Nipigon bay, Thunder Bay dist., Ont. (Not Mazokama.) Kamachigama; lake, and river tributary to the Upper Ottawa, Montealm county, Que.

Kamanatogama; lake, southeast of Boyer lake, Kenora district, Out.

Kamaniskeg; lake, Bangor township, Hastings county, Out.

Kamatsi; lake, on Churchill river, east of Reindeer river, central Saskatchewan.

Kaministikwia: river and railway station, Thunder Bay district, Out. (Not Kaministiquia.)

Kaminuassin; lake, south of Dinorwic lake, Kenora district, Ont.

Kaminnaweiskagwok. See Minnaweiskag.

Kaminni; lake, N.W. of Manitou lake, Kenora district, Out. (Not Kaminneseipekok.) Kamitsgamak; lake, on Ribbon river, upper St. Maurice river, Champlain county, Que.

Kamongus; lake, near Manitou lake, Kenora district. Ont. (Not Canoe.) Kampigukakatoka; river, tributary to Migiskan river, Abitibi district. Que. Kamshigama; lake and river, north of Shabogama lake, Abitibi district, Que.

Kananaskis; lakes and river, tributary to Bow river, post office, railway station, and range of mountains, Alta, also pass, Alta and B.C.

Kangerflung. See Newell.

Kangerthialuksoak. See George..

Kaniapiskan; river, tributary to Koksoak river, Ungava. (Not Wauguash.)

Kaniapiskau. See Keniapiskau.

Kanikawinika; lake, upper Ottawa river, east of Grand lake Victoria, Pontiae county, One. (Not Kaniquonika nor Kanequaneka.)

Kanimitti; river, flowing into Shoshokwan river a tributary of the upper Ottawa, Pontiac county, Que. (Not Kanimittikoshkwa.)

Kanish: bay. S. of Granite point, Quadra island, Coast district. B.C. (Not Calmish.)

Kanotaikau; lake, at headwaters of Rupert river, Mistassini district, Que.

Kanuchuan; river, tributary to upper Attawapiskat river, Keewatin.

Kanus; river, trib. to St. Croix R., Charlotte Co., N.B. (Not Canous nor Canouse.)

Kanusio; lake, and river tributary to Kekek river, Abitibi district, Que.

Kaopskikamak; lake and river, southeast of Manitou lake, Kenora district, Ont.

Kaoskauta; lake, N.W. of Manitou L., Kenora district, Ont. (Not Kaoskowtakok.)
Kapemitchigama; lake, at the sources of Ottawa river, Joliette county. Que. (Not

Kapemechigama.)

Kapesakosi; lake, west of Manitou lake, Kenora district. (Not Kapesakosikok.) Kapikik; lake, south of Cat lake, Keewatin. (Not Pine channel nor Wapikik lake.) Kapikitegoitch; lake, headwaters of Ashuapmuchuan river, Chicoutimi county, Que. Kapikwabikok. See Kabikwabik.

Kapiskau; river, north of Albany river, Keewatin. (Not Ka-pis-cow nor Kaypiscow.)
Kapitachuan; lake, and river tributary to the upper Ottawa river, Berthier, Joliette.

Maskinonge, Montcalm and Pontiac counties, Que. (Not Kapitashewinna nor

Kapitajewin.)

Kapitagama; lake, southeast of Abitibi lake. Pontiac county, Que.

Kapitajewan. See Kapitachuan.

Kapitashewinna. See Kapitachuan.

Kapitswe; lake, at headwaters of St. Maurice river, Champlain county, Que.

Kapkichi; lake, north of L. St. Joseph, Keewatin.

Kaposvar; creek, tributary to Qu'Appelle river, Sask. Not Little Cutarm.)

Karmutsen. See Nimpkish.

Kasagiminnis; lake, north of L. St. Joseph, Keewatin.

Kasakacheweiwak. See Uphill.

Kashagawi; lake, Stauhope Tp., Haliburton Co., Ont. (Not Kah-shah-gah-wig-e-mog.)

Kashagawigamog; lake, Dysart and Minden townships, Haliburton county, Out.

Kashaweogama: lake, southwest of Savant lake, Thunder Bay district, Ont.

Kasiks: railway sta., also river tributary to Skeena R., B.C. (Not Kasits-siks.)

Kaskawulsh; river, tributary to Alsek river, southwestern Yukon (Not O'Connor.) Kasshabog: lake, Methuen Tp., Peterborough Co., Ont. (Not Kag-i-h-a-bog-a-mog.)

Kate: point, at upper end of Lower Arrow lake, Kootenay district, B.C.

Kates Needle; mountain near Stikine R., opp. Porcupine creek, Cassiar district, D.C.

Kathawachaga; lake, south of Coronation gulf, Mackenzie. (Not Cathawhachaga.)

Katherine: lake, on Lady Evelyn river, below Grays river, Nipissing district, Ont. Katharine: lake, at headwaters of Bow river, Rocky mountains, Alta.

Katina; creek, tributary to Silver Salmon river. Cassiar district. B.C.

Kusawa; river, flowing northerly from Cassiar district, B.C., into Kusawa lake, Yukon. (Not Arkell.)

Kushog; lake, Stanhope township, Haliburton county, Out. (Not Hall's nor Kahwah-she-be-mah-gog.)

Kusiwah. See Surprise.

Kuskanax; creck, E. side of Upper Arrow L., Kootenay dist., B.C. (Not Koos-ka-nax.)

Kuskonook; P.O. and railway station, near the southern end of Kootenay lake, Kootenay district, B.C. (Not Kuskanook.)

Kutawagan; lake, Tp. 30, R. 20, W. 2 M., southern Saskatehewan.

Kuthai: lake, discharging into Silver Salmon river. Cassiar district, B.C.

Kwadacha; river, tributary to Finlay R., Cassiar, B.C. (Not Quadacha nor Quaneca.)

Kwichpak. See Yukon.

Kwinitsa: railway station, also river tributary to Skeena R., B.C. (Net Quinitsa.)

Kyak, lake, on Churchill river, east of Reindeer river, central Saskatchewan.

Kyect. See Kaiete.

\mathbf{L}

Laberge; lake, in the southern portion of Yukon. (Not Labarge nor Lebarge.)

LaBiche; lake and river, northeastern Alberta. (Not Red Deeer.)

Labrador; reef, south of Belanger point, Manitoulin island, Manitoulin district, Ont.

Labrador; reef, north of cape Chidley, Ungava.

LaChapelle; post office, Two Mountains county, Que. (Not Lachapelle.)

Lacroix; lake, southeast of L. LaBiche, central Alberta.

Lacroix; lake, in the valley of Bulkley river, Cassiar district, B.C. (Not La Croix,

Le Croix, nor Round.)

LaCroix; lake, Int. boundary, Rainy R. dist., Ont. (Not Namoukan nor Nequaquon.)

Ladder; hill and lake, southeast of Cowan lake, central Sask.

Ladue; ereek, tributary to White river, below Katrina creek. Yukon.

Lady Beatrix; lake, northeast of Mattagami lake. Abitibi district, Que. Ladybird; mountain, N. of Columbia R., Kootenay district, B.C. (Not Lady Bird.)

Lady Franklin; island, east of Clements Land, Franklin. (Not Kitigtung.)

LaFrance: creek, east side of Kootenay lake, Kootenay district, B.C. (Not Lafrance.)

Laggan; railway station, Alta.

Lagoon; head, south entrance to Hammond bay, S.E. coast of Vancouver island, B.C. Lahave: island and river, Lunenburg county, N.S. (Not La Have nor Le Havre.)

Lake; creek, tributary to Stewart river, Yukon,

Lake. See Chonat.

Lake Fleet; group of islands, E. of Admiralty group, St. Lawrence R., Leeds Co. Ont. Lakelse: lake and river, tributary to Skeena river, Coast district, B.C. (Not Lekelse.) Lake Megantic. See Megantic.

Lake of the Narrows. See Washi.

Laketon; post on Dease lake, Cassiar district, B.C.

Lakit: creek. E. of Kootenay R., N. of Steele, Kootenay dist., B.C. (Not Four-mile.)

La Lime See Lanim. La Loche. See Methye.

Lalonde: island, St. Lawrence river, Soulanges county, Que. (Not Chateauguay.) L'Amable; brook and lake, Dungannon and Faraday townships, Hastings county, Ont.

Lamb; creek, tributary to Moyie river, Kootenay district B.C. Lambert; shoal, northwest of Saugeen river, Brace county, Ont.

Lamek; bay, Shippigan island, Gloucester county, N.B. (Not Alemek, Lamec, L'amec, nor Lameque.)

Landing: lake, north of Sipiwesk lake, Keewatin,

Langara: island, off the northern extreme of Graham island, Queen Charlotte group; also point on the island, midway between Thrumb island and St. Margaret point, with lightstation thereon; name also applied to rocks off the north shore of the island; Coast district, B.C. (Not North island nor North point.)

The island was named North by Capt, George Dixon in 1757; and Laugara by Commander Jacinto of the Spanish corvette "Aranzazu", 1792, after Admiral Don Juan de Langara of the Spanish navy and the point was called North by Vancouver, 1793. Walbran's "Coast Names of B.C." name "North" objected to as not being sufficiently distinctive.

L'Ange Gardien. See Canrobert.

Langford; lake, west of Esquinnalt, Vancouver island, B.C.

Lanim; point, west of Dalhousie, Restigouche county, N.B. (Not La Lime, nor La Nim, nor Le Nim.)

L'Anse-a-Valleau. See Anse-au-Vallon.

Lansdowne, mount, west of lake Marsh, Yukon,

Lapêche; lake, Pontiac county, Que.

Lapie: river, tributary to Pelly river, below Ross river, Yukon. Laplante; post village, Gloucester county, N.B. (Not LaPlante.

Larch; river, tributary to Koksoak river, Ungava. (Not Kenggamissee.)

Lardeau; mining division. Kootenay district, B.C. (Not Lardo.)

Lardeau; river, tributary to Duncan river, Kootenay district, B.C. (Not Lardo.) Lardeau; town, on Upper Arrow lake, Kootenay district, B.C. (Not Lardo.)

Larder; lake, S. of Abitibi L., Nipissing district, Ont. (Not Present nor President.)

Lardo. See Lardeau. Lardo. See Purity.

L'Ardoise; village, Richmond county, N.S. (Not Ardoise.)

Large. See Hamilton. Large Trout. See Hector.

LaRivière; railway station and village, Lisgar electoral district, Man. (Not Larivière.)

LaRonge (lac); lake, south of Churchill river, central Saskatchewan.

Larry; rock, south of Great Duck L. and west of Kitty shoal, Manitoulin district, Ont.

LaSalette; town, Norfolk county, Out. (Not La Sallette nor Lasallette.)
Lash; island, E. of Dead I., entrance to Key harbour, Parry Sound district, Out.

Lasher; island, south of Shesheeb point, Thunder Bay district, Ont.

Laskay: post village, York county, Ont. (Not Laskey.)

Lasketti. See Lasqueti.

Last-Chance; creek, branch of Hunker creek, Klondike river, Yukon.

Lasquely. See Lasqueti.

Lasqueti; island, south of Texada island, strait of Georgia, New Westminster district,

B.C. (Not Lasquely nor Lasketti.)

Latchford: town, on Montreal river, Nipissing district, Ont.

La Tete. See Walton.

Laura; mount, near lower Stikine river, north of Iskut river, Cassiar district, B.C.

Laurie: range of mountains, west of O'Donnel river, Cassiar district, B.C.

Laurier; cove, in upper portion of Prince Rupert harbour, Coast district, B.C.

Laurier: lake, Pettypiece township, Kenora district, Ont.

Laurier; mount, east of lake Laberge, Yukon.

Laurier; river, emptying into E. end Clinton-Colden L., N.E. of Slave L., N.W.T.

Laussedat; mount, S. of Mt. Freshfield and N.E. of Donald, Kootenay district, B.C. Lavallée: lake, northwest of Crean lake, central Saskatchewan. (Not Pelican.) Lavigne; post office and railway station. Vaudreuil county, Que. (Not Graham P.O.:

Lawrence: lake, north of DeLaronde lake, central Saskatchewan. (Not Caribou.)

Lawrence: lake, south of L. Winnipegosis, Man.

Lazy: lake, east of Kootenay R., north of Steele, Kootenay district, B.C. (Not Rock,

Leading peak. See mount Finlayson.

Leaf; bay, lake, and river, south coast of Ungava bay, Ungava. (Not Nephijee river.) Leak. See Thwartway.

Leanchoil: railway station. Kootenay district, B.C.

Leary; cove and point, entrance to Blind bay, Halifax county, N.S. (Not Leary's.) Leask; bay and point, South bay, Manitoulin district, Out.

Leather: river, tributary to Carrot river, Saskatchewan. (Not Hauging Hide.)

Lebarge. See Laberge.

Leboeuf; bay. Gabriola island. S.E. coast of Vancouver L. B.C. (Not Lebeuf.)

Le Croix. See Lacroix.

Leda; peak, near "Castor" and "Pollox," east of mount Swanzy, Selkirk mountains, Kootenay district, B.C.

Lee: bank, north of Saugeon river, Bruce county, Ont.

Lee: creek, tributary to St. Mary river, southern Alberta. (Not Lee's.

Leech: river, tributary to Sooke river, Vancouver island, B.C.

Leek. See Thwartway.

Lefroy; mount, also glacier, in the Bow range of the Rockies, Alta, and B.C.

Le Have. See Lehave.

Lelu; island, northwest of Smith island, Chatham sound, Coast district, B.C. (Not Le-loo nor South Porpoise.)

Le Nim. See Lanim.

Lenore; lake, north of Humboldt, Sask.

Leon; settlement, E. side of Upper Arrow L., Kootenay, B.C. (Not Leon Hot Springs.) Leonard; island. St. Lawrence river, Soulanges county, Que. (Not Grand Batture.)

Leonard; mount, west of Surprise lake, Cassiar district, B.C.

Leopold; point, Markham bay, Hudson strait, Franklin.

Leotta: creek, tributary to Klondike river, Yukon.

Lepreau; basin, harbour, parish, point, river, and village, Charlotte county, N.B. (Not Lepreaux nor Belas basin.)

Leroux. See Hill.

Lester: lake, Maycock township, Kenera district, Ont.

L'Etang: harbour, river, and village, Charlotte county, N.B. (Not Etang nor Letang.) L'Etate. See Letite.

Letite; passage and village. Charlotte county, N.B. (Not L'Etete nor Letete.)

Lève; lake. Radeliffe township. Renfrew county. Ont.

Lewes; lake, near the "big bend" of Watson river, and river tributary to Yukon river, Yukon. (Not Lewis.)

Lewes; mount, north of lake Laberge, Yukon. (Not River mountain.)

Lewis; creek, east of Kootenay river, north of Steele. Kootenay district, B.C.

Lewis; island, between Kennedy and Porcher islands, Coast district, B.C.

Lewis; lake, northeast of Tawatinaw lake, Kenora district, Ont.

Lewis; lake, Ross river, Yukon.

Lewis. See Crease. Lewis. See Lewes.

Lewis. See Louis.

Liard: river, trib. to Mackenzie river, B.C., N.W.T., and Yukon. (Not Mountain.) Lichfield; shoal, W. entrance to Halifax harbour, Holitax Co., N.S. (Not Litchfield.) Lighthouse. See Snake.

Lillooet; district, river, and town, B.C.

Lily; bay, upper Ottawa river, northwest of Grand lake Victoria, Pontiac county, Que.

Lily; bay, also Lily Bay P.O., east shore of L. Manitoba. Man.

Lily; glacier, and pass, north of mount Swanzy, Selkirk Mts., Koctenay district, B.C.

Lily; lakes, on international boundary, Thunder Bay district, Ont.

Lima; point, S. extreme of Digby I., W. entrance to Prince Rupert harbour, B.C.

Limebank; post office, Carleton county, Ont. (Not Lime Bank.)

Limestone; lake, Mayo township, Hastings county, Ont.

Limestone: point, Nipisignit bay, Gloucester county, N.B. (Not Young's.)

Limestone. See Dolomite.

Lina; range of mountains, east of Atlin lake, Cassiar district, B.C.

Linda; lake, northeast of mount Odaray, Rocky mountains, Kootenay district, B.C.

Lindal; lake. Pettypiece township, Kenora district. Ont. (Not Lindel.)

Lindeman; lake, S. of Bennett L., Cassiar, B.C. (Not Linderman nor Lyndeman.) Lindsay; island, Admiralty group, St. Lawrence river, Leeds county, Ont. (Not Cut.)

Line; lake, southwest of Eagle lake, Kenora district, Ont. Lineham; creek, tributary to Sheep river, southern Alberta.

Link; island, near Dodd narrows, east coast of Vancouver island, B.C.

Link; lake. Strathy township, Nipissing district. Out.

Linklater; ereck, tributary to Kootenay river, near intenational boundary, Kootenay district, B.C. (Not Linkwater nor Meadow.)

Linklater; lake, east of Willard lake, Kenora district, Ont.

Linkwater. See Linklater.

Liscomb; harbour and post village, Guyshorough county, N.S. (Not Liscombe.)

Liskeard; town, Nipissing district, Ont. (Not New Liskeard.)

L'Isle. See Delisle.

Listowel: town. Perth county. Ont. (Not Listowell.)

Litchfield. See Lichfield.

Little: mount, W. of Mt. Fay, Bow range of the Rockies. Alta., and Kootenay, B.C. Little: rock, southwest of Phebe point, Fitzwilliam island, Manitoulin district, Ont.

Little. See Rough.

Little Black. See Belanger.

Little Black. See Burton.

Little Blanche; creek, branch of Quartz creek, Indian river, Yukon, Little Boshkung; lake, Minden township, Haliburton county, Ont.

Little Bow; river, tributary to Belly river, Alta. (Not Small.)

Little Candle. See Torch.

Little Cedar. See Pakhoan.

Little Charlton. See Trodely.

Little Cockburn. See Kitchener.

Little Cutarm. See Kaposvar. Little Fishing. See Peck.

Little Flatland. See Campbell.

Little Fork. See Gunamitz.

Little Fork of the Saskatchewan. See Mistava.

Little-gem; creek, branch of Hunker creek, Yukon.

Little Grant. See Pearson.

Little Green See Steevens

Little Island (lake). See Ministikwan. Little Jackfish. See Foreleg.

Littleiohn: island. Admiralty group. St. Lawrence river. Leeds county, Ont.

Little Knife: portage, between Knife and Cypress lakes, Rainy R., district, Ont.

Little Loran. See Little Lorembec.

Little Lorembec; post settlement, midway between Lorembec and Cape Breton, Cape Breton county, N.S. (Not Little Loran nor Little Lorraine.)

Little Lorraine. See Little Lorembec.

Little Madawaska; river. E. side of Algonquin National park, Nipissing district, Ont.

Little Magog. See Magog.

Little Mecattina. See Mekattina.

Little (or south) Miminigash. See Roseville. Little Mistassini. See Albanel.

Little Musquodoboit; village. Halifax county, N.S. (Not Little River Musquodoboit.)

Little Natashquan. See Natashkwan. Little Nation. See South Nation.

Little Nipisiguit. See Millstream.

Little Nottaway. See Broadback.

Little Opeongo. See Aylen. Little Pelican. See Suggi.

Little Quill. See Quill.

Little Red. See Spruce

Little River Musquodoboit. See Little Musquodoboit.

Little Roger: lake, north of lac des Quinze, Pontiac county, Que, (Not Little Rogers.) Previous decision revised.

Little Sachigo. See Oponask.

Little Salmon; river, tributary to Lewes river. Yukon.

Little Sandy. See Athol.

Little Saskatchewaen. See Dauphin.

Little Saskatchewan. See Minnedosa.

Little Shallow. See Pakwash.

Little Slocan; river, tributary to Slocan river, Kootenay district, B.C.

Little Slave. See Prince Regent.

Little Tahltan; river, tributary to Tahltan river, Cassiar district, B.C.

Little Vermilion; lake, between Loon and Sand Point lakes, international boundary, Rainy River district, Ont. (Not Vermilion.)

Little Wabigoon. See Dinorwic.

Little Weslemcoon. See Effingham.

Livingstone; range of mountains and river, southern Alberta.

Llewellyn; glacier, south of Atlin lake, Cassiar district. B.C.

Loadstone. See Lodestone.

Lobster; lake, Airy township, Nipissing district, Ont.

Lobster. See Crayfish,

Lobstick; bay, in the lake of the Woods, Kenora district, Ont. (Not Lebstick.)

Lobstick. See Chip.

Lobstick. See Kisseynew.

Lock; bay, Gabriola island, southeast coast of Vancouver island, B.C.

Locke; island, Lockeport harbour, Shelburne county, N.S. (Not Ragged nor Rugged.)

Lockeport; harbour, also town on Locke island, Shelburne county, N.S. (Not Ragged or Rugged Island harbour.)

Lockhart; river, emptying into E. end of Great Slave L., N.W.T. (Not Lockhart's.) Lodestone; lake and mountain, south of Tulameen river, Yale district, B.C. (Not

Loadstone mountain nor Paradise lake.)

Lodge; creek, southern Alberta and Saskatchewan. (Not Medicine Lodge.)
Logan; island, in northerly portion of lake Nipigen. Thunder Bay district, Ont.

Logan; mount, east of Frances lake, Yukon.

Logie: rock, west of McNab point. Bruce county, Ont.

Loks Land; at entrance to Frobisher bay, Franklin. (Not Lok's Land.)

Long. See Methy.

Long. See Mountain.

Long. See Ord.

Long. See Trident.

Long. See Tyee.

Long. See Wolfe.

Long. See Woods.

Long-legged; lake and river, emptying into Wilcox lake on English river. Keewatin. Long Point; bay and lightstation, L. Eric, Norfolk county, Ont. (Not North Foreland nor Outer Bay of Long Point.)

Long Sault; rapids, below Maniton rapids, Rainy river, Rainy River district. Ont.

Longspell; point, near Kingsport, Kings county, N.S. (Not Indian.)

Longue-Pointe; village, Hochelaga county. Que. (Not Long Point.)

Lookout: mountain, in the Selkirks, Kootenay district, B.C.

Lookout; river, emptying into Smoothrock lake, Thunder Bay district, Ont.

Loon: lake, between LaCroix and Little Vermilion lakes, international boundary, Rainy River district. Ont.

Loon. See Makwa.

Loon. See Mang.

Loonhead: lake, on Burntwood river. Keewatin. (Not Loon-head.)

Loop; brook, tributary to Illecillewaet river, near "The Loop," Kootenay district, B.C.

Lordmills: post office. Grenville county. Ont. (Not Lord Mills.)

Lorembee: head and post settlement, about 2 miles east of Louisburg, Cape Breton county, N.S. (Not Big Loran nor Big Lorraine.)

The original form of this name was Laurentbee (See page 175 of "Cape Breton and its Memorials." by Sir John Bourinot) which survives in the neighbouring "Lawrence head"; this successively became "Laurentbee"; "Lorembee"; and "Lorembee", evidently a typographical error; "Loran", probably a corruption of Laurent; and lastly "Lorraine", evidently adopted from the name of the Rhenish province under a misconception.

Loretta; island, north of Hawkesbury island, Coast district, B.C.

Lorette: parish, railway station, and village, S.E. of Winnipeg, Man. (Not Loretto.)

L'Orignal; town, Prescott county, Out. (Not L'Original.)

Lorne; lake, Rugby township, Kenora district, Ont. Lorne; lake, Pembina river, southern Manitoba.

Lorne: mount, west of lake Marsh, Yukon.

Lorrain: lake, east of Cassels township, Nipissing district, Out. (Not Bear.)

Loscombe; reef, north of Macpherson point. Bruce county, Ont. Lost; lake, northwest of Minnitaki lake, Kenora district, Ont.

Loucks; lake, Burleigh township. Peterborough county. Ont. (Not Louck's.)

Longheed; bay, point and reef, east of Dominion point, Manitoulin island, Ont.

Louis; mount, northwest of Banff, Alta.

Louis; point, south end of Coste island, Kitimat arm, Coast district, B.C. Louis; port, Graham island, Coast district, B.C. (Not Ingraham nor Lewis.)

Louisa: lake, Lawrence township, Haliburton county, Ont. Louise: lake, west of Laggan station, Alta. (Not Emerald.)

Louise: lake, Pembina river, also railway station, southern Manitoba.

Lount: lake, English river, Kenora district, Ont.

Loutre: Harbour de, harbour, W. side of Campobello I., N.B. (Not Harbour de Lute.)

Low: lake, southeast of Silver lake, Kenora district, Ont.

Low: point, and Low Point post office, east side of George bay, Inverness county, N.S.

Low. See Clark. Low. See Flat

Lower Arrow: lake, an expansion of Columbia river, Kostenay district, B.C.

Lower Bow. See Hector.

Lower Clearwater. See Washagomish.

Lower Savage; islands. Gabriel strait, Franklin.

Lower White Fish. See Gregg.

Lowes; lake, southwest of Yorkton, Sask. (Not Long, Pebble, nor Silver.)

Lubbock; bay, west of Markham bay, Hudson strait, Franklin,

Lubbock: river, flowing into Atlin lake from Little Atlin lake, Yukon.

Lucas; channel, island, and reef, at entrance to Georgian bay. Manitoulin district, Ont

Lucky: creek, branch of Allgold creek, Klondike river, Yukon, Luke: creek, tributary to St. Mary river, Kootenay district, B.C.

Luke Fox. See Fox.

Lumley. See Frobisher.

Lusk: creek, tributary to Kananaskis river, Alta.

Lussier; river, tributary to Kootenay river, Kootenay district, B.C

Lutz. post settlement. Westmorland county. N.B. (Not Lutes nor Lutes Mountain.)

Lyal; island and reef, southeast of Greenough point, Bruce county, Ont.

Lynch: island, in the Ste. Genevieve group, east of Ste. Anne-de-Bellevue, Jacques Cartier county, Que. (Not Dowker's nor Lynch's.)

Lyndeman. See Lindeman.

Lynedoch: island, west of Hill island, St. Lawrence river, Leeds county, Ont. (Not Ash nor Lyndoch.)

Lynn; point, Manitoulin L. N.W. of Greene L. Manitoulin dist., Ont. (Not Black.) Lunx. See Selby.

Lyster: lake, Barnston township, Stanstead county, Que. (Not Baldwin's pond nor Barnston pond.)

\mathbf{M}

Mabee: village, Norfolk county, Ont. (Not Maybee.)

Macabee; creek, tributary to Sheep river, also mountain, southern Alberta.

McAdam: Rv. sta. and village, York Co., N.B. (Not Macadam nor McAdam Junction.) McAlpine: P.O. and Ry. station, Prescott Co., Ont. (Not McAlpine's nor McAlpin.) Macan. See Macan.

McArthur; creek, lake, and pass, west of Columbia river; also mountain, at head of upper Yoho valley, Rocky mountains, Kootenay district, B.C.

Macaulay; lake. Airy township, Nipissing district, Ont.

Macaulay; spit, off the southeastern end of Inner Duck island, Manitoulin district, Ont. (Not McCauley's,)

McBean; mount, west of Mt. Purity. Selkirk mountains, Kootenay district, B.C.

McCallum: island, southeast of Beament island, Bruce county, Ont. (Not Snake.)

McCallum; mountains east of Atlin lake, Cassiar district, B.C.

Maccan; railway station, river, and village, Cumberland county, N.S. (Not Macan.)
McCarthy; point, southeast side of Fitzwilliam island, Manitoulin district, Ont.

M'Clintock; peak and river, between lake Marsh and Teslin river, Yukon, (Not McClintock.)

McConnell; peak and river. Nisutlin river. Yukon.

Macoostiyan. See Makustigan.

McCormick; creek and landing, near foot of Lower Arrow lake, Kootenay district, B.C. (Not McCormack.)

McCoy; head, east of Thompson cove. St. John county, N.B. (Not McCoy's.)

McCoy; island, Brock group, St. Lawrence R., Leeds Co., Ont. (Not Montgomery.) McCreary; island, N. of Turnagain point, L. Winnipeg, Man. (Not Outer Sturgeon.)

McDame; creek, tributary to Dease river, Cassiar district, B.C.

McDonald; bay and point, west of Brockville, Leeds county, Ont. (Not Donald, Macdonald, nor McDonald's.)

McDonald; creek, flowing into Upper Arrow lake, Kootenay district, B.C.

McDonald: island, Admiralty group, St. Lawrence R., Leeds county, Ont. (Not Hog.)

McDonald; lake, east of Atlin lake, Cassiar district, B.C. McDonald; lake, Haycock township, Kenora district, Ont.

McDonald; mount, west of Esquimalt, Vancouver island, B.C.

Macdonald: island, N.W. of the islands of God's Mereie, Hudson strait. (Not Egypt.) Macdonald: lake, Havelock township, Haliburton county, Ont. (Not Macdonald's.)

Macdonald; mount, in the Selkirks, Kootenay district, B.C. (Not Carroll.)

McDonald's. See Prince Regent.

McDougal; brook, trib. to Incomappleux R., Kootenay dist., B.C. (Not McDougall.)

McDougall; mount, east of Kananaskis river, Rocky Mountains park, Alta.

Macdougall; settlement. Kent county, N.B. (Not Macdougal nor Macdougall's.)

Macdougall's. See Marion.

Mace; bay. Charlotte county. N.B. (Not Mace's.)

McElhinney; shoal, N. of Flowerpot I., Georgian bay, Ont. (Not McElhinney's.)

McEwen; lake, east of Kawaweogama lake. Thunder Bay district, Ont.

McFadden; lake, McClintock township, Haliburton county, Ont. (Not McFadden's.) McFarlane; river, emptying into the S. side of Athabaska lake, Sask. (Not Beaver.) McGaw; point, entrance to S. Baymouth, Manitoulin island, Manitoulin district, Ont.

McGillivray; creek, flowing southeasterly into Anderson lake, also mountain and pass at the head of the creek, Lillooet district, B.C. (Not McGillyray.)

McGillivray; post office, Middlesex county, Ont. (Not West McGillivray.)

McGillvary. See McGillivray.

McGrath; mount, near lower Stikine R., north of Iskut R., Cassiar district, B.C.

MacGregor; point, west of Port Elgin, Bruce county, Ont.

McGregor; settlement, east shore of Kootenay lake, south of Lockhart creek, Kootenay district, B.C. (Not McGregor's.)

Macha. See Hatchau.

Machawaian: lake, southwest of Attawapiskat lake, Keewatin.

McHugh; brook, flowing into Dinorwic L., Kenora dist., Ont. (Not McHugh's creek.)

McInnes; post office, Middlesex county, Ont. (Not McInness.)

McInness. See McInnes.

McIntosh: mount, east of Atlin lake, Cassiar district, B.C.

McIntosh: post village, Leeds county, Ont. (Not MacIntosh Mills.) McIntyre; bay, south shore of L. Nipigon, Thunder Bay district, Ont.

Mackay; lake, Gloucester township, Carleton county, Ont. (Not Hemlock.)

McKay; H. B. Co. post, also settlement on Athabaska R., Alta. (Not Fort McKay.)

McKay; lake, south of Nanaimo river, Vancouver island, B.C.

McKay; mount, S.W. of Fort William, Thunder Bay district, Ont. (Not McKay)

McKay; reach, between Princess Royal and Gribbell islands, Coast district, B.C.

McKay; rock. S.W. from Pulpwood point, Cockburn I., Manitoulin district. Ont.

McKee; creek, north of O'Donnel river, Cassiar district, B.C.

McKellar; channel (middle) of Kaministikwia river. Thunder Bay district. Out. (Not McKellar river.)

McKellar; island, south of Pie island, Thunder Bay district, Ont.

McKellar; point, southwest of Victoria island, Thunder Bay district, Ont.

McKenzie; lake, Nightingale township, Haliburton county, Ont. (Not McKenzie's.

Mackenzie: lake, S. of N. T. Ry., N.W. of L. Nipigon, Thunder Bay district, Ont.

Mackenzie: mount, southeast of Revelstoke, Kootenay district, B.C. (Not McKenzie.) McKim; bay, west shore South bay, Manitoulin island, Out. (Not McKimm.)

McLaren. See McLaurin.

McLaughlin. See McLoughlin.

McLaurin; bay, east of East Templeton, Ottawa county, Que. (Not MacLaren.)

McLaurin; lake, northwest of lake Nipigon, Thunder Bay district, Ont.

McLay; mount, east of Surprise lake, Cassiar district, B.C.

McLean; canyon, below the Grand falls of Hamilton river, Ashuanipi district, Que. and Ungava. (Not Bowdoin.) Named after John McLean, an officer of the H. B. Co. who discovered the falls and canyon in 1839.

McLean, See McLelan.

McLelan; rock, in Fitzwilliam channel, Manitoulin district, Ont.

McLelan: strait, northeast shore Ungava bay, Ungava. (Not McLean.)

McLennan: lake, Haycock township, Kenora district, Ont.

Macleod: lake, Tp 51, R. 16, W. 3 M., Saskatchewan.

Macleod: town and railway station, southern Alberta. (Not Fort Macleod.)

McLeod; mount, west of Dease lake, Cassiar district, B.C.

McLoughlin; bay, Lama passage, Coast district; also point in Victoria harbour; B.C. (Not M'Laughlin, Maclaughlin, nor McLaughlin.)

McMahon; island, off the southeast side of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Shantee nor Shanty.)

McMaster; lake, Jones township, Renfrew county, Ont. (Not McMaster's.)

McMaster; mount, east of O'Donnel river. Cassiar district. B.C.

Macmillan; range of mountains, and river tributary to Pelly river. Yukon.

21a - 6

MacMillan; railway station, Kenora district, Ont.

McMullen. See Carnaryon.

McMurray: II. B. Co. post, also settlement on Λthabaska river, northeastern Alberta. (Not Fort McMurray.)

McNab: point, south of Chantry island, Bruce county, Ont.

McNair: island, St. Lawrence river, below Brockville, Leeds county, Ont. McNeil: mount, between Watson and Wheaton rivers, southern Yukon.

McNevin; lake, Murchison township. Nipissing district. Ont. (Not McNevin's.) McNicoll; mount, southeast of Sixmile Creek station, Kootenay district. B.C.

McNutt; island, Shelburne harbour, Shelburne county, N.S. (Not McNutt's.)

Macoming. See Chiblow.

McPherson; lake, north of Frances lake, Yukon.

Macpherseon: mount, southwest of Revelstoke. Kootenay district, B.C.

Macpherson: point, northeast of Douglas point, Bruce Co., Ont. (Not McPherson.)
Macoun; mount, northwest of mount Fox, Selkirk mountains, Kootenay district, B.C.

Marquereau. See Maquereau.

McQuesten: river, tributary to Stewart river, Yukon. (Not McQuestion.)

McRae: point, south of Douglas point, Bruce county, Ont.

McReynolds; post office, Grenville county, Ont. (Not McReynold's Corners.)

McReynold's Corners. See McReynolds.

Mad; reef. between Greenough point and Lyal island, Bruce county, Ont.

Madawaska; post office. Nipissing district. Ont.

Madawaska: river, tributary to Ottawa river, Renfrew county, Ont.

Madendanada. See Tendinenda.

Madurnakeag. See Meduxnekeag.

Maganasibi; river, tributary to Ottawa river, Pontiac county, Que. (Not Maganacipi nor Maganasipi.)

Maganatawan; post office and river, Parry Sound district, Ont. (Not Magnetawan nor Maganetawan.)

Maggie; lake. Finlayson township, Nipissing district, Ont. (Not Maggie's.)

Magnet: channel, island, and point, S.E. entrance Black B., Thunder Bay dist., Ont.

Magnetawan. See Maganatawan.

Magnetic; island and reef, southeastern side of Cockburn I., Manitoulin district, Ont. Magnetic; lake, W. of Gunflint L., international boundary, Thunder Bay district, Ont. Magog; lake and river, tributary to St. Francis river, Sherbrooke and Stanstead counties, Que. (Not Little Magog lake.)

Magog: lake, in Mack township, Algema district, Ont.

Maguacha. See Maguasha.

Maguasha: point and post office, Nouvelle township, Bonaventure county, Que. (Not Goacha, Maguascha, Migaocha, nor Miguasha.)

Maguire: mount, east of Sooke inlet, Vancouver island, B.C. (Not McGuire.)

Magusi: river. flowing northeasterly into Agotawekami lake, Abitibi district. Que., and Nipissing district, Ont. (Not Asipimocasi nor Isabemagussi.)

Mahogany. See Manawagonish.

Maiden; island, south shore Hudson strait, Ungava, (Not Maiden Paps.)

Maiden; island, east of Michael point, Manitoulin island, Manitoulin district, Ont.

Maikaskagi; river, north of Waswanipi river. Abitibi district, Que.

Main: channel, between Cove island and "Bad Neighbour" rock, entrance to Georgian bay, Bruce county, Ont.

Mainadieu; bay, lightstation, passage, and village, Cape Breton county, N.S. (Not Main à Dieu, Main-à-dieu nor Menadou.)

Maitland: island, Douglas channel, north of Hawkesbury island, Coast district, B.C.

Maitland: river, emptying into lake Huron at Goderich, Huron county, Ont.

Maitland. See Port Maitland.

Makamik; lake, Royal Rouissillon township. Abitibi district. Quee. (Not Mekamic.)

Makokibatan; lake, Albany river, Keewatin, and Thunder Bay district. Ont.

Makustigan; lake, S. of Wetetnagami L., Abitibi district, Que. (Not Macoostigan.) Makwa; lake and river, trib. to Beaver R., from the southwest, Sask. (Not Loon.) Malahat; ridge, west of Saanich inlet, Vancouver island, B.C. (Not Beddingfield.)

Malaspina's. See Galiano.

Malbaie: See also Murray Bay.

Malcolm; reef, between Boyer reef and Port Elgin, Bruce county, Ont.

Mâle (lac du); lake, at headwaters of St. Maurice river, Champlain county, Que.

Mallon; lake, in Rattray township, Nipissing district, Ont. Maloney; mount, northwest of Aishihik lake, Yukon.

Malpeque: bay, Prince county, P. E. I. (Not Richmond.)

Mamakwash; lake, at headwaters of Berens river, Keewatin. (Not Fairy.)

Mameigwess; lake, north of Attawapiskat lake. Keewatin.

Manasan; river, tributary to Burntwood river, Keewatin. (Not Munosahn.)

Manawagonish; island, in St. John harbour, St. John county, N.B. (Not Mahogany, Manawaganish, nor Meagenes.)

Manawan; lake, on Churchill river, below Reindeer river, central Sask.

Mandamin; post village and railway station, Lambton Co., Ont. (Not Mandaumin.)

Mang: lake, west of Kawawia lake, Kenora district, Ont. (Not Loon.)

Manganese; mountain, east of Ice river, Rocky mountains, Kootenay district, B.C.

Manicouagan. See Manikuagan.

Manicuagan. See Manikuagan.

Manigotagan; lake and river, east of lake Winnipeg, Man. (Not Bad Throat river, Muskrat lake, nor Rat Portage lake.)

Manikuagan; point and river, Saguenay Co., Q. (Not Manicouagan nor Manicuagan.)
Manito; lake, south of Battle river, Sask.

Manitoba: large lake of Manitoba.

Manitotha; ledge, off W. side of Yeo L. cutrance to Georgian bay. Manitoulin dis., Ont.

Manitoba; reef. north of Great Duck island, Manitoulin district, Ont.

Manitou; creek, flowing into Michael bay, Manitoulin island, Manitoulin district, Ont.

Manitou; lake, northwest of L. Npigon, Thunder Bay district, Ont.

Manitou; rapid, Rainy river, international boundary, Rainy River district, Ont. Manitou. See Silver.

Manitoulin; island, Manitoulin district, Ont. (Not Grand Manitoulin.)

Manitoulin gulf. See South bay.

Manitounuk; sound, north of Great Whale river, Ungava. (Not Manitounuck.)

Manitowaning; bay and village. Manitoulin district, Ont. (Not Manitouaning.)

Manitumeig; lake, west of Manitou lake, Kenora district, Ont.

Manitush; lake, southwest of Attawapiskat lake, Keewatin.

Mann; island, in upper part of lake Timiskaming, Pontiac county, Que.

Mann; island, east of Bigsby island, at entrance to Key harbour, Georgian bay, Parry Sound district. Ont.

Manomin; lake, west of Winnange lake. Kenora district. Ont. (Not Unaminnikan.)

Manquart. See Monquart.

Mansel; island, Hudson bay. (Not Mansfield.)

Mansfield. See Mansel.

Mansfield; creek, tributary to Tatshenshini river, Cassiar district, B.C. (Not Bear.)

Manuan; lake, and river tributary to the upper St. Maurice, Champlain county, Que. (Not Manouan.)

Manuminan. See Paint.

Maple; bay and mountain, W. Sansum narrows. Stuart channel, Vancouver I., B.C.

Maple; island, St. Lawrence R, Soulanges county, Que. (Not D'Alogmy nor Thorn.)

 $21a - -6\frac{1}{2}$

Maple; point, at the northeast end of Gil island, Coast district, B.C.

Maple. See Goosehunting.

Maplegrove; post office, Middlesex county, Ont. (Not Maple Grove.)

Maquereau; point, Gaspé county, Que. (Not Macquereau.)

Mara; lake, east of Salmon arm of Shuswap lake, Yale district, B.C. (Not Mara arm of Shuswap lake.)

Marble; canyon, a very narrow deep pass through the range of mountains between Bonaparte and Fraser rivers, Lillooet district, B.C.

Marble Dome; mountain, S. of Gladys lake, Cassiar dist., B.C. (Not Brown Dome.)

Margaree; town, Inverness county, N.S. (Not Margaree Harbour.)

Margaret; lake, northeast of Turquoise lake, Alta.

Margaret; lake, at headwaters of Wenasaga river, Keewatin. (Not Kakinookama.)

Marguerite; bay, point, and river, north shore of lower St. Lawrence, Saguenay county,

Que. (Not Ste. Marguerite.) To avoid duplication, see Ste. Marguerite river,

Chicoutimi county.

Maria; lake, northwest of Tuya lake, Cassiar district, B.C. Maria; lake, Purdom township, Thunder Bay district, Ont. Marieville; railway station and village, Rouville county, Que.

Marieville creek. Se Huron river.

Marina; island, S.W. of Cortes I., Sutil channel, Coast district, B.C. (Not Mary.)

Marion; lake, west of Glacier station, Kootenay district, B.C.

Marion; point, near Dorval, Jacques Cartier county, Que. (Not Macdougall's.)

Marion. See Allan.

Marjorie; island, westward of Sandys point, St. Peters inlet, Richmond county, N.S. (Not Gooseberry.)

Mark; creek, tributary to St. Mary river, Kootenay district, B.C.

Mark; lake, northeast of Silver lake, Kenora district, Out.

Markham; bay, northeast shore of Hudson strait, Franklin.

Marmot; mountain, north of Observation peak, Rocky mountains, Alta.

Marpole; mount, also lakes, at headwaters of Yoho river, Kootenay district, B.C. Marsh; lake, in the southern portion of Yukon, near Bennett and Tagish lakes.

Marshall Cove. See Port Lorne.

Marshall; lake, northeast of L. Nipigon, Thunder Bay district, Ont. Mars Hill; post settlement, Carleton county, N.B. (Not Mar's Hill.)

Martel; post office, Russell county, Ont. (Not Martel Corners.)

Martel Corners. See Martel.

Marten; river, tributary to Rupert river, Mistassini district, Que.

Marten Drinking; river, emptying into Attawapiskat lake, Keewatin.

Martimoki; lake, Saguenay county, Que. (Not Martimokinipau.)

Martin; lake, northeast of North lake, Kenora district. Ont.

Martin; lake, southeast of Humboldt bay, L. Nipigon, Thunder Bay district, Ont. Martin. See Martre.

Martineau; bay, Lorrain township, Nipissing district, Ont.

Martineau; river, flowing southwesterly into Cold lake, central Alberta.

Martini; island, west of Moore point, southern coast of Digby L. Coast district, B.C. Martins; valley, east of Chancellor peak, Rocky mountains, Kootenay district, B.C.

Martre (rivière à la); river, Christie township, Gaspé county, Que. (Not Martin river nor Rivière à la Marte.)

Mary; ereek, tributary to Teslin river, near M'Clintock peak, Yukon.

Mary; point, Boxer reach, Coast district, B.C.

Mary; shoal, south of Great Duck island, Manitoulin district. Ont.

Mary. See Marina.

Mascabin; point, N. entrance Passamaquoddy B., Charlotte Co., N.B. (Not Mascarin.)

Mascareen; peninsula and village. Charlotte county, N.B. (Not Mascarene nor Masearren.)

Mascarin. See Mascabin.

Mashamengoose. See Mitchinamekus.

Masinabik; lake. S.E. of L. Nipigon. Thunder Bay dist., Ont. (Not Masinabikaigan.)

Maskwa; hill, on Battle river, west of Cutknife creek, central Saskatchewan.

Massasauga: point, west of Horse point, Ameliasburg Tp., Prince Edward Co., Ont. Masstown; lightstation, fishing and post settlement. Cobequid bay, Colchester county, N.S. (Not Debert nor Mass Town.)

Matabechawan. See Matabitchuan.

Matabitchuan; river, flowing into L. Timiskaming below the mouth of Montreal R., Nipissing district, Ont. (Not Matabechawan nor Matabitehouan.)

Matapedia; lake, river and village. Matane and Bonaventure Cos., Q. (Not Metapedia.)

Matashi: river. headwaters of Gatineau river. Berthier county. Que.

Matawa. See Shamattawa.

Matchimanito; lake, southwest of lake Millie, Abitibi district, Que.

Matheson: island, W. of N. entrance to narrows of lake Winnipeg, Man. (Not Snake.)

Matheson; mount, also lake, north of Becher bay, Vancouver island, B.C.

Matheson: mount, on east side of Bennett lake, Yukon. Matilda: lake, Redditt township, Kenora district, Ont.

Matsatu: river. tributary to Nahlin river. Cassiar district, B.C.

Mattagami: lake, and river tributary to Nottaway river, Abitibi district, Que.

Matinatinda. See Tendinenda.

Mattawa: lake, at headwaters of St. Maurice river. Champlain county. Que.

Mattawagosik; lake, south of Abitibi lake, Abitibi district, Que. (Not Island, Mattawagosig, nor Obadowagashing.)

Matthew; creek, tributary to St. Mary river, Kootenay district. B.C.

Matthews: point, Active pass, strait of Georgia. New Westminster district, B.C.

Mattice: lake, south of N.T. Ry., northwest of L. Nipigon, Thunder Bay district. Out.

Manger; beach, at entrance to Halifax harbour, Halifax county, N.S. (Not Meagher.)

Maunoir: butte, near confluence of Lewes and Teslin rivers. Yukon.

Maurelle: island, between "Hole in the wall" and Surge narrows, Coast district, B.C.

The eastern portion of what was formerly Valdes island.

Maus: creek, E. of Kootenay R., south of Steele, Kootenay district, B.C. (Not Mouse.) Maxwell: mount, Saltspring island, S.E. coast of Vancouver I., B.C. (Not Baynes.)

Maybank; post office, Huntingdon county, Que. (Not May Bank.)

Maybee. See Mabee.

Mayes; point, at N. end of Read I., Sutil channel, Coast district, B.C. (Not Mayor.)

Mayflower; island, at entrance to Thomas bay, Manitoulin island, Ont. Maynard; lake, English river, Kenora district. Ont. (Not Maynard's.)

Mayne: island and post village, in the southern portion of the strait of Georgia, New Westminster district. B.C.

Mavo; brook and lake, tributary to Stewart river, Yukon.

Mayor. See Mayes.

Mazokama. See Kama.

Meacham; creek, tributary to St. Mary river. Kootenay district. B.C. Not Caribou nor Whitefish.)

Meadow; creek, branch of Sulphur creeek. Indian river, Yukon.

Meadow: creek and lake, tributary to Beaver river, central Saskatchewan.

Meadow. See Linklater. Meadow. See Ripple. Meagher. See Mauger.

Meander; brook, south of Eagle lake, Kenor, Fistrict, Ont.

Mecatina. See Mekattina.

Medicine: river, tributary to Red Decer river, southern Alta.

Medicine-lodge; hills, in Tp. 40, R. 2, W. 3 M., southern Alta. (Not Medicine Lodge.)

Medecine Lodge. See Lodge.

Medicine-stone; lake, south of Roll lake, Keewatin. (Not Medicine Stone.)

Meduxnekeag; river, tributary to St. John river, Carleton county, N.B. (Not Mad-

uxnakeag nor Meduxnakeag.)

Medway; river, trib, to N, branch of Thames R., Middlesex Co., Out. (Not Arva creek.) Medway; scaport town, Queens county, N.S. (Not Port Medway nor Port Metway.)

Meehin; brook, flowing into Minas channel, Kings county, N.S. (Not Meehins.)

Meeting: lake, in the Thickwood hills, central Saskatchewan.

Megantic; county, lake, and village. Que. (Not Lake Megantic village.)

Meggisi; brook, tributary to upper Winisk river, below Tabasokwia river, Keewatin.

Meggisi; lake, southwest of Auzhekumming L., Kenora dist., Ont. (Not Small Trout.)

Megiskun. See Migiskan.

Meholland. See Mulholland. Meholland. See Mulholland.

Meig: post office. Missisquoi county. Que. (Not Meig's Corners.)

Meig's Corners. See Meig.

Meisner; point, E. side Mahone bay, Lunenburg Co., N.S. (Not Meisener nor Misener.)

Mejomanguse. See Mitchinamekus.

Mekamic. See Makamik.

Mekattina; cape, islands, and river. Saguenay county. Que. (Not Mecatina, nor Little Mecattina river.)

Mekinak; lake, river, and town-hip, Champlain county, Que. (Not Mekinac.)

Mekiscan. See Megiskan.

Middleport. See Tuscarora.

Middle Savage; islands, northwest of Pritzler harbour, Hudson strait, Franklin. (Not islands of God's Mercie (eastern).

Middleton; island, at the mouth of Broadback river, Abitibi district, Que.

Middleton: mount, southeast of lake Evans, Abitibi district, Que.

Midjik; point, on east side of Passamaquoddy bay, Charlotte county, N.B. (Not Midgie, Midjie, nor Mijic bluff.)

Midnight; lake, Tp. 52, R. 16, W. 3 M., Sask.

Migiskan; river, flowing westerly from the height of land near sources of St. Maurice river into Shabogama lake, Abitibi district, Que. (Not Megiskun, Mekiscan, Metchiskan, nor Metiscan,)

Migoacha. See Maguasha.

Miguasha. See Maguasha.

Mijic. See Midjik.

Mikwasach; lake, west of Opemiska lake, Abitibi district. Que. (Not Wikwasash.)

Mildram, See Meldrum.

Mildrum. See Meldrum.

Mile; island, Brock group, St. Lawrence R. Leeds county, Ont. (Not Huckleberry.)
Mile, See Victoria.

Miles; eanyon, on Lewes river, above Whitehorse rapid, Ynkon.

Miles: point, Gabriola island, strait of Georgia, B.C. (Not Schooner.)

Millar; post office, Grenville county, Ont. (Not Millar's Corners.)

Millar's. See Riall.

Millar's Corners. See Millar.

Miller; creek, tributary to Sixtymile river, Yukon.

Miller; lake, southwest of Williams bay, L. Seul, Kenora district, Ont.

Miller; mount, west of Lewes river, Yukon.

Miller; point, western entrance point of Robinson cove, Big island, bay of Quinte, Prince Edward county, Ont. (Not Miller's.)

Miller; point, southeast coast of Digly island. Coast district, B.C.

Mille-Roches; post village, Stormont county, Ont.

Mille-Vaches; bay, point, and river, Sagnenay Co., Que. (Not Saut de Mouton river.)

Millie; lake, northeast of Matchimanito lake. Abitibi district, Que.

Millstream; river, flowing easterly into Nipisguit bay, Gloucester county, N.B. (Not Little Nipisiguit nor Nipisiguit Millstream.)

Milton: bank, southeast of Wells shoal, Bruce county, Ont.

Milton; island, N. of Wolfe I., St. Lawrence R., Frontenac Co., Ont. (Not Amazon.)

Milton; mount, east of Lewes river, Yukon.

Milton; point, between Lonely and Lougheed bays, Manitoulin island, Ont.

Milton; post office, Shefford county, Que. (Not Milton East.)

Milton; town and railway station, Halton county, Ont. (Not Milton West,)

Miltonbrae; post office, Gloucester county, N.B. (Not Milton Brae.)

Milton East. See Milton. Milton West. See Milton.

Miminegash; river and village, Prince county, Prince Edward Island. (Not Big or North Miminigash, nor Minimegash.)

Miminiska; lake, Albany river, Thunder Bay district, Ont. and Keewatin.

Mimiminatik; brook, emptying into Kapkichi lake, upper Winisk river, Keewatin.

Minago; river, emptying into Cross lake, Keewatin. (Not Pine.)

Minas: basin, east arm of the bay of Fundy, Colchester, Cumberland, Hants, and Kings counties, N.S. (Not Basin of Mines nor Mines Basin.)

Mindemota; river, emptying into Providence bay, Manitoulin I., Manitoulin dist., Ont.

Mineral: ereek and town, north of Caribon creek. Kootenay district, B.C.

Mineronte. See Mirond.

Miners: range of mountains, near lake Laberge, Yukon,

Mines basin. See Minas basin. Minette; bay, Kitimat arm, Coast district, B.C.

Minimegash. See Mininegash.

Minimegash. See Roseville.

Ministikwan; lake, west of Makwa lake, central Sask. (Not Little Island lake.)

Minitonas; creek, hill, post office, and railway station, western Manitoba.

Mink: reef, Manitoulin island, northwest of Steevens island, Manitoulin district, Ont.

Mink. See Ninette.

Minnaweiskag; lake, S. of Dinorwic L., Kenora dist., Ont. (Not Kaminnaweiskagwok.) Minnedosa: river, tributary to Assiniboine river, western Manitoba Saskatchewan nor Rapid.)

Minnehaha: lake, north of Peak lake, Kenora district, Ont. (Not Kiskopkechewans.)

Minnesabik; lake, south of Separation lake. Kenora district. Ont.

Minnewakan; post village, Posen municipality, Man.

Minnewanka: lake, in the Rocky Mountains park, Allerta. (Not Devil's Head.)

Minnie Bell: creek, tributary to Flat creek, Klondike river, Yukon,

Minnikau: river, east of Minnitaki lake. Kenora district. Ont.

Minnitaki; lake and railway station, Kenora district. Ont. (Not Minnietakie.)

Mint: creek, branch of Hunker creek, Klondike river, Yukon.

Minto; mount, west of Atlin lake, near north end. Cassiar district, B.C.

Miramichi; bay and river. Northumberland county, N.B. (Not Mirimichi.)

Mirimichi. See Miramichi.

Miron; lake, headwaters of Sturgeon-weir river, eastern Sa-katchewan. (Not Heron, Merion, Mineronte, nor Stone.)

Mirror; lake, west of lake Louise, Alta.

Misamikwash; lake, west of Wunnummin L. upper waters of Winisk R., Keewatin,

Miscou; island, harbour, point, Gloucester Co., N.B. (Not Miscow, Mya. nor N. Mya.) Miscoer. See Meisner.

Misery; bay and point, south shore Manitoulin island, Manitoulin district, Out.

Mishomis; lake, southwest of Grand lake Victoria, Pontiac county, Que.

Misinabi. See Missinaibi.

Miskatla: Indian village, Douglas channel, opposite Maitland island, Coast district, B.C. (Not Mis-ka-tla.)

Miskittenau: lake, at headwaters of Rupert river, Mistassini district, Que.

Misko; creek, tributary to Ottertail R., Rocky Mts., Kootenay dist., B.C. (Not Mescoh.)

Miskwabi; lake, Dudley township, Haliburton county, Ont. (Not Mis-quah-be-nish.) Mis-quah-be-nish. See Miskwabi.

Missagnash; river, emptying into Cumberland bay. Westmorland county, N.B. (Not Missagnash, Missignash, nor Missiquash.)

Missanabie. See Missinaibi.

Missawawi; lake. south of L. LaBiche, central Alberta. (Not Big Egg.)

Misseguash. See Missaguash.

Missiguash. See Missaguash.

Missinaibi; lake and railway station. Algoma district, also river flowing from the lake into Moose R..Algoma and Sudbury districts. Ont. (Not Missinabi ner Missanabie.) Missinnippi. See Churchill

Mission; bay, and channel (southern) of Kaministikwia river, Thunder Bay district, Ont. (Not Mission river.)

Mission; mountain, Tsimpsean peninsula, W. of Prince Rupert har., Coast dist., B.C.

Mission; pass, between Bridge river and Seton lake, Lillooet district, E.C.

Missipisew; river, tributary to Grass river. Keewatin.

Missiquash. See Missaguash.

Mississagi: bay, island, river, and strait, at north end of lake Hurch. Algoma and Manitoulin district. Ont. (Not Mississauga.)

Mississagua; brook and lake, Peterborough county, Ont. (Not Gull lake.)

Mist: creek and mountain. Misty range, southern Alberta.

Mista; a peak of the Valkyr mountains. Kootenay district. B.C.

Mistake; mountain, northwest of L. Laberge, Yukon.

Mistassibi: river, tributary to Mistassini river, Lake St. John county, Que. (Not Muskosibi.) Reversal of previous decision.

Mistassini: district and lake, northwestern Quebec.

Mistassinis. See Albanel.

Mistikus: lake, Rimouski county, Que. (Not Mistigouche nor Mistigougèche.)

Misty: range of mountains, northwest of Highwood range, southern Alberta.

Mitchell; bay and point. L. St. Clair, Kent county, Ont. (Not Mitchell's.)

Mitchell Bay; post village, Kent county, Ont. (Not Mitchell's Bay.)

Mitchell; range of mountains, east of Kootenay river. Kootenay district. B.C.

Mitchinamekus; lake and river, headwaters of Lièvre river, Berthier, Champlain, Massian kinonge, and St. Maurice counties, Que. (Not Mashamengoose, Meiomanguse. nor Menjobaguse.)

Mitis. See Metis.

Mitishto; river, tributary to Grass river, below Wekusko lake, Keewatin,

Moberly; creek, west of Lower Arrow lake, Kootenay district, B.C.

Moberly; peak, and railway station, Rocky mountains, Kootenay district, B.C.

Mohawk; post settlement and railway station, Brant Co., Ont. (Not Mt. Pleasant,) Moira; river, emptying into the bay of Quinte, near Belleville, Hastings county, Ont. Moisie: bay, point, river, rock, and shoal, Saguenay Co., Que. (Not Moisi nor Moisie.) Mokwawastuk; lake, at headwaters of Marten river, Mistassini district, Que. (Not

Mokwahwastuk.)

Molar: mountain, northeast of mount Hector, Rocky mountains, Alberta.

Molus: river, tributary to Richibucto river, Kent county, N.B. (Not Moulie's.)

Monckland; post village and railway station. Stormont county, Ont. (Not Moncklands, Monklands, nor Moncklands Station P.O.)

Mondonak; lake and river, upper waters of Manuan river, Champlain county, Que. Monell; reef, at entrance to Wood bay, Manitoulin island, Manitoulin district. Ont.

Money; point, on the southerly portion of Hawkesbury island, Coast district, B.C.

Mongus; lake, near Manitou lake, Kenora district, Ont.

Monk; lake, Cardiff township, Haliburton county, Ont.

Monklands. See Monckland,

Monmouth: lake, Monmouth township, Haliburton county, Ont.

Monguart; river, tributary to St. John river, Carleton county, N.B. (Not Manguart nor Munquart.)

Monroe; ereek and lake, near Moyie lake, Kootenay district, B.C.

Monson; mount, west of Lewes river, Ynkon. Montagne; lake, Tp. 6, R. 29, W. 2 M., Sask.

Monts (pointe des); point, Saguenay county, Que. See also Pointe-des-Monts.

Monsomshi; lake, on Severn river, Keewatin. (Not Mon-som-shi-pin-net.)

Montague; lake, Skead township, Nipissing district, Ont.
Montague; village, Kings county, Prince Edward Island. (Not Montague Bridge.)

Montana; creek, tributary to Yukon river, above Dawson, Yukon.

Montebello; railway station and village, Ottawa county, Que. (Not Monte Bello.) Montée-du-Lac; cove and landing, on the St. Lawrence, west of Cap Brulé, also road leading from thence to St. Joachim lakes, Montmoreney county, Que.

Montée du Lac. See Cap Brulé.

Montgomery. See McCoy.

Montgomery. See Young.

Montreal; channel, west of Edward island and south of entrance to Black bay, Thunder Bay district, Ont.

Montreal; lake and river, south of Churchill river, central Sask. (Not Rapid river.)

Montreal; river, flowing southeasterly into L. Timiskaming, Nipissing district, Ont. Montrose; cape, Markham bay, Hudson strait, Franklin.

Monumental: island, southeast of Clements Land, Franklin,

Moody; point, Boxer reach, Coast district. B.C.

Moonshine. See Uphill.

Moore; lake, Lutterworth township, Haliburton county, Ont. (Not Moore's.)

Moore; point, southerly coast of Digby island, Coast district, B.C.

Moore; post village, Lambton county, Ont. (Not Mooretown.) Moore; rock, Blunden harbour, Queen Charlotte sound, Coast district, B.C.

Moose; creek, tributary to Fortymile river, near international boundary, Yukon.

Moose; lake, north of Cedar lake, Keewatin.

Moose; lake and portage, on international boundary. Thunder Bay district, Out. Moose; mountain, also Moose Mountain creek and post office, southeastern Sask.

Moose. See Bonald.

Moosehorn; bay and lakes, east shore of L. Manitoba, Matt. (Not Moose Horn.)

Moosehorn; lake, west of Grand lake Victoria, Pontiac county, Que.

Moosejaw: creek and town, Sask. (Not Moose Jaw.)

Moosehide: creek and mountains, near mouth of Kloudike river, Yukon,

Mooshaulagan. See Mushalagan.

Moonie. See Movie.

Moraine: lake, south of mount Temple, Alta.

Morgan: lake, south of Silver lake, Kenora district, Ont.

Morice: lake and river, tributary to Bulkley river, Coast district, B.C. (Not Morrice.) Moricetown: village, on Bulkley river, Coast district, B.C. (Not Morricetown.) Morin: creek, flowing northeasterly into Meadow creek, central Sask. (Not Bear,

Morley: river, emptying into Teslin lake, Yukon,

Morrice. See Morice.

Morricetown. See Moricetown.

Morris: river, tributary to Red river, Man. (Not Boyne, He de Bois nor Scratching.)

Morris: town, in southern Manitoba.

Morrison: mount, on Yukon river, near international boundary, Yukon.

Morse; basin, east of Kaien island, Coast district, B.C. Morse: creek, Prince Rupert, Coast district, B.C.

Morse: mount, south of Tuck inlet. Coast district, B.C.

Moresby: island and passage, in the north end of Haro strait, B.C.

Moses Oates; cape, Charles island, Hudson strait, Ungava.

Mosher; creek and ridge, west of Beaverdell creek. Yale district.

Mosher; island and point, E. side St. Margaret bay, Halifax Co., N.S. (Not Gramous.)

Mosquito; creek, tributary to Columbia river, Kootenay district, B.C.

Mosquito: creek ,tributary to Bonanza creek, Yukon.

Mossy; river, flowing from Dauphin lake to L. Winnipegosis. Man.

Mouat: channel and reef, off southeast point of Vancouver island, B.C. (Not Mouatt.) Mouat: islands, off S.W. coast of Tevada I., New Westminster dist., B.C. (Not Mouatt.) Mouat: point. W. point of Pender I., New Westminster dist., B.C. (Not Mouatt. Mouat: rock, in Goletas channel, northern coast of Vancouver I., B.C. (Not Mouatt.)

Mouatt. See Mouat.

Mouchalagan. See Mushalagan.

Mouile. See Mouillée. Mouille. See Mouillée.

Moulie's. See Molus.

Mouillée: point, in St. Lawrence R., Glengarry Co., Ont. (Not Mouile nor Mouille.) Mountain; lake, southwest of lake Lindeman, Cassiar district, B.C. (Not Long lake.)

Mountain; lake on international boundary. Thunder bay district. Ont.

Mountain. See Cliff. Mountain, See Liard. Mountain. See Watchi.

Mount Johnson; post office and railway station, Iberville Co., Que. (Not St. Grégoire.) Mt. Pleasant. See Mohawk.

Mouse. See Mans.

Moyie; lakes, rivers, and town, in S.W. portion of Kootenay dist., B.C. (Not Mooyie.) Muchuya: creek, tributary to Kakuchuya river, Cassiar district, B.C.

Mud; glacier, northeast of mount Purity. Selkirk mountains. Kootenay district. B.C.

Mud. See Chilako. Mud. See Gillies.

Mud. See Kabagukski.

Mud. See Rose.

Muddy. See Pikitigushi.

Maddy Water. See Apeganau.

Mudge; island, between Gabriola and Vancouver islands, B.C.

Mudie; lake, south of Beaver river and north of Ministikwan lake, central Sask.

Mudjatik; river, tributary to Churchill river, north of He à la Crosse, Sask. (Not Caribou nor Mudjatick.)

Muhigan; river, emptying into Sipiwesk lake, Ker. (Not Wolf nor Wolf Rand.) Muirkirk; railway station and village, Oxford Tr., Kent Co. (Not Muir Kirk.) Muir: creek, flowing into Juan de Fuca strait, also mountain, Vancouver island, B.C.

Mukoman; river, tributary to Churchill river, Sask.

Mulcaster; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Sugar.)
Mulholland: point, Campobello island. Charlotte county, N.B. (Not Mulholland's,
Meholland, nor Mehollan.).

Mulvey; creek, tributary to Slocan river. Kootenay district, B.C.

Mummery: mountain, west of Blacberry river. Rocky Mts., Kootenay district. B.C. Munosahn. See Manasan.

Munquart. See Monquart.

Munro; creek, emptying into Gladys lake, Cassiar district, B.C.

Munro; mount, east of Atlin lake, Cassiar district, B.C.

Munro; point, St. Ann harbour, Victoria county, N.S. (Not Munroe nor Munro's.) Munroe Mills; post office. Glengarry Co., Ont. (Not Munro's Mills nor Munroe's Mills.)

Murchison: cape, southeast end of Brevoort island, Franklin.

Murchison; island, L. Nipigon, Thunder Bay district, Ont. (Not Murchison's,)

Muriel; lake, Tps. 59 and 60, R. 5, W. 4 M., eastern Alberta.

Murphy: barbour and point, south shore of Manitoulin I. Manitoulin district, Ont. Murphy; lakes, north of Tulameen river, Yale district, B.C. (Not Eagle nor Fish.) Murray Bay (Eng. usage). Malbaie (Fr. usage): village, Charlevoix county, Que. (Not Mal Bay, Malbay, nor Malbaye.)

Murray; canal, in Murray and Brighton townships, connecting the bay of Quinte with

Presqu'ile bay, Northumberland county, Ont.

Murray; creek, tributary to Sutherland river, south of Lesser Slave lake, central Alta.

Murray; island, St. Lawrence river, below Brockville, Leeds county, Ont.

Murray; island, Cold lake, central Alberta and Saskatchewan.

Murray; lake, east of Jackfish lake, central Saskatchewan.

Murray; point, Markham bay, Hudson strait, Franklin.

Murray; reef, southwest of Dead island, also rocks south of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Muscote; bay, off Big bay, S.W. side of the bay of Quinte. Prince Edward Co., Ont. Mushalagan; lake. Saguenay county. Que. (Not Mooshaulagan nor Mouchalagan.)

Muskiki; lake, north of Dana, Sask. (Not Houghton.) Muskoka: lake and river, Muskoka district, Ont.

Muskosibi. See Mistassibi.

Muskrat. See Manigotagan.

Muskwaro; point and river, Saguenay county, Que. (Not Musquarro.)
Muskwesi; river, flowing into north end of Southern Indian lake, Sask.
Mussen; mount, near southern end of Atlin lake, Cassiar district, B.C.
Mutchmore; point, south shore Manitoulin island, Manitoulin district, Ont.
Mya; point, Shippigan island, Gloucester county, N.B. (Not South Mya.)
Mya. See Miscou.

Myers; island, southwest of Lynedoch island, St. Lawrence river, Leeds county, Ont.

Myers: point, Sidney township, Hastings county, Ont.

Myles; sheal, opposite Kingston, Frontenac county, Ont. (Not Royal George.)

Myra; cove and island. Blind bay, Halifax county, N.S. (Not Myra's.)

Mystery; lake, southwest of Cliff lake. Kenora district. Ont.

N

Na-a-ma. See Nemaia.

Naas. See Nass.

Nabesipi. See Nabisipi.

Nabesippi. See Nabisipi.

Nabisipi; river, north shore gulf of St. Lawrence. Saguenay county, Que. (Not Nabesipi nor Nabesippi.)

Nacawicac. See Naekawie.

Nackawic; river and village, York county, N.B. (Not Nacawicae nor Nackawick.)

Nadahini; river, tributary to Chilkat river. Cassiar district, B.C.

Nadina; mountain, and river flowing into Français lake from the west. Coast district, B.C. (Not Nadinaka river nor Nadinako river.)

Nahlin; river, tributary to Inklin river, Cassiar district, B.C.

Nahoni; mountains, also lakes (upper, lower and middle), at headwaters of Porcupine river, Yukon. (Not Nahone.)

Nainlin; brook, tributary to lower Gravel river, Mackenzie, N.W.T.

Najan; river, tributary to St. Maurice river, above Manuan river, Champlain Co., Que. Najualand. See Najwalwank.

Najwalwank; lake, Quebec county, Que. (Not Kajoualwang nor Najualand.

Nakimu: eaves, in valley of Cougar creek, Selkirk mountains, Kootenay district, B.C.

Nakina; river, tributary to Taku river. Cassiar district. B.C.

Nakonake; river, tributary to Sloko river, Cassiar district, B.C.

Nakusp; ereek, railway terminus, and town, east side of Upper Arrow lake, Kootenay district, B.C. (Not Na-Kusp.)

Nalta. See Fraser

Naltesby; lake, on telegraph trail, N. of Chilako R., Cariboo dist., B.C. (Not Bobtail.: Namakan: lake, S.E. of Rainy L. Int. boundary, Rainy R. dist., Ont. (Not Nameukan.)

Namawash; lake, upper Ottawa R., northwest of Grand L. Victoria, Pontiac Co., Que.

Namego; lake, south of Separation lake, Kenora district, Ont.

Namegos: lake, south of Matchimanito lake, Montcalm Co., Que. (Not Nemegos.

Namegosis; lake, south of Matchimanito lake. Montealm Co., Que. (Not Nemegosis.)

Nameiben: lake, north of Kagianagami lake, Thunder Bay district, Ont.

Nameins; rapids, upper Winisk river. Keewatin.

Nameukan. See Namakan.

Namew; lake, northeast of Cumberland lake, Sask. (Not Sturgeon.)

Papineau: brook and lake. Wicklow township, Hastings county, Ont. Papineau: lake. Ottawa county, Que. (Not Lac du Commandant.)

Papineau d'Abbotsford: post office and railway station. Rouville county, Que.

Paquash. See Pakwash.

Paquehigan. See Pakwa.

Paquin: lake, northwest of Crean lake, central Saskatchewan. (Not Cross.)

Paradise; mountain peak, south of Sloko river. Cassiar district, B.C.

Paradise: valley, north of mount Temple, Alta.

Paradise. See Lodestone.

Parc-Laval: post office. Laval county. Que.

Parisian. See Parisienne.

Parisienne (ile): island. Whitefish bay. L. Superior. Ont. Not Parisian island.)
Parizeau: point, on east coast of Digby I., Prince Rupert harbour, Coast dist. B.C.
Park: mount, west of mount Biddle, Rocky mountains, Kootenay district. B.C.

Parker; creek, tributary to Klondike river. Yukon.

Parker: island and landing, south of Shute point, Bruce county, Ont.

Parkhill; village and railway station. Middlesex county. Ont. (Not Park Hill.)

Parkins; cape. at west entrance to Quatsino sound. Vancouver island, B.C.

Parks: lake, southeast of lake Nipigon, Thunder Bay district, Ont.

Parrsboro; parish, river, and town, Cumberland county, N.S. (Not Parrsborough.)

Parry: bay, southwest of Esquimalt, Vancouver island, B.C.

Parrywood; railway station, Kenora district, Ont.

Parson; rock, Active pass, strait of Georgia, New Westminister district, B.C.

Partipique. See Portapique.

Parton; river, tributary to Tat-henshini river, Cassiar district, B.C.

Partridge; ereek, flowing into Wheaton river, also pass, southern Yukon.

Partridge: falls, Pigeon R., near Grand portage, Int. boundary, Thunder Bay dist., O. Partridge Crop. See Pineimuta.

Pashashibu; bay. Saguenay county, Que. (Not Pashasheeboo.)

Pasiminikana; lake, at headwaters of St. Maurice river, Champlain county, Que.

Pashkokogan; lake and river, southeast of L. St. Joseph, Thunder Bay district, Ont

Paskagama; lake, upper waters of Migiskan river. Abitibi district. Que.

Paskekegan. See Piskaliegan.

Pasquia; range of hills, also river tributary to the Saskatchewan, Keewatin and Sask. (Not Basquia nor Basquian.)

Pass. See Blakiston.

Patauquin. See Petauguin.

Patience; lake, Tp. 36, R. 3, W. of 3 M., southern Saskatchewan.

Patterson; bay and point, St. Lawrence river, Yonge township, Leeds county, Ont. (Not Chimney Island point.)

Paudash: brook, lake, and post office. Cardiff town-hip, Haliburton county. Ont.

Paugh; lake, Sherwood towship, Renfrew county, Out.

Pauktorvik; island, southwest shore Ungava bay, Ungava.

Pawghtchewan. See Pagwachuan.

Pawgutchewan. See Pagwachuan.

Pauoonan, See Peonan.

Payne; lake, and river emptying into Ungava bay, Ungava. (Not Tasurak.)

Peach; island, at outlet of lake St. Clair, Essex county, Out. (Not Isle aux Pêches.)

Peak: lake, southwest of Dinorwic lake, Kenora district, Ont.

Pear. See Dromedary.

Pearce: mount, northwest of Mt. McNicoll, Selkirk Mts., Kootenay district, B.C.

Pearson; island, west of Belanger point and east of Greene island, Manitoulin district, Ont. (Not Little Grant.)

Peashteebee. See Pia-liti.

Peavine; creek, tributary to Moyie river. Kootenay district, B.C.

Pebble. See Lowes.

Peck; lake, south of Ministikwan lake, central Sask. (Not Little Fishing.)

Peckagomique. See Becaguimec.

Pedder; bay and inlet, south of Parry bay, Vancouver island, B.C.

Peekopee. See Pakowki.

Peel; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Prince Edward nor Tent.)

Peel: shoal, off Peel island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Tent Island shoal.)

Pee-pee-ke-wah-he-kung. See Pipikwabi.

Peeshabo. See Pishabo.

Pegamasai; lake, in Montgomery township, Algoma district, Ont. (Not Pegamasay.)

Peggy Cove; village, Halifax county, N.S. (Not Peggy's Cove.)

Pe-kange-kum. See Pikangikum.

Pekangikum. See Pikangikum.

Pekisko; creek, tributary to Highwood R., Alta. (Not Middle Branch of Highwood R.

Pelee: island and point, and Pelee Island post office. Essex county, Ont. (Not Pele nor Pointe Pelee.)

Pelerin; post settlement. Kent county, N.B. (Not Pelering nor Puellering.)

Pelican: lake, north of Minnitaki lake, Kenora district, Ont.

Pelican. See Chitek. Pelican. See Lavallée. Pelican. See Pantage. Pelican. See Primeau.

Pelly; mountains, lakes, and river, Yukon.

Pemberton; meadows, on Lillooet river, above Lilooet lake, also pass, portage, and post office, between Anderson and Lillooet lakes, B.C.

Pembina; mountain and river, southern Manitoba.

St .Helena; island, northeast of Grenadier island. St. Lawrence river, Leeds county, Ont. (Not Cherry nor Goulbourne.)

Ste. Hélène-de-Bagot; post village and railway station, Bagot county, Que. (Not Ste. Hélène de Bagot.)

St. Henri; post village. I évis county, Que. (Not St. Henri Station.)

- St. Henri Station. See St. Henri.
- St. Hilary: mount, southeast of Braeburn lake, southern Yukon.
- St. Jean Deschaillons. See Deschaillons.
- St. Joachim; post village and railway station, Essex county, Ont. (Not St. Joachim River Ruscom.)
- St. Joachim-de-Shefford; post village, Shefford Co., Que. (Not St. Joachim de Shefford.)
- St. John; creek and ridge, west of Beaverdell creek, Yale district, B.C.
- St. John: island, lake Melville, A-huanipi district, Que. (Not St. Johns.)
- St. Johns; county and town, on Richelieu river. Que. (Not St. John's.)
- St. John; mount, southwest of Windigo bay, L. Nipigon, Thunder Bay district, Ont.
- St. Joseph: village, south of Goderich. Huron county, Out.
- St. Joseph d'Orleans. See Orleans.
- St. Joseph-de-St.-Hyacinthe: post village, St. Hyacinthe county, Que. (Not St. Joseph de St. Hyacinthe.)
- St. Lambert; village, Chambly county, Que. (Not St. Lambert, Chambly.)
- St. Laurent; village, Jacques Cartier county, Que. (Not St. Laurent, Montreal.)
- St. Laurent. Montreal. See St. Laurent.
- St. Lawrence; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.
- St. Margaret; bay, Halifax county, N.S. (Not St. Margaret's.)
- Ste. Marguerite; river, tributary to Saguenay river, Chicontimi and Saguenay counties, Que. (Not St. Margaret.)
- Ste. Marguerite. See Marguerite.
- St. Martin; lake, northeast of lake Manitoba, Man. (Not St. Martin's.)
- St. Mary; bay and cape. Digby county, N.S.
- St. Mary; lake, Saltspring island, southeast coast of Vancouver island, B.C.
- St. Mary; lake, Ridout township, Muskoka district, Ont.
- St .Mary; lake and river tributary to Kootenay river, B.C. (Not Torrent.)
- St. Mary; post village. Kent county, N.B.
- St. Mary; river, Guysborough county, N.S.
- St. Mary; river, tributary to Belly river, southern Alberta. (Not St. Mary's.)
- St. Marys; town and railway station, Perth county, Out. (Not St. Mary's.)
- St. Maurice; county and river. Que.
- St. Michel-de-Rougemont; village, Rouville Co., Q. (Not St. Michel de Rougement.)
- Ste. Monique; post office. Two Mountains county. Que. (Not Ste. Monique des Deux Montagnes.)
- Ste. Monique des Deux Montagne. See St. Monique.
- St. Nicholas; peak, north of Mt. Gordon, Rocky mountains, Alta.
- St. Nora; lake, Stanhope township, Haliburton county, Ont. (Not St. Nora's.)
- St. Onge: post office. near Embrun, Russell county, Ont.
- St. Patrick's. See San Josef.
- St. Paul: post village. Kent county, N.B. (Not St. Pauls.)
- St. Paul. See Nuns.
- St. Paul's Bay. See Baie-St.-Paul
- St. Peter; bay, river, and railway station, Kings county, P.E.I. (Not St. Peter's nor Head of St. Peter's bay.)
- St. Peter; island, Hill-borough bay, Queens county, P.E.I. (Not St. Peter's.)
- St. Pierre-les-Becquets; parish and post office, Nicolet county, Que. (Not St. Pierre des Becquets nor St. Pierre les Bequets.)
- St. Piran; mount, west of Laggan station, Alta.
- St. Raphaël; post village, Glengarry Co., Ont. (Not St. Rafael nor St. Raphael West.)
- St. Regis: post office. Huntingdon county, Que. (Not St. Régis.)
- St. Roch-des-Aulnaies; village, L'Islet county, Que. (Not St. Roch des Aulnets.)
- Ste. Rosalie; island, in Ottawa river, near Montebello, Ottawa county, Que.

St. Simon-de-Yamaska; post village and railway station, Bagot county, Que. (Not St. Simon d'Yamaska,)

St. Sixte; lake, and river trib, to Petite Nation R. Ottawa Co., Que. (Not Sincique.)

St .Stanislas-de-Kostka; post village, Beauharnois county, Que. (Not St. Stanislas.)

St. Stephen; town, Charlotte county, N.B. (Not St. Stephens.)

St. Théodore-d'Acton; post village, Bagot county, Que.

Ste. Therese-de-Blainville; village and railway station, Terrebonne county, Que. (Not Ste. Thérèse nor Ste. Thérèse de Blainville.)

St. Urbain-de-Chateauguay; parish and post village, Chateauguay county, Que. (Not St. Urbain de Chateaugnay nor St. Urbain en haut.)

St. Valentin; parish and post village, St. Johns county, Que. (Not St. Valentine.) Sakwataman; river, tributary to Athabaska R., Alta. (Not Eagle nor Sa-kwa-ta-mow.)

Salem: post village, Cumberland county, N.S. (Not Salent.)

Salent. See Salem.

Salisbury: bay, Albert county, N.B. (Not Rougie.)

Salmon; island, north side of Big bay, Hastings county, Ont.

Salmon; river flowing into Big bay, Hastings and Lennox counties, Ont.

Salmon. See Kinonge. Salmon. See Wicked.

Salt: point, Presqui'ile peninsula, Brighton town-hip, Northumberland county. Ont. Salt. See Way.

Saitspring; island, southeast coast of Vancouver I., B.C. (Not Admiral nor Chuan.)

Salvus; railway station, north shore of Skeena river, Coast district, B.C.

Sand: bay, outlet of Rainy lake, international boundary, Rainy River district, Ont.

Sand. See Desert.

Sand. See Hyndman.

Sanderson: point, west side of Lower Arrow lake, Kootenay district, B.C.

Sanderson. See Iononoaklin.

Sand Point; lake, southeast of Namakan L., Int. boundary, Rainy River district, Ont. Sandy. See Pakwa.

Sandy-beach; lake, at headwaters of St. Maurice river, Champlain county, Que.

Sanford: mount, southwest of Snowdon range, Cassiar district, B.C.

Sangrida; peak, Valkyr mountains, Kootenay district, B.C.

San Josef; bay, near N.W. end Vancouver I., B.C. (Not San Joseph nor St. Patrick's.)

San Juan; river, flowing into Juan de Fuca strait, Vancouver island, B.C.

San Miguel; group of islands, off the entrance to Friendly cove, Nootka sound, Vanconver island, B.C.

Sansum: narrows, between Saltspring and Vancouver islands, B.C.

Sapasook. See Sapasuk.

Tinson; point, Gabriola island, strait of Georgia, B.C. (Not Rocky.)

Tintina; valley, central Yukon. A great depression occupied successively by Pelly, Kalzas, Stewart, and Klondike rivers, and extending to the Yukon.

Tisiriuk; lake, emptying into Leaf river, Ungava. (Not Seal.)

Tlet-tlan-a-tsoots. See Finlayson.

Tobermory; harbour and village, at N.W. extreme of Saugeen peninsula, Bruce Co., O.

Tobey; point, west side of Prince Rupert harbour. Coast district, B.C.

Tod; creek and inlet Saanich inlet, Vancouver island, B.C.

Todman: reef. at mouth of Thomas bay. Manitoulin island. Manitoulin district, Ont. Todnustook. See Tulnustuk.

Tofino; inlet, also townsite on Low peninsula, Clayoquot sound, Vancouver I., B.C.

Tokumm; creek, south of Deltaform mountain, Kootenay district, B.C. Tolmie; reef, between Kincardine, and Clark point, Bruce county, Ont.

Tom. See Thom.

Tomasine: river, Pontiac county, Que. (Not Thomasine nor Tomassino.)

Tombstone; mountain, northeast of Kananaskis lakes, southern Alberta.

Tomkinson; point, Ursula channel, Coast district B.C. (Not Tomkinsin.)

Tomilson; point, Blunden harbour, Queen Charlotte sound, Coast district, B.C.

Tonkawatla; river, tributary to Columbia R., Kootenay dist., B.C. (Not Tonca Watla.)

Toochi. See Tutshi.

Too-flat: creek, tributary to Klondike river. Yukon.

Toohoolitas. See Tuhulitas.

Toolnustook. See Tulnustuk.

Too-much-gold; creek, tributary to Klondike river, Yukon,

Too-tlas. See Thomas.

Tooya. See Tuya.

Topham; mount, southeast of Mt. Macoun, Selkirk mountains, Kootenay district, B.C.

Torch; lake, southwest of Candle lake, central Sask. (Not Little Candle.)

Torch; river, emptying into Cumberland lake, eastern Sask. (Not Big Sturgeon.)

Tornait. See Newton.

Torrent. See St. Marv.

Torres: channel, between Teresa and Copper islands and west shore of Atlin lake, Cassiar district, B.C. (Not West channel, Torres straits, nor Tory inlet.)

Tortue; river, Saguenay county, Que. (Not Fall.)

Tortue. See Orme.

Toru. See Torres.

Totogan; lake, north of Kanuchuan river, upper Winisk river, Keewatin.

Touchwood; hill, southern Saskatchewan.

Toussaint; island, above Iroquois point, St. Lawrence river. Dundas county, Ont. (Not Tousaint's, Toussaint's, nor Toussons.)

Toussons. See Toussaint.

Tower; creek, tributary to St. Mary river, Kootenay district, B.C.

Tower; peak, north of Quiet lake, Yukon.

Tower of Babel; mountain, east of Moraine lake, southern Alberta

Towincut: creek and mountain, S. of Cowiehan L., Vancouver I., B.C. (Not Nixon.)

Toyehill; post office, Dundas county, Ont. (Not Toy's Hill.)

Tracy; creek and post office, east of Kootenay river, north of Steele, Kootenay, B.C.

Trade; lake, on Churchill river, above Reindeer river, Sask. (Not Island lake.)

Trading; lake, Ridout township, Muskoka district, Ont.

Traffic; mountain, north of Pelly lakes, Yukon.

Trail. See Chungo.

Tramping: lake, southwest of Battleford, Sask.

Trap; mountain, west of Sooke river, Vancouver island, B.C.
Trapper; creek, tributary to W. fork of Kettle river, Yale district, B.C. (Not E. Fork of W. Fork of Kettle River.)

Travers (lac de); lake, at headwaters of St. Maurice river, Champlain county, Que.

Tremayne; bay, in southern portion of Digby island, Coast district, B.C.

Trent; river, flowing into the bay of Quinte at Trenton, Hastings and Northumberland counties. Ont.

Trenton; town, at western end of the bay of Quinte, Hastings county, Ont.

Triangle: lake, southeast of L. Nipigon, Thunder Bay district, Ont.

Trident; point, on north shore of the bay of Quink, Hastings Co., Ont. (Not Long.) Trincomali; channel, between Galiano and Saltspring islands, southeast coast of

Vancouver island, B.C. (Not Trincomalee nor Trincomalie.)

Trivet; point, on the northerly portion of Princess Royal island, Coast district, B.C. Trodely; island, north of Charlton island, James bay, Ungava. (Not Little Charlton.) Trois Bras. See Holden.

Trolltinder: mountain, south of mount Balfour, Kootenay district, B.C. Troughton; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Trout; creek, branch of McDame creek, Dease river, Cassiar district. B.C.

Trout. See Buntzen.

Trout. See Crean.

Trout. See Hayes.

Truda; peaks, Hermit range. Selkirk mountains, Kootenay district, B.C.

Tsetelui; lake, at headwaters of Kakuchuya R., Cassiar district, B.C. (Not Tseteloui.)

Tshensagi. See Chensagi.

Tsichu; river, tributary to Gravel river, Mackenzie, N.W.T. (Not Tsi-Choo.)

Tsinkut. See Sinkut.

Tuck; inlet, narrows, and point, north of Prince Rupert harbour, B.C. (Not Tuck's.) Tudjakdjuan. See Resolution.

Tudjakdjudusirn. See Gabriel.

Tugwell; creek, west of Otter point, Juan de Fuca strait. Vancouver island. B.C.

Tuhulitas; inlet, north of Cyrus Field bay, Franklin. (Not Toohoolitas.)

Tulameen; mountain, river, and village, Yale district, B.C. (Not Tulameen city.)

Tulip; creek, east of Lower Arrow lake, Kootenay district, B.C.

Tullin; mountain, west of outlet of Chilko L., Coast district, B.C. (Not Tull-in.) Tulnustuk; river, Saguenay county, Que. (Not Todnustook nor Toolnustook.)

Tummel; river, tributary to Pelly river, Yukon.

Tun; island, Blind bay, Halifax county, N.S. (Not Tuns.)

Tunagamik; lake, at headwaters of Ottawa river, Joliette county, Que.

Tunnussaksuk: point, east shore of Ungava bay, Ungava.

Tupper; mount, also glacier in the Selkirks, Kootenay district, B.C.

Turn. See Dryad.

Turnagain; point, at entrance to Lynx bay, L. Winnipeg, Man. (Not Saskatchewan.) Turner; mount, east of Stikine river and north of Iskut river, Cassiar district, B.C.

Turner. See Terence.

Turnerville. See Ennett.

Turning; island, near S. point of Cove I., entrance to Georgian bay, Bruce Co., Ont.

Turquoise; lake, east of mount Balfour, Alberta.

Turtle: mountain, southwestern Manitoba.

Turtle; point, on northerly portion of Gil island, Coast district, B.C.

Turtle. See Jarvis.

Tuscarora; post settlement and railway station, Brant Co., Out. (Not Middleport.)

Tusket; island and village. Yarmouth county, N.S. (Not Great Tusket island.)

Tustles; lake, north of Frauces lake, Yukon. (Not Tus-tles-tu.)

Tutchi. See Tutshi.

Tutesheta; creek, tributary to Tahltan river, Cassiar district, B.C. (Not Tuteshita.) Tutshi; lake and river, S.E. of Bennett L. Cassiar dist., B.C. (Not Toochi nor Tutchi.)

Tuttle: point, at entrance to Stupart bay, Hudson strait, Ungava.

Tuvalik; Indian village, west coast of Ungava bay, Ungava.

Tuya; lake, and river tributary to Stikine river, Cassiar district, B.C. (Not Tooya.) Tuzo; mount, east of Deltaform mountain. Bow range of the Rockies, Alta. and B.C. Twelve Mile. See Bronte.

Twelve O'clock; point, at the eastern entrance to Murray canal, Murray township, Northumberland county. Ont.

Twilight; lake, southwest of Cliff lake, Kenora district, Ont.

Twin: falls, on the upper part of Yoho river, Kootenay district, B.C.

Twin. See Dunsmuir.

Twin. See Vrooman.

Twin Sisters; islands, Brock group, St. Lawrence river, Leeds county, Ont. Twitya; river, tributary to Gravel river, Mackenzie, N.W.T. (Not Twityeh.)

Two-bit; creek, east of Lower Arrow lake. Kootenay district, B.C.

Two Rivers: lake of, in Algonquin National park, Nipissing district, Ont.

Tyee; lake and telegraph station, on trail near Bulkley river, Cassiar and Coast districts, B.C. (Not Long.)

Tyendinaga; township, Hastings county, Ont.

Tyers; river, tributary to Frances river, near Frances lake, Yukon. Tyne; point, Departure bay, east coast of Vancouver island, B.C.

Tzuhalem; mountain and post settlement, north of Cowichan river, Vancouver island, B.C. Not Tzouhalem.)

U

Uibvaksoak. See Uinaksoak.

Uinaksoak; cape, east shore Ungava bay, Ungava. (Not Uibvaksoak.)

Unahini; river, tributary to Tatshenshini river, Yukon.

Unaminnikan. See Manomin.

Ungava; bay, northeastern Canada.

Unger; island, bay of Quinte, mouth of Napance R., Lennox Co., Ont. (Not Unger's.)

Union; bay, east side of Saanich inlet, Vancouver island, B.C.

Uphill; lake, northeast of Manitou lake, Kenora district, Ont. (Not Moonshine nor Kasakacheweiwak.)

Upinnakaw. See Opinnagau.

Upper Arrow; lake, an expansion of Columbia river. Kootenay district, B.C.

Upper Bow. See Bow.

Upper Emerald. See Yoho.

Upper Kootanie. See Duncan.

Upper Lahave; village, Lunenburg county, N.S. (Not Upper La Have.)

Upper Manitou. See Anzhekumming.

Upper Savage; islands, east of Big island, Hudson strait, Franklin. (Not Savage.)

Upper White Fish. See Jarvis.

Urd; a peak of the Valhalla mountains. Kootenay district, B.C. Ursula; channel, east of Gribbell island. Coast district, B.C.

Ursus Major; mountain, Hermit range, Selkirk mountains, Kootenay district, B.C. Ursus Minor; mountain, Hermit range, Selkirk mountains, Kootenay district, B.C. Usatzes; point, N.E. point of Low peninsula, Clayoquot sound, Vancouver I., B.C.

Uto: peak, near mount Sir Donald, Selkirk mountains, Kootenay district, B.C.

\mathbf{v}

Valdes; island, in the southern portion of the strait of Georgia, B.C.

Valdes. See Maurelle, Quadra, and Sonora. Recent surveys proved that the name Valdes covered three islands, which have been named separately as above, and the former name has been discarded to avoid duplication.

Valhalla; mountains, west of Slocan lake, Kootenay district, B.C. (Not Val Halla.) Valkyr; mountains, east of Lower Arrow lake, Kootenay, B.C. (Not Valkyriur.)

Valley; river, flowing easterly into Dauphin lake, Manitoba.

Valleyview; post office, north of Wapella, Sask. (Not Valley View.) Valois; village, Jacques Cartier county, Que. (Not Valoisville.)

Valoisville. See Valois.

Van Buren; island, northeast of Tar island, St. Lawrence river, Leeeds county, Ont.

Vancouver: ereek, tributary to McQuesten river. Yukon.

Van Hooven. See Van Houten.

Van Horne; brook, glacier, névé, and range of mountains. Kootenay district, B.C.

Van Houten; creek, E. of Lower Arrow L., Kootenay district, B.C. (Not Van Hooven.)

Vankoughnet; bay, east of The Narrows, L. Manitoba, Man.

Vansittart; island, northeast of Grenadier island, St. Lawrence river, Leeds Co., Ont. Vaudreuil; bay, railway station, rapids, and post village, also Vaudreuil Station post office, Vaudreuil county, Que. (Not Dorion.)

Vaux; mount, also glacier, northeast of Leanchoil station. Kootenay district. B.C.

Venn; passage between Metlakatla bay and Prince Rupert harbour, B.C.

Ventego; mountain, Selkirk range, Kootenay district, B.C.

Vermilion; bay and railway station, Eagle L., Kenora district, Ont. (Not Vermillion.)

Vermilion...See Little Vermilion.

Vermilion. See Pink. Vermilion. See Red.

Verney; passage, between Hawkesbury and Gribbell islands, Coast district. B.C. Vertebrae; mountain, north of Bush river, Rocky Mts., Kootenay district, B.C.

Verte-Vallée; post office, Vaudreuil county, Que. (Not Green Valley.) Vertical; mountain, east of Kootenay river, Kootenay district, B.C.

Vesuvius; bay, Saltspring island, southeast coast of Vancouver island, B.C.

Vesuvius; hill, north of Wheaton river, southern Yukon.

Victoria; mount, also glacier, in the Bow range of the Rockies. Alta., and Kootenay district, B.C. (Not Mt. Green.)

Victoria: island, Franklin. Portions of this island have been known as "Victoria Land," "Prince Albert Land," and "Wollaston Land,"

Victoria; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Mile.)

Vigilant: island, on north side of Prince Rupert harbour, B.C. (Not Bacon.)

Vigilant; rock, east of Grantham shoals, Manitoulin island, Manitoulin district, Ont. Village Bélanger. See Bélanger.

Village Richelieu. See Richelieu.

Villanova; post office. Norfolk county, Ont. (Not Villa Nova.) Vingolf; mount, west of Slocan lake, Kootenay district, B.C.

Violadale; post village, Marquette electoreal district, Man. (Not Viola Dale.)

Voisin (lac); lake, northeast of Taggart lake, central Saskatchewan.

Volcano; creek, tributary to Sheep river, southern Alberta.

Volunteer; spit, between Birch and Walker points. Manitoulin I., Manitoulin dist., Ont.

Von Wilczek; valley, on Lewes river, above Pelly river, Yukon.

Vowle; mount, west of Schwatka river, southern Yukon.

Vrooman; islands, McGregor cove, Bruce county, Ont. (Not Twin.) Vulture; col, between mounts Gordon and Olive, Rocky mountains, Alta.

Vulture. See Winnange.

\mathbf{w}

Waagan. See Wagan.

Waagoosh. See Waugush.

Wabakimi; lake, northwest of Smoothrock lake, Thunder Bay district, Ont. Wabamun; lake, south of St. Ann. central Alberta. (Not White Whale.)

Wabanoni; river. emptying into Obaska lake, Abitibi district. Que. (Not Wabinoni.)

Wabasca. See Wabiskaw. Wabaskoutyunk. See Kempt.

Wabaskus; lake, southeast of Abitibi lake. Pontiac county, Que.

Wabassi; brook, Templeton township, Ottawa county, Que. Wabi; bay and creek, at the head of lake Timiskaming, Ont.

Wabigoon; lake, river, and railway station, Kenera district, Ont. (Not Wabigwunn.)

Wabigwunn. See Wabigoon. Wabinoni. See Wabanoni.

Wabinosh; bay, lake, and river, on west side of L. Nipigon, Thunder Bay district, Ont.

Wabishkok; lakes, south of Kisseynew lake, Keewatin,

Wabiskaw; lakes and river, northeast of Lesser Slave lake, Alta. (Not Wabasca nor Wabiscaw.)

Waddell; bay, Frobisher bay, Franklin. (Not Dyer sound.)

Wadopi: brook, tributary to upper Winisk river, above Tabasokwia river, Keewatin.

Wadsworth: lake, Tudor township, Hastings county, Ont.

Wagabkedei; lake, northwest of Attawapiskat lake, Keewatin.

Wagan; river, tributary to Restigouche R., Madawaska Co., N.B. (Not Waagan.)

Wagosh; bay and reef, Cockburn island, Manitoulin district, Ont. (Not Walgoosh.)

Wagwabeya. See Wagwabika.

Wagwabika; lake, headwaters of Lièvre R., St. Maurice Co., Que. (Not Wagwabeya.) Wahbiquekobing. See Wakwekobi.

Wahcomatagaming. See Wakomata.

Wahgoosh. See Wagosh.

Wahnapitae. See Wanapitei.

Wahquekobing. See Wakwekobi.

Wahwanichi. See Wakonichi.

Waiatt; bay, Okisollo channel, Coast district, B.C. (Not Wi-yat nor Wyatt.) Wai-nusk. See Winisk.

Wainwright; basin, between S.E. end of Kaien I. and mainland, Coast district, B.C. Waitabit; creek, flowing into Columbia river below Donald, Kootenay district, B.C. Wakamagaming. See Wakami.

Wakami; lake, river, and Ry, station, Sudbury district, Ont. (Not Wakamagaming.)

Wakaw; lake, northwest of Basin lake, central Sask. (Not Crooked.)

Wakeham; bay, southeast of Wales sound, Hudson strait, Ungava.

Wakinichi. See Wakonichi.

Wakomata: lake, north of Gould township, Algoma district, Ont. (Not Clear nor Wahoomatagaming.)

Wakonichi: lake, south of Mistassini lake, Mistassini district, Que. (Not Wahwanichi nor Wakinichi.)

Wakwekobi; lake, Day township, Algoma district, Ont. (Not Wahbiquekobing nor Wahquekobing.)

Walbran; point, north end of Loretta island, Devastation channel, Coast district, B.C. Wales; cape, island, and sound, S. shore Hudson strait, Ungava, (Not Prince of Wales.)

Walkem; islands, Johnstone strait, Coast district, B.C. (Not Pender.) This name adopted to avoid duplication, there being a Pender island further south.

Walker; creek, north of Sixtymile river, near international boundary, Yukon.

Walker; mount, north of Blaeberry, river, Rocky mountains, Kootenay district, B.C.

Walker; point, south shore Manitoulin island, Manitoulin district, Ont.

Walker; post office. Middlesex county. Ont. (Not Walker's.)

Walkhouse; bay and point, northeast of Inner Duck island, Manitoulin district, Ont. Wallace; island, east of Lynedoch island, St. Lawrence river, Leeds county, Ont.

Wallace; island, N. of Saltspring I., S.E. coast of Vancouver I., B.C. (Not Narrow.)

Wallace; mount, southeast of Beaverdell, Yale district. B.C.

Wallace; mount, also river, south of Lesser Slave lake, central Alberta.

Wallace; rock, near South Baymouth, Manitoulin district. Out.

Wallbridge; point, Ameliasburg township, Prince Edward county, Ont. Wallenger; creek, tributary to Wild Horse river, Kootenay district, B.C.

Wall-eye; lake, south of Eagle lake, Kenora district, Ont.

Wallis: point, Nanoose harbour, east coast of Vancouver island, B.C.

Walsh; lake, north of Rosamond lake, Kenora district, Ont.

Walters; point, north shore of Okisollo channel. Coast district. B.C.

Walton: river and village, Hants county .N.S. (Not La Tete nor Petite.)

Wanapitei; lake, Ry. station, and river. Sudbury district. Ont. (Not Wahnapitae.)

Wanderer: shoal, southwest of Lyal island, Bruce county, Ont.

Wanipigow; river, emptying into the east side of lake Winnipeg, Man. (Not Hole.)

Wanogu: lake, Ledger township, Thunder Bay district, Ont. (Not Wanogooh.)

Wapageisi; lake, east of Anzhekumming lake, Kenora district Ont.

Wapateehk. See Waputik.

Wapawekka; lake and range of hills, southeast of L. La Ronge, central Saskatchewan. (Not Bear lake nor Great Bear Sand hills.)

Wapiabi; creek, tributary to south branch of Brazeau river, Alta. (Not Grave.)

Wapichtigow. See Wapishtigau.

Wapikik. See Kapikik.

Wapikopa; lake and river, upper waters of Winisk river, Keewatin.

Wapishtigau; brook, tributary to Burntwood river, Keewatin. (Not Wapichtigow.)

Wapitotem; river, between Attawapiskat and Weibikwei lakes, Keewatin.

Wapoos. See Wapus.

Wapoose. See Wapus.

Wapta; glacier, lake, and mountain, Rocky mountains, Kootenay district, B.C.

Wapta. See Cataract.

Wapta. See Kicking Horse.

Wapta. See Yoho,

Wapus; lake and river, north of Kakagi lake, Kenora district, Ont. (Not Wapoose.)

Wapus; lake and river, east side of Reindeer lake, central Sask. (Not Wapoos.)

Wapusanan; lake, upper waters of Ottawa R., N. of Grand L., Victoria, Pontiac Co., Q. Wapustagamu; lake, on west branch of St. Augustin river, Saguenay county, Que. (Not Wapustagamoo.)

Waputik; mountains and snowfield, Rocky mountains, Kootenay district, B.C. (Not Wapatechk, Wap-ut-techk, Waputchk, nor Waputchk.)

Ward; bay, in Aylmer lake. Wolfe county, Que. (Not Ward's.)

Ward; inlet, Frobisher bay, Franklin. (Not A. H. Ward.)

Ward; lake, Rattray township, Nipissing district, Ont.

Ward; mount, south of Wheaton river, southern Yukon.

Wardner; village, on Kootenay river, south of Bull river, Kootenay district, B.C.

Ware; creek, tributary to Sheep river, southern Alberta.

Ware; mount, northwest of mount Hoffman, southern Alberta.

Wark; channel, northeast side of Tsimpsean peninsula, also island at entrance to the channel, Coast district, B.C. (Not Work.)

Wark; island ,northeast of Princess Royal island, Coast district, B.C.

Wark; mount, near head of Saanich inlet, Vancouver island, B.C. (Not Big Saanich, nor Work.)

Wark; point in Victoria harbour, B.C. (Not Warke or Work.)

Warner; bay and point, east of Hopkins point, Bruce county, Ont.

Warpath; river, emptying into the west side of L. Winnipeg, Man. (Not War Path.)

Warren; island, south of Beament island, Bruce county, Ont.

Warwick; cape, east end of Resolution island, Franklin. (Not Resolution.)

Wasawakasik; lake, on Churchill river, below Nemei river, Sask.

Wascana. See Waskana.

Washademoak; river, tributary to St. John river, Queens county, N.B. (Not Washademoac nor Washedemoak.)

Washagami; river, tributary to Ekwan river, Keewatin. (Not Washegummy.)

Washagomis; lake, south of Shabumeni lake, Keewatin. (Not Lower Clearwater.)

Washedemoak. See Washademoak.

Washegummy. See Washagami.

Washeibemaga; lake, southeast of Boyer lake, Kenora district, Ont. (Not Kawasheibemagagamak.)

Washeka; lake, upper Ottawa river, Pontiac county, Que. (Not Waskega.)

Washi; lake, on Albany river, east of Makokibatan lake, southeastern Keewatin. (Not Lake of the Narrows.)

Washikuti; bay and river. Saguenay county. Que. (Not Washsheecootai.)

Washimeska; river, Lake St. John county, Que. (Not Ouasiemska nor Wassienska.)

Washmawapta; glacier, E. of Helmet mountain, Rocky Mts., Kootenay district, B.C. Washsheecootai. See Washikuti.

Washahigan; river, tributary to Little Smoky river, Alberta.

Waskaiowaka. See Waskatowaka.

Waskana; ereek, flowing N.W. past Regina into Qu'Appelle R., Sask. (Not Wascana.) Waskatowaka; lake, at headwaters of Little Churchill R., Kee. (Not Waskaiowaka.) Waskega. See Washeka.

Waskesiu; creek and lake, tributary to Montreal L., central Sask. (Not Red Deer.)

Waskik; lake, southwest of Sipiwesk lake, Keewatin. (Not Waskiktepigo.)

Waskiktepigo. See Waskik.

Washwatim. See Wushwatim.

Wasp; łake, Redditt township, Kenora district, Ont.

Wassienska. See Washimeska.

Waswanipi; H. B. Co.'s post, lake, also river tributary to Nottaway R., Abitibi, Que.

Watch; island, north of Hill island. St. Lawrence river. Leeds county, Ont. Watcheeshoo. See Watshishu.

Watchi: lake, northeast of Reader lake, Keewatin. (Not Mountain.)

Waterfall; valley, at the head of Yoho river. Rocky Mts., Kootenay district, B.C.

Waterhen; lake and river, between Manitoba and Winnipegosis lakes, Man.

Waterton; lake and river, southern Alta. (Not Chief Mt. lake nor Kootenai river.) Watsheeshoo. See Watshishu.

Watsheeshoo. See Watshishu.
Watshishu; river, Saguenay county, Que. (Not Watcheeshoo nor Watsheeshoo.)

Watson; island, between S. end of Kaien I. and mainland, Coast district, B.C. Watson; railway station, ridge, river, and valley, north of Bennett lake, Yukon.

Watt; railway station. Charlotte county, N.B. (Not Watt Junction.)

Watt Junction. See Watt.

Waugh; creek, tributary to Goldstream river. Vanceuver island. B.C.

Waughs: river, Colchester county. N.S. (Not Wough's.)

Wauguash. See Kaniapiskau.

Waugush; lake, Spragge township, Algema district, Ont. (Not Waagoosh.)

Wave. See Wavy.

Wavy; lake, north of Battle river, Alberta. (Not Wave.)

Wawagosik; lake, west of Harricanaw river, Abitibi district, Que. (Not Wawagosic nor Wawagosie.)

Waweig; lake, northwest of Wabinosh lake, Thunder Bay district, Ont.

Wawiag; river, headwaters of Maligne river, Kenora and Thunder Bay district, Ont. (Not Kawawiagamak.)

Wawong; lake, near Windigokan L. E. of L. Nipigon. Thunder Bay district, Ont.

Way; point S.W. of Potter point, Ameliasburg Tp., Prince Edw. Co., Ont. (Not Salt.)

Wayagamak; lake, Champlain county, Que. (Not Wayagamack.) Weaver; creek, tributary to Moyie river, Kootenay district, B.C.

Wedding: river, tributary to Bell river. Abitibi district. Que.

Wedge; island, east of Dokis island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Wedge; point, Oyster harbour, east coast of Vancouver island, B.C.

Wedlock; island, Admiralty group, St. Lawrence river, Leeds county, Ont.

Weed; hills, southeastern Saskatchewan.

Weenisk. See Winisk.

Weese; creek, Brighton township. Northumberland county, Ont. (Not Weese's.)

Weggs; cape, south shore of Hudson strait, Ungava.

Weibikwei; lake, at head of Winisk R., S.E. Keewatin. (Not Pepisquew nor Winisk.)

Weir. See Footprint.

Weir. See Hennigar.

Weiseieno; lake, near Manitou lake, Kenora district, Ont.

Wekusko; lake, Grass river, east of Reed lake, Kee. (Not Herb nor Sweet Herb.)

Welcome; lake, Lawrence township, Haliburton county, Ont.

Welland; river, Welland county, Ont. (Not Chippewa.)

Wellandport; post office, Lincoln county, Ont. (Not Welland Port.)

Weller; bay, near west end of bay of Quinte, Prince Edward Co., Ont. (Not Weller's.)

Wellesley; lake, west of White river, Yukon.

Wellington; bay and village. Prince Edward county, Ont. (Not Big Sandy bay.)

Wells; shoal, southeast of Lyal reef, Bruce county, Ont. Welsh; bank, north of Scott point, Bruce county, Ont.

Wenistagosew: river, upper waters of Waswanipi river, Abitibi district, Que.

Wenasaga; river, flowing into L. Seul, Keewatin.

Wendigokan. See Windigokan.

Wenkchemna; peaks, in the Bow range of the Rockies, Alta. and Kootenay district, B.C. (Not Desolation range nor "The Stragglers.")

Wepiskow. See Burntwood.

Wesketahin; village, near the mouth of Unahini river, Yukon.

Weslemkoon; lake, Addington county, Ont.

West; bay, the western extremity of lake Evans, Abitibi district, Que.

West: river, Bonaventure county, Que. (Not West Port Daniel river.)

West; river, Pictou county. N.S. (Not West river of Pictou.)

West; river, tributary to Fraser river, above Queenel, Cariboo district, B.C.

West. See Nelson.

West. See Owen.

West. See Torres.

West Arrowood; creek, tributary to Bow R., S. Alberta. (Not West Arrow-wood.) West Belanger. See Belanger.

Westboro; post office and summer resort. Carleton county, Ont. (Not Westborough.) Westbourne; bay, north shore of Hudson strait, Franklin.

Westbourne; post settlement, on Whitemud river, south of L. Manitoba, Man.

West Dog Head. See Whiteway.

West Duck; reef. northwest of Western Duck island, Manitoulin district, Ont.

Western; river, emptying into Coronation gulf, Mackenzie. (Not Back's Western.)

Western Duck; island, of the Duck group. Manitoulin district, Ont.

West Fox. See Fox.

Westholme: post settlement, south of Chemainus river, Vancouver island, B.C.

West McGillivray. See McGillivray.

West Niskitogisew. See Kiskitto.

West Port Daniel. See West.

West river of Pictou. See West.

West Road river. See Blackwater.

West Sister; shoal, S. of Yeo I., entrance to Georgian bay, Manitoulin district, Ont. West Winisk. See Asheweig.

Wetetnagami; lake, and river tributary to Opawika river, Abitibi district, Que.

Wettigo; lake, south of Nemiskau lake, Abitibi district. Que.

Weymontachi; Iulian village, at the mouth of Manuan river, upper St. Maurice river, Champlain county, Que. (Not Weymontachingue.)

Whale; river, emptying into Ungava bay, Ungava.

Whaleback; mountain, at the headwaters of Yoho river, Rocky mountains, Kootenay district, B.C. (Not Whalesback.)

Whaler; bay, Active pass, strait of Georgia, New Westminster district, B.C.

Wharton; harbour, north shore of Hudson strait, Franklin.

Whatshan; lakes and river, west of Lower Arrow lake, Keotenay district, B.C. Wheaton; mount, in the "big bend" of Wheaton river, southern Yukon,

Wheaton; river, emptying into the west side of Bennett lake, Yukon. Wheaton Vault; brook, flowing into Minas channel, Kings county, N.S. Wheeler; mount, Purity range, Selkirk mountains, Kootenay district B.C. Wheeler; reef, southwest of Kitchener island. Manitoulin district, Ont.

Whetstone; lake, Lake township, Hastings county, Ont. Whiffen; spit, Sooke inlet. Vancouver island, B.C.

Whipple; mount, east of the elbow of Stikine river, Cassiar district, B.C.

White; cliff. northeast of Hungerford point, Manitoulin L. Manitoulin district, Ont.

White: mount, north of Atlin lake. Yukon.

White: pass, at head of Skagway river, Cassiar district, B.C.

White; river, tributary to Yukon river, above Stewart river, Yukon.

White: strait, north shore of Hudson strait, Franklin.

White. See Ketch.

White Bear; bay, northeast of Markham bay, Hudson strait. Franklin.

Whitebear; lake, north of Saskatchewan Landing, southern Sask. (Not White Bear.) White Bear; lake and river, at headwaters of Gatineau river, Champlain county, Que. White Bear. See Cassels.

Whiteclay; lake, Ogoki river, east of Whitewater lake. Thunder Bay district. Ont.

Whitefish. See Garson.

Whitefish. See Meacham.

Whitefish Spawning. See Chukuni.

Whitefox; river, tributary to Torch river, central Sask. (Not White Fox.)

White Goat. See Cline.

Whitegoose: river, tributary to Migiskan R., below Paskagama L., Abitibi dist., Ont.

White Grouse; creek, east of Whatshan lake, Kootenay district. B.C.

Whitehorse; town and rapid, Lewes river, below Miles eanyon, Yukon. (Not White Horse.)

White Man; pass, Rocky Mts., Alta. and Kootenay district, B.C. (Not White Man's.) Whitemud; river, flowing into the southerly end of L. Manitoba, Man. (Not White Mud nor White-mud.)

White Mud. See Frenchman.

Whiterock: post office, Kings county, N.S. (Not White Rock Mills.)

White Rock Mills. See Whiterock.

Whites; post office, Kings county, N.S. (Not White's Corner.)

Whites: post office and railway station, Huntingdon county, Que. (Not White's nor White's Station post office.)

White's. See Geikie.

Whitesand; lake and river, emptying into the northerly end of L. Nipigon, Thunder Bay district, Ont.

Whitesand; post office and river, southeastern Sask. (Not White Sand.)

White's Corner. See Whites.

Whiteshore; lake, east of Tramping lake, Sask. (Not White Shore.)

White's Station. See Whites.

Whitestone; lake, north of Cat lake, Keewatin. (Not White Stone.) Whitestone; river, tributary to Tatshenshini river, southwestern Yukon.

Whiteswan; river, emptying into Teslin L., Cassiar district, B.C. (Not White Swan.)

Whitewater; lake, southwestern Manitoba.

Whitewater. See Taseko.

Whiteway; point, at west side of north entrance to the narrows of lake Winnipeg, Man. (Not Dog's Head nor West Dog Head.)

White Whale. See Wabamun.

Whitewood; lake, Tp. 29, R. 17. W. 2 M., southeastern Saskatchewan.

Whitewood. See Basswood.

Whitley; bay, northwest of Burgoyne bay, Hudson strait, Ungava.

Whitney; lake, Smellie township, Kenora district, Ont.

Wholdaia; lake, an expansion of Dubawnt river, N.W.T. (Not Wholdiah.) Whymper; mount, northwest of Storm mountain, Rocky mountains, Alta. Whymper; mount, near head of Chemainus river, Vancouver island, B.C.

Whymper. See Kiwetinok.

Whyte: mount, west of lake Louise, Alberta.

Wiachuan: river, Richmond gulf, Ungava. (Not Wiachewan nor Wiacheuan.) Wicked: point, Athol township. Prince Edward county, Ont. (Not Salmon.)

Wickens; lake. Britton township, Kenora district, Ont.

Wickham; post office and railway station, Drummond Co., Que. (Not Wickham West.) Wickham West. See Wickham.

Wicksteed; rock S.E. of Dead I., entrance to Key har., Georgian B., Parry S. dist, Ont. Wigwas. See Eva.

Wigwasan; lake, west of Bukemiga lake, Thunder Bay district, Ont. Wigwasikak; lake, northwest of Cat lake, Keewatin. (Not Birch.)

Wikwaskopauk; lake, northwest of Grand lake Victoria, Abitibi district, Que.

Wilcox: lake, English river, Kenora district, Ont.

Wild: bight, in west side of Fitzwilliam island, Manitoulin district, Ont.

Wild Horse; river, tributary to Kootenay R., Kootenay district, B.C. (Not Skirmish.) Wilkinson; creek, tributary to W. fork of Kettle R., above Carmi, Yale district, B.C. Willard; lake, north of Hawk lake, Kenora district, Ont.

William; head, at north entrance to Pedder bay, Vancouver island, B.C.

Williams: bay, south shore of L. Seul. Kenora district, Ont.

Williams; lake, east of Fraser river, in the southern portion of Cariboo district, B.C. Williams; lake, east of Cat lake Keewatin.

William Smith; cape, northeast shore of Ungava bay, Ungava.

Willoughby; island, northeast of Grenadier island. St. Lawrence river, Leeds Co., Ont. Willowbank: creek and mountain. W. of Blaeberry R., Rocky Mts., Kootenay, B.C. Willowbunch; lake and post office. southern Saskatchewan. (Not Willow Bunch.)

Willowgrove; post office. Haldimand county, Ont. (Not Willow Grove.)

Wilson: mount, also lake. Ross river, Yukon.

Wilson; post office, Grenville county. Ont. (Not Wilson's Bay.)

Wilson: post office, northwest of Chemainus river, Vancouver island, B.C. (Not Wilson's Crossing.)

Wilson; river, flowing easterly into Dauphin lake, Man.

Wilson. See Kiwetinok.

Wilson Corners: post office, Wakefield Tp., Ottawa Co., Que. (Not Wilson's Corners.) Wilson's Bay. See Wilson.

Wilson's Crossing. See Wilson.

Wiltshire: village, Queens county. P.E.I. (Not New Wiltshire nor North Wiltshire.)

Wiltse; lake, Leeds county, Ont. (Not Wiltz nor Wiltze.) Wimapedi; brook, tributary to Burntwood river, Keewatin,

Winawiash; lake, southwest of Grand lake Victoria, Pontiac county, Que.

Wind; mountain, west of Kananaskis river, Rocky Mts. park, Alta. (Not Windy.) Windigo; bay and islands, north shore of L. Nipigon, Thunder Bay district, Ont.

Windigo; lake and river, tributary to Severn river. Keewatin.

Windigokan; lake, E. of L. Nipigon, Thunder Bay district, Ont. (Not Wendigokan.)

Windy; arm. Tagish lake, Yukon.

Windy; lake, southwest of Oxford lake, Keewatin.

Winging: point, east headland of Fourchu bay, opposite Guyon island, Cape Breton county, N.S. (Not Wining nor Winning.)

Wining. See Winging.

Winisk: lake and river, southeastern Keewatin. (Not Wai-nusk nor Weenisk.)

Winiskisis; river, tributary to upper Winisk river, Keewatin.

Winnange; lake, north of Dryberry lake, Kenora district, Ont. (Not Vulture.)

Winning. See Winging.

Winnipegosis; a large lake in Manitoha. (Not Winnipegoos nor Winnipegoosis.)

Winonitikameg; lake, northwest of Attawapiskat lake, Keewatin. Wintawanan; lake, southwest of Attawapiskat lake, Keewatin.

Wintego; lake, an expansion of Churchill river, below Reindeer river, Sask.

Wintering; lake, west of Landing lake, Keewatin. Witchai: lake, on lower Grass river, Keewatin.

Witchekan; lake, in the Thickwood hills, central Saskatchewan.

Wiwaxy; peaks, southwest of Mt. Victoria, Rocky mountains, Kootenay district, B.C.

Wi-yat. See Waiatt.

Wizida; lake, at headwaters of Attawapiskat river, Keewatin.

Wizidans: lake, west of Wizida lake, upper Attawapiskat river, Keewatin.

Woden; a peak of the Valhalla mountains, Kootenay district, B.C.

Wolf: eanyon, on Pelly river, above Woodside river, Tukon.

Wolf: creek, tributary to Klondike river, Yukon.

Wolf. See Grimsthorpe.

Wolf. See Muhigan.

Wolf Rand. See Muhigan.

Wolfe; island, St. Lawrence river, Frontenac county, Ont. (Not Long.)

Wolfe; island, south of De Stein point, Prince Rupert harbour, Coast district, B.C.

Wolfestown; township and village, Wolfe county, Que. (Not Wolfstown.)

Wollaston; peninsula, S.W. portion of Victoria I., Franklin. (Not Wollaston Land.) Woman; lake and river, south of Shabumeni lake, Kee. (Not Woman Lake river.) Wollaston Land. See Victoria island.

Wood: brook, tributary to Grass river, Keewatin.

Wood; mount, west of Saanich inlet, Vancouver island, B.C.

Wood: mountain and river, also Wood Mountain post office and R.N.W.M. Police station, southern Saskatchewan. (Not Wood Mountain river.)

Wood. See Jacob.

Woodley; range of mountains, west of Kulleet bay. Vancouver island, B.C.

Wood Mountain river. See Wood river.

Woodroffe; post office and summer resort, Carleton county, Ont. (Not Woodroofe nor Woodruff.)

Woods; lake of the, on international boundary, Kenora and Rainy River districts, Ont.

Woodside; river, tributary to Upper Pelly river, Yukon.

Woods; island, Oyster harbour, east coast of Vancouver island, B.C. (Not Long.)

Woods. See Carroll Wood.

Woodtick; island, St. Clair river, Lambton county, Ont. (Not Fawn.) Woody; river, flowing northeasterly into Swan lake, Man. and Sask. Work. See Wark.

Worthington; ereek, west of Lower Arrow lake. Kootenay district, B.C.

Wotinimata; lake, east of Shabogama lake, Abitibi district, Que. Wreck; point, southwest of Tobermory harbour, Bruce county, Ont.

Wrench; lake, northeast of Carlton, central Saskatchewan.

Wright; creek, near west end of Surprise lake, Cassiar district, B.C. Wright; creek, tributary to Blanche river, Nipissing district, Ont.

Wright; point, north of Goderich, Huron county, Out.

Wright; sound, between Gil and Gribbell islands, Coast district, B.C.

Wunnummin: lake, upper waters of Winisk river, Keewatin.

Wuskatasko; brook, tributary to Grass river, Keewatin.

Wuskwatim; brook and lake, on Burntwood river, Keewatin. (Not Beaver-dam, Ooskootim, nor Waskwatim.)

Wyatt. See Waiatt.

Wynott; point, N.E. of Head harb., St. Margaret bay, Halifax Co., N.S. (Not Smith.) Yahk; mountain, river, and railway station, in S.W. portion of Kootenay district, B.C. Yalakom; game reserve, between north fork of Bridge river and the Fraser, Lillooet district, B.C.

Yawningstone; lake, north of Cormoraut lake, Keewatin.

Yellow; point, northeast of Kulleet bay, Vanconver island, B.C.

Yeo; channel, island, and spit, at entrance to Georgian bay, Manitoulin district, Ont. Yeo; island, southwest of Grenadier island. St. Lawrence river, Leeds county, Ont. (Not Bluff nor Old Bluff.)

Yeth; creek, tributary to Inklin river, Cassiar district, B.C.

Yoho; glacier, lake, park, pass, peak, and river, Rocky mountains, Kootenay district, B.C. (Not Collie glacier, Glacier creek, North Fork river, Upper Emerald lake, nor Wapta lake and pass.)

York; river, trib. to Madawaska R., Hastings and Renfrew Cos, Ont. (Not York Brch.)

York; sound, in southwest portion of Frobisher bay, Franklin.

Yorke; island, Admiralty group, St. Lawrence river, Leeds Co., Ont. (Not Boss Dick.)

Youell; island, east of Hopkins point. Bruce county, Ont.

Young; lake, in S.W. portion of Dalton Tp., Victoria Co., Ont. (Not Montgomery.) Youngs; point, Weller bay, Ameliasburg township, Prince Edward county, Out. Young's. See Limestone.

Yukness; mount, southwest of mount Lefroy, Kootenay district, B.C.

Yukon; river and territory, N.W. Canada. (Not Youcon, Youkon, Kwichpak, &c.)

\mathbf{z}

Zachariah; point, near Dodd narrows, east coast of Vancouver island, B.C.

Zanardi; rapids, at S.W. end of Wainwright basin and S. of Kaien I., Coast dist, B.C. Zemawdza; Indian village, Kitimat arm, Coast district, B.C. (Not Ze-mawd-za.)

Zenazie; creek, south of Gladys lake, Cassiar district, B.C.

Zero; rock, in Haro strait, N.E. of Gordon head, S.E. coast of Vancouver I., B.C.

Zinc; mountain and valley, east of Ice river, Rocky mountains, Kootenay district, B.C.

Zinkan; island, Pine Tree harbour, Bruce county, Ont.

Zwick; island, in the bay of Quinte, Hastings county, Ontario. (Not Zwick's.) Zymoetz; river, tributary to Skeena river, Coast district, B.C. (Not Copper.)

SUPPLEMENT TO THE ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES MARINE

HANDBOOK

OF

INDIANS OF CANADA

Published as an Appendix to the Tenth Report of the Geographic Board of Canada

Reprinted by permission of Mr. F. W. Hodge, Ethnologist-in-Charge, from Handbook of American Indians North of Mexico, published as Bulletin 30, Bureau of American Ethnology, and edited by Frederick Webb Hodge

Reprinted under the direction of James White, F. R. G. S., Secretary, Commission of Conservation

OTTAWA

PRINTED BY C. H. PARMELEE, PRINTER TO THE KING'S MOST EXCELLENT MAJESTY

1913

[No. 21a-1912.]

FOREWORD

In 1907, the Bureau of American Ethnology published Part I (972 pages) of the *Handbook of American Indians North of Mexico* and, in 1910, published Part II (1221 pages). This work which can be correctly characterized as monumental, was begun in 1873, and was completed in 1910, thirty-seven years later. The history of the undertaking is set forth in the Preface and need not be repeated here.

As it contained an enormous amount of information relating to the Indians of Canada, geographical as well as ethnological, it was decided that the Geographic Board would republish this portion. Mr. F. W. Hodge having courteously accorded permission to reprint, the undersigned volunteered to

supervise the publication.

In publishing this work some changes have been made to bring the orthography into accord with English usage. Thus the 'u' has been inserted in such words as colour, favour, labour, etc. The forms discs, boulder, draughts-

man, etc., were substituted for disks, bowlder, draftsman, etc.

As, in the original publication, the articles respecting Treaties, Dept. of Indian Affairs and Indian Reserves dealt almost altogether with the United States, new articles relative to Canadian conditions have been inserted, also a list of Indian reserves in Canada. Where in the original, minor errors of geographical description were noted, the corrections were inserted without special note but historical statements that the editor deemed erroneous are corrected in foot-notes.

A new map showing the territory occupied by the Aborigines of Canada, Alaska and Greenland has been compiled by the editor. It is a revision of the map prepared for the Atlas of Canada, 1906, but was printed before Mr. Stefansson's return from the Arctic. The information furnished by him, has, therefore, been noted in red by an over-printing.

Maps showing the areas in which the Indian title has been quieted by treaties

with the native inhabitants have been compiled for this volume.

It is hoped that this work will form the basis of a more comprehensive publication which will deal with the Indians of Canada in greater detail than the scope of the present work permits.

JAMES WHITE

PREFACE

During the early exploration and settlement of North America, a multitude of Indian tribes were encountered, having diverse customs and languages, Lack of knowledge of the aborigines and of their languages led to many curious errors on the part of the early explorers and settlers: names were applied to the Indians that had no relation whatever to their aboriginal names; sometimes nicknames were bestowed, owing perhaps to personal characteristics, fancied or real; sometimes tribes came to be known by names given by other tribes, which were often opprobrious; frequently the designation by which a tribal group was known to itself was employed, and as such names are oftentimes unpronounceable by alien tongues and unrepresentable by civilized alphabets, the result was a sorry corruption, varying according as the sounds were impressed on Spanish. English, French, Dutch, German, Russian, or Swedish ears. Sometimes, again, bands of a single tribe were given distinctive tribal names, while clans and gentes were often regarded as independent autonomous groups to which separate triba designations likewise were applied. Consequently, in the literature relating to the American Indians, which is practically coextensive with the literature of the first three centuries of the New World, thousands of such names are recorded the significance and application of which are to be understood only after much

The need of a comprehensive work on the subject has been felt ever since scientific interest in the Indians was first aroused. Many lists of tribes have been published, but the scientific student, as well as the general reader, until the present time has been practically without the means of knowing any more about a given confederacy, tribe, clan, or settlement of Indians than was to be gleaned from casual references to it.

The work of which this Handbook is an outgrowth had its inception as early as 1873, when Prof. Otis T. Mason, now of the United States National Museum, began the preparation of a list of the tribal names mentioned in the vast literature pertaining to the Indians, and in due time several thousand names were recorded with references to the works in which they appear. The work was continued by him until after the establishment of the Bureau, when other duties compelled its suspension. Later, the task was assigned to Col. Garrick Mallery, who, however, soon abandoned it for investigations in a field which proved to be his life work, namely, the pictography and sign language of the American Indians. Meanwhile Mr. James Mooney was engaged in compiling a similar list of tribes with their synonymy, classified chiefly on a geographic basis and covering the entire Western Hemisphere—a work begun in 1873 and continued for twelve years before either he or the members of the Bureau of American Ethnology knew of the labours of each other in this field.

Soon after the organization of the Bureau in 1879, the work of recording a tribal synonymy was formally assigned to Mr. Henry W. Henshaw. Up to this time a complete linguistic classification of the tribes north of Mexico, particularly in the West and Northwest, was not possible, since sufficient data had not been gathered for determining their linguistic affinities. Mr. Henshaw soon perceived that a linguistic classification of the Indian tribes, a work long contemplated by Major Powell, must precede and form the basis for a tribal synonymy, and to him, therefore, as a necessary preliminary, was intrusted the supervision of such a linguistic classification. By 1885 the Bureau's researches in this direction had reached a stage that warranted the grouping of practically all the known tribes by linguistic stocks. This classification is published in the Seventh Annual Report of the Bureau, and on it is based, with few exceptions, the present Handbook.

Immediately on the completion of the linguistic classification, the entire force of the Bureau, under Mr. Henshaw's immediate direction, was assigned to the work that had now grown into a Dictionary and Synonymy of the Indian Tribes North of Mexico. As his special field Mr. Henshaw devoted attention to several of the Californian stocks, and to those of the North Pacific coast, north of Oregon, including the Eskimo. To Mr. Mooney were given the great and historically important Algonquian and Iroquoian families, and through his wide general knowledge of Indian history and customs he rendered aid in many other A list of Linguistic Families of the Indian Tribes North of Mexico with Provisional List of the Principal Tribal Names and Synonyms (55 pp. octavo), was at once printed for use by the collaborators of the Bureau in connection with the complete compilation, and, although the list does not include the Californian tribes, it proved of great service in the earlier stages of the work. The 2,500 tribal names and synonyms appearing in this list were taken chiefly from Mr. Mooney's manuscript; the linguistic classification was the result of the work that the Bureau had been conducting under Mr. Henshaw's supervision.

Rev. J. Owen Dorsey assumed charge of the work on the Siouan, Caddoan, and Athapascan stocks; Dr. W. J. Hoffman, under the personal direction of Major Powell, devoted his energies to the Shoshonean family, and Mr. Jeremiah Curtin, by reason of his familiarity with a number of the Californian tribes, rendered direct aid to Mr. Henshaw in that field. Dr. Albert S. Gatschet employed his time and long experience in the preparation of the material pertaining to the Muskhogean tribes of southeastern United States, the Yuman tribes of the lower Colorado drainage and of Lower California, and various smaller linguistic groups. To Col. Garrick Mallery were assigned the French anthors bearing on the general subject. With such aid the work received a pronounced impetus, and before the close of 1885 a large body of additional material had been recorded. Four years later the elaboration of the material pertaining to the Yuman, Piman, Keresan, Tanoan, and Zunian stocks of the extreme Southwest was placed in charge of Mr. F. W. Hodge, who brought it to completion.

The work was continued under Mr. Henshaw's supervision until, in 1893, ill health compelled his abandonment of the task. This is the more to be regretted

as Mr. Henshaw had in course of preparation, a classification and nomenclature of the minor divisions of the linguistic stocks, which is essential to a proper presentation and a clear understanding of the subject. After Mr. Henshaw's relinquishment of the work, Mr. Hodge was given entire charge of it. But other official duties of members of the staff prevented the Handbook as a whole from making marked progress until 1899, when Dr. Cyrus Thomas was intrusted with the task of revising the recorded material bearing on the Algonquian, Siouan, and Muskhogean families.

In 1902 the work on the Handbook was again systematically taken up, at the instance of Secretary Langley, who detailed Mr. Hodge, at that time conneeted immediately with the Smithsonian Institution, to undertake its general editorial supervision. The scope of the subject-matter was enlarged to include the relations between the aborigines and the Government; their archaeology, manners, customs, arts, and industries; brief biographies of Indians of note; and words of aboriginal origin that have found their way into the English It was proposed also to include Indian names that are purely geographic, but by reason of the vast number of these it was subsequently deemed advisable to embody them eventually in an independent work. Moreover, it was provided that the work should be illustrated as adequately as time and the illustrative material available would admit, a feature not originally contemplated. To fully cover this vast field at the present time is impossible, by reason of the fact that research among the native tribes, notwithstanding the extensive and important work that has been accomplished in recent years, has not advanced far beyond the first stage, even when is taken into account the sum of knowledge derived from the researches of the Bureau and of other institutions, as well as ot individuals.

The lack of completeness of our present knowledge of the tribes was, perhaps never better shown than when an attempt was made to carry out the enlarged plan of the Handbook. With its limited force the Bureau could scarcely hope to cover the entire range of the subject within a reasonable time; consequently various specialists not directly connected with the Bureau were invited to assist—an invitation that was accepted in a manner most gratifying. It is owing to the generous aid of these students that a work so complete as the Handbook is intended to be, was made possible, and, to them, the Bureau owes its deep appreciation. That the Handbook has many imperfections there is no doubt, but it is hoped that in future editions the weak points may be strengthened and the gaps filled, until, as researches among the tribes are continued, the compilation will eventually represent a complete summary of existing knowledge respecting the aborigines of northern America.

The scope of the Handbook is as comprehensive as its function necessitates. It treats of all the tribes north of Mexico, including the Eskimo, and those tribes south of the boundary more or less affiliated with those in the United States* It has been the aim to give a brief description of every linguistic stock, confederacy, tribe, subtribe or tribal division, and settlement known to histery or even to tradition, as well as the origin and derivation of every name treated whenever such is known, and to record under each every form of the name and

^{*}Only tribes residing wholly, or in part, in Canada are treated in the within publication.

every other appellation that could be learned. These synonyms, in alphabetic order, are assembled as cross references in Appendix III.

Under the tribal descriptions a brief account of the ethnic relations of the tribe its history, its location at various periods, statistics of population, etc., are included. Accompanying each synonym (the earliest known date always being given) a reference to the authority is noted, and these references form practically a bibliography of the tribe for those who desire to pursue the subject further. It is not claimed that every spelling of every tribal name that occurs in print is given, but it is believed that a sufficient number of forms is recorded to enable the student to identify practically every name by which any group of Indians has been known, as well as to trace the origin of many of the terms that have been incorporated into our geographic nomenclature.

The contributors*, in addition to those who have rendered valued assistance by affording information, correcting proofs, and in other ways, are as follows, the names being arranged in the alphabetical order of the initials attached to the signed articles:

NOTE

As the orthography of the original did not, in all cases, conform to the decisions of the Geographic Board of Canada, the following names have been changed, as stated

> Anahim, not Anaham. Antigonish, not Antigonishe. Athabaska, not Athabasca. Chemainus, not Chemanus. Chilliwak, not Chilliwack. Hamamiou, not Hamameou. Keremeos, not Keremeus. Kispiox, not Kishpiyeoux. Kitimat, not Kitamat. Kitsalas, not Kitzilas. Kitsumgallum, not Kitzimgaulum Kitwinga, not Kitwingach. Lahare, not Le Have. Mattawa, not Mattawan. Muncey, not Munceytown. Muskwaro, not Musquarro. Napisipi, not Nabisippi. Naskapi, not Nascapee. Natashkwan, not Natashquan. Nipisiguit not Nipigiguit. Pachenaht, not Pacheenaht. Semiamu, not Semiahmoo. Sumas, not Sumass. Tadoussac, not Tadousac. Timiskaming, not Temiscaming. Windigo, not Weendigo.

HANDBOOK OF INDIANS OF CANADA

Abbatotine ('bighorn people'). A Nahane tribe living in upper Pelly, Macmillan, and Stewart r. valleys, Yukon.

Abbāto-tenā'.--Dall in Cont. N. A. Ethnol , 1, 32, 1877. Abba-to-tenah.-Dall in Proc. A. A. A. S., 271, 1870. Abbato-tinneh.-Bancroft, Nat. Races, III, 587, 1882. Affats-tena.-Ibid , J. 149 (misprint), Ab-bah-to dln-ne.-Hardisty in Smithson. Rep. 1866, 311, 1872. Ambahtawoot.-Prichard, Phys. Hist, v, 377, 1847. Ambah-tawut-dinni.-Latham in Trans. Philol. Soc. Lond., 69, 1856 (trans. 'mountain sheep men'). Ambata-ut' tinè.-Richardson, Arct Exped., II, 7, 1851. Am-ba-ta-ut' tiné.—Petitot, Diet. Dênê Dindjié, xx, 1876. Ambatawwoot.—Schooleraft, Ind. Tribes, II. 28, IS52. Ambawtamoot.--Ibid, III, 525, 1853, Ambawtawhoot-dinneh .-- Franklin, Narr, 11, 84, 1824. Ambawtawhoot Tinneh.-Bancroft, Nat. Races, v, 640, 1882. Ambawtawoot.—Gallatin in Trans. Am. Antiq. Soc., 11, 19, 1836. Ambawtowhoot.-Balbi, Atlas Ethnog., 821, 1826. Mountain Sheep Men .- Latham in Trans. Philol. Soc. Lond., 69, 1856. Sheep Indians.-Franklin, Narr., II, 84, 1824. Sheep People.-Richardson, op. cit.

Abitibi (abi'ta, 'half,' 'middle,' 'intermediate'; bi, a secondary stem referring to a state or condition, here alluding to water; -q, a locative suffix: hence 'halfway-across water.' referring to the situation of Abitibi lake.—W. Jones). A little known Algonkin band whose habitat has been the shores of Abitibi lake. Ont. The first recorded notice of them is in the Jesuit Relation for 1640. It is said in the Relation of 1660 that the Iroquois had warred upon them and two other tribes of the same locality. Du Lhut (1684) includes them in the list of nations of the region N. of L. Superior whose trade it was desirable should be turned from the English of Hudson bay to the French. Chauvignerie (1736) seems to conneet this tribe, estimated at 140 warriors, with the Têtes de Boule. He mentions as totems the partridge and the eagle. In 1906, they ceded their lands by treaty No. 9 and are now under the Temiskaming agency. In 1911, the pop. was 278. (j. m. c. t.)

Abbetikls.—Chauvignerie (1736) quoted by Schoolcraft, Ind. Tribes, 111, 556, 1853. Abbitibbes.—Keane in Stanford, Compendium, 498, 1878. Abitibles.—Harris, Voy. and Trav., 1, map. 1705. Abittibbes.—Walch, map. 1805. Abittibbe.—Chauvignerie (1736) in N. Y. Doc. Hist., 1x, 1054, 1855. Outabitibek.—Jesuit Rel 1660, 111, 12, 1858. Outabytibls.—Bacqueville de la 17877—1

Potherie, n. 49, 1753. Outatibes.—Harris, Voy. and Trav., r. map, 1705. Tabitibis.—Du Lhut (1684) in Margry, Dec., vt, 51, 1886. Tabittibis.—Chauvignerie (1736) in N. Y. Doc. Hist., rx, 1053, 1855. Tabittikis.—Schoolcraft, Ind. Tribes, rm, 555, 1853. Tibitibis.—Hennepin, New Disc, map., 1698.

Abnaki. (Wābŭna'ki, from wābūn, a term associated with 'light,' 'white,' and refers to the morning and the east; a'ki 'earth,' 'land'; hence Wābāna'ki is an inanimate singular term signifying 'eastland,' or 'morning-land,' the elements referring to animate dwellers of the east being wanting.—Jones). A name used by the English and French of the colonial period to designate an Algonquian confederacy centreing in the present state of Maine, and by the Algonquian tribes to include all those of their own stock resident on the Atlantic seaboard. more particularly the "Abnaki" in the N. and the Delawares in the S. More recently it has been applied also to the emigrant Oneida. Stockbridges, and Munsee about Green bay. Wis. By the Puritans they were generally called Tarrateens, a term apparently obtained from the southern New England tribes; and though that is the general conclusion of modern authorities, there is some doubt as to the aboriginal origin of this term. In later times, after the main body of the Abnaki had removed to Canada, the name was applied more especially to the Penobscot tribe. The Iroquois called them Owenunga, which seems to be merely a modification of Abnaki, or Abnaqui, the name applied by the French and used by most modern writers. The form Openango has been used more especially to designate the eastern tribes. Maurault (Hist. des Aben., 2, 1866) says: "Some English authors have ealled these savages Wabanoaks, 'those of the east'; this is the reason they are called 'Abenakis' by some among us. This name was given them because they were toward the east with reference to the Narragansetts."

Ethnic relations.—In his tentative arrangement Brinton (Len. Leg., 11, 1885) brings into one group the Nascapee, Miemae, Malecite. Etchimin, and Abnaki, but this is more of a geographic than a linguistic grouping. Vetro-

mile (Abnakis, 20, 1866), following other authors, says that we should "embrace under this term all the tribes of the Algie [Algonquian] family, who occupy or have occupied the E. or N. E. shore of North America; thus, all the Indians of the seashores, from Virginia to Nova Scotia, were Abnaki." Manrault gives the following as the principal tribes of the Abnaki confederacy: Kanibesinnoaks (Norridgewock in part; Patsuikets (Sokoki in part); Sokouakiaks (Sokoki); Nurhantsuaks (Norridgewock); Pentagoets (Penobscot); Etemankiaks (Etchimin) Ouarastegouiaks (Malecite), the name Abnaki being applied in the restricted sense to the Indians of Kennebec r. All these tribes spoke substantially the same language, the chief dialectal differences being between the Etchimin and the other tribes of the group. The Etchimin, who formed a subgroup of the Abnaki confederacy, included the Passamaquoddy and Malecite. Linguistically the Abnaki do not appear to be more closely related to the Micmac than to the Delaware group, and Dr. William Jones finds the Abnaki closely related to the central Algonquian languages. In customs and beliefs they are more nearly related to the Micmae, and their ethnic relations appear to be with the tribes N. of the St. Lawrence.

History.—The history of the Abnaki may be said to begin with Verrazano's visit in 1524. The mythical accounts of Norumbega (q. v.) of the early writers and navigators finally dwindled to a village of a few bark-covered huts under the name Agguncia, situated near the mouth of Penobscot r., in the country of the Abnaki. In 1604, Champlain ascended the Penobscot to the vicinity of the present Bangor, and met the "lord" of Norumbega, doubtless an Abnaki chief. From that time the Abnaki formed an important factor in the history of the region now embraced in the state of Maine. From the time of their discovery until their partial withdrawal to Canada they occupied the general region from the St. John to the Saco: but the earliest English accounts indicate that about 1605-20 the S. W. part of the coast of Maine was occupied by other Indians, whose chief seat was near Pemaquid, and who were at war with the Abnaki, or Tarrateen, as the English ternied them, who were more to the N.; but these other tribes were finally conquered by the Abnaki and probably absorbed by them. Who these Indians were is unknown. The Abnaki formed an early attachment for the French, chiefly through the influence of their missionaries, and carried on an almost constant war with the English until the fall of the French power in America. The accounts of these struggles during the settlement of Maine are familiar episodes in American history. As the whites encroached on them the Abnaki gradually withdrew to Canada and settled chiefly at Bécancour and Sillery, the latter being afterward abandoned by them for St. Francis, near Pierreville, Quebec. The Penobscot, Passamaquoddy, and Malecite, however, remained in their an ient homes, and, in 1749, the Penobscot, as the leading tribe, made peace with the English, accepting fixed bounds. Since that period the different tribes have gradually dwindled into insignificance. The descendants of those who emigrated from Maine together with remnants of other New England tribes, are now at St. Francis and Bécancour, in Quebec, where, under the name of Abnaki, they numbered 340 in 1911. In 1903 the Malecite. or Amalicite, were numbered at 801 in several villages in New Brunswick and Quebec, with about 625 Penobscot and Passamaquoddy in Maine. The present Penobscot say they number between 300 and 400, while the Passamaquoddy claim as many as 800 souls.

Customs and beliefs.—According to the writers on early Maine, the Abnaki were more gentle in manners and more docile than their western congeners. Yet they were implacable enemies and, as Maurault states, watched for opportunities of revenge, as did other Indians. Notwithstanding Vetromile's statement to the contrary, if Maurault's assertion (Hist. Abenakis, 25, 1866) applies to this tribe, as seems evident, they, like most other tribes, were guilty of tortnring their prisoners, except in the case of females, who were kindly treated. Although relying for subsistence to a large extent on hunting, and still more on fishing, maize was an important article of diet, especially in winter. Sagard states that in his day they cultivated the soil in the manner of the Huron. They used the rejected and superfluous fish to fertilize their fields, one or two fish being placed near the roots of the plant. Their houses or wigwams were conical in form and covered with bireh-bark or with woven mats, and several families occupied a single dwelling. Their villages were, in some cases at least, inclosed with palisades. Each village had its council house of considerable size, oblong in form and roofed with bark; and similar structures were used by the males of the village who preferred to club together in social

fellowship. Polygamy was practised but little, and the marriage ceremony was of the simplest character; presents were offered, and on their acceptance marriage was consummated. Each tribe had a war chief, and also a civil chief whose duty it was to preserve order, though this was accomplished through advice rather than by command. They had two councils, the grand and the general. The former, consisting of the chiefs and two men from each family, determined matters that were of great importance to the tribe, and pronounced sentence of death on those deserving that punishment. The general council, composed of all the tribe, including males and females, decided questions relating to war. The Abnaki believed in the immortality of the soul. Their chief deities were Kechi Niwaskw and Machi Niwaskw, representing, respectively, the good and the evil; the former, they believed, resided on an island in the Atlantic; Machi Niwaskw was the more powerful. According to Maurault they believed that the first man and woman were created out of a stone, but that Kechi Niwaskw, not being satisfied with these, destroyed them and created two more out of wood, from whom the Indians are descended. They buried their dead in graves excavated in the soil.

Tribal divisions.—The tribes included in the confederacy as noted by Maurault have already been given. In a letter sent by the Abnaki in 1721, to the governor of New England their divisions are given as follows: Narantsouuk (Norridgewock), Pentugouet (Penobscot), Narakamigou (Rocameca), Anmissoukanti (Amaseconti), Muanbissek, Pegouakki (Pequawket, N. H.), Medoktek (Medoctee), Kwupahag, Pesmokanti (Passamaquoddy), Arsikantegou (Arosagnntacook), Ouanwinak (Wewenoc, s. edge of N. H.). The following is a full list of Abnaki tribes: Accominta, Amaseconti, Arosaguntacook, Etchimin, Malecite, Missiassik, Norridgewock (the Abnaki in the most limited sense), Passamaquoddy, Penobscot, Pequawket Rocameca, Sokoki, and Wewenoc. The bands residing on St. Croix and St. John rs. spoke a different dialect from those to the southward, and were known collectively as Etchimin. They are now known as Passamaquoddy and Malecite. Although really a part of the Abnaki, they were frequently classed as a distinct body, while on the other hand the Pennacook tribes, although distinct from the Abnaki, were often classed with them on account of their connection during the Indian wars and after their removal to Canada. According to Morgan they had fourteen gentes: 1, Mals'-sūm, Wolf; 2, Pis-suh', Black Wildcat; 3, Ah-weh'-soos, Bear; 4, Skooke, Snake; 5, Ah-lunk-soo. Spotted Animal; 6, Ta-mä-kwa, Beaver; 7, Maguh-le-loo', Caribou; 8, Kä-bäh'-seh, Sturgeon; 9, Moos-kwä-suh', Muskrat; 10, K'-che-gä-gong'-go, Pigeon Hawk; 11, Meh-ko-à', Squirrel; 12, Che-gwà'-lis, Spotted Frog; 13, Koos-koo', Crane; 14, Mä-dà'-weh-soos, Porcupine. According to Chauvignerie their principal totems were the pigeon and the bear, while they also had the partridge, beaver, and otter totems.

The Abnaki villages, so far as their names have been recorded, were Amaseconti, Ammoncongan, Aquadocta (?), Arosaguntacook, Asnela, Aucocisco, Bagaduce, Bécancour, Calais (Passamaquoddy) Gunasquamekook (Passamaquoddy), Imnarkuan (Passamaquoddy), Kennebec, Ketangheanycke, Lincoln Island, Masherosqueck, Mattawamkeag (Penobscot), Mattinacook (Penobscot), Mecadacut, Medoctee (Malecite), Meecombe, Missiassik (Missiassik), Moratiggon (?), Moshoquen, Muanbissek (?), Muscongus, Negas, Negusset (?), Norridgewock, Norumbega, Okpaak, (Malecite) Olamon (Penobscot), Old Town (Penobscot), Ossaghrage, Ouwerage, Pasharanack, Passadumkeag (Penobscot), Passamaquoddy (village?), Pauhuntanuc, Pemaquid, Penobscot, Pequawket, Pocopassum, Precaute, Rocameca, Sabino, Sagadahoc, Sainte Anne (Malecite), St Francis, Satquin, Sebaik (Passamaquoddy), Segocket, Segotago, Sillery, Sokoki (village?), Taconnet, Tobique (Malecite), Unvjaware, Viger (Malecite), Wabigganus, Waccogo, Wewenoe (village?). (J. M. C. T.)

Y., II, 164, 1829 (used as synonymous with Lenmi Lenape for tribes of eastern Pennsylvania, New Jersey, New York, Delaware, and Connecticut¹. Wobanaki.—5 Kidder in Maine Hist. Soc. Coll., vi, 243, 1859 title of spelling book of 1830).

Abrading Implements. In shaping their nnmerous implements, utensils, and ornaments of stone, wood, bone, shell, and metal, the native tribes were largely dependent on abrading implements, of which there are many varieties. Of first importance are grinding stones and whetstones of more or less gritty rock, while less effectual are potsherds and rasp-like surfaces, such as that of the skin of the dogfish. Of the same general class are all sawing, drilling, and scraping tools and devices, which are described under separate heads. The smoothing and polishing implements into which the grinding stones imperceptibly grade are also separately treated. The smaller grinding stones were held in the hand, and were usually unshaped fragments, the arrowshaft rubber and the slender nephrite whetstone of the Eskimo being exceptions. The larger ones were slabs, boulders, or fragments. which rested on the ground or were held in the lap while in use. In many localities exposed surfaces of rock in place were utilized, and these as well as the movable varieties are often covered with the grooves produced by the grinding work. These markings range from narrow, shallow lines, produced by shaping pointed objects, to broad channels made in shaping large implements and utensils. Reference to the various forms of abrading implements is made in numerous works and articles treating of the technology of the native tribes. (W. H. H.)

Abraham, also called Little Abraham. A Mohawk chief of considerable oratorical power who succeeded the so-called King Hendrick after the battle of L. George in 1755, in which the latter was killed. He espoused the English cause in the American Revolution, but was of a pacific character. He was present at the last meeting of the Mohawk with the American commissioners at Albany in Sept., 1775, after which he drops from notice. He was succeeded by Brant. (c. T.)

Achigan (ŭ'shigŭn, sing. anim. noun.—Wm. Jones). A Freneh-Canadian name of the small-mouthed black bass (Micropterus dolomicu), occasionally found in English writings. The word is old in Freneh, Hennepin using it in 1688. Ashigan is the name of this fish in Chippewa and closely related Algonquian dialects. (A. F. C.)

Achiligouan. A tribe or band living between 1640 and 1670 on the N. shore of L. Huron, about the mouth of French r, and westward nearly to Sault Ste. Marie. In 1670 they were attached to the mission at the Sault. In the Jesuit Relation of 1640 their position is given on the N. shore of L. Huron, at the mouth of French r. The Amikwa are mentioned in the same connection as residing on this stream. In the Relation of 1658 they appear to be placed farther N. on the river, and it is stated that they traded with the Cree. In the Relation of 1670 they are said to have been attached to the mission of Sault Ste. Marie, but only as going there to fish. It is probable that they were a Chippewa or a Nipissing band. (J. M. C. T.)

Achiligouans.—Heriot, Travels, 194, 1807. Achiligoülane.—Jesuit Rel., 1670, 79, 1858. Achirigouans.—Ibid., 1646, 81. Archirigouan.—Ibid., 1643, 61, 1858. Atchiligoüan.—Ibid., 1640, 34, 1858.

Acous. The principal village of the Chaicelesaht, situate on Battle bay, Ououkinish inlet, W. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Adario. A Tionontate chief, known also as Kondiaronk, Sastaretsi, and The Rat. He had a high reputation for bravery and sagacity, and was courted by the French, who made a treaty with him in 1688 by which he agreed to lead an expedition against the Iroquois, his hereditary enemics. Starting out for the war with a picked band, he was surprised to hear. on reaching Cataracouy,* that the French were negotiating peace with the Iroquois, who were about to send envoys to Montreal with hostages from each tribe. Concealing his surprise and chagrin, he secretly determined to intercept the embassy. Departing as though to return to his own country in compliance with the admonition of the French commandant, he placed his men in ambush and made prisoners of the members of the Iroquois mission, telling the chief of the embassy that the French had commissioned him to surprise and destroy the party. Keeping only one prisoner to answer for the death of a Huron who was killed in the fight, he set the others free, saving that he hoped they would repay the French for their treachery. Taking his captive to Michilimackinae, he delivered him over to the French commander, who put him to death, having no knowledge of the arrangement of peace. He then released a captive Iroquois whom he had

long held at his village that he might return to inform his people of the act of the French commander. An expedition of 1,200 Iroquois fell upon Montreal Aug. 25, 1689, when the French felt secure in the anticipation of peace, slew hundreds of the settlers and burned and sacked the place. Other posts were abandoned by the French, and only the excellent fortifications of others saved them from being driven out of the country. Adario led a delegation of Huron chiefs who went to Montreal to conclude a peace, and, while there, he died, Aug. 1, 1701, and was buried by the French with military honours. (F. H.)

Adirondack (Mohawk: Hatiron'tāks, 'they eat trees', a name given in allusion to the eating of the bark of trees in time of famine,—Hewitt). The Algonquian tribes N. of the St. Lawrence with which the Iroquois were acquainted, particularly those along Ottawa and St. Maurice rs., who were afterward settled at Three Rivers and Oka, Quebec. Jefferys in 1761, seems to apply the term to the Chippewa. (J. M.)

Adlet. A fabulous people that the Eskimo believe to be descended from a dog. A woman married a red dog and bore five dogs, which she cast adrift in a boat, and also five children of monstrous shape. The dogs reached the other side of the ocean and begot the white people. The monsters engendered the Adlet, terrible beings, identified by the Labrador Eskimo with the Indians, of whom they formerly lived in dread, also by the Eskimo of the

^{*}Fort Cataraqui-modern Kingston, Ont

western shores of Hudson bay, who, however, called this misbegotten and bloodthirsty race Erqigdlit. The Eskimo of Greenland and Baffin island, having no Indian neighbours, pictured the tribe of monsters with human heads, arms, and trunks joined to the hind legs of dogs. See Boas (1) in Trans. Roy. Soc. Can., v., sec. 2, 35, 1888; (2) in 6th Rep. B. A. E., 640, 1888.

Adoption. An almost universal political and social institution which originally dealt only with persons but later with families, clans or gentes, bands, and tribes. It had its beginnings far back in the history of primitive society and, after passing through many forms and losing much ceremonial garb, appears today in the civilized institution of naturalization. In the primitive mind the fundamental motive underlying adoption was to defeat the evil purpose of death to remove a member of the kinship group by actually replacing in person the lost or dead member. In primitive philosophy, birth and death are the results of magic power; birth increases and death decreases the orenda (q. v.) of the clan or family of the group affected. In order to preserve that magic power intact, society, by the exercise of constructive orenda, resuscitates the dead in the person of another in whom is embodied the blood and person of the dead. As the diminution of the number of the kindred was regarded as having been caused by magic power—by the orendo of some hostile agency so the prevention or reparation of that loss must be accomplished by a like power, manifested in ritualistic liturgy and ceremonial. From the view-point of the primitive mind adoption serves to change, by a fiction of law, the personality as well as the political status of the adopted person. For example, there were captured two white persons sisters by the Seneca, and instead of both being adopted into one clan, one was adopted by the Deer and the other by the Heron clan, and thus the blood of the two sisters was changed by the rite of adoption in such wise that their children could intermarry. Furthermore, to satisfy the underlying concept of the rite, the adopted person must be brought into one of the strains of kinship in order to define the standing of such person in the community, and the kinship

name which the person receives declares his relation to all other persons in the family group; that is to say, should the adopted person be named son rather than uncle by the adopter, his status in the community would differ accordingly. From the political adoption of the Tuscarora by the Five Nations, about 1726, it is evident that tribes, families, clans. and groups of people could be adopted like persons. A fictitious age might be conferred upon the person adopted, since age largely governed the rights, duties, and position of persons in the community. In this wise, by the action of the constituted authorities, the age of an adopted group was fixed and its social and political importance thereby determined. Owing to the peculiar circumstances of the expulsion of the Tuscarora from North Carolina it was deemed best by the Five Nations. in view of their relation to the Colonies at that time, to give an asylum to the Tuscarora simply by means of the institution of adoption rather than by the political recognition of the Tuscarora as a member of the League. Therefore the Oncida made a motion in the federal eouncil of the Five Nations that they adopt the Tuscarora as a nurshing still swathed to the cradleboard. This having prevailed, the Five Nations, by the spokesman of the Oneida, said: "We have set up for ourselves a cradle-board in the extended house," that is, in the dominions of the League. After due probation the Tuscarora, by separate resolutions of the council, on separate motions of the Oneida, were made successively a boy, a young man, a man, an assistant to the official woman cooks, a warrior, and lastly a peer, having the right of chiefship in the council on an equal footing with the chiefs of the other tribes. From this it is seen that a tribe or other group of people may be adopted upon any one of several planes of political growth, corresponding to the various ages of human growth. This seems to explain the problem of the alleged subjugation and degradation of the Delawares by the Iroquois, which is said to have been enacted in open council. When it is understood that the Five Nations adopted the Delaware tribe as men assistants to the official cooks of the League it becomes clear that no taint of slavery and degradation was designed to be given by the act. It merely made the Delawares probationary heirs to citizenship in the League, and citizenship would be conferred upon them after suitable tutclage. In this they were treated with much greater consideration than were the Tusearora, who are of the language and lineage of the Five Nations. The Delawares were not adopted as warriors or chiefs, but as assistant cooks; neither were they adopted, like the Tusearora, as infants, but as men whose duty it was to assist the women whose official function was to cook for the people at public assemblies. Their office was hence well exemplified by the possession of a corn pestle, a hoe, and pettieoats. This fact, misunderstood, perhaps intentionally misrepresented, seems to explain the mystery eoncerning the "making women" of the Delawares. This kind of adoption was virtually a state of probation, which could be made long or short.

The adoption of a chief's son by a fellow chief, eustomary in some of the tribes of the N. W. coast, differs in motive and effect from that defined above, which concerns persons alien to the tribe, upon whom it confers citizenship in the clan, gens and tribe, as this deals only with intratribal persons for the purpose of conferring some degree of honour upon them rather than citizenship and political authority.

The Iroquois, in order to recruit the great losses incurred in their many wars, put into systematic practice the adoption not only of individuals but also of entire clans and tribes. The Tutelo, the Saponi, the Nanticoke, and other tribes and portions of tribes were forced to incorporate with the several tribes of the Iroquois confederation by formal adoption.

* * * * * * * * (J. N. B. H.)

Adornment. The motive of personal adornment, aside from the desire to appear attractive, seems to have been to mark individual. tribal, or eeremonial distinction. The use of paint on the face, hair, and body, both in colour and design, generally had reference to individual or elan beliefs, or it indicated relationship or personal bereavement, or was an aet of courtesy. It was always employed in eeremonies, religious and secular, and was an accompaniment of gala dress donned to honour a guest or to celebrate an oceasion. The face of the dead was frequently painted in accordance with tribal or religious symbolism. The practiee of painting was widespread and was observed by both sexes. Paint was also put on the faces of adults and children as a protection against wind and sun. Plucking the hair from the face and body was generally practised Deformation, as head flattening, and tattooing,

according to some writers, were personal embellishments. Fats were used to beautify the hair and to ceremonially anoint the face and body. Sweet grass and seeds, as those of the columbine, served as perfume.

Ear ornaments were a mark of family thrift, wealth, or distinction, and indicated honour shown to the wearer by his kindred. Ceremonies, occasionally religious in character, some of which seem to relate to sacrificial rites, usually attended the boring of the ear. Each perforation cost the parent the child or the kindred of the adult gifts of a standard value, and sometimes these perforations extended round the entire rim of the ear. The pendants were of haliotis or other valued shell, or were made of metal or bone, or were long woven bands of dentalium which reached nearly to the waist.

Labrets were used by the Eskimo, the N. Pacific coast tribes, and some of the Gulf coast Indians. Among some the labret was worn only by men, in some by women, and where worn by both sexes it was of two different styles. At puberty an incision was made in the lip or at the corner of the mouth, and a slender pin was inserted, which was replaced by larger ones until the opening could admit a stud of the size desired. The Eskimo, when travelling, removed his labret to prevent freezing of the lip, but inserted it when entering a village. Among some of the northern and southern tribes the septum of the nose was pierced, and feathers, bark, or rings were inserted.

Elaborate ornamentation of garments was reserved for the gala dress. The Eskimo combined bits of fur of different colours and quality in a pleasing pattern for trimming their garments, and fishskin dyed in brilliant colours and the plumage of birds were also used for the same purpose. Outer garments were made of the breasts of sea birds skilfully joined together. Among the inland tribes the earlier designs for porcupine and feather quillwork were reproduced later in beads of European manufacture. Feathers were widely used to decorate the robes and garments of warriors and other distinguished persons, and were woven into mantles by the cliff-dwellers and by tribes formerly living near the Gulf of Mexico. Among the Plains Indians the milk teeth of the elk were the most costly of adornments. They were fastened in rows on a woman's tunie, giving the garment a value of several hundred dollars.

Headbands, armlets, bracelets, belts, necklaces, and garters, of metal, seeds, embroidered buckskin, peculiar pelts, or woven fibre, had their practical use, but were made decorative, and often were symbolic. Archeological testimony shows that sea-shell beads, worn as neeklaces or woven into belts, were widely used, and they probably found their way into the interior through barter or as ceremonial or friendly gifts. Wampum belts figured largely in the official transactions between the early settlers and the eastern tribes. Discs cut from the conch shell were worn as ornaments and were also offered in certain religious rites; they ranked among the northern tribes as did the turquoise among the people of the S. W. With the Plains Indians a necklace of bear's claws marked the man of distinction. The head-dress varied in different parts of the country and was generally significant of a man's kinship, ceremonial office, rank, or totenic dependence, as was also the ornamentation upon his weapons and his shield.

In the S. W. blankets bordered with a design woven in colours were used on ceremonial oceasions, and with the broad belts, white robes, and fringed sashes worn at marriage are interesting specimens of weaving and colour treat-The brilliant Navaho blankets with ment. their eosmie symbols are well known. most remarkable example of the native weaver's skill is the ceremonial blanket and apron of the Chilkat tribe of Alaska; it is made of the wool of the mountain goat, dyed black, yellow, and green with native dyes over a warp of cedarbark strings. A design of elaborate totemic forms covered the entire space within the border lines, and the ends and lower edge were heavily fringed. According to Boas these garments probably originated among the Tsimshian. In the buffalo country women seldom ornamented their own robes, but embroidered those worn by men. Sometimes a man painted his robe in accordance with a dream, or pictured upon it a yearly record of his own deeds or of the prominent events of the tribe. Women wore the buffalo robe differently from the men, who gathered it about the person in a way that emphasized their action or the expression of emotion.

It was common for a tribe to have its peculiar cut and decoration of the moceasin, so that a man's tribe was proclaimed by his foot gear. The war shirt was frequently painted to represent the wearer's prayer, having the design on the back for protection and one on the breast

for victory. The shirt was occasionally deccrated with a fringe of human hair, locks being generally contributed by female relatives; is rarely displayed war trophies. The mosimposing article of the warrior's regalia was the bonnet with its crown of golden-eagle feathers. Before the introduction of the horse the flap at the back rarely extended below the waist, but when the warriors got to be mounted "the spine," with its ruff of feathers, was so lengthened as to equal or exceed the height of the man. Song and ceremony accompanied the making of a war bonnet by warriors of the tribe. and a war honour was recounted upon each feather before it was placed in position. A bonnet could not be made without the consenof warriors, and it stood as a record of tribal valour as well as a distinction granted to a man by his fellow tribesmen.

The gala and ceremonial dress of the Pueble tribes of the S. W., of those formerly dwelling on the plains, and of those of the Pacific coast, was replete with ornamentation which, either in design or material, suggested rites or past experiences and thus kept alive beliefs and historic memories among the people. Such were the woman's dress of the Yurok of California: the fringe of the skirt was wrapped with the same vegetal materials as she used in her basketry, and her apron was an elaborate network of the same on which depended strands of shells with pendants cut from the abalone. In the same connection may be mentioned the manner of dressing the hair of a Hopi maiden: the whorl on each side of her head symbolizes the flower of the squash, a sacred emblem of the tribe. The horses of warriors were often painted to indicate the dreams or the war experiences of their riders. Accoutrements were sometimes elaborately ornamented.

Consult Abbott, Prim. Indus., 1881; Beauchamp (1) in Bull. N. Y. State Mus., no. 41, 1901, (2) ibid., no. 73, 1903; Boas (1) in Rep. Nat. Mus. 1895, 1897, (2) in Mem. Am. Mus. Nat. Hist., Anthr. 1, pt. 1, 1898; Dall in 3d Rep. B. A. E., 1884; Fewkes in 19th Rep. B. A. E., 1900; Fletcher in Pubs. Peabody Mus.; Matthews (1) in Mem. Am. Mus. Nat. Hist., vi, 1903, (2) in 3d Rep. B. 2 GEORGE V., A. 1912

Adzes. Cutting, scraping, or gouging implements in prehistoric and early historic times, made usually of stone, but not infrequently of shell, bone, or copper. Iron and steel are much used by the tribes at the present day. The blade resembles that of a celt, although often somewhat curved by chipping or by grinding at the proper angle to make it most effectual. Some are grooved for hafting, after the manner of the grooved axe, but the groove does not extend over the flat face against which the handle is fastened. The hafting takes various forms according to the shape and size of the blade. The adze is primarily a woodworking tool, but it serves also for scraping, as in the dressing of skins and in other arts, and, no doubt also on occasion, for digging. The edge of the primitive adze was probably not sharp enough to make it effectual in working wood save in connection with the process of charring. The distribution of this implement was very general over the area north of Mexico but it probably reached its highest development and specialization among the woodworking tribes of the N. Pacific coast. The scraper and the gouge have many uses in common with the adze.

For various examples of the adze, ancient and modern, consult Beauchamp in Bull. N. Y. State Mus., no. 18, 1897; Fowke in 13th Rep. B. A. E., 1896; Moorehead, Prehist. Impls., 1900; Murdoch in 9th Rep. B. A. E., 1892; Nelson in 19th Rep. B. A. E., 1899; Niblack in Rep. Nat. Mus. 1888, 1890; Rau in Smithson, Cont., XXII, 1876. (W. H. H. G. F.)

Agomiut ('people of the weather side'). A tribe of Eskimo inhabiting a region of N. Baffin island bordering on Lancaster sd., consisting of two subtribes—the Tununirusirmiut in the W., about Admiralty inlet, and the Tununirmiut in the E., about Eclipse sd. They hunt the narwhal and the white whale in Eclipse sd., and in search of seals sometimes cross the ice on sledges to Devon island, there coming in contact with the natives of Ellesmere island.

Agriculture. An opinion long prevailed in the minds of the people that the Indians N. of Mexico were, previous to and at the time Europeans began to settle that part of the continent, virtually nomads, having no fixed abodes, and hence practising agriculture to a very limited extent. Why this opinion has been entertained by the masses, who have learned it from tales and traditions of Indian

life and warfare as they have been since th' establishment of European colonies, can be readily understood, but why writers who have had access to the older records should thus speak of them is not easily explained, when these records, speaking of the temperate regions, almost without exception notice the fact that the Indians were generally found, from the border of the western plains to the Atlantic, dwelling in settled villages and cultivating the soil. De Soto found all the tribes that he visited, from the Florida peninsula to the western part of Arkansas, cultivating maize and various other food plants. The early voyagers found the same thing true along the Atlantic from Florida to Massachusetts. Capt. John Smith and his Jamestown colony, indeed all the early colonies, depended at first very largely for subsistence on the products of Indian cultivation. Jacques Cartier, the first European who ascended the St. Lawrence, found the Indians of Hochelaga (Montreal id.) cultivating the soil. "They have," he remarks, "good and large fields of corn." Champlain and other early French explorers testify to the large reliance of the Iroquois on the cultivation of the soil for subsistence. La Salle and his companions observed the Indians of Illinois, and thence southward along the Mississippi, cultivating and to a large extent subsisting on maize.

Sagard, an eyewitness of what he reports, says, in speaking of the agriculture of the Hurons in 1623-26, that they dug a round place at every 2 feet or less, where they planted in the month of May in each hole nine or ten grains of corn which they had previously selected, culled, and soaked for several days in water. And every year they thus planted their corn in the same places or spots, which they renovated with their small wooden shovels. He indicates the height of the corn by the statement that he lost his way quicker in these fields than in the prairies or forests (Hist. du Canada, 1, 265-266, 1636, repr. 1866).

Indian corn, the great American cereal, "was found in cultivation from the southern extremity of Chile to the 50th parallel of N. latitude" (Brinton, Myths of the New World, 22, 1868). "All the nations who inhabit from the sea as far as the Illinois, and even farther, carefully cultivate the maize corn, which they make their principal subsistence" (Du Pratz, Hist. La., 11, 239, 1763). "The whole of the tribes situated in the Mississippi valley, in Ohio and the lakes reaching on both sides of

the Alleghanies, quite to Massachusetts and other parts of New England, cultivated Indian corn. It was the staple product" (Schooleraft, Ind. Tribes, 1, 80, 1851).

The great length of the period previous to the discovery during which maize had been in cultivation is proved by its differentiation into varieties, of which there were four in Virginia; by the fact that charred corn and impressions of corn on burnt clay have been found in the mounds and in the ruins of prehistoric pueblos in the S. W.; by the Delaware tradition; and by the fact that the builders of the oldest mounds must have been tillers of the soil.

Some idea of the extent of the cultivation of maize by some of the tribes may be gained from the following estimates: The amount of corn (probably in the ear) of the Iroquois destroyed by Denonville in 1687 was estimated at 1,000,000 bushels (Charlevoix, Hist. Nouv. Fr., 11, 355, 1744; also Doc. Hist. N. Y., 1, 238, 1849). According to Tenti, who accompanied the expedition, they were engaged seven days in cutting up the corn of 4 villages. Gen. Sullivan, in his expedition into the Iroquois country, destroyed 160,000 bushels of corn and cut down the Indian orchards: in one orchard alone 1,500 apple trees were destroyed (Hist. N. Y. During the Revolutionary War, 11, 334. 1879). Gen. Wayne, writing from Grand Glaize in 1794, says: "The margins of these beautiful rivers—the Miami of the Lake and the Au Glaize-appear like one continuous village for a number of miles, both above and below this place; nor have I ever before beheld such immense fields of corn in any part of America from Canada to Florida" (Manypenny, Ind. Wards, 84, 1880 c.

If we are indebted to the Indians for maize, without which the peopling of America would probably have been delayed for a century; it is also from them that the whites learned the methods of planting, storing, and using it. The ordinary corncribs, set on posts, are copies of those in use among the Indians, which Lawson described in 1701 (Hist. Car., 35, repr. 1860).

Beans, squashes, pumpkins, sweet potatoes, tobacco, gourds, and the sunflower were also cultivated to some extent, especially in what are now the southern states. According to Beverly (Hist. Va., 125-128, 1722), the Indianhad two varieties of sweet potatoes. Marquette, speaking of the Illinois Indians, says that in addition to maize, "they also sow beans and melons, which are excellent, especially

those with a red seed. Their squashes are not of the best: they dry them in the sun to eat in the winter and spring" (Voy. and Discov., in French, Hist. Coll. La., IV, 33, 1852).

(c. T.

Ahadzooas. The principal village of the Oiaht, on Diana id., W. coast of Vancouver id.—Can. Ind. Aff., 263, 1902.

Ahahpitape (aah'-pūn 'blood,' tūppe 'people': 'bloody band'). A division of the Piegan tribe of the Siksika.

Ah-ah-pi-ta-pe,—Morgan, Anc. Soc., 171, 1877. Ah-pai-tup-iks.—Grinnell, Blackfoot Lodge Tales, 200, 1892 A'-pe-tup-i.—Hayden, Ethnog, and Philol. Mo. Val., 264, 1862 Bloody Piedgans.—Culbertson in Smathson Rep. 1850, 144, 1851

Ahahswinnis. The principal village of the Opitchesaht, on the E. bank of Somass r., Vancouver id.—Can. Ind. Aff., 263, 1902.

Ahahweh 'a'hävee, 'a swan.'—Win. Jones . A phratry of the Chippewa. According to Morgan it is the Duck gens of the tribe.

A-auh-wauh.—Ramsey in U.S. Ind. Aff. Rep., 83, 1850-Ah-ah-wai.—Schoolcraft, Ind. Tribes, 1, 304, 1853. Ah-ah-wauk.—Warren in Minn. Hist. Soc. Coll., v, 44, 1885. Ah-auh-weh.—Morgan, Anc. Soc., 166, 1877. Ah-auh-wauh.—Ramsey in U.S. Ind. Aff. Rep., 91, 1850. Ah-auh-wauh-ug.—Warren in Minn. Hist. Soc. Coll., v, 87, 1885 (plural). Ahawhwauk.—Schoolcraft, Ind. Tribes, it., 142, 1852.

Ahdik "iditk, 'tearibou'—W, Jones). A gens of the Chippewa, often translated 'rein-deer,'

Addick.—Warren in Minn, Hist. Soc. Coll., v. 44, 1885. Ad-dik.—Tanner, Narrative, 314, 1830. Ad-dik.— Morzah, Anc. Soc., 166, 1877. Âtik'.—Gatschet fid-Tomazin, Indian informant

Ahkaiksumiks. A subtribe gens of the Kainah.

Ah-kaik'-sum-iks.—Grinnell, Blackfoot I odge Tales, 209, 1892

Ahkaipokaks (ah-kai-tm' many', po-ka' child': many children.—Grinnell': A subtribe or gens of the Kainah.

Ah-kai'-po-kaks.—Grinnell, Blackfoot Lodge Tales, 200, 1802

Ahkaiyikokakiniks ('white breasts' . A band or gens of the Piegan.

Ah-kai-yi-ko-ka -kin-iks.—Grannell, Blackroot Lodge Tales, 200, 1892. Kai'-it-ko-ki'-ki-naks.—Hayden, Lthnog and Plalol, Mo. Val., 264, 1862

Ahkotashiks (many beasts [horses]). A subtribe or gens of the Kainah.

Ahk-o'-tash-iks,—Grinnell, Blackfoot Lodge Tales, 209, 1894

2 GEORGE V., A. 1912

Ahkwonistsists ('many lodge poles'). A subtribe or gens of the Kainah.

Ah-kwo'-nis-tsists.—Grinnell, Blackfoot Lodge Tales, 209, 1892.

Ahmik ('beaver'). A gens of the Chippewa. Ah-meek.—Tanner, Narrative, 314, 1830. Ah-mik'.
—Morgan, Anc. Soc., 166, 1877. Amik.—Warren in Minn. Hist. Soc. Coll., v. 45, 1885. Umi'k.—Jones, inf'n, 1905 (correct form).

Ahousaht. A Nootka tribe about Clayoquot sd., w. coast of Vaneouver id.: pop. 212 in 1941. Their principal village is Mahktosis. (J. R. S.)

Ahhousaht.—Can. Ind. Aff., 188, 1883. Ahosett.— Swan in Smithson. Cont., xvi, 56, 1870. Ahousaht.— Sproat, Sav. Life, 308, 1868. Ahousĕt.—Mayne, Brit. Col., 251, 1862. Ahowartz.—Armstrong, Oreg., 136, 1857. Ahowsaht.—Powell in 7th Rep. B. A. E., 130, 1891. Ah-owz-arts.—Jewitt, Narr., 36, 1849. Arhosett.—Swan, MS., B. A. E., Asonsaht.—Dept. Ind. Aff., 7, 1872.

Ahulka (A-hul-qa). A village of the Ntlakyapamuk, on Fraser r., British Columbia, just below Siska; pop. 5 in 1897, the last time the name appears.

Abulqa.—Hill-Tout in Rep. Ethnol. Snrv. Can., 5, 1899. Halaha.—Can. Ind. Aff. for 1885, 196 (probably the same).

Ainslie Creek. A band of Ntlakyapamuk on Fraser r., above Spuzzum, Brit. Col.—Can. Ind. Aff., 79, 1878.

Aiodjus (²ai'²odjus, 'all fat [meat]]). A Skittagetan town on the W. side of the mouth of Masset inlet, Queen Charlotte isds. It was occupied by the Aokeawai before they moved to Alaska.—Swanton, Cont. Haida, 281, 1905.

Aisikstukiks ('biters'). A band of the Siksika.

Ai-sik'-stük-iks.—Grinnell, Blackfoot Lodge Tales, 209, 1892.

Aivilik ('having walrus'). An Eskimo village on Repulse bay, Franklin dist., the principal winter settlement of the Aivilirmiut.—Boas in 6th Rep. B. A. E., 449, 1888. A'-wee-lik.—McClintock, Voy. of Fox, 163, 1881. Aywee-lik.—Lyons, Priv. Journ., 161, 1825. Eiwill.—Klutschak, Unter d. Eskimo, map, 48, 1881. Iwillichs.—Gilder, Schwatka's Search, 294, 1881. Iwillic.—Ibid., 304. Iwillik.—Ibid., 181.

Aivilirmiut ('people of the walrus place'). A Central Eskimo tribe on the N. shores of Hudson bay from Chesterfield inlet to Fox channel, among whom Rae sojourned in 1846–47, C. F. Hall in 1864–69, and Schwatka in 1877–79. They kill deer, muskoxen, seal, walrus, trout, and salmon, caching a part of the

meat and blubber, which before winter they bring to one of their central settlements. Their chief villages are Akudlit, Avilik, Iglulik, Maluksilak, Nuvung, Pikuliak, Ugluriak, Ukusiksalik; summer villages are Inugsulik, Kariak Naujan, Pitiktaujang.—Boas in 6th Rep. B. A. E., 445, 1888.

Ahaknañĕlet.—Petitot in Bib. Ling. et Ethnol. Am., III, xi, 1876 (so called by the Chiglit of Liverpool bay: sig. 'wonen'). A-hak-nan-helet.—Richardson, Arct. Exped, I, 362, 1851. Ahaknanhelik.—Richardson, Polar Regions, 300, 1861. Ahwhacknanhelett.—Franklin, Journey to Polar Sea, II, 42, 1824. Aivillirmint.—Boas in 6th Rep. B. A. E., 445, 1888. Eivillinmint.—Boas in Trans. Anthrop. Soc. Wash., III, 102, 1885. Eiwillik.—Boas in Zeitschr. Ges. f. Erdk., 226, 1883.

Aiyansh ('eternal bloom.'—Dorsey). A mission village on the lower course of Nass r., British Columbia, founded in 1871, its inhabitants being drawn from Niska villages. Pop. 133 in 1901.

Aiyansh.—Can Ind. Aff., 271, 1889. Aiyansh.—Dorsey in Am Antiq., xix, 281, 1897 (misprint).

Akamnik. A tribe of the Upper Kutenai living around Ft. Steele and the mission of St. Eugene on upper Kootenay r., Brit. Col.

Aqk'amnik.—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Aqk'ā'mnik.—Chamberlain in 8th Rep. N. W. Tribes, Can., 6, 1892.

Akanekunik ('Indians on a river'). A tribe of the Upper Kutenai on Kootenay r. at the Tobacco plains, Brit. Col.

Aqk'aneqúnik.—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Aqk'āneqū'nik.—Chamberlain in 8th Rep. N. W. Tribes Can., 6, 1892. Tobacco Plains Kootanie.—Tolmie and Dawson, Comp. Vocabs., 1248, 1884. Tobacco Plains Kootenay.—Chamberlaio, op. cit., table opp. 41. Yaket-ahno-klatak-makanay.—Tolmie and Dawson, op. cit. Yā'k'ēt aqkinūqtlē'ēt āqkts'mā'klnik.—Chamberlain, op. cit., 6 ('Indians of the Tobacco plains,' Irom yā'k'ēt tobacco, āqkinūqtlē'ēt plain, āqkts'mā'kinik Indians)

Akiskenukinik ('people of the two lakes'). A tribe of the Upper Kutenai living on the Columbia lakes, having their chief settlement at Windermere, Brit. Col. They numbered 72 in 1911.

Akiskinookaniks,—Wilson in Trans. Ethnol. Soc. Lond., 304, 1866. Aqkiskanükenik.—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Aqkl'sk'enü'-kinik.—Chamberlain in 8th Rep. N. W. Tribes Can., 6, 1892. Columbia Łakes.—Ibid., 7.

Aktese. A village of the Kyuquot on Village id., Kyuquot sd., W. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Akudnirmiut ('people of the intervening country'). An Eskimo tribe of E. Baffin island,

on the shore of Home bay and northward. They migrate between their various stations, in winter as well as in summer, in search of deer, bear, seal, walrus, and salmon, having ceased to capture whales from the floe edge since the advent of whaling ships; pop. 83 in 1883 (Boas in 6th Rep. B. A. E., 440, 1888). Their winter settlements are not permanent. Their villages and camping places are: Arbaktung, Avaudjelling, Ekalualuin, Ijelirtung, Idiutelling, Idniteling, Karmakdjuin, Kaudjukdjuak, Kivitung, Niakonaujang. Nudlung, Sirmiling.

Akugdlit. A village of the Aivilirmiut at the S. end of the gulf of Boothia, on Committee bay.—Boas in 6th Rep. B. A. E., 445, 1888.

Akuli. An Iglulirmiut village on the isthmus of Melville peninsula; pop. 50.

Ac-cool-le.—Ross, Sec. Voy., 316, 1835. Acculee.— Ibid, map facing p. 262. Ackoolee.—Ibid., 254. Akkoolee.—Parry, Sec. Voy, 449, 1824.

Akuliak. An Akuliarmiut winter village on the N. shore of Hudson str., where there was an American whaling station; pop. 200.

Akuliaq.-Boas in 6th Rep. B. A. E., map, 1888.

Akuliarmiut ('people of the point between two large bays'). An Eskimo tribe settled on the N. shore of Hudson strait (Boas in 6th Rep. B. A. E., 421, 1888). They go to Amakdjuak through White Bear sd. to hunt, where they meet the Nugumiut.

Akkolear.—Gilder, Schwatka's Search, 181, 1881. Akudliarmint.—Boas in Trans. Anthrop. Soc. Wash., III, 96, 1885. Akuliak-Eskimos.—Boas in Petermanns Mitt., 68, 1885.

Algic. A term applied by H. R. Schoolcraft to the Algonquian tribes and languages, and used occasionally by other writer since his time. Algique is employed by some Canadian French essayists. Schoolcraft himself (Ind. Tribes, v. 536, 1855) includes the term in his list of words of Indian origin. The word seems to be formed arbitrarily from Alg., a part of Algonkin, and the English adjectival termination ic. (A. F. C.)

Algonkian. A geological term used to designate an important series of rocks lying between the Archean and the Paleozoic systems. These rocks are most prominent in the region of L. Superior, a characteristic territory of the Indians of the Algonquian family, whence the name. Geologists speak of the "Algonkian period." (A. F. C.)

Algonkin (a name hitherto variously and

erroneously interpreted, but Hewitt suggests that it is probably from (Miemae) algoomeaking, or algoomaking, 'at the place of spearing fish and eels [from the bow of a canoe]'). A term applied originally to the Weskarini, a small Algonquian tribe formerly living on the present Gatineau r., a tributary of Ottawa r., E. of the present city of Ottawa, in Quebec. Later the name was used to include also the Amikwa, Kichesipirini, Kinonche, Kisakon, Maskasinik, Matawachkirini. Missisauga. Miehaeonbidi Nikikouek. Ononchataronon. Oskemanitigou, Ouasouarini, Outaouakamigouk, Outchougai, Powating, Sagahiganirini, and Sagnitaounigama. French writers sometimes called the Montagnais encountered along the lower St. Lawrence, the Lower Algonquins, because they spoke the same language; and the ethnic stock and family of languages has been named from the Algonkin, who formed a close alliance with the French at the first settlement of Canada and received their help against the Iroquois. The latter, however, afterward procured firearms and soon forced the Algonkin to abandon the St Lawrence region. Some of the bands on Ottawa r. fled W. to Mackinaw and into Michigan, where they consolidated and became known under the modern name of Ottawa. The others fled to the N. and E., beyond reach of the Iroquois, but gradually found their way back and reoccupied the country. Their chief gathering place and mission station was at Three Rivers, in Quebec Nothing is known of their social organization. The bands now recognized as Algonkin, with their population in 1900, are as follows. In Ottawa: Golden Lake, 86; North Renfrew, 286; Gibson (Iroquois in part), 123. In Quebec: River Desert, 393; Timiskaming, 203; Lake of Two Mountains (Iroquois in part), 447; total, 1,536. As late as 1894 the Dept. of Indian Affairs included as Algonkin also 1,679 "stragglers" in Pontiac, Ottawa co., Champlain, and St Maurice in Quebec, but these are omitted from subsequent reports. In 1884 there were 3,874 Algonkin in Quebec province and in E. Ontario, including the Timiskaming. Following are the Algonkin villages, so far as they are known to have been recorded: Cape Magdalen, Egan, Hartwell, Isle aux Tourtes (Kichesipirini and Nipissing), Rouge River, Tangouaen (Algonkin and Huron). (J. M. C. T.)

Abnaki.—For forms of this word as applied to the Algonkin, see *Abnaki*. Akwanake.—Brebeuf quoted by Schoolcraft, Ind Tribes, iv. 207, 1854. Alagonkins.—

Croghan (1765) in Monthly Am. Jour. Gool, 272, 1831. Algokin. - McKenzie quoted by Tanner, Natr., 332, 1830. Algomeequin.—Schoolcraft, Ind Tribes, 1, 306, 1851. Algomequins.—Ibid., v, 38, 1855. Algommequin.—Champlain (1632), Œuv., v, pt. 2, 493, 1870. Algomquins.—Sagard (1636), Canada, 1, 247, 1866. Algonialns.-Hennepin, New Disc, 95, 1698 Algonglns.-Tracy (1667) in N. Y. Doc. Col. Algonquian Family (adapted from the name of the Algonkin tribe). A linguistic stock which formerly occupied a more extended area than any other in North America. Their territory reached from the E. shore of Newfoundland to the Rocky mts. and from Churchill r. to Pamlico sd. The E. parts of this territory were separated by an area occupied by Iroquoian tribes. On the E., Algonquian tribes skirted the Atlantic coast from Newfoundland to Neuse r.; on the S., they touched on the territories of the eastern Siouan, southern Iroquoian, and the Muskhogean families; on the W., they bordered on the Siouan area; on the N.W., on the Kitunahan and Athapascan; in Ungava they came into contact with the Eskimo; in Newfoundland they surrounded on three sides the Beothuk. The Cheyenne and Arapaho moved from the main body and drifted out into the plains. Although there is a general agreement as to the peoples which should be included in this family, information in regard to the numerous dialects is too limited to justify an attempt to give a strict linguistic classification; the data are in fact so meagre, in many instances as to leave it doubtful whether certain bodies were confederacies, tribes, bands, or clans, especially bodies which have become extinct or can not be identified, since early writers have frequently designated

settlements or bands of the same tribe as distinct tribes. As in the case of all Indians. travellers, observing part of a tribe settled at one place and part at another, have frequently taken them for different peoples, and have dignified single villages, settlements, or bands with the title "tribe" or "nation," named from the locality or the chief. It is generally impossible to discriminate between tribes and villages throughout the greater part of New England and along the Altantic coast, for the Indians there seem to have been grouped into small communities, each taking its name from the principal village of the group or from a neighbouring stream or other natural feature. Whether these were subordinate to some real tribal authority or of equal rank and interdependent, although still allied, it is impossible in many instances to determine. Since true tribal organization is found among the better known branches and can be traced in several instances in the eastern division, it is presumed that it was general. A geographic classification of the Algonquian tribes follows:

Western division, comprising three groups dwelling along the E. slope of the Rocky mts: Blackfoot confederacy, composed of the Siksika, Kainah, and Piegan; Arapaho and Cheyenne.

Northern division, the most extensive one, stretching from the extreme N. W. of the Algonquian area to the extreme E., chiefly N. of the St. Lawrence and the Great lakes, including several groups which, on account of insufficient knowledge of their linguistic relations, can only partially be outlined: Chippewa group, embracing the Cree (?), Ottawa, Chippewa, and Missisauga; Algonkin group, comprising the Nipissing, Timiskaming, Abitibi, and Algonkin.

Northeastern division, embraeing the tribes inhabiting E. Quebec, the Maritime provinces, and E. Maine: the Montagnais group, composed of the Naskapi, Montagnais, Mistassin, Bersiamite, and Papinachois; Abnaki group, comprising the Micmac, Malecite, Passamaquoddy, Arosaguntacook, Sokoki, Penobscot, and Norridgewock.

Central division, including groups that resided in Wisconsin, Illinois, Indiana, Michigan, and Ohio: Menominee; the Sauk group, including the Sauk, Fox, and Kickapoo; Mascouten; Potawatomi; Illinois branch of the Miami group, comprising the Peoria, Kaskaskia, Cahokia, Tamaroa, and Michigamea; Miami branch, composed of the Miami, Piankashaw, and Wea.

Eastern division, embracing all the Algonquian tribes that lived along the Atlantic coast S. of the Abnaki and including several confederacies and groups, as the Pennacook, Massachuset, Wampanoag, Narraganset, Nipmuc, Montauk, Mohegan, Mahican, Wappinger, Delawares, Shawnee, Nanticoke, Conoy, Powhatan, and Pamlico.

As the early settlements of the French, Dutch, and English were all within the territory of the eastern members of the family, they were the first aborigines N. of the Gulf of Mexico to feel the blighting effect of contact with a superior race. As a rule the relations of the French with the Algonquian tribes were friendly, the Foxes being the only tribe against whom they waged war. The English settlements were often engaged in border wars with their Algonquian neighbours, who, continually pressed farther toward the interior by the advancing white immigration, kept up for a time a futile struggle for the possession of their territory. The eastern tribes, from Maine to Carolina, were defeated and their tribal organization was broken up, Some withdrew to Canada, others crossed the mountains into the Ohio valley, while a few bands were located on reservations by the whites, only to dwindle and ultimately become extinct. Of many of the smaller tribes of New England, Virginia, and other eastern states there are no living representatives. Even the languages of some are known only by a few words mentioned by early historians, while some tribes are known only by name. The Abnaki and others who fled into Canada settled along the St. Lawrence under the proteetion of the French, whose active allies they became in all the subsequent wars with the English down to the fall of the French power in Canada. Those who crossed the Allegheny mts, into the Ohio valley, together with the Wyandot and the native Algonquian tribes of that region, formed themselves into a loose confederacy, allied first with the French and afterward with the English against the advancing settlements with the deelared purpose of preserving the Ohio r. as the Indian boundary. Wayne's victory in 1794 put an end to the struggle, and at the treaty of Greenville in 1795 the Indians acknowledged their defeat and made the first cession of land W. of the Ohio. Tecumseh and his brother, Ellskwatawa, aroused the western tribes against the United States a few years later, but the disastrous defeat at Tippecanoe in 1811 and the death of their leader broke the spirit of the Indians. In 1815 those

who had taken part against the United States during the War of 1812 made peace with the Government; then began the series of treaties by which, within thirty years, most of the Indians of this region ceded their lands and removed W. of the Mississippi.

A factor which contributed greatly to the decline of the Algonquian ascendency was the power of the Iroquoian confederacy, which by the beginning of the 17th century had developed a power destined to make them the securge of the other Indian populations from the Atlantic to the Mississippi and from Ottawa r. in Canada to the Tennessee. After destroying the Huron and the Erie, they turned their power chiefly against the Algonquian tribes, and ere long Ohio and Indiana were nearly deserted, only a few villages of Miami remaining here and there in the northern portion. The region S. and W. they made a desert, elearing of native inhabitants the whole country within 500 m. of their seats. The Algonouian tribes fled before them to the region of the upper lakes and the banks of the Mississippi. and only when the French had guaranteed them protection against their deadly foes did they venture to turn back toward the E.

The central Algonquians are tall, averaging about 173 cm.; they have the typical Indian nose, heavy and prominent, somewhat hooked in men, flatter in women; their cheek bones are heavy; the head among the tribes of the Great lakes is very large and almost brachycephalic, but showing considerable variation; the face is very large. The type of the Atlantic coast Algonouians can hardly be determined from living individuals, as no full-bloods survive, but skulls found in old burial grounds show that they were tall, their faces not quite so broad, the heads much more elongate and remarkably high, resembling in this respect the Eskimo and suggesting the possibility that on the New England coast there may have been some mixture with that type. The Cheyenne and Arapaho are even taller than the central Algonquians; their faces are larger, their heads more elongate. It is worthy of remark that in the region in which the mound builders' remains are found, rounded heads prevailed. and the present population of the region are also more round-headed, perhaps suggesting fusion of blood (Boas, inf'n, 1905).

The religious beliefs of the eastern Algonquian tribes were similar in their leading features. Their myths are numerous. Their deities, or *manitus*, including objects animate

2 GEORGE V., A. 1912

and inanimate, were many, but the chief enlture hero, he to whom the creation and control of the world were ascribed, was substantially the same in character, although known by various names, among different tribes. As Manibozho, or Michabo, among the Chippewa and other like tribes, he was usually identified as a fabulous great rabbit, bearing some relation to the sun; and this identification with the great rabbit appears to have prevailed among other tribes, being found as far S. as Maryland. Brinton (Hero Myths, 1882) believes this mythological animal to have been merely a symbol of light, adopted because of the similarity between the Algonquian words for rabbit and light. Among the Siksika this chief beneficent deity was known as Napiw. among the Abnaki as Ketchiniwesk, among the New England tribes as Kiehtan, Woonand, Cautantowit, etc. He it was who created the world by magic power, peopled it with game and the other animals, taught his favorite people the arts of the chase, and gave them corn and beans. But this deity was distinguished more for his magical powers and his ability to overcome opposition by trickery, deception, and falsehood than for benevolent qualities. The objects of nature were deities to them, as the sun, the moon, fire, trees, lakes, and the various animals. Respect was also paid to the four cardinal points. There was a general belief in a soul, shade, or immortal spiritual nature not only in man but in animals and all other things, and in a spiritual abode to which this soul went after the death of the body, and in which the occupations and enjoyments were supposed to be similar to those of this life. Priests or conjurers, called by the whites medicine-men, played an important part in their social, political, and religious systems. They were supposed to possess influence with spirits or other agencies, which they could bring to their aid in prying into the future, inflicting or curing disease, etc.

Among the tribes from s. New England to Carolina, including especially the Mohegan, Delawares, the people of the Powhatan confederacy, and the Chippewa, descent was reckoned in the female line; among the Potawatomi, Abnaki, Blackfeet, and probably most of the northern tribes, in the male line. Within recent times descent has been paternal also among the Menominee, Sauk and Fox, Illinois, Kiekapoo, and Shawnee, and, although it has been stated that it was anciently maternal, there is no satisfactory proof of this. The

Cree, Arapaho, and Cheyenn, are without clans or gentes. The gens or clan was usually governed by a chief, who in some cases was installed by the heads of other clans or gentes. The tribe also had its chief, usually selected from a particular clan or gens, though the manner of choosing a chief and the authority vested in him varied somewhat in the different tribes. This was the peace chief, whose authority was not absolute, and who had no part in the declaration of war or in carrying it on, the leader in the campaign being one who had acquired a right to the position by noted deeds and skill. In some tribes the title of chief was hereditary, and the distinction between a peace chief and a war chief was not observed. The chief's power among some tribes, as the Miami. were greater than in others. The government was directed in weighty matters by a council. consisting of the chiefs of the clans or gentes of the tribe. It was by their authority that tribal war was undertaken, peace concluded, territory sold, etc.

The Algonquian tribes were mainly sedentary and agricultural, probably the only exceptions being those of the cold regions of Canada and the Siksika of the plains. The Chippewa did not formerly cultivate the soil. Maize was the staple Indian food product, but the tribes of the region of the Great lakes, particularly the Menominee, made extensive use of wild rice. The Powhatan tribes raised enough maize to supply not only their own wants but those of the Virginia colonists for some years after the founding of Jamestown, and the New England colonists were more than once relieved from hunger by corn raised by the natives. In 1792 Wayne's army found a continuous plantation along the entire length of the Maumee from Ft. Wayne to L. Erie. Although depending chiefly on hunting and fishing for subsistence, the New England tribes cultivated large quantities of maize, beans, pumpkins, and tobacco. It is said they understood the advantage of fertilizing, using fish, shells, and ashes for this purpose. The tools they used in preparing the ground and in cultivation were usually wooden spades or hoes, the latter being made by fastening to a stick, as a handle, a shell, the shoulder blade of an animal, or a tortoise shell. It was from the Algonquian tribes that the whites first learned to make hominy, succotash, samp, maple sugar, johnnyeake, etc. Gookin, in 1674, thus describes the method of preparing food among the Indians of Massachusetts: "Their food is generally

boiled maize, or Indian corn, mixed with kidney beans, or sometimes without. Also, they frequently boil in this pottage fish and flesh of all sorts, either new taken or dried, as shad, eels, alewives, or a kind of herring, or any other sort of fish. But they dry mostly those sorts before mentioned. These they cut in pieces, bones and all, and boil them in the aforesaid pottage. I have wondered many times that they were not in danger of being choked with fish bones; but they are so dexterous in separating the bones from the fish in their eating thereof that they are in no hazard. Also, they boil in this frumenty all sorts of flesh they take in hunting, as ven son, beaver, bear's flesh, moose, otters, raecoons, etc., eutting this flesh in small pieces and boiling it as aforesaid. Also, they mix with the said pottage several sorts of roots, as Jerusalem artichokes, and groundnuts, and other roots, and pompions, and squashes, and also several sorts of nuts or masts, as oak acorns, chestnuts, and walnuts: these husked and dried and powdered, they thicken their pottage therewith. Also, sometimes, they beat their maize into meal and sift it through a basket made for that purpose. With this meal they make bread, baking it in the ashes, covering the dough with leaves. Sometimes they make of their meal a small sort of cakes and boil them. They make also a certain sort of meal of parched maize. This meal they call "nokake." Their pots were made of clay, somewhat egg-shaped; their dishes, spoons, and ladles of wood: their water pails of birch bark, doubled up so as to make them four-cornered, with a handle. They also had baskets of various sizes in which they placed their provisions; these were made of rushes, stalks, corn husks, grass, and bark, often ornamented with coloured figures of animals. Mats woven of bark and rushes, dressed deerskins, feather garments, and utensils of wood, stone, and horn are mentioned by explorers Fish were taken with hooks, spears, and nets, in canoes and along the shore, on the sea and in the ponds and rivers. They captured without much trouble all the smaller kinds of fish, and, in their canoes, often dragged sturgeon with nets stoutly ma e of Canada hemp" (De Forest, His., Inds. Conn. 1853). Canoes used for fishing were of two kinds one of birch bark, very light, but liable to overset; the other made from the trunk of a large tree. Their clothing was composed chiefly of the skins of animals, tanned until soft and pliable, and was sometimes ornamen-

ted with paint and beads made from shells-Occasionally they decked themselves with mantles made of feathers overlapping each other as on the back of the fowl. The dress of the women consisted usually of two articles, a leather shirt, or undergarment, ornamented with fringe, and a skirt of the same material fastened round the waist with a belt and reaching nearly to the feet. The legs were protected, especially in the winter, with leggings, and the feet with moccasins of soft dressed leather, often embroidered with wampun. The men usually covered the lower part of the body with a breech-cloth, and often wore a skin mantle thrown over one shoulder. The women dressed their hair in a thick heavy plait which fell down the neck, and sometimes ornamented their heads with bands decorated with wampum or with a small cap. Higginson (New England's Plantation, 1629 | says: "Their hair is usually cut before, leaving one lock longer than the rest." The men went bareheaded, with their hair fantastically trimmed, each according to his own faney. One would shave it on one side and leave it long on the other: another left an unshaved strip, 2 or 3 in. wide, running from the forehead to the nape of the

The typical Algonquian lodge of the woods and lakes was oval, and the conical lodge, made of sheets of birch-bark, also occurred. The Mohegan, and to some extent the Virginia Indians, constructed long communal houses which accommodated a number of families. The dwellings in the N. were sometimes built of logs, while those in the S. and parts of the W. were constructed of saplings fixed in the ground, bent over at the top, and covered with movable matting, thus forming a long, roundroofed house. The Delawares and some other eastern tribes, preferring to live separately, built smaller dwellings. The manner of construction among the Delawares is thus deseribed by Zeisberger: "They peel trees, abounding with sap, such as lime trees, etc., then cutting the bark into pieces of 2 or 3 yards in length, they lay heavy stones upon them, that they may become flat and even in drying. The frame of the hut is made by driving poles into the ground and strengthening them by cross beams. This framework is covered, both within and without, with the above-mentioned pieces of bark, fastened very tight with bast or twigs of hickory, which are remarkably tough. The roof runs up to a ridge, and is covered in the same manner. These huts have

one opening in the roof to let out the smoke and one in the side for an entrance. The door is made of a large piece of bark without either bolt or lock, a stick leaning against the outside being a sign that nobody is at home. The light enters by small openings furnished with sliding shutters." The covering was sometimes rushes or long reed grass. The houses of the Illinois are described by Hennepin as being "made with long arbors" and covered with double mats of flat flags. Those of the Chippewa and the Plains tribes were circular or conical, a framework covered with bark among the former, a frame of movable poles covered with dressed skins among the latter. The villages, especially along the Atlantic coast, were frequently surrounded with stockades of tall, stout stakes firmly set in the ground. A number of the western Algonquian towns are described by early explorers as fortified or as surrounded with palisades.

In no other tribes N. of Mexico was picture writing developed to the advanced stage that it reached among the Delawares and the Chippewa. The figures were scratched or painted on pieces of bark or on slabs of wood. Some of the tribes, especially the Ottawa, were great traders, acting as chief middlemen between the more distant Indians and the early French settlements. Some of the interior tribes of Hlinois and Wisconsin made but little use of the canoe, travelling almost always afoot: while others who lived along the upper lakes and the Atlantic coast were expert canoemen. The canoes of the upper lakes were of birch-bark, strengthened on the inside with ribs or knees. The more solid and substantial boat of Virginia and the western rivers was the dugout, made from the trunk of a large tree. The manufacture of pottery, though the product was small, except in one or two tribes, was widespread. Judged by the number of vessels found in the graves of the regions occupied by the Shawnee, this tribe carried on the manufacture to a greater extent than any other. The usual method of burial was in graves, each elan or gens having its own cemetery. The mortuary ceremonies among the eastern and central tribes were substantially as described by Zeisberger. Immediately after death the corpse was arrayed in the deceased's best clothing and decked with the chief ornaments worn in life, sometimes having the face and shirt painted red, then laid on a mat or skin in the middle of the hut, and the arms and personal effects were placed about it. After sunset, and also before daybreak, the female relations and friends assembled around the body to mourn over it. The grave was dug generally by old women; inside it was lined with bark, and when the corpse was placed in it 4 sticks were laid across, and a covering of bark was placed over these; then the grave was filled with earth. An earlier custom was to place in the grave the personal effects or those indicative of the character and occupation of the deceased, as well as food, cooking utensils, etc. Usually the body was placed horizontally, though among some of the western tribes, as the Foxes, it was sometimes buried in a sitting posture. It was the custom of probably most of the tribes to light fires on the grave for four nights after burial. The Illinois, Chippewa, and some of the extreme western tribes frequently practised tree or scaffold burial. The bodies of the chiefs of the Powhatan confederacy were stripped of the flesh and the skeletons were placed on scaffolds in a charnel house. The Ottawa usually placed the body for a short time on a scaffold near the grave previous to burial. The Shawnee, and possibly one or more of the southern Illinois tribes, were accustomed to bury their dead in boxshaped sepulchres made of undressed stone slabs. The Nanticoke, and some of the western tribes, after temporary burial in the ground or exposure on scaffolds, removed the flesh and reinterred the skeletons.

The eastern Algonquian tribes probably equalled the Iroquois in bravery, intelligence, and physical powers, but lacked their constancy, solidity of character, and capability of organization, and do not appear to have appreciated the power and influence they might have wielded by combination. The alliances between tribes were generally temporary and without real cohesion. There seems, indeed, to have been some element in their character which rendered them incapable of combining in large bodies, even against a common enemy. Some of their great chieftains, as Philip, Pontiae, and Tecumseh, attempted at different periods to unite the kindred tribes in an effort to resist the advance of the white race: but each in turn found that a single great defeat disheartened his followers and rendered all his efforts fruitless, and the former two fell by the hands of deserters from their own ranks. The Virginia tribes, under the able guidance of Powhatan and Opechancanough, formed an exception to the general rule. They presented a united front to the whites, and resisted for

years every step of their advance until the Indians were practically exterminated. From the close of the Revolution to the treaty of Greenville (1795) the tribes of the Ohio valley also made a desperate stand against the Americans. In individual character many of the Algonquian chiefs rank high, and Tecumseh stands out prominently as one of the noblest figures in Indian history.

The present number of the Algonquian family is about 90,000, of whom about 40,000 are in the United States and 50,000 in Canada. The largest tribes are the Chippewa and the Cree. (J. M. C. T.)

Alkunwea (A'lk'unwēe, 'lower corner'). A subdivision of the Laalaksentaio, a Kwakiutl gens.—Boas in Rep. Nat. Mus. 1895, 332, 1897.

Allagasomeda. A Chimmesyan village on upper Skeena r., British Columbia.—Downie in Jour. Roy. Geog. Soc., xxxi, 253, 1861.

Allh. A body of Salish E. of Chemainus lake, Vancouver id.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Altar. Using the term in its broadest sense, an altar, on which sacrifices were made or offerings laid or around which some other act of worship was performed, was a feature of the performance of every ceremony of the Ameriean Indians. Some of these altars are so simple that their nature is not easily apprehended: an excavation in the earth, a pile of rocks, a fire, a buffalo skull serving the purpose. Others, presenting a complex assemblage of parts, are definitely recognizable as altars and in some cases resemble in form the altars of civilized people, for example, those of the Hopi and the Sia. The altar, on account of its universal distribution, thus renders important aid to the comparative study of religions. The effect of the altar is to localize the worship and to furnish a place where the worshipper can convey to the deity his offering and prayers. Altar-shrines are often placed by springs, rivers, caves, rocks, or trees on mountains and near spots which certain deities are supposed to inhabit, in the belief that the roads of these deities extend from these localities. In pursnance of a like idea the Haida deposit certain offerings in the sea, and many tribes throw offerings into springs, lakes, and rivers. Some of the temporary altars of the eastern and southern Indians, so far as may be learned from the illustrations of early writers, consisted of an oval or circular palisade of carved stakes surrounding an area in the centre of which was a fire or a mat on which were laid various symbolic cult apparatus. Lafitau (Mœurs des Sanvages, n, 327, 1724) regards as a fire altar the pipe in the calumet ceremony of the Illinois described by Marquette. Such altars are more primitive than the temporary altars erected for the celebration of a ritual or a portion of a ritual, and the distinction should be noted. In this connection the cloud-blowing tubes and pipes of the ancient and modern Pueblos may also be mentioned. The widespread connection of fire with the altar is an

Amaseconti ('abundance of small fish' [herring]). A small division of the Abnaki formerly residing in part at Farmington Falls, on Sandy r., Franklin eo., Me., and partly near the present New Sharon, a few miles distant. They took part with the other Abnaki in the early Indian wars against the English and joined in the treaty made at Portsmouth, N. H., in 1713. Some of them lingered in their old homes until about 1797, when the last family removed to St Francis, Quebee, where they retained their distinctive name until 1809. (J. M.)

Amerind. A word composed of the first syllables of "American Indian," suggested in 1899 by an American lexicographer as a substitute for the inappropriate terms used to designate the race of man inhabiting the New World before its occupancy by Europeans. The convenience of such derivatives as Amerindic, Amerindize, Amerindian, proto-Amerind, pre-Amerindic, pseudo-Amerind, etc., argues in favour of the new word. The introduction

of "Amerind" was urged by the late Maj. J. W. Powell, and it has the support of several anthropologists. A plea by Dr. W. J. McGee for its general adoption appeared in 1900 in the Journal of the Anthropological Institute of Great Britain. The use of "Amerind" at the International Congress of Americanists in New York, Oct., 1902, occasioned a discussion (Science, n. s., xvi, 892, 1902) in which it was supported by some and attacked by others. The name, nevertheless, has found its way into both scientific and popular literature. (A. F. C.)

Amikwa (from amik, 'beaver'). An Algonquian tribe found by the French on the N. shore of l. Huron, opposite Manitoulin id., where they were identified in the Jesuit Relations at various dates up to 1672. Bacqueville de la Potherie (Hist. Am. Sept., 1753) says that they and the Nipissing once inhabited the shores of l. Nipissing, and that they rendered themselves masters of all the other nations in those quarters until disease made great havoc among them and the Iroquois compelled the remainder of the tribe to betake themselves, some to the French settlements, others to 1. Superior and to Green bay of lake Michigan. In 1740 a remnant had retired to Manitoulin id. Chauvignerie, writing in 1736, says of the Nipissing: "The armorial bearings of this nation are, the heron for the Achagué or Heron tribe, the beaver for the AmekoSes (Amikwa), the birch for the Bark tribe." The reference may possibly be to a gens of the Nipissing and not to the Amikwa tribe, yet the evidently close relation between the latter and the Nipissing justifies the belief that the writer alluded to the Amikwa as known to history. They elaimed in 1673 to be allies of the Nipissing. (J. M. ← T.)

Amitok ('narrow'). A winter settlement of the Amitormiut on the E. coast of Melville peninsula, Franklin.

Amitigoke.—Gilder, Schwatka's Search, 181, 1881. Amitloke.—Parry, Second Voy., 206, 1824. Amittioke.—Ibid., map, 197. Amitoq.—Boas in 6th Rep. B. A. E., map, 1888. Amityook.—Lyon, Private Jour, 406, 1825.

Amitormiut ('inhabitants of the narrow place.'—Boas). An Eskimo tribe on the E. coast of Melville penin. Their principal village is Amitok, from which they take their name.—Gilder, Schwatka's Search, 181, 1881.

Amusements. When not bound down by stern necessity, the Indian at home was occupied much of the time with dancing, feasting, gaming, and story-telling. Though most of the dances were religious or otherwise ceremonial in character, there were some which had no other purpose than that of social pleasure. They might take place in the day or the night, be general or confined to particular societies, and usually were accompanied with the drum or other musical instrument to accentuate the song. The rattle was perhaps invariably used only in ceremonial dances. Many dances were of pantominic or dramatic character, and the Eskimo had regular pantomime plays, though evidently due to Indian influence. The giving of presents was often a feature of the dance, as was betting of all athletic contests and ordinary games. The amusements of the Eskimo and extreme northern tribes were chiefly athletic, such as racing, wrestling, throwing of heavy stones, and tossing in a blanket. From Hudson bay to the Gulf of Mexico, and from the Atlantic to the border of the plains, the great athletic game was the ball play, now adopted among civilized games under the name of lacrosse. In the N. it was played with one racket, and in the S. with two. Athletes were regularly trained for this game, and competitions were frequently inter-tribal. The wheel-and-stick game in one form or another was well-nigh universal. As played in the E. one gamester

rolled forward a stone disc, or wheel, while his opponent slid after it a stick curved at one end in such a way that the wheel, when it fell to the ground, rested within the crook of the stick. On the plains and in the S. W. a wooden wheel, frequently netted, took the place of the stone disk. Like most Indian institutions, the game often had a symbolic significance in connection with a sun myth. A sacred variant of the game was played by the priests for divinatory purposes, or even as a sort of votive ceremony to procure the recovery of a patient. Target practice with arrows, knives, or hatchets, thrown from the hand, as well as with the bow or rifle, was also universal among the warriors and boys of the various tribes. The gaming arrows were of special design and ornamentation, and the game itself had often a symbolic purpose. Horse races, frequently inter-tribal, were prominent amusements, especially on the plains, during the warm season. and foot races, often elaborately ceremonial in character, were common among the sedentary agricultural tribes, particularly the Pueblos and the Wichita.

Games resembling dice and hunt-the-button were found everywhere and were played by both sexes alike, particularly in the tipi or the wigwam during the long winter nights. The dice, or their equivalents, were of stone, bone. fruit seeds, shell, wood, or reed, variously shaped and marked. They were thrown from the hand or from a small basket or wooden bowl. One form, the awl game, confined to the women, was played around a blanket, which had various tally marks along the border for marking the progress of the game. The huntthe-button games were usually accompanied with songs and rhythmic movements of the hands and body, intended to confuse the parties whose task was to guess the location of the button. Investigations by Culin show a close correspondence between these Indian games and those of China, Japan, Korea, and northern

Special women's games were shinny, football, and the deer-foot game, besides the awl game already noted. In football the main object was to keep the ball in the air as long as possible by kicking it upward. The deer-foot game was played, sometimes also by men with a number of perforated bones from a deer's foot strung upon a beaded cord, having a needle at one end. The purpose was to toss the bones in such a way as to catch a particular one upon the end of the needle.

Among the children there were target shooting, stilts, slings, and tops for the boys, and buckskin dolls and playing-house for the girls, with "wolf" or "eatcher," and various forfeit plays, including a breath-holding test. Cats'eradles, or string figures, as well as shuttlecocks and buzzes, were common. As among civilized nations, the children found the greatest delight in imitating the occupations of the elders Numerous references to amusements among the various tribes may be found throughout the annual reports of the Bureau of American Ethnology. Consult especially games of the American Indians, by Stewart Culin, 24th Rep. B. A. E., 1905. (j. M.)

Anahim. A band of the Tsilkotin, numbering 216 in 1901, occupying a valley near Chileotin r., 60 m. from its mouth in British Columbia.—Can. Ind. Aff., 162, 1902.

Anarnitung ('having smell [of walrus dung]'). A winter village of the Kingua branch of Okomiut in Baffin island at the head of Cumberland sd. (Boas in 6th Rep. B. A. E., map, 1888); pop. 43 in 1883.

Annanatook.—Howgate, Cruise of Florence, 33, 1877 Annanetoote.—Wareham in Jour Geog Soc. Lond, xii, 24, 1842.

Anatomy. While the American Indians show many minor and even some important physical variations, and can be separated into several physical types, they present throughout the continent so many features in common that they may properly be regarded as one great race, admitting of a general anatomical description. The Eskimo form a distinct subrace of the Mongolo-Malay and must be treated separately.

The Indian, in many of his anatomical characters, stands between the white and the negro. His skin is of various shades of brown, tinged in youth, particularly in the cheeks, with the red of the circulating blood. The term "red Indian" is a misnomer. Very dark individuals of a hue approaching chocolate or even the colour of some negroes are found in more primitive tribes, especially in the S. and among the old men, who often went nearly naked. Most women and school children or others who wear clothing and live a more civilized life are lighter in colour. Prolonged exposure to the elements tends, as with whites, to darken the skin. The darkest parts of the skin are ordi-

narily the back of the hands, wrists, and neck, the axillæ, nipples, peritoneal regions, and the exposed parts of the feet. A newborn infant is of varying degrees of dusky red.

The colour of the hair is generally black, with the lustre and slight bluish or brownish tinge that occurs among whites, not the dull greyish black of the African negro. With many individuals of all ages above early childhood who go much with bare head the hair becomes partly bleached, especially superficially, turning to a rusty hue.

The colour of the eyes varies from hazelbrown to dark brown. The conjunctiva in the young is bluish; in adults, especially the old, dirty-yellowish. The iris is often surrounded with a narrow but clearly marked ring.

The skin appears to be slightly thicker than that of the whites. The normal corrugations on the back of the hand and wrist are from childhood decidedly more pronounced in Indians of both sexes.

The hair of the head is straight, almost circular in cross-section, slightly coarser than in the average white, rather abundant and long. The range of variation in natural length is from 40 to 100 cm., or 18 in. to 36 in. Most male Indians would have a slight to moderate monstache and some beard on the chin if they allowed the hair to grow; but side whiskers in many are absent, or nearly so. Both moustache and chin beard are scarcer and coarser than with the whites, straight, of the same black as the hair, and in length 1 to 7 cm., or 15 in. to $2\frac{1}{2}$ in. The hair in the axillæ and on the pubis is moderate in quantity, in some instances nearly absent, and on the rest of the body hairs are shorter and less abundant than with the average white person. The nails are dull bluish in hue and moderately tough.

The face is well rounded and agreeable in childhood, interesting and occasionally handsome during adolescence and earlier adult life, and agreeable but much wrinkled in old age. The forehead in adults with undeformed skulls is somewhat low and in males slopes slightly backward. The eyebrows, where not plucked, are frequently connected by sparser hair above the nose. The evelashes are moderately thick and long. The apertures of the eyes are slightly oblique, the outer canthi, especially the right one, being the higher. In children the fold called Mongolie is general, but not excessive. The root of the nose is usually depressed, as in most whites. The size and shape of the nose vary much, but it is commonly

slightly shorter at the base and relatively wider than in whites, with an aquiline bridge predominating in men. In many men the point of the nose is lower than the base of the septum, the distal length exceeding the proximal. This peculiarity is especially frequent in some tribes. In women the nasal depression is wider and often shallower, and the bridge lower. Thin noses are not found. The lips are well formed and, barring individual exceptions, about as thick as in average whites. Prognathism is greater than in whites. The malars are in both sexes somewhat large and prominent: this becomes especially apparent in old age when much of the adipose tissue below them is gone. The chin often appears less prominent than in whites, but this effect is due to the greater alveolar protrusion. The ears are well formed and of good size, occasionally somewhat thick. The neck is of fair dimensions, never very long or thin.

The body as a rule is of good proportions, symmetrical, and, except in old age, straight and well nourished. The chest is of ample size. especially in men. The abdomen, which in children is often rather large, retains but slight fulness in later life. The pelvis, on account of the ample chest, appears somewhat small, but is not so by actual measurement. The spinal curves are only moderate, as are the size and prominence of the buttocks. The thighs are rather shapely: the calves are usually smaller than in whites. The upper limbs are of good shape and medium mu-culature. The feet and hands are well moulded and in many tribes smaller than they ordinarily are in whites. The toes are rather short, and, where the people walk much barefoot or in sandals, show more or less separation. The proximal parts of the second and third toes are often confluent. In the more sedentary tribes the women, and occasionally also the men, are inclined to corpulence. The breasts of women are of medium size; in the childless the conical form predominates: the nipple and areola are more pronounced than in whites: in later life the breasts become small and flaccid. The genital organs do not differ essentially from those of the whites.

The Indian skull is, on the average, slightly smaller than that of whites of equal height. Cranial capacity in men ranges from 1,300 to 1,500 e.c.; in women from about 1,150 to 1,350 e. c. The frontal region in men is often low and sloping, the sagittal region elevated, the occipital region marked with moderate ridges

and, in the dolichocephalic, protruding. Sutures are mostly less serrated than in whites: metopism, except in some localities, is rare, and occipital division is uncommon, while malar division is very rare and parietal division extremely so. Intercalated bones are few in undeformed crania; in deformed crania they are more numerous. The glabella, supraorbital ridges, and mastoids in male skulls are well-developed and sometimes heavy; in women they are small or of medium size. The nasal bridge is occasionally low, the nasal spine smaller than in whites; the lower borders of the nasal aperture are not often sharp, but nasal gutters are rare; subnasal fossæ are rather common. Orbits are of fair volume, approaching the quadrilateral, with angles rounded. Malars are often large, submalar depressions medium or shallow. The upper alveolar process, and occasionally also the lower, shows in both sexes a degree of prognathism greater than the average in whites, but less than in the negro. The protusion on the whole is somewhat greater in the females. The face is meso- or ortho-gnathic. The lower jaw varies greatly. The chin is of moderate prominence, occasionally high, sometimes square in form. prominence of the angles in full-grown males is not infrequently pronounced.

As to base structures, the foramen magnum is seldom large, and its position and inclination are very nearly the same as in whites; the styloid process is mostly smaller than in whites and not infrequently rudimentary; petrous portions on the average are less depressed below the level of neighbouring parts than in whites; anterior lacerated foramina are smaller; the palate is well formed and fairly spacious, mostly parabolic, occasionally U-shaped

The teeth are of moderate size: upper incisors are ventrally concave, shovel-shaped: canines not excessive; molars much as in whites; third molars rarely absent when adult life is reached. The usual cuspidory formula, though variations are numerous, is 4, 4, 3, above; 5, 5, irregular, below. A supernumerary conical dental element appears with some frequency in the upper jaw between, in front of, or behind the middle permanent incisors.

The bones of the vertebral column, the ribs, sternum, clavicles, and the smaller bones of the upper and lower limbs present many marks of minor importance. The pelvis is well formed, moderately spacious, approaching the European in shape. The humerus is rather flat, at times very much so: the fossa in 31 per

cent. is perforated; but vestiges of a supra-condyloid process are much rarer than in whites. The humero-radial index of maximum frequency in adult males is 77 to 80 (in whites 71 to 75); humero-femoral index, 71 to 75 (in whites 70 to 74). The femur is quite flat below the tuberosities; the tibia, often flat (platyenemic.)

Of the brain and other soft organs but little is known. Two adult male Apache brains, collected by Dr. W. Matthews and now preserved in the U.S. National Museum, weighed after removal 1,191 and 1,304 grams, respectively. Both show good gyration.

The Eskimo differs anatomically from the Indian in many important features. His hair and eyes are similar in shade, though the eyes are more obliquely set; but his skin colour on the whole is lighter, being yellowish or light brown, with a pronounced redness of the face. The Eskimo skull is high, normally scaphoid, and usually spacious. The face is large and flat, and the nasal bones are narrower than in any other people. The bones of the body are usually strong. There is less flattening of the shaft of the humerus, of the upper part of the shaft of the femur, and of the tibia. The superior border of the scapula shows often an angular instead of a curved outline.

In anthropometric differentiation the native tribes N. of Mexico are primarily separable into Indians and Eskimo. Some of the adjacent Indian tribes show Eskimo admixture.

The Indians among themselves vary considerably in stature, in form of the head and face, and of the orbits, the nose, and the nasal aperture. Low stature, from 160 to 165 cm. in males, is found among some of the Californian tribes as the Yuki of Round Valley ageney), many of the Pueblos, and some of the tribes of the N. W. coast, as the Salish of Harrison lake and Thompson r., and others. Among the Tigua, Tewa, Apache, Navaho, Comanche, northern Ute, Paiute, and Shoshoni, among the majority of California, Washington, and Oregon tribes, and among the eastern Cherokee, Chiekasaw, Kiowa, and Iowa the height in male adults ranges between 165 and 170 cm., while among the Yuma, Mohave, Maricopa, Pima, Nez Perces, Sioux, Crows, Winnebago, Cheyenne, Arapaho, Iroquois, Osage, Chippewa, and eastern Algonquians the prevalent stature of adult men is from 170 to 175 cm. The range of variation in the majority of tribes and in both sexes is within 30 em. The stature does not regularly

follow the geographic or elimatic features, nor does it agree wholly with the distribution of the other principal physical characteristics. The women are on the average about 125 em. shorter than the men: the difference is greater among the tall than among the short tribes.

The distribution of the Indians according to cephalic index is of much interest. Excluding tribes that are known to be much mixed, there are found in the territory N. of Mexico all the three principal classes of cranial form, namely, dolieho-, braehy-, and meso-cephalie. Among the extremely dolichocephalic were the Delawares and the southern Utah eliff-dwellers. Moderate dolichocephaly, with occasional extreme forms, was and is very prevalent, being found in the Algonquian and the majority of the Siouan and Plains tribes and among the Siksika, Shoshoni, some Pueblos (e. g., Taos), and the Pima. Pure brachycephaly existed in Florida, and prevailed in the mound region and among the ancient Pueblos. It is best represented to-day among the Apache, Walapai, Havasupai, Nez Percés, Harrison Lake Salish, Osage, and Wichita, and in a less degree, among the Hopi, Zuni, most of the Rio Grande Pueblos, Navaho, Mohave, Yuma, California Mission Indians, Comanche, Winnebago, many of the north-western tribes, and Seminole. Mesocephaly existed principally among the California Indians, the Cherokee, and some of the Sioux and Iroquois. There are numerous tribes in North America about whose cephalic form there is still much uncertainty on account of the prevailing head deformation. As to the height of the head, which must naturally be considered in connection with the cephalic index, fair uniformity is found. In the Apache the head is rather low, among most other tribes it is moderate.

The form of the face is generally allied, as among other peoples, to the form of the head, being relatively narrow in narrow heads and broad in the brachycephalic. Orbits show variations, but the prevalent form is mesoseme. The nose and the nasal aperture are generally mesorhinic; the principal exception to this is found on the W. coast, especially in California, where a relatively narrow nose (leptorhinic) was common. The projection of the upper alveolar region is almost uniformly mesognathic.

The Eskimo range in height from short to medium, with long and high head, relatively broad flat face, high orbits, and narrow nose, showing alveolar prognathism like the Indians.

Andeguale. A Niska town inhabited by two Chimmesyan families, the Lakseel of the Raven clan and the Gitgigenih of the Wolf clan.—Boas in 10th Rep. N. W. Tribes, 48–49, 1895.

Anderson Lake. A band of Upper Lillooet on a lake of the same name in British Columbia Can. Ind. Aff., 415, 1898); pop. 38 in 1911.

Andiata. A former Huron village in Ontario.—Jes. Rel. of 1636, III, 1858.

Andiatae.-Jes. Rel. of 1637, 134, 1858.

Anektettim (Anexté't'tîm, 'stony little hollow'). A village of the Lytton band of Ntlakyapamuk, situate on the E. side of Fraser r., 3 m. above Lytton, British Columbia.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Anepo ('buffalo rising up.'—Hayden). A division of the Kainah tribe of the Siksika.

A-ne'-po.—Morgan, Anc. Soc, 171, 1878 (said to be the name of an extinct animal). 1-ni'-po-i.—Hayden, Ethnog, and Philol. Mo. Val., 264, 1862.

Angakok. A magician or conjurer among the Eskimo, the word for shaman in the eastern Eskimo dialects, now much used especially in American anthropological literature. (A. F. C.)

Angmalook (Eskimo name). A species of salmon (Salmo nitidus) found in the lakes of Boothia peninsula, Franklin.—Rep. U. S. Fish. Com., 122, 1872–73.

Augmalortuk ('the round one'). A Netchilirmiut winter village on the W. coast of Boothia bay, Franklin.

Angmalortoq.—Boas in 6th Rep. B. A. E, map, 1888.

Angoutenc. A former Huron village situated between Wenrio and Ossossane, about 2 m. from the latter place, in Ontario.

Angoutenc.—Jes. Rel. for 1638, 34, 1858. Ang8iens.—Ibid., 1636, 116 (misprint). Ang8tenc.—Ibid., 35.

Anibiminanisibiwininiwak. ('Pembina (cranberry) river men.' from nibimina 'highbush cranberry,' sibiw 'river,' ininiwak 'men'). A Chippewa band living on Pembina r. in extreme x. Minnesota and the adjacent portion of Manitoba. They removed from Sandy lake, Minn., to that region about 1807, at the solicitation of the North West Fur Company.—Gatschet, Ojibwa MS., B. A. E.

Chippewas of Pembena River.—Lewis, Travels, 178, 1809. Pembina band.—Events in Ind. Hist, suppl, 613, 1841.

Annapolis. One of the 7 districts of the territory of the Micmac, as recognized by themselves. It includes the S. W. portion of Nova Scotia.—Rand, First Micmae Reading Book, 81, 1875.

Anonatea. A Huron village situated a league from Ihonatiria, in Ontario in 1637.— Jesuit Relation for 1637, 143, 1858.

Anenatea.—Ibid., 141. Anonatra.—Ibid., 166 (misprint).

Anoritok ('without wind'). An Eskimo settlement in E. Greenland, lat. 61° 45′.—Meddelelser om Grönland, xxv, 23, 1902.

Antigonish. Mentioned as an Indian settlement on a river of the same name which rises in a lake near the coast of the strait of Canso, in "the province and colony of New Scotland." It was probably on or near the site of the present Antigonish, in Antigonish co., Nova Scotia, and perhaps belonged to the Miemae.

Artigoniche. Alcedo, Die. Geog., 1, 161, 1786.

Antiquity. The antiquity of man on the American continent is a subject of interest to the student of the aborigines as well as to the historian of the human race, and the various problems that arise with respect to it in the region N. of Mexico are receiving much scientific attention. As the tribes were without a system of writing available to scholars, knowledge of events that transpired before the Columbian discovery is limited to the rather indefinite testimony furnished by tradition, by the more definite but as yet fragmentary evidences of archeology, and by the internal evidence of general ethnological phenomena. The fact that the American Indians have acquired such marked physical characteristics as to be regarded as a separate race of very considerable homogeneity from Alaska to Patagonia, is regarded as indicating a long and complete separation from their parental peoples. Similarly, the existence in America of numerous culture groups, measurably distinct from one another in language, social customs, religion, technology, and esthetics, is thought to indicate a long and more or less exclusive occupancy of independent areas. But as a criterion of age the testimony thus furnished lacks definiteness, since to one mind it may signify a short time, while to another it may suggest a very long period. Native historical records of even the most advanced tribes are hardly more to be relied on than tradition, and they prove of little service in determining the duration of occupancy of the continent by the race, or even in tracing the more recent course of events connected with the historic peoples. No one ean speak with assurance, on the authority of either tradition or history, of events dating farther back than a few hundred years. Archieology, however, can furnish definite data with respect to antiquity; and, aided by geology and biology, this science is furnishing results of great value, although some of the greater problems encountered remain still unsolved. and must so remain indefinitely. the first centuries of European occupancy

of the continent, belief in the derivation of the native tribes from some Old World people in comparatively recent times was very general, and indeed the fallacy has not yet been entirely extinguished. This view was based on the apparently solid foundation of the Mosaic record and the chronology as determined by Usher, and many works have been written in the attempt to determine the particular people from which the American tribes sprang. (See Popular Fallacies, and for various references consult Bancroft, Native Races, v. 1886; Winsor, Narrative and Critical History, 1, 1884). The results of researches into the prehistoric archæology of the eastern continent during the last century, however, have cleared away the Usherian interpretation of events and established the fact of the great antiquity of man in the world. Later, investigations in America were taken up, and the conclusion was reached that the course of primitive history had been about the same on both continents. Observations that seemed to substantiate this conclusion were soon forthcoming and were readily accepted; but a more critical examination of the testimony shows its shortcomings and tends to hold final determinations in abevance. It is clear that traces of early man are not so plentiful in America as in Europe, and investigations have proceeded with painful slowness and much halting along the various lines of research. Attempts have been made to establish a chronology of events in various ways, but without definite result. The magnitude of the work accomplished in the building of mounds and other earthworks has been emphasized, the time requisite for the growth and decay upon these works of a succession of forests has been computed (see Mounds). The vast accumulations of midden deposits and the fact that the strata composing them seem to indicate a succession of occupancies by tribes of gradually advancing culture, beginning in savagery and ending in well-advanced barbarism, have impressed themselves on chronologists (see Shell-heaps). Striking physiographic mutations, such as changes of level and the consequent retreat or advance of the sea and changes in river courses since man began to dwell along their shores, have been earefully considered. Modifications of partieular species of mollusks between the time of their first use on the shell-heap sites and the present time, and the development in one or more eases of new varieties, suggest very considerable antiquity. But the highest estimate

of elapsed time based on these evidences does not exceed a few thousand years. Dall, after carefully weighing the evidence collected by himself in Alaska, reached the conclusion that the earliest midden deposits of the Alcutian ids. are probably as much as 3,000 years old. Going beyond this limit, the geological chronology must be appealed to, and we find no criteria by means of which calculations can be made in years until we reach the close of the Glacial epoch, which, according to those who venture to make estimates based on the erosion of river channels, was, in the states that border the St. Lawrence basin, not more than 8,000 or 10,000 years ago Winchell. Within this period. which in middle North America may properly be designated post-Glacial, there have been reported numerous traces of man so associated with the deposits of that time as to make them measurably valuable in chronological studies; but these evidences come within the province of the geologist rather than of the archæologist, and findings not subjected to critical examination by geologists having special training in the particular field may well be placed in the doubtful category.

Post-Glacial rivers, in cutting their channels through the various deposits to their present level, have in some cases left a succession of flood-plain terraces in which remains of man and his works are embedded. These terraces afford rather imperfect means of subdividing post-Glacial time, but under discriminating observation may be expected to furnish valuable data to the chronologist. The river terraces at Trenton, N.J., for example, formed largely of gravel accumulated at the period when the southern margin of the ice sheet was retreating northward beyond the Delaware valley, have been the subject of careful and prolonged investigation. At the points where traces of man have been reported the section of these deposits shows generally beneath the soil a few feet of superficial sands of uncertain age, passing down rather abruptly into a more or less uniform deposit of coarse gravel that reaches in places a depth of 30 feet or more. On and near the surface are found village sites and other traces of occupancy by the Indian tribes. Beneath the soil, extending throughout the sand layers, stone implements and the refuse of implement-making occur; but the testimony of these finds can have little value in chronology, since the age of the deposits inclosing them remains in doubt. From the Glacial gravels proper there has been recovered a single object to which weight as evidence of human presence during their accumulation is attached; this is a tubular bone, regarded as part of a human femur and said to show glacial strike and traces of human workmanship. found at a depth of 21 feet. On this object the claim for the Glacial antiquity of man in the Delaware valley and on the Atlantic slope practically rests (Putnam, Mercer, Wright, Abbott, Hrdlicka, Holmes). Other finds E. of the Alleghenies lacking scientific verification furnish no reliable index of time. In a post-Glacial terrace on the s. shore of lake Ontario the remains of a hearth were discovered at a depth of 22 feet by Mr. Tomlinson in digging a well, apparently indicating early aboriginal occupancy of the St. Lawrence basin (Gilbert). From the Glacial or immediately post-Glacial deposits of Ohio a number of articles of human workmanship have been reported: A grooved axe from a well 22 feet beneath the surface, near New London (Claypole); a chipped object of waster type at Newcomerstown, at a depth of 16 feet in Glacial gravels Wright, Holmes; chipped stones in gravels, one at Madisonville at a depth of > feet, and another at Loveland at a depth of 30 feet. Metz. Putnam, Wright, Holmest. At Little Falls, Minn., flood-plain deposits of sand and gravel are found to contain many artificial objects of quartz. This flood plain is believed by some to have been finally abandoned by the Mississippi well back toward the close of the Głacial period in the valley (Brower, Winchell, Uphani, but that these finds warrant definite conclusions as to time is seriously questioned by Chamberlin. In a Missouri r. bench near Lansing Kans., portions of a human skeleton were recently found at a depth of 20 feet, but geologists are not agreed as to the age of the formation (see Lansing Man. At Clayton, Mo., in a deposit believed to belong to the loess, at a depth of 14 feet, a well-finished grooved axe was found In the Basin Range region be-(Peterson tween the Rocky mts, and the Sierras, two discoveries that seem to bear on the antiquity of human occupancy have been reported: In a silt deposit in Walker r. valley, Nev., believed to be of Glacial age, an obsidian implement was obtained at a depth of 25 feet /McGee: at Nampa, Idaho, a clay image is reported to have been brought up by a sand pump from a depth of 320 feet in alternating beds of clay and quicksand underlying a lava flow of late Tertiary or early Glacial age Wright, Emmons: see $Nampa\ Imag\epsilon$. Questions are raised by a

number of geologists respecting the value of these finds (McGee). The most extraordinary discoveries of human remains in connection with geological formations are those from the auriferous gravels of California (Whitney, Holmes). These finds are numerous and are reported from many localities and from deposits covering a wide range of time. So convincing did the evidence appear to Whitney, state geologist of California from 1860 to 1874, that he accepted without hesitation the conclusion that man had occupied the auriferous gravel region during pre-Glacial time, and other students of the subject still regard the testimony as convincing: but consideration of the extraordinary nature of the conclusions dependent on this evidence should cause even the most sanguine advocate of great human antiquity in America to hesitate (see Calaveras Man). Geologists are practically agreed that the gravels from which some at least of the relics of man are said to come are of Tertiary age. These relies represent a polished-stone culture corresponding closely to that of the modern tribes of the Pacific slope. Thus, man in America must have passed through the savage and well into the barbarous stage while the hypothetical earliest representative of the human race in the Old World, Pithecanthropus erectus of Dubois, was still running wild in the forests of Java, a half-regenerate Simian. Furthermore, the acceptance of the auriferousgravel testimony makes it necessary to place the presence of man in America far back toward the beginning of the Tertiary age, a period to be reckoned not in tens but in hundreds of thousands of years. (See Smithson, Rep. for 1899). These and other equally striking considerations suggest the wisdom of formulating conclusions with the utmost caution.

Caves and rock shelters representing various periods and offering dwelling places to the tribes that have come and gone, may reasonably be expected to contain traces of the peoples of all periods of occupancy; but the deposits forming their floors, with few exceptions, have not been very fully examined, and up to the present time have furnished no very tangible evidence of the presence of men beyond the limited period of the American Indian as known to us. The University of California has conducted excavations in a cave in the N. part of the state, and the discovery of bones that appear to have been shaped by human hands, associated with fossil fauna that probably represent early Glacial times, has been reported Sinclair); but the result is not decisive. The apparent absence or dearth of ancient human remains in the caves of the country furnishes one of the strongest reasons for critically examining all testimony bearing on antiquity about which reasonable doubt can be raised. It is incredible that primitive man should have inhabited a country of caverns for ages without resorting at some period to their hospitable shelter; but research in this field is hardly begun, and evidence of a more conclusive nature may yet be forthcoming.

In view of the extent of the researches carried on in various fields with the object of adducing evidence on which to base a scheme of human chronology in America, decisive results are surprisingly meager, and the finds so far made, reputed to represent a vast period of time stretching forward from the middle Tertiary to the present, are characterized by so many defects of observation and record and so many apparent incongruities, biological, geological, and cultural, that the task of the chronologist is still largely before him.

For archæological investigations and scientific discussion relating to the antiquity of man within the limits of the United States, see Abbott (I) in Proc. Boston Soc. Nat. Hist., XXIII, 1888, (2) in Proc. A. A. A. S., XXXVII. 1888; Allen, Prehist, World, 1885; Bancroft, Native Races, 1v, 1882; Becker in Bull. Geol. Soc. Am., 11, 1891; Blake in Jour. Geol. The progress of opinion and research relating to the origin, antiquity, and early history of the American tribes is recorded in a vast body of literature fully eited, until within recent years, by Bancroft in Native Races, IV, 1882. and Haynes in Winsor's Narrative and Critical History, I, 1884. (W. H. H.)

Anuenes (Anuē'nes). A gens of the Nanaimo.—Boas in 5th Rep. N. W. Tribes, 32, 1889.

Anvils. Primitive workers in metal were dependent on anvil stones in shaping their implements, utensils, and ornaments. Anvils were probably not especially shaped for the purpose, but consisted of boulders or other natural masses of stone, fixed or moveable, selected according to their fitness for the particular purpose for which they were employed. Few of these utensils have been identified, however, and the types most utilized by the tribes are left to conjecture. The worker in stone also sometimes used a solid rock body on which to break and roughly shape masses of flint and other stone. These are found on many sites where stone was quarried and wholly or partially worked into shape, the upper surface showing the marks of rough usage, while fragments of stone left by the workmen are scattered about. (w. H. n.)

Aogitunai (⁸Ao-gùanā'-i, 'Masset inlet gituns'). A Masset subdivision residing in the town of Yaku, opposite North id., and deriving their name from Masset inlet, Queen Charlotte ids., British Columbia.—Swanton, Cont. Ilaida 275, 1905.

Aokeawai (*Ao-qē'awa-i, 'those born in the inlet'). A division of the Raven clan of the Skittagetan family which received its name from Masset inlet, Queen Charlotte ids., British Columbia, where these people formerly lived. Part of them, at least, were settled for a time at Dadens, whence all finally went to Alaska. There were two subdivisions: Hlingwainaashadai and Taolnaashadai.—Swanton, Cont. Haida, 272, 1905.

Kão-kē'-owai,---Boas, 12th Rep. N. W. Tribes, 22, 1898-Kēo Hāadē,---Harrison in Trans. Roy. Soc. Can., sec-II, 125, 1895.

Aondironon. A branch of the Neutrals whose territory bordered on that of the Huron in w. Ontario. In 1648, owing to an alleged breach of neutrality, the chief town of this tribe was sacked by 300 Iroquois, mainly Seneca, who killed a large number of its inhabitants and carried away many others in captivity.—Jes. Rel. for 1640, 35, 1858.

Ahondihronnons.—Jes. Rel. for 1656, 34, 1858. Aondironnons.—Jes. Rel. for 1648, 49, 1858. Ondironon.
—Ibid, mr, index, 1858.

Aostlanlnagai (⁸Ao st.'an Inagā'i, 'Masset inlet rear-town people'). A local subdivision of the Raven clan of the Skittagetan family. Masset inlet gave them the separate name.—Swanton, Cont. Haida, 271, 1905.

Stl'EngE lä' nas.—Boas, 12th Rep. N. W. Tribes, 22, 1898

Aoyakulnagai (⁸Ao yā' ku lnagā' i, 'middle town people of Masset inlet'). A branch of the Yakulanas division of the Raven clan of the Skittagetan family, which received the name from Masset inlet, where its town stood.—Swanton, Cont. Haida, 271, 1905.

G'anyakoiinagai.—Boas, 12th Rep. N. W. Tribes, 23, 1898 (probably a misprint for G'auyakoilnagai, its name in the Skidegate dialect). Ou yākū llnigē.—Harrison in Trans Roy Soc. Can, 125, 1895.

Apikaiyiks ('skunks'). A division of the Kainah and of the Piegan.

Ah-pe-ki'.—Morgan, Anc. Soc, 171, 1877 (Kainah). Ah-pe-ki'-e.—Ibid, (Piegan). Ap'-i-kai-yiks.— Grinnell, Blackfoot Lodge Tales, 209, 1892 (Kainah and Piegan). A-pi-kai-'yiks.—Hayden, Ethnog and Philol, Mo. Val., 261, 1862 (Piegan).

Apishamore. A saddle blanket, made of buffalo-calf skins, used on the great prairies (Bartlett, Diet. Americanisms, 15, 1877). An impossible derivation of this word from the French empichement has been suggested. Meaning and form make it evident that the term is a corruption of apishimon, which in the Chippewa and closely related dialects of Algonquian signifies 'anything to lie down upon.' (A. F. C.)

Apontigoumy. An Ottawa village, attacked by the Seneca in 1670.—Conrelles (1670) in N. Y. Doc. Col. Hist., IX, 788, 1855.

Appeelatat. A Montagnais village on the s. coast of Labrador. —Stearns, Labrador, 271, 1884.

Aputosikainah ('northern Bloods'), A band of the Kainah division of the Siksika, Ap-ut'-o-si-kai-nah.—Grmnell, Blackfoot Lodge Tales 209, 1892.

Aqbirsiarbing ('a lookout for whales'). A winter settlement of Nugumint at cape True, Baffin island.—Boas in 6th Rep. B. A. E., 422, 1888.

Aragaritka. The name given by the Iroquois to the tribes, including the Huron and Tionontati, which they drove out from the peninsula between 1. Huron and 4. Eric and from lower Michigan.—Iroquois deed (1701) in N. Y. Doc. Col. Hist., 19, 908, 1854.

Araste. An froquoian village in 1535 on, or near, St. Lawrence r., below the site of Quebec. —Cartier (1545), Bref Récit, 32, 1863.

Arbaktung. A subdivision of the Akudnirmiut; they winter generally on cape Bisson, Home bay, Baffin island.—Boas in Deutsche Geog. Blatt., viii, 34, 1885.

Archæology. Archæological researches are applied to the clucidation of three principal departments of inquiry: (1) The history of the race and the sub-races; (2) the history of the separate families, tribes, and inferior social groups; (3) the history of culture in its multifarious forms. Questions of origin and antiquity are necessarily considered in connection with investigations in each of these departments. In the present article all that can be included is a brief review of the salient features of the archæology of northern America.

In no part of America are there remains of man or his works clearly indicatin, the presence of peoples distinct from the Indian and the Eskimo, or having culture markedly different in kind and degree from those characterizing the aborigines of historic times. Archaeological researches serve to carry the story of the tribes and their culture back indefinitely into the past, although the record furnished by the various classes of remains grows rapidly less legible as we pass beyond the few well-illumined pages of the historic period. It is now known that the sedentary condition prevailed among the aborigines to a much larger extent than has been generally supposed. The more advanced nations of Middle and South America have been practically stationary for long periods, as indicated by the magnitude of their architectural achievements, and even such primitive groups as the Iroquois, Algonquians, and others of northern America have occupied their general historic habitat for unnumbered generations. The prehistoric remains of the various regions thus pertain in large measure to the ancestors of the historic occupants, and the record is thus much more simple than that of prehistoric Europe.

Within the area of the United States Pre-Columbian progress was greatest in two principal regions: (1) The Mississippi valley, including portions of the southern States farther eastward, and (2) the Pueblo country, comprising New Mexico, Arizona, and parts of Colorado, Utali, and Texas. The first-mentioned area is characterized by remains of extensive fixed works, such as mounds and fortifications; the second by its ruined pueblos of stone and adobe. In the remainder of the area, as on the Atlantic and Pacific slopes and in the regions of the Great lakes, the N. Rocky mts., and the Great basin, there is comparatively little save minor moveable relies and kitchen deposits to mark earlier occupancy. The fixed works which occur in the first-mentioned region are very numerous, and are extremely important to the student of native history. In the Mississippi valley and the Southern states these works consist of mounds of diversified shapes, built mainly of earth and devoted to a variety of purposes, such as dwelling, observation, defense, burial, and reremony. Some of these are of great size, as the Cahokia mound in Illinois, and the Etowah mound in Georgia, which compare well in bulk with the great pyramids of middle America. There are also fortifications and inclosures of extremely varied form and, in many instances, of great extent. These are well illustrated by Ft.

Ancient, Adams co., Ohio, andthe earthworks at Newark, Ohio. The animalshaped mounds, occurring principally in the Ohio and upper Mississippi valleys, are a striking variety of these remains. Wellknown examples are the Serpent mound, Adams co., Ohio, and the so-called Elephant mound, Grant co., Wis. The materials used in these structures include earth, clay, sand, and, along the coast, shells. Stone entered into the construction where it was readily available, but rarely as well-built walls or as masonry. These works indicate the former presence in the region of a numerous sedentary population relying mainly on agriculture for subsistence. It is now known, as a result of the more recent archæological investigations, that these people, often called the "Moundbuilders," were no other than Indians, and in some cases at least the ancestors of tribes occupying the general region within historic times.

In the Pueblo region the fixed works consist of villages and dwellings of stone, and, in the southern Pueblo area, of adobe. Of unusual interest are the cliff-dwellings, built of stone in rifts and shelters in the cañon walls and along the faces of the table-lands or excavated in friable eliffs. The advanced condition of the earlier occupants of the region is indicated not only by these remains but by the presence of traces of extensive irrigating ditches. A careful study of these various remains, including the skeletal parts, demonstrates the fact that they pertain in large measure to the ancestors of the present occupants of the Pueblo towns and that no antecedent distinct people or culture can be differentiated.

In the districts lying outside of the areas referred to above are encountered occasional burial mounds and earthworks, as well as countless refuse deposits marking occupied sites. The most notable of the latter are the shell mounds of the Atlantic and Pacific shore lines, which offer a rich reward for the labours of the archæologist.

Among fixed works of somewhat wide distribution are the quarries where flint, soapstone, mica, quartzite, obsidian, and other varieties of stone were obtained for the manufacture of implements and utensils. Such are the extensive workings at Flint Ridge, Ohio; Hot Springs, Ark.; and Mill Creek, Ill., the sites being marked by numerous pittings surrounded with the refuse of manufacture. Their lesson is a most instructive one, demonstrating especially the great enterprise and perseverance of

the tribes. There are also numerous copper mines in the L. Superior region, marked by excavations of no great depth but of surprising extent, indicating the fulness of the native awakening to the advantages of metal in the arts. (See Mines and Quarries.) Caverns formerly occupied by the tribes also contain deposits of refuse, and their walls display numerous examples of pictography. In connection with fixed works may also be mentioned the petroglyphs, or rock inscriptions, found in nearly every part of the country. These give little aid, however, to the study of aboriginal history, since they can not be interpreted, save in rare cases where tradition has kept the significance alive.

Knowledge of native history in Post-Columbian as well as in Pre-Columbian times is greatly enhanced by a study of the minor remains and relics—the implements, utensils, ornaments, ceremonial and diversional objects and appliances—great numbers of which are now preserved in our museums.

A study of the archaeological remains contained in the area N. of the Rio Grande as a whole supplements the knowledge gained by investigations among the living tribes in such a way as to enable us not only to prolong the vista of many tribal histories but to outline, tentatively at least, the native general history somewhat as follows: An occupancy of the various regions in very early times by tribes of low culture; a gradual advance in arts and industries, especially in favourable localities, resulting in many cases in fully sedentary habits, an artificial basis of subsistence, and the successful practice of many arts and industries. such as agriculture, architecture, sculpture, pottery, weaving, and metallurgy-accomplishments characterizing a well-advanced stage of barbarism, as defined by Morgan; while in the less favoured regions, comprising perhaps three-fourths of the area of the United States and a larger proportion of the British possessions, the more primitive hunter-fisher stage mainly persisted down to historic times.

Efforts have been made to distinguish definite stages of culture progress in America corresponding to those established in Europe, but there appears to be no very close correspondence. The use of stone was universal among the tribes, and chipped and polished implements appear to have been employed at all periods and by peoples of every stage of culture, although the polishing processes seem to have grown relatively more important with advance-

ing culture, being capable of producing art works of the higher grades, while flaking processes are not. Some of the more advanced tribes of the S. were making marked headway in the use of metals, but the culture was everywhere essentially that of polished stone.

The antiquity of man in America has been much discussed in recent years, but as yet it is not fully agreed that any great antiquity is established. Geological formations in the United States, reaching well back toward the close of the Glacial period, possibly ten thousand years, are found to include remains of man and his arts; but beyond this time the traces are so meagre and elements of doubt so numerous that conservative students hesitate to accept the evidence as satisfactory.

The literature of the northern archæology is very extensive and can not be cited here save in outline. Worthy of particular mention are publications* by (1) Government Depart-MENTS: U. S. Interior Dept., Reps. Survey of Territories, with papers by Bessels, Holmes, Jackson: Contributions to N. Am. Ethnology, papers by Dall, Powers, Rau, and others. U. S. War Dept.: Reps. of Surveys, papers by Abbott, Ewbank, Loew, Putnam, Schumacher, Yarrow, and others. Education Department, Toronto, Canada: Reps. of Minister of Edneation, papers by Boyle, Hunter, Laidlaw, and others. (2) Institutions: Smithsonian Institution Annual Reports, Contributions to Knowledge, Miscellaneous Collections, containing articles by Abbott, Dall, Fewkes, Holmes, Jones, Lapham, Rau, Squier and Davis, Whittlesey, Wilson, and others (see published list); National Museum Reports, Proceedings, Bulletins, containing papers by Holmes, Hough, Mason, McGuire, Wilson, and others (see published list); Bureau of American Ethnology Reports, Bulletins, containing articles by Cushing, Dall, Fewkes, Fowke, Henshaw, Holmes, Mindeleff, Thomas, and others Peabody Museum Reports, Memoirs, Archæol. and Ethnol. Papers, containing articles by Abbott, Putnam, Willoughby, Wyman, and others; American Museum of Natural History, Memoirs, Bulletins, containing articles by Hrdlicka, Smith, and others (see published list); Museum of Arts and Science University of Pennsylvania, Publications, containing articles by Abbott, Culin, Mercer, and others; Field Columbian Museum, Publications, containing papers by Dorsey, Phillips, and others; N. Y. State Museum Reports! University of the State of New York, Bulletins, containing papers by Beauchamp; University of California, Publications, containing papers by Sinclair and others. (3) Academies, Societies, and Associations: Academy of Natural Sciences of Phila., Journal, with numerous memoirs by Moore; American Ethnological Society, Transactions, with papers by Schoolcraft, Troost, and others; Davenport Academy of Science, Proceedings, with papers by Farquharson, Holmes, and others; American Association for the Advancement of Science, Proceedings, with numerous papers; Archæological Institute of America, Papers, containing articles by Bandelier and others; National History Society of New Brunswick, Bulletins; International Congress of Americanists; Washington Anthropological Society; Wyoming Historical and Geological Society; Ohio Archæological and Historical Society; Canadian Institute: American Antiquarian Society; Boston Society of Natural History. (4) Periodicals: American Geologist; American Journal of Science and Art; American Anthropologist; American Antiquarian; The Archeologist; Popular Science Monthly; Science; American Journal of Science; American Naturalist; Journal of Geology. (5) Sepa-RATE INDIVIDUAL PUBLICATIONS: Abbott, Primitive Industry, 1881; Allen, Prehist. World, 1885; Bancroft, Native Races, 1882; Brower, Memoirs of Explorations, 1898–1903; Clark. Prehist. Remains, 1876; Dellenbaugh, North Americans of Yesterday, 1901; Fewkes, Journal of American Ethnology and Archeology, 1-1v, 1891-94; Foster, Prehist. Races, 1878; Fowke, Archeol. Hist. Ohio, 1902; Jones, (1) Monumental Remains of Georgia, 1861, (2) Antiquities of the Southern Indians, 1873; McLean, Mound Builders, 1879; Moorehead, (1) Prehistoric Implements, 1900, (2) Fort Ancient, 1890, (3) Primitive Man in Ohio, 1892; Morgan, League of Iroquois, 1854, 1904; Munro, Archæology and False Antiquities, 1905; Nadaillac, Prehist. Am., 1884; Nordenskiöld, Cliff Dwellers of the Mesa Verde, 1893; Read and Whittlesey in Ohio Centennial Rep., 1877; Schoolcraft, Indian Tribes, vols. 1-1v, 1851-57; Short, North Americans of Antiquity, 1880; Starr, First Steps in Human Progress, 1895; Squier, Antiquities of New York and the West, 1851; Terry, Sculp. Anthr. Ape Heads, 1891; Thurston, Antiq. of Tenn., 1897; Warden, Recherches sur les antiquités de l'Amér. Sept.,

^{*}This list is reprinted verbatim from the Handbook of American Indeans and, therefore, contains many works that do not contain any references to Canadian Indians.

1827. Wilson, Prehistoric Man, 1862; Winsor, Narrative and Critical History of America, I, 1884; Wright, Man and the Glacial Period, 1895. For archæological bibliography of Ontario, Canada, see 9th Archæological Report of Minister of Education, Ontario. 1897. (W. H. H.)

Architecture. The simple constructions of the tribes N. of Mexico, although almost exclusively practical in their purpose, serve to illustrate many of the initial steps in the evolution of architecture; they are hence worthy of careful consideration by the student of culture history. Various branches of the building arts are treated separately under appropriate heads, but as these topics are there considered mainly in their ethnologic aspects, they will here be briefly treated as products of environment and as illustrations of the manner in which beginnings are made and the higher architectural forms are evolved. The kind and character of the buildings in a given district or region depend on a number of conditions, namely: (a) The capacity, habits, and characteristics of the people; (b) the cultural and especially the social status of the particular peoples; (c) the influence of neighbouring cultures; (d) the physiography of the district occupied; (e) the resources, animal, vegetal, and mineral, and especially the building materials available within the area; (f) climate. These in the main are the determining factors in the art development of all peoples in all times, and may be referred to somewhat at length.

- (1) In these studies it is necessary that the man himself and especially his mental capacities and characteristics should be considered as essential elements of the environment, since he is not only the product, as is his culture, of present and past environments, but is the primary dynamic factor in all culture development.
- (2) The culture status of the people—the particular stage of their religious, social, technical, and æsthetic development—goes far toward determining the character of their buildings. The manner in which social status determines the character of habitations is dwelt on by Morgan (Cont. N. A. Ethnol., IV, 1881), to the apparent exclusion of other criteria. Within the area N. of Mexico the various phases characterizing the enlture of numerous tribes and groups of tribes are marked by more or less distinctive habitations. People of the lowest social grade are content with nature's canopies

- -the sky, the forest, and the overhanging rocks-or construct simple shelters of brush or bark for protection against sun, wind, and rain. Some build lodges of skins and mats, so light that they may be carried from place to place as the food quest or the pressure of foes reonires; while others, higher in the scale, construct strong houses of timber or build fortresslike pueblos of hewn stone or adobe. Along with the succession of steps in culture progress there goes progressive differentiation of use. The less advanced tribes have only the dwelling, while the more cultured have, in addition, fortifications, temples, civic structures, tombs, storage houses, observation towers, dams, canals, reservoirs, shelters for domestic animals. and various constructions employed in transportation. Social customs and religion play each a part in the results accomplished, the one acting on the habitation and the other giving rise to a separate and most important branch of the building arts.
- (3) The building arts of the tribes N. of Mexico have been little affected by outside influence. In the N. there is only a limited contact with the Siberian tribes, which have little to give; and in the s. nearly a thousand miles separate the tribes of our s. border from the semi-civilized Indians of central Mexico. So slowly did inter-tribal influence act within the area here included, and so fully does environment control culture, that in many cases where the conditions have remained reasonably stable distinct styles of building exist almost side by side, and have so existed from time immemorial.
- (4) It is apparent at a glance that the physiographic characters of a country exercise strong influence on aboriginal building arts, and at the same time have much to do with the trend of culture in general and with results finally achieved in civilization. Dwellings on the open plains necessarily differ from those in the mountains, those of a country of forests from those of an arid region, and those of rich alluvial bottoms from those of the land of plateaus and cliffs. Even the characteristics of the particular site impress themselves strongly on the buildings and the building group.
- (5) In any area the natural resources have much to do with determining the economic status of the people and, according as they are favourable or unfavourable, foster or discourage progress in the arts. The building materials available to a people exercise a profound influence on the building arts. The presence of

plentiful, easily quarried stone, well adapted to building purposes, permits and encourages rapid development of these arts, while its absence may seriously retard their development and in fact may be accountable for the backward condition of a people not only in this activity but in the whole range of its activities. The highest development is not possible without stone, which alone of the materials available to uncivilized man for building purposes is sufficiently permanent to permit the cumulative growth necessary to the evolution of the higher forms of the art of architecture.

(6) Climate is an element of the highest significance in the history of building. In warm, and districts shelter is not often a necessity, and a primitive people may have no buildings worthy of the name; but in the far N. carefully constructed dwellings are essential to life. The habitations of an arid region naturally differ from those of a region where moisture prevails.

The conditions thus outlined have operated in the various culture areas N. of the Rio Grande to produce the diversified results observed; and these results may now be passed briefly in review. Among the most clearly defined and characteristic of these environments are (1) the Arctic area, (2) the North Pacific area, (3) the Middle Pacific area, (4) the arid region of the S. W., (5) the Basin range and Rocky Mt. highlands, (6) the Mississippi lowlands and the middle S., (7) the woodlands of the N. and E., and (8) the Gulf coast and Florida. Within some of these the conditions are practically uniform over vast areas, and the results are uniform in proportion, while in others conditions are greatly diversified, numerous more or less distinct styles of house construction having developed almost side by side. As with the larger areas, each inferior division displays results due to the local conditions. may be observed that of the various conditioning agencies of environment one may dominate in one district and another in another district, but with our present imperfect knowledge of the facts in a majority of cases the full analysis of conditions and effects is not vet possible.

It is not to be expected that the building arts can flourish within the Arctic circle. Along the many thousands of miles of n. shore line agriculture is out of the question. Wood is known only as it drifts from the s. along the icy shores, and save for the presence of oil-producing animals of the sea primitive man could not exist. Snow, ice, stone, bones of animals, and

driftwood are the materials available for building, and these are utilized for dwellings and storage places according to the requirements and capacities of the tribes. The house is depressed beneath the surface of the ground, partly, perhaps, better to withstand the cold, and partly, no doubt, because of the lack of necessary timbers to build walls and span the space required above ground. The large winter houses are entered by a long underground passage, the low walls of which are constructed of whale bones, stones, or timbers, while the house has a framework of timbers or whale-ribs covered with earth. The groundplan and interior arrangement are simple, but well perfected, and remarkably uniform over the vast extent of the Arctic shore line. The snow house is particularly a product of the N. Snow and ice, available for the greater part of the year, are utilized in the construction of dwellings unique on the face of the earth. These are built of blocks of compacted snow held in position, not by utilizing any of the ordinary principles of construction, but by permitting the blocks to crystallize by freezing into a solid dome of ice—so solid that the key block may be omitted for a window or for the passage of smoke without danger to the structure. This house lasts during the winter, and in the summer melts away. The summer houses are mere shelters of driftwood or bones covered with skins. There is no opportunity for æsthetic display in such houses as these, and clever as the Eskimo are in their minor art work, it is not likely that æsthetic effect in their buildings, interior or exterior, ever received serious consideration. The people do not lack in ability and industry, but the environment restricts constructive effort to the barest necessities of existence and effectually blocks the way to higher development. Their place in the culture ladder is by no means at the lowest rung, but it is far from the highest.

The houses of the N. W. coast derive their character largely from the vast forests of yellow cedar, which the enterprising people were strong enough to master and utilize. They are substantial and roomy structures, and indicate on the part of the builders decided ability in planning and remarkable enterprise in execution. They mark the highest achievement of the native tribes in wood construction that has been observed. The genius of this people applied to building with stone in a stone environment might well have placed them among the foremost builders in America. Vast

labour was expended in getting out the huge trunks, in hewing the planks, posts, and beams, in carving the house and totem poles, and in erecting the massive structures. The façade, with its mythological paintings and huge heraldic columns, is distinctly impressive. In early days the fortified towns, described by Vancouver and other pioneer explorers, were striking and important constructions. It is indeed a matter of regret that the genius of such a people should be expended upon a material of which no trace is left, save in museums, after the lapse of a few generations.

The contrast, due to differences in environment, between the buildings of the N. W. coast and those of the Pueblo region is most striking. With greater ability, perhaps, than the Pueblos, the northern peoples laboured under the disadvantage of employing materials that rapidly decay, while with the Pueblos the results of the skill and effort of one generation were supplemented by those of the next, and the cumulative result was the great pueblo. The lot of the Pueblo tribes fell in the midst of a vast region of cliffs and plateaus, where the means of subsistence admitted of the growth of large communities and where the readyquarried stone, with searcity of wood, led inevitably to the building of houses of masonry. The defensive motive being present, it directed the genius of the people toward continued and united effort, and the dwelling group became a great stronghold. Cumulative results encouraged cumulative effort; stronger and stronger walls were built, and story grew on story. The art of the stone-mason was mastered, the stones were hewn and laid in diversified courses for effect, door and window openings were accurately and symmetrically framed with cut stone and spanned with lintels of stone and wood, and towers of picturesque outline in picturesque situations, now often in ruins, offer suggestions of the feudal eastles of the Old World.

* * * * * * *

The primitive habitations of the Pacific slope from the strait of Fuca to the gulf of California afford a most instructive lesson. In the N. the vigorous tribes had risen to the task of utilizing the vast forests, but in the S. the improvident and enervated natives were little short of homeless wanderers. In the N. the roomy communal dwellings of the Columbia valley, described by Lewis and Clark, were found, while to the S. one passes through varied environments where timber and earth, rocks

and caves, rushes, bark, grass, and brush in turn played their part in the very primitive house-making achievements of the strangely diversified tribesmen.

In the highlands of the Great Divide and in the vast inland basins of the N, the building arts did not flourish, and houses of bark, grass, reeds, the skins of animals, and rough timbers covered with earth gave only necessary shelter from winter blasts. In the whole expanse of the forest-covered E, the palisaded fortress and the long-house of the Iroquois, in use at the beginning of the historical period, mark the highest limit in the building arts. On the Gulf coast the simple pile dwellings set in the shallow waters were all that the conditions of existence in a mild climate required.

It is probably useless to speculate on what might have been in store for the native builders had they been permitted to continue unmolested throughout the ages. The stone-builders had the most promising outlook, but they were still in the elementary stages of the arts of construction. They had not made the one essential step toward great building—the discovery of the means of covering large spaces without the use of wood. Although they were acquainted with many essential elements of construction, they had devised neither the offset span of stone nor the keystone arch.

In none of these areas had the tribes reached the stage in the building arts where constructive features or architectural details are utilized freely for purposes of embellishment. A people that could carve wood and stone and could decorate pottery and weave baskets of admirable pattern could not mould the unwieldy elements of the building into æsthetic form. But æsthetic suggestions and features did not pass entirely unappreciated. Some of the lower types of structures, such as the grass lodge and the mat house, partaking of textile technique. were characterized by elements of symmetry. grace, and rhythmic repetition of details. The wooden house of the N. W. had massiveness of form and boldness of outline, and the sculltured and painted details lent much æsthetiinterest; while in the arid region the stonebuilders had introduced a number of featureto relieve the monotony of walls and to add to the pleasing effect of the interiors. In these things the native mind certainly took some pleasure, but probably little thought was given to architectural effect as this is known to the more civilized tribes, such as the Maya of Yucatan, who spent a vast amount of time and energy on the purely decorative features of their stone buildings.

Numerous authors dwell more or less on the buildings of the tribes N. of Mexico, but only the more important publications will here be cited. See Boas, Dorsey, Fewkes, Hoffman, the Mindelefts, Nelson, Mrs. Stevenson, Thomas, and Turner in various Reports, B. A. E.; Adair, Hist Amer. Inds., 1775; Bandelier, various reports in Papers Arch. Inst. Am., 1881-92; Beauchamp, Iroqouis Trail, 1892; Boas in Rep. Nat. Mus. 1895, 1897; Catlin, N. Am. Inds., 1841, 1866; Dawson in Proc. and Trans. Royal Soc. Can., IX. 1891: De Bry. (w. н. н.)

Ardnainiq. A mythical people believed by the Central Eskimo to live far to the N. w. of them. The women are supposed to be of ordinary stature. They hunt in kaiaks and provide for their husbands, who are covered with hair and are so tiny that they carry them about in their hoods.—Bors in 6th Rep. B. A. E., 640, 1888.

Arendahronon ('rock people'). One of the four chief tribes of the Huren, having the most easterly situation and claiming to be the first allies of the French, who founded among them the missions of St. Jean Baptiste, St. Joachim, and Ste. Elisabeth. In 1639 they were said to have been residents of the Huron country for about 50 years. In 1649, on the political destruction and expulsion of the Huron tribes by

the Iro quois, the inhabitants of St. Jean Baptiste submitted in a body to the Seneca, who adopted them. They constituted the Stone, or Rock, tribe of the Huron. See Jesuit Relation for 1639, 40, 1858. — t. N. B. H.1

Ahrenda.—Shea, Cath. Miss., 182, 1855. Ahrendahrenons.—Schoolcraft, In I. Tribes, 117, 522, 1853. Ahrendaronons.—Iss. Rel. for 1640, 61, 1858. Arenda.—Charlevors, (1635) New France, 12, 72, 1872. Arendaonatia. A Huron village in Ontario about 1640.—Jes. Rel. for 1637, 159, 1858. Anendaonactia.—Ibid., 165.

Arente. A Huron village in Ontario about 1640.—Jes. Rel. for 1637, 150, 1858.

Argillite (slate). This material, which is much diversified in character, was in very general use by the tribes x, of Mexico for the manufacture of utensils, implements, and ornaments, and for carvings in general. The typical slates, characterized by their decided foliate structure, were used to some extent for implements; but the more massive varieties, such as the greenish striped slates of the Eastern states, the argillite of New Jersey, Pennsylvania, and the states to the s., and the black slate of the N. W. coast were usually preferred for polished implements and carvings. Argillite was much used by the tribes of the Delaware and Susquehanna valleys, and an ancient quarry of this material, situated at Point Pleasant, Pa., has been described by Mercer. Material from this and other quarries in the Appalachian region was used mainly for flaked implements, including leaf-shaped blades, knives, and arrow and spear heads, and these are widely distributed over the Middle Atlan-The fine-grained greenish and tic states. striped slates of the Eastern and Middle states and Canada were extensively used in the manufacture of several varieties of objects of somewhat problematic use, including so-called banner-stones, bird-stones, and perforated tablets. It is probable that, like the green agates and jadeites of Mexico, some varieties of this stone had special significance with the

native tribes. The tribes of the N. W. coast employ a fine-grained-slate in their very artistic carvings, which the Haida obtain chiefly from deposits on Slate er., Queen Charlotte ids, This slate has the desirable qualities of being soft and easily carved when freshly quarried, and of growing harder with time. It is black and takes an excellent polish (Niblack).

References to the use of argillite and slate occur in many works relating to ethnologic and archæologic subjects, but are not sufficiently important to be given in full. Worthy of special mention are Abbott, Prim. Industry, 1881; Holmes in 15th Rep. B. A. E., 1897; Mercer in Pubs. Univ. Penn., v1, 1897; Niblack in Rep. Nat. Mus. 1888, 1890; Rau in Smithson. Rep. 1872, 1873; Squier and Davis in Smithson. Cont., 1, 1848. (W. H. H.)

Arliaktung. An Eskimo village of the Akudnirmiut, N. of Home bay, E. Baffin island.—Boas in Deutsch. Geog. Blätt., viii, 34, 1885.

Armour. Shields and body armour app ar to have been in more or less general use among the Indian tribes N. of Mexico. The Eskimo are said not to employ the shield, but it was in use among the tribes of the plains, the S. W., and British Columbia, and occasionally among the Iroquois and other eastern Indians. The Plains Indians made their shields of buffalo hide, covered with buckskin or elk skin; others used basketry (Pueblo), cedar rods (Navaho), osiers or bark (Virginia Indians, Iroquois). With the exception of a sort of oblong armourshield 4 to 5 ft. long, made of elk hide by the Ntlakyapamuk (Teit in Mem. Am. Mus. Nat. Hist., Anthrop , ser. 1, 1900), the Indian shield is circular. The decoration of the shield, the eeremonies connected with its acquisition, its use in ritual, etc., constitute important chapters in the art and religion of the aborigines. The shield ceremony of the Hopi and the heraldry of the shield among the Kiowa have respectively been specially studied by Dr. J. Walter Fewkes and Mr. James Mooney of the Bureau of American Ethnology. Helmets and head defences are found among some of the tribes of the North Pacific coast, and are often ornamented with the crest of the owner. North of Mexico body armour presents at least five types: Rows of overlapping plates of ivory, bone, and,

since contact with the whit s. iron (Eskimo, Chukchi: twined wooden slats (N. W. coast Shasta, Iroquois, Virginia Indians; twined wooden rods (Aleut, N. W. e. ast, Columbia r tribes, Klamath, Hupa, Iroquos, Powhatan, etc.); bands of skin arranged in telescoping fashion (Chukchi); costs, co., of hardened hide (Tlingit, Haida, Chinook, Hupa, Shoshoni, Navaho, Pawnee, Mohawk, et a. The ivory plate armour is believed by Bo. see be an imitation of the iron armour of the Chukchi, and the other plate armour may also be of N. E. Asiatic (Japanese) origin. The present of the buffalo in the Mississippi region, and of the clk, moose, etc., in other parts of the country, had much to do with the nature of armour. The data concerning armour among the Indians are sum marized by Hough (Primitive American Armor, Rep. Nat. Mus. 1893, 625-651 . One sort of defensive armour did the early English adventurers in Virginia good service on one occasion. At the suggestion of Mosco and the friendly Indians, Capt. John Smith, when fighting a tribe on the Chesapeake, made use of the "Massawomek targets," or shields (Smith, Va., 1, 185, 1819; Holmes in 13th Rep. B. A. E., 18, 1896). These the English set "about the fore part of our Boat, like a forecastic, from whence we securely beat back the Salvages from off the plaine without any hurt." And so, protected by "these light Targets (which are made of little small sticks woven betwixt strings of their hempe, but so firmly that no arrow can possibly pierce them)," the English drove back the enemy. In general, it may be said that the shield and lance were used chiefly by the equestrian tribes of the open country, while body armour, with the knife and tomahawk, were more in favor with those of the timber and coast region. (A. F. C.)

Arontaen ('it is a lying leg.'—Hewitt. A Huron village situated near Peint Cockburn on the x. shore of Nottawasiga bay, Ontario, in 1636.—Jesuit Relation for 1536, 133, 1858.

Arosaguntacook. A trille of the Abnaka confederacy, formerly living in Androscoggin co., Me. Their village, which were the some name, was on Androscoggin reprobably near Lewiston. The various names used indiscriminately for the tribe and the invertible and Arosaguntacook, which have received different interpretations, all seeming to refer to the presence of fish in the stream. The name seems to have been used only for the part of

2 GEORGE V., A. 1912

the river in Androscoggin co. between the falls near Jay and those near Lewiston. The present name was obtained by changing the first part of the word to Andros in compliment to Gov. Andros. The Arosaguntacook lived on the edge of the first English settlements in Maine, and consequently suffered much in the various Indian wars, in which they took a prominent part from 1675 until their removal to Canada. Their town was barned by the English in 1690. As the settlements pushed into the interior the Wawenov, at the mouth of the river, moved up and joined the Arosaguntacook, and at a later period the combined tribes moved still farther up and joined the Rocamera. These movements led to much confusion in the statements of writers, as the united tribes were commonly known by the name of the leading one, the Arosaguntacook or Andrescoggin. These tribes, together with the Pigwacket, removed to St. Francis, Queber, soon after the defeat of the Peoplawket by Lovewell in 1725. Here the Arosaguntacook were still the principal tribe and their dialect Abnaki was adopted by all the inhabitants of the village, who were frequently known collectively as Arosaguntacook. J. M.

Arrowheads. The separate tips or points of arrow-shafts. Among the Indian tribes many were made of flint and other varieties of stone, as well as bone, horn, antier, shell, wood, and copper. Copper was much used by such tribes as were able to obtain a supply from the L. Superior region and to some extent by those of British Columbia and Alaska. Iron has largely taken the place of these materials since the coming of the whites. In stone implements of this class the only line of distinction between arrowheads and spearheads is that of size. Very few flint arrowheads are as much as 2 inches long, and these are quite slender; thick or strong ones are much shorter. Solid flesh, being almost as resistant as soft rubber, could not be penetrated by a large projectile unless it were propelled by greater power than can be obtained from a bow without artificial aid which is not at the command of a savage. The shape of the stone arrowhead among the Indian tribes is usually triangular or pointedoval, though some have very slender blades with expanding base. Many of them are notched. These were set in a slot in the end of the shaft and tied with sinew, rawhide, or cord, which passed through the notches. Those without notches were secured by the cord passing over and under the angle at the base in a figure-8 fashion. It is said that war arrows often had the head loosely attached, so

that it would remain in the wound when the shaft was withdrawn, while the hunting point was firmly secured in order that the arrow might be recovered entire. Glue, gum, and eement were used in some sections for fixing the point or for rendering the fastening more secure. A specimen which has the end rounded or squared instead of flattened is known as a "bunt." As a rule both faces are worked off equally so as to bring the edge opposite the middle plane of the blade, though it is sometimes a little on one side. For the greater part these seem to be redressed ordinary spearheads, knives, or arrowheads whose points have been broken off. though some appear to have been originally made in this form. A few are smooth or polished at the ends, as if used for knives or scrapers; but most of them have no marks of use except occasionally such as would result from being shot or struck against a hard substance. It is probable that their purpose was to stun birds or small game, in order to secure the pelt or plumage free from cuts or blood stain. They are relatively few in number. though widely distributed in area. The Eskimo employ arrowheads of stone of usual forms.

Arrows, Bows and Quivers. The bow and arrow was the most useful and universal weapon and implement of the chase possessed by the Indians x. of Mexico for striking or piercing distant objects.

Arrows.—A complete Indian arrow is made up of six parts: Head, shaft, foreshaft, shaftment, feathering, and nock. These differ in material, form, measurement, decoration, and assemblage, according to individuals, locality, and tribe. Arrowheads have three parts: Body, tang, and barbs. There are two kinds of arrowheads, the blunt and the sharp. Blunt heads are for stunning, being top-shaped. The Ute, Painte, and others tied short, sticks crosswise on the end of the shafts of boys'

arrows for killing birds. Sharp arrowheads are of two classes, the lanceolate, which can be withdrawn, and the sagittate, intended for holding game or for rankling in the wound. The former are used on hunting, the latter on war or retrieving arrows. In the S. W. a sharpened foreshaft of hard wood serves for the head. Arctic and N. W. coast arrows have heads of ivery, bone, wood, or copper, as well as of stone; elsewhere they are more generally of stone, chipped or polished. Many of the arrowheads from those two areas are either two-pronged, three-pronged, or harpoonshaped. The head is attached to the shaft or foreshaft by lashing with sinew, by riveting, or with gum. Among the Eskimo the barbed head of bone is stuck loosely into a socket on the shaft, so that this will come out and the head rankle in the wound. The barbs of the ordinary chipped head are usually alike on both sides, but in the long examples from ivory, bone, or wood the barbing is either bilateral or unilateral, one-barbed or many-barbed, alike on the two sides or different. In addition to their use in hunting and in war, arrows are commonly used in games and ceremonies. Among certain Hopi priesthoods arrowheads are tied to bandoliers as ornaments, and among the Zuñi they are frequently attached to fetishes.

Arrowshafts of the simplest kind are reeds, canes, or stems of wood. In the Arctic region they are made of driftwood or are bits of bone lashed together, and are rather short, owing to the scarcity of material. The foreshaft is a piece of ivory, bone, or heavy wood. Among the Eskimo, foreshafts are of bone or ivory on wooden shafts; in California, of hard wood or shafts of pithy or other light wood: from California across the continent to Florida, of hard wood on cane shafts. The shaftments in most arrows are plain; but on the W. coast they are painted with stripes for identification. The Plains Indians and the Jicarillas cut shallow grooves lengthwise down their arrowshafts, called "lightning marks," or "blood grooves," and also are said by Indians to keep the shaft from warping (Fletcher) or to direct the flight. The feathering is an important feature in the Indian arrow, differing in the species of birds, the kind and number of feathers and in their form, length, and manner of setting. As to the number of feathers, arrows are either without feathering, two-feathered, or three-feathered. As to form, feathers are whole, as among most of the Eskimo and some S. W.

tribes, or halved or notched on the edges. In length they vary from the very short feathering on S. W. arrows, with long reed shafts and heavy fore-shafts, to the long feathering on Plains arrows, with their short shafts of hard wood. The feathers are set on the shaftnient either flat or radiating; the ends are lashed with sinew, straight or doubled under, and the middles are either free or glued down. In some arrows there is a slight rifling, due perhaps to the twist needed to make a tight fit, though it is not said that this feature is intentional. The nocks of arrows, the part containing the notch for the string, are, in the Aretic, flat; in the S., where reed shafts were employed, cylindrical; and in localities where the shafts were cut, bulbous. Besides its use as a piereing or striking projectile, special forms of the arrow were employed as a toy, in gaming, in divining, in rain-making, in ceremony, in symbolism, and in miniature forms with prayer-sticks. The modulus in arrow-making was each man's arm. The manufacture of arrows was usually attended with much ceremony.

The utmost flight, the certainty of aim, and the piercing power of Indian arrows are not known, and stories about them are greatly exaggerated. The hunter or warrior got as near to his victim as possible. In shooting he drew his right hand to his ear. His bow register scarcely exceeded 60 pounds, yet arrows are said to have gone quite through the body of a buffalo (Wilson in Rep. Nat. Mus. for 1897, 811–988.)

Bows.—The bows of the North Americans are quite as interesting as their arrows. The varied environments quickened the inventive faculty and produced several varieties. They are distinguished by the materials and the parts, which are known as back, belly, wings, grip, nocks, and strings. The varieties are as follows: (1) Self-bow, made of one piece; (2) compound bow, of several pieces of wood, bone, or horn lashed together; (3) sinew-backed bow, a bow of driftwood or other brittle wood, reinforced with cord of sinew wrapped many times about it lengthwise, from wing to wing; (4) sinew-lined bow, a self-bow, the back of which is further strengthened with sinew glued on. In some cases bows were decorated in colours.

The varieties characterizing the culture areas are distinguished as follows:

1. Arctic.—Compound bows in the E., very clumsy, owing to scarcity of material; the grip may be of wood, the wings of whale's ribs or bits of wood from whalers. In the W. excellent

sinew-backed bows were made on bodies of driftwood. Asiatic influence is apparent in them. (See Boas in 6th Rep. B. A. E., 399-669, 1884; Murdoch in 9th Rep. B. A. E., 133-617, 1887, and Rep. Nat. Mus. for 1884, 307-316.)

- 2. Northern Athapascan. Long, straight bows of willow or birch, with wooden wrist-guards projecting from the belly.
- 3. St. Lawrence and Eastern United States.—Self-bows of ash, second-growth hickory, osage orange (bois d'arc), oak, or other hard wood.
- 4. Gulf States.—Long bows, reetangular in section, of walnut or other hard wood.
- 5. Rocky mts.—(1) Self-bow of osage orange or other hard wood; (2) a compound bow of several strips of buffalo horn lashed together and strengthened.
- North Pacific coast.—Bows with rounded grip and flat wings, usually made of yew or cedar.
- 7. Fraser-Columbia region.—Similar to No. 6, but with wings much shorter and the nocks eurved sharply outward.
- 8. Interior basin.—A long slender stick of rude form; many are strengthened by means of a sinew lining on the back and cross wrappings.

The bows E. of the Roekies have little distinction of parts, but the w. Eskimo and Pacific slope varieties have flat wings, and the former shows connection with Asia. The nocks are in some tribes alike, but among the Plains Indians the lower nock is cut in at one side only. Bow-strings are of sinew cord tied at one end and looped at the other.

Wrist-guard.—When the bowman's left arm was exposed he wore a wrist-guard of hide or other suitable material to break the blow of the released string. Wrist-guards were also decorated for ceremonial purposes.

ARROW RELEASE.—Arrow release is the way of holding the nock and letting loose the arrow in shooting. Morse describes four methods among the tribes N. of Mexico, the first three being Indian: (1) Primary release, in which the nock is held between the thumb and the first joint of the forefinger; (2) secondary release, in which the middle and the ring fingers are hald inside of the string; (3) tertiary release, in which the nock is held between the ends of the forefinger and the middle finger, while the first three fingers are hooked on the string; (4) the Mediterranean method, confined to the Eskimo, whose arrows have a flat nock, in which

the string is drawn with the tips of the first, second, and third fingers, the nock being lightly held between the first and the second fingers. Morse finds that among the North American tribes, the Navaho, Chippewa, Miemac, and Penobscot used the primary release; the Ottawa, Chippewa, and Zuñi the secondary; the Omaha. Arapaho, Cheyenne, Assiniboin, Comanche, Crows, Siksika, and some Navaho, the tertiary.

QUIVERS.—The form of the quiver depended on the size of the bow and arrows; the materials, determined by the region, are skin or wood. Sealskin quivers are used in the Arctic region; beautifully decorated examples of deerskin are common in Canada, also E. of the Rockies and in the Interior basin. On the Pacific coast cedar quivers are employed by the canoe-using tribes, and others make them of skins of the otter, mountain lion, or coyote.

E., 1905; Mason, N. Am. Bows, Arrows, and Quivers, in Rep. Smithson. Inst. 1893, 1894; Murdoch, Study of Eskimo Bows, Rep. Nat. Mus. 1884, 1885; Morse, Arrow Release, in Bull. Essex Inst., 1885; Arrows and Arrow-makers, in Am. Anthrop., 45-74, 1891; also various Reports of the Bureau of American Ethnology. (O. T. M.)

Artificial Head Deformation. Deformations of the human head have been known since the writings of Herodotus. They are divisible into two main classes, those of pathological and those of mechanical or artificial origin. The latter, with which this article is alone concerned, are again divisible into unintentional and intentional deformations. One or the other of these varieties of mechanical deformation has been found among numerous primitive peoples, as the ancient Avars and Krimeans, some Turkomans, Malays, Africans, etc., as well as among some civilized peoples. as the French and Wends, in different parts of the Old World, and both varieties existed from prehistoric through historic time to the present. among a number of Indian tribes throughout the Western hemisphere. Unintentianal mechanical deformations of the head present but one important, widely distributed form, that of occipital compression, which results from prolonged contact of the occiput of the infant with a resistant head support in the eradleboard. Intentional deformations, in all parts of the world and in all periods, present two important forms only. In the first of these, the flat-head form, the forehead is flattened by means of a board or a variety of cushion, while the parietes of the head undergo compensatory expansion. In the second form, known as macrocephalous, conical, Aymara, Toulousian, etc., the pressure of bandages, or of a series of small cushions, applied about the head, passing over the frontal region and under the occiput, produces a more or less conical, truncated, bag-like, or irregular deformity, characterized by low forehead, narrow parietes, often with a depression just behind the frontal bone, and a protruding occiput. All of these forms present numerous individual variations, some of which are sometimes improperly described as separate types of deformation.

Among the Indians N. of Mexico there are numerous tribes in which no head deformation exists and apparently has never existed. Among these are included many of the Athapascan and Californian peoples, all of the Algonquian, Shoshonean (except the Hopi), and Eskimo tribes, and most of the Indians of the great plains. Unintentional occipital compression is observable among nearly all the southwestern tribes, and it once extended over most of the United States (excepting Florida) s. of the range of the tribes above mentioned. It also exists in ancient skulls found in some parts of the N. W. coast.

Both forms of intentional deformation are found in North America. Their geographical distribution is well defined and limited, suggesting a comparatively late introduction from more southerly peoples. The flat-head variety existed in two widely separated foci, one among the Natchez and in a few other localities along the northeast coast of the Gulf of Mexico, and the other on the N. W. coast from s. Oregon as far N, as s. Vancouver id., but chiefly w. of the Cascades, along Columbia r. The Aymara variety existed, and still exists, only on and near the N. W. extremity of Vancouver id.

The motives of intentional deformation among the Indians, so far as known, are the same as those that lead to similar practices elsewhere; the custom has become fixed through long practice, hence is considered one of propriety and duty, and the result is regarded as a mark of distinction and superiority.

The effects of the various deformations on brain function and growth, as well as on the health of the individual, are apparently insignificant. The tribes that practise it show no indication of greater mortality at any age than those among which it does not exist, nor do they show a larger percentage of imbeciles, or of insane or neuropathic individuals. The deformation, once acquired, persists throughout life, the skull and brain compensating for the compression by augmented extension in directions of least resistance. No hereditary effect is perceptible. The custom of head deformation among the Indians, on the whole, is gradually decreasing, and the indications are that in a few generations it will have ceased to exist.

Consult Morton, Crania Americana, 1839; Gosse. Essai sur les déformations artificielles du erâne, 1855; Lunier, Déformations artificielles du crâne, Dict. de Médic. et de Chirurg., x, 1869: Broca, Sur la déformation Toulousaine du crâne, 1872: Lenhossek, Die künstlichen Schädelverbildungen, 1881: Topinard, Élém. d'anthrop, génér., 739, 1885; Bräss, Beiträge z. Kenntniss d. künstlichen Schädelverbildungen, 1887: Porter, Notes on Artificial Deformation of Children, Rep. Nat. Mus., 1889; Bancroft, Native Races, 1, 180, 226, et seq., 1874; Hrdlicka, Head deformation among the Klamath, Am. Anthrop, vII, no. 2, 360, 1905; Catlin, North American Indians, 1-11, 1841. See Flatheads. (A. H.

Arts and Industries. The arts and industries of the North American aborigines, including all artificial methods of making things or of doing work, were numerous and diversified, since they were not limited in purpose to the material conditions of life: a technic was developed to gratify the æsthetic sense, and art was aneillary to social and ceremonial institutions and was employed in inscribing speech on hide, bark, or stone, in records of tribal lore, and in the service of religion. Many activities too, existed, not so much in the service of these for their own sake as for others. After the coming of the whites, arts and industries in places were greatly improved, multiplied in number, and rendered more complex by the introduction of metallurgy, domestic animals. mechanical devices, and more efficient engineering. Great difficulties embarrass the student in deciding whether some of the early erude inventions were aboriginal or introduced.

The arts and industries of the Indians were ealled forth and developed for utilizing the mineral, vegetal, and animal products of nature and they were modified by the environmental wants and resources of every place. Gravity, buoyancy, and elasticity were employed mechanically, and the production of fire with the drill and by percussion was also practised. The preservation of fire and its utilization in many ways were also known. Dogs were made beasts of burden and of traction, but neither beast nor wind nor water turned a wheel N. of Mexico in Pre-Columbian times. The savages were just on the borders of machinery, having the reciprocating two-hand drill, the bow and strap drills, and the continuous-motion spindle.

Industrial activities were of five kinds: (1) Going to nature for her bounty, the primary or exploiting arts and industries: (2) working up materials for use, the secondary or intermediary arts and industries, called also shaping arts or manufactures; (3) transporting or travelling devices; (4) the mechanism of exchange; (5) the using up or enjoyment of finished products, the ultimate arts and industries, or consumption. The products of one art or industry were often the material or apparatus of another, and many tools could be employed in more than one; for example, the flint arrowhead or blade could be used for both killing and skinning a buffalo. Some arts or industries were practised by men, some by women, others by both sexes. They had their seasons and their etiquette, their ceremonies and their tabus.

Stone craft.—This embraces all the operations, tools, and apparatus employed in gathering and quarrying minerals and working them into paints, tools, implements, and utensils, or into ornaments and sculptures, from the rudest to such as exhibit the best expressions in fine art. Another branch is the gathering of stone for building.

Water industry.— This includes activities and inventions concerned in finding, carrying, storing, and heating water, and in irrigation, also, far more important than any of these, the making of vessels for plying on the water, which was the mother of many arts. The absence of the larger beasts of burden and the accommodating waterways together stimulated the perfecting of various boats to suit particular regions.

Earth work.—To this belong gathering, carrying, and using the soil for construction purposes, excavating cellars, building sod and snow houses, and digging ditches. The Arctic permanent houses were made of earth and sod, the temporary ones of snow cut in blocks,

which were laid in spiral courses to form low domes. The Eskimo were especially ingenious in solving the mechanical problems presented by their environment of ice. The St. Lawrence Atlantic, and Canadian tribes undertook no earth-building that required skill; but those of the Mississippi valley, the Gulf states, and the far S. W., in their mounds and earthworks developed engineering and co-operative ability of no mean order. In some eases millions of cubic feet of earth were built up into geometric forms, the material often having been borne long distances by men and women. The tribes of the Pacific coast lived in partly subterranean houses. The Pueblo tribes were skilful in laving out and digging irrigating ditches and in the builder's art, erecting houses and walls of stones, pisé, or adobe. Some remains of stone structures show much taste in arrangement.

Ceramic art.—This industry includes all operations in plastic materials. The Arctic tribes in the extreme W., which lack proper stone, kneaded with their fingers lumps of clay mixed with blood and hair into rude lamps and eooking vessels, but in the zone of intense cold besides the ruder form there was no pottery. The tribes of Canada and of the N. tier of states w. of 1. Superior and those of the Pacific slope worked little in elay; but the Indians of the Atlantic slope, of the Mississippi valley, and especially of the S. W. knew how to gather and mix clay and form it into pottery, much of which has great artistic merit. This industry was quite generally woman's work, and each region shows separate types of form and decoration.

Metal craft.—This included mining, grinding of ores and paint, rubbing, cold-hammering, engraving, embossing, and overlaying with plates. The metals were copper, hematite and meteoric iron, lead in the form of galena, and nugget gold and mica. No smelting was done.

Wood craft.—Here belongs the felling of trees with stone axes and fire. The softest woods, such as pine, cedar, poplar, and cypress, were chosen for canoes, house frames, totem poles, and other large objects. The stems of smaller trees were used also for many purposes. Driftwood was wrought into bows by the Eskimo. As there were no saws, trunks were split and hewn into single planks on the N. Pacific coast. Immense communal dwellings of cedar were there erected, the timbers being moved by rude mechanical appliances and set in place with ropes and skids. The carving on house posts, totem poles, and household furniture was often

admirable. In the S. W. underground stems were carved into objects of use and ceremony.

Root craft.—Practised for food, basketry, textiles, dyes, fish-poisoning, medicine, etc. Serving the purposes of wood, the roots of plants developed a number of special arts and industries.

Fibre craft.—Far more important than roots for textile purposes, the stems, leaves, and inner and outer bark of plants and the tissues of animals, having each its special qualities, engendered a whole series of arts. Some of these materials were used for siding and roofing houses; others yielded shredded fibre, yarn, string, and rope; and some were employed in furniture, clothing, food receptacles, and utensils. Cotton was extensively cultivated in the S. W.

Seed craft.—The harvesting of berries, acorns and other nuts, and grain and other seeds developed primitive methods of gathering, earrying, milling, storing, cooking, and serving, with innumerable observances of days and seasons, and multifarious ceremony and lore.

Not content with merely taking from the hand of nature, the Indians were primitive agriculturists. In gathering roots they first unconsciously stirred the soil and stimulated better growth. They planted gourds in favoured places, and returned in autumn to harvest the crops. Maize was regularly planted on ground cleared with the help of fire and was cultivated with sharpened sticks and hoes of bone, shell, and stone. Tobacco was cultivated by many tribes, some of which planted nothing else.

Animal industries.—Arts and industries depending on the animal kingdom include primarily hunting, fishing, trapping, and domestication. (See Hunting.) The secondary arts involve cooking and otherwise preparing food; the butchering and skinning of animals, skindressing in all its forms; cutting garments, tents, boats, and hundreds of smaller articles and sewing them with sinew and other thread; working claws, horn, bone, teeth, and shell into things of use, ornaments, and money; and work in feathers, quills, and hair. These industries went far beyond the daily routine and drudgery connected with dress, costume, receptacles, and apparatus of travel and transportation. Pietographs were drawn on specially prepared hides; drums and other musical instruments were made of skins and membranes; for gorgeous head-dresses and robes of eeremony the rarest and finest products of animals were requisite; embroiderers everywhere most skilfully used quills and feathers, and sometimes grass and roots.

Evolution of arts.—Much was gathered from nature for immediate use or consumption, but the North Americans were skilful in secondary arts, becoming manufacturers when nature did not supply their demands. They built a different kind of house in each environment-in one place snow domes and underground dwellings, in another houses of puncheons hewn from the giant cedar, and in other regions conical tents made of hides of animals, pole arbours covered with matting or with cane, and honses of sods or grass laid on a framework of logs. The invention of house furniture and utensils, such as cooking vessels of stone, pottery, or vegetal material, vessels of elay, basketry, worked bark or hide for serving food, and bedding, developed the tanner, the seamstress, the potter, the wood-worker, the painter, the dyer, and the stone-cutter. The need of elothing the body also offered employment to some of these and gave rise to other industries. The methods of preparing food were baking in pits, roasting, and boiling; little invention was necessary therein, but utensils and apparatus for getting and transporting food materials had to be devised. These demands developed the canoemaker and the sled-builder, the fabricator of weapons, the stone-worker, the wood-worker, the carvers of bone and ivory, the skilful basketmaker, the weaver, the netter, and the makers of rope and babiche. These arts were not finely specialized; one person would be skilful in several. The workshop was under the open sky, and the patterns of the industrial workers were carried in their minds.

The arts and industries associated with the use and consumption of industrial products were not specially differentiated. Tools, utensils, and implements were worn out in the using. There was also some going about, traffic, and luxury, and these developed demands for higher grades of industry. The Eskimo had fur suits that they would not wear in lunting; all the deer-chasing tribes had their gala dress for festal occasions, ceremony, and worship, upon which much time and skill were expended; the southern and western tribes wove marvellously fine and elegant robes of hemp, goat's bair, rabbit skin in strips, and skins of birds. The artisans of both sexes were instinct with the asthetic impulse; in one region they were devoted to quill-work, those of the next area to carving wood and slate; the ones living across the mountains produced whole costumes adorned with beadwork; the tribes of the central area erected elaborate earthworks; workers on the Pacific coast made matchless basketry; those of the S. W. modelled and decorated pottery in an endless variety of shapes and colored designs. The Indians N. of Mexico were generally well advanced in the simpler handicrafts, but had nowhere attempted massive stone architecture.

Consult the Annual Reports and Bulletins of the Bureau of American Ethnology, which are replete with information regarding Indian arts and industries. See also the articles on the subjects of the various individual arts and industries and the works thereunder cited. (O. T. M.)

Aseik (Asē'īx). One of the three Bellacoola towns of the Talio division at the head of South Bentinek arm, British Columbia.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.
A'sēq.—Boas in 7th Rep. N. W. Tribes, 3, 1891.

Asenane (Ase'nanē). A former Bellacoola town on Bellacoola r. British Columbia.— Boas in 7th Rep. N. W. Tribes, 3, 1891.

Ashk nen ('Blackfoot lodges'). A band of the Crows,

Ash-kane'-na. --Morgan, Anc. Soc., 159, 1877

Ashnola. A body of Okinagan in s. w. British Columbia; pop. 37 in 1911.—Can. Ind. Aff. for 1901, pt. I, 245.

Asilao. A Helatl town on lower Fraser r., above Yale, British Columbia.

Asilā'o.—Boas in Rep. Brit. A. A. S., 454, 1894.

Aspenquid. An Abnaki of Agamenticus. Me., forming a curious figure in New England tradition. He is said to have been born toward the end of the 16th century and converted to Christianity, to have preached it to the Indians. travelled much, and died among his own people at the age of about 100 years. Up to 1775-76 Aspenquid's day was celebrated in Halifax. Nova Scotia, by a clam dinner. He is said to be buried on the slope of Mt. Agamenticus, where he is reported to have appeared in 1682. He is thought by some to be identical with Passaconaway. In Drake's New England Legends there is a poem, "St. Aspenquid," by John Albee. See Am. Notes and Queries, 11, 1889. (A. F. C.)

Assabaoch. A band, probably of the Assiniboin or Chippewa, in the vicinity of Rainy lake, Ontario, in 1874; pop. 152.—Can. Ind. Rep., 85, 1875.

Assacumbuit. An Abnaki ("Tarratine") chief who appeared in history about 1696. He was a faithful adherent of the French and rendered important aid to Iberville and Montigny in the reduction of Ft. St. John, N.B., Nov. 30, 1696. With two other chiefs and a few French soldiers Assacumbuit attacked the fort at Casco, Me., in 1703, then defended by Capt. March, which was saved by the timely arrival of an English vessel. He assisted the French in 1704-5 in their attempt to drive out the English who had established themselves in Newfoundland, and in 1706 visited France, where he became known to Charlevoix and was received by Louis XIV, who knighted him and presented him an elegant sword, after boasting that he had slain with his own hand 140 of the King's enemies in New England (Penhallow, Ind. Wars, 1, 40, 1824). Assacnmbuit returned from France in 1707 and in the following year was present with the French in their attack on Haverhill, Mass. From that time until his death in 1727 nothing further in regard to him is recorded. He is sometimes mentioned under the name Nescambioüit, and in one instance as Old Eseambuit. (c. T.)

Assapan. A dictionary name for the flying squirrel (Sciuropterus volucella), spelt also

assaphan, evidently cognate with Chippewa ä'sipũn, Sauk and Fox ä'sepàna, 'raccoon.' (A. F. C. W. J.)

Assegun (probably from Chippewa *i'shigun* 'black bass.'—W. J.). A traditional tribe said to have occupied the region about Mackinaw and Sault Ste. Marie on the first coming of the Ottawa and Chippewa, and to have been driven by them southward through lower Michigan. They are said, and apparently correctly, to have been either connected with the Mascoutin or identical with that tribe, and to have made the bone deposits in N. Michigan. See Mascoutin. (J. M.)

Asseguns.—Schooleraft, Ind. Tribes, vr. 202-4, 1857. Assigunaick.—Brinton, Lenape Legend, 228, 1885. Assigunaigs.—Schooleraft, op. cit., r. 191, 1851. Bone Indians.—Ibid., 307.

Assiniboin (Chippewa ŭ'sini 'stone,' ŭ'pwäwa 'he cooks by roasting': 'one who cooks by the use of stones.'-W. J.). A large Siouan tribe, originally constituting a part of the Yanktonai. Their separation from the parent stem, to judge by the slight dialectal difference in the language, could not have greatly preceded the appearance of the whites, but it must have taken place before 1640, as the Jesuit Relation for that year mentions the Assiniboin as distinct. The Relation of 1658 places them in the vicinity of L. Alimibeg, between L. Superior and Hudson bay. On Jefferys' map of 1762 this name is applied to L. Nipigon, and on De l'Isle's map of 1703 to Rainy lake. From a tradition found in the widely scattered bodies of the tribe and heard by the first Europeans who visited the Dakota, the Assiniboin appear to have separated from their ancestral stem while the latter resided somewhere in the region about the headwaters of the Mississippi, whence they moved northward and joined the Cree. It is probable that they first settled about Lake o the Woods, then drifted northwestward to the region about L. Winnipeg, where they were living as early as 1670, and were thus located on Lahontan's map of 1691. Chauvigneric (1736) places them in the same region. Dobbs (Hudson Bay, 1744) located one division of the Assiniboin some distance N. w. of L. Winnipeg and the other immediately w. of an unidentified lake placed N. of L. Winnipeg. These divisions he distinguishes as Assiniboin of the Meadows and Assiniboin of the Woods. In 1775 Henry found the tribe scattered along Saskatchewan and Assiniboine rs., from the forest limit well up to the headwaters of the former, and this region, between

the Sioux on the s. and the Siksika on the w., was the country over which they continued to range until gathered on reservations. Hayden (Ethnog, and Philol. Mo. Val., 1862) limits their range at that time as follows: "The Northern Assiniboins roam over the country from the w. banks of the Saskatchewan and Assiniboine rs., in a w. direction to the Wood nit., x. and w. amongst some of the small outliers of the Rocky mts. E. of the Missouri, and on the banks of the small lakes frequently met with on the plains in that district. They consist of 250 or 300 lodges. The remainder of the tribe, now [1856] reduced to 250 lodges, occupy the district defined as follows: Commencing at the mouth of the White Earth r. on the E., extending up that river to and as far beyond its source as the Grand coulée and the head of Souris river, thence x, w, along the Missouri côteau, or divide, as far as the beginning of the Cypress mts., on the N. fork of Milk r., down that river to its junction with the Missouri, thence down the Miss souri to White Earth r., the starting point. Until the year 1838 the tribe still numbered from 1,000 to 1,200 lodges, trading on the Missouri, when the smallpox reduced them to less than 400 lodges. They were also surrounded by large and hostile tribes, who continually made war upon them, and in this way their number was diminished, though at the present time they are slowly on the increase."

From the time they separated from the parent stem and joined the Cree until brought under control of the whites, they were almost constantly at war with the Dakota. As they have lived since the appearance of the whites in the N. W. almost wholly on the plains, without permanent villages, moving from place to place in search of food, their history has been one of conflict with surrounding tribes.

Physically the Assiniboin do not differ materially from the other Sioux. The men dress their hair in various forms: it is seldom cut, but as it grows is twisted into small locks or tails, and frequently false hair is added to lengthen the twist. It sometimes reaches the ground, but is generally wound in a coil on top of the head. Their dress, tents, and customs generally are similar to those of the Plains Cree, but they observe more decorum in camp and are more cleanly, and their hospitality is noted by most traders who have visited them. Polygamy is common. While the buffalo abounded their principal occupation consisted in making penmican, which they bartered to the whites

for liquor, tobacco, powder, balls, knives, etc-Dogs are said to have been sacrificed to their deities. According to Alexander Henry, if death happened in winter at a distance from the burial ground of the family, the body was carried along during their journeying and placed on a scaffold, out of reach of dogs and beasts of prey, at their stopping places. Arrived at the burial place, the corpse was deposited in a sitting posture in a circular grave about 5 feet deep, lined with bark or skins; it was then covered with bark, over which logs were placed, and these in turn were covered with earth.

The names of their bands or divisions, as given by different writers, vary considerably. owing to the loose organization and wandering habit of the tribe. Lewis and Clark mention as divisions in 1805; (1) Menatopa (Otaopabinè of Maximilian. Gens de Feuilles [for filles] Htscheabine, Big Devils (Watopachnato), Osecgah, and another the name of which is not stated. The whole people were divided into the northern and southern and into the forest and prairie bands. Maximilian (Trav., 194, 1843 names their gentes as follows: (1) Itscheabine gens des filles); (2) Jatonabine igens des rochesi; (3 Otopachgnato (gens du large); (4) Otaopabinê (gens des canots); (5) Tschantoga (gens des bois); (6) Watopachnato (gens de l'age); (7) Tanintauei (gens des osayes; (8) Chabin (gens des montagnes). A band mentioned by Hayden (op. cit., 387), the Minishinakato, has not been identified with any named by Maximilian. Henry (Jour., II, 522-523, 1897 enumerated 11 bands in 1808, of which the Red River, Rabbit, Eagle Hills, Saskatchewan, Foot, and Swampy Ground Assiniboin, and Those-who-have-water-forthemselves-only can not be positively identified. This last may be Hayden's Minishinakato. Other divisions mentioned, chiefly geographical, are: Assiniboin of the Meadows, Turtle Mountain Sioux, Wawaseeasson, and Assabaoch (?). The only Assiniboin village mentioned in print is Pasquayah.

Porter (1829) estimated the Assiniboin population at 8,000; Drake at 10,000 before the smallpox epidemic of 1836, during which 4,000 of them perished. Gallatin (1836) placed the number at 6,000; the U.S. Indian Report of 1843, at 7,000. In 1890 they numbered 3,008; in 1904, 2,600.

The Assiniboin now (1904) living in the United States are in Montana, 699 under Ft. Belknap agency and 535 under Ft. Peck agency;

total, 1.234. In Canada there were in 1911 the Mosquito and Bears' Head and Lean Man's bands at Battleford agency, 94; Joseph's band of 143 and Paul's of 142 at Edmonton agency; Carry-the-Kettle band under Assiniboine agency. 210; Pheasant Rump's band, originally 69, and Ocean Man's, 68 in number, were united with White Bear's band of Cree and Chippewa in 1901; and the bands on Stony res., Alberta, 665; total, 1,393. See Powell in 7th Rep. B. A. E., 111, 1891; McGee, Siouan Indians, 15th Rep. B. A. E., 157, 1897; Dorsey, Siouan Sociology, ibid, 213; Hayden, Ethnog, and Philol. Mo. Val., 1862.

(J. M. C. T.) Apinulboines.--Lloyd in Jour, Anthrop. Inst., v, 246, 1876 (misprint). Arsenipoitis.—Barcia, Ensayo, 238, 1723. Arsenipoits. - McKenney and Hall, Ind. Tribes, III, 80, 1854. Asinbols.—Trumbull, Ind. Wars, 185, 1851. Asiniboels.—Anville, Am. Sept. map, 1756 Asiniboines.—Morgan in N. Am. Bell, of Winmpeg, Manitoba, 1886 the common name used by English in Canada). Thickwood.-Keane in Stanford, Compend, 536, 1878 (applied to the Assioiboin of the Rocky mts.), Tlū'tlamā'rkā,—Chamberliin, inf'n. 1903 ('entthroats': Kutenai name). Ussinebwolnug. -Tanner, Nar, 316, 1830 (Chippewa name). Weepers. -Henry, Tray, 286, 1809.

Assiniboin of the Plains. A division of the Assiniboin described by Dobbs (Hudson Bay, 35, 1744) as distinguished from that portion of the tribe living in the wooded country. On his map they are located w. of L. Winnipeg. De Smet (Miss. de l'Oregon, 104, 106, 1848) estimated them at 300 lodges, and in the English edition of his work (Oregon Miss., 156, 1817) the number given is 600 lodges. He says they hunt over the great plains between the Saskatchewan, Red, Missouri, and Yellowstone rs., and as compared with the Assiniboin of the woods "are more expert in thieving, greater topers, and are perpetually at war," but that in general the men are more robust and of commanding stature. They include the Itscheabine, Watopaehnato, Otaopabine, and Jaton-

Assiniboels of the South.—Jefferys, French Dom. in Am, pt. 1, map, 1741. Assiniboins des Plaines.— Smet, Miss. de l'Oregon, 104, 1848. Assinibouels of the Meadows.—Dobbs, Hudson Bay, 35, 1744. Plain Assineboins.—Hind, Red River Exped, 11, 152, 1860.

Assuapmushan. A Montagnais mission founded by the Jesuits in 1661 about 300 m. up Saguenay r., Quebec, probably at the entrance of Ashuapmuehuan r. into L. St. John. A trading post of the same name was on that river in 1832.—Hind, Labrador, 11, 25, 26, 38, 1863.

Astouregamigoukh. Mentioned as one of the small tribes N. of St. Lawrence r. (Jes. Rel. 1613, 111, 38, 1858). Probably a Montagnais band or settlenmet about the headwaters of Saguenay or St. Maurice r.

Atana (Atā'na). A Haida town on House, or Atana, id., E. coast of Moresby id., Queen Charlotte group, British Columbia. According to Skidegate legend, House id. was the second to appear above the waters of the flood. At that time there was sitting upon it a woman

who became the ancestress of the Tadjilanas. The Kagialskegawai also considered her as their "grandmother," although saying that they were not descended directly from her but from some people who drifted ashore at the same place in a cockleshell. The town was occupied by the Tadjilanas. As the name does not occur in John Wark's list, it would seem to have been abandoned prior to 1836—41.—Swanton, Cont. Haida, 277, 1905.

Ataronchronon. One of the minor tribes of the Huron confederation, among whom the Jesuit mission of Sainte Marie was established. Jes. Rel. for 1610, 61, 1858.

Andouanchronon.—Jes. Rel. for 1640, 35, 1858. Andowanchronon.—Jes. Rel. index, 1858. Ataconchronons.—Jes. Rel. for 1637, 114, 1858. Ataronch.—Kingsley, Stand. Nat. Hist., pt. 6, 454, 1883.

Atchitchiken (Atci'tciken, sig. doubtful, or Nkailu'sus, 'reaches the top of the brow or low steep,' because the trail here passes on top of a bench and enters Spapiam valley). A village of the Spence Bridge band of the Ntlakyapamuk on the N. side of Thompson r. 3 m. back in the sountains from Spence Bridge, British Columbia.—Teit in Mem. Am. Mus. Nat. Hist., n, 173–1900.

Athabaska (Forest Cree: athap 'in succession' askaw 'grass,' 'reeds'; hence 'grass or reeds here and there.'—Hewitt). A northern Athapasean tribe, from which the stock name is derived, residing around Athabaska lake, Alberta and Saskatchewan. Ross (MS., B. A. E.) regards them as a part of the Chipewyan proper. They do not differ essentially from neighbouring Athapasean tribes. In 1911 (Can. Ind. Aff., pt. II, 52, 1911) 360 were enumerated at Ft. Chipewyan.

Arabaskaw.—Lacombe, Dict. des Cris, 1874 ("Athabasca" Cree name). Athabaskans.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Athapascow.—Drake, Bk. Inds., vi, 1848. Athapascow.—Hearne, Journ. N. Ocean, 177, 1795. Ayabaskau.—Gatschet, MS, B. A. E. (Cree name). Kkpay-tpèlè-Octine.—Petitot, Autour du lac des Esclaves, 363, 1891 ('people of the willow floor,' i. e., of Ft. Chipewyan). Kkpest'aylé-kkè ortiné.—Petitot, Dict. Dènè-Dindjié, xx, 1876 ('people of the poplar floor'). Yéta-Ottinè.—Petitot, Autour, op. cit. ('people from above').

Athapascan Family. The most widely distributed of all the Indian linguistic families of North America, formerly extending over parts of the continent from the Arctic coast far into N. Mexico, from the Pacific to Hudson bay at the N., and from the Rio Colorado to the mouth of the Rio Grande at the s.—a territory

extending for more than 40° of latitude and 75° of longitude.

The languages which compose the Athapascan family are plainly related to each other and, because of certain peculiarities, stand out from the other American languages with considerable distinctness. Phonetically they are rendered harsh and difficult for European ears because of series of guttural sounds, many continuants, and frequent ehecks and aspirations. Morphologically they are marked by a sentence verb of considerable complexity, due largely to many decayed prefixes and to various changes of the root to indi at . the numbe: and character of the subject and object. Between the various languages much regular phonetic change, especially of vowels, appears, and while certain words are found to be common, each language. independently of the others, has formed many nouns by composition and transformed the structure of its verbs. The wide differences in physical type and culture and the differences in language point to a long separation of the family, certainly covering many centuries. Geographically it consists of three divisions: Northern, Pacific, and Southern.

The Northern division, known as the Tinneh, or Déné, the name they apply to themselves, consists of three groups: The eastern, the north-western, the south-western. The eastern group occupies a vast extent of continuous territory, bounded on the E. by the Rocky mts. and lower Mackenzie r., on the s. by the watershed between the Athabaska and lower Peace rs., Athabaska lake, and Churchill r. To the E. and N. a narrow but continuous strip of Eskimo territory bars them from Hudson bay and the Arctic ocean. Their neighbours on the s. are members of the Algonquian family. This group seems to constitute a culture area of its own, rather uniform and somewhat limited on its material side. Very little is known of the folklore and religion of the people of this region. The principal tribes are the Tatsanottine or Yellowknives, E, of Yellowknife r., the Thlingchadinne or Dogribs, between Great Slave and Great Bear lakes; on Mackenzie r., beginning at the N., the Kawchodinneh or Hares, and the Etchaottine or Slaves; the Chipewyan on Slave r., the Tsattine or Beavers on Peace r.: and some 500 m. to the s. beyond the area outlined, the Sarsi, a small tribe allied with their Algonquian neighbours, the Siksika. The northwestern group occupies the interior of Alaska and adjacent portions of British territory as ar as the Rocky mts. The shore-lands to the

N. and W. are held by the Eskimo, except at Cook inlet and Copper r. The people seem to have been too much occupied with the severe struggle with the elements for a bare existence to have developed much material culture. They are usually distinguished into three principal divisions: The Kutchin of Porcupine and Tanana rs., the middle course of the Yukon, and the lower Mackenzie (where they are often spoken of as Loucheux); the Ahtena of Copper r.; and the Khotana of the lower Yukon, Koyukuk r., and Cook inlet. The south-western group occupies the mountainous interior of British America from the upper Yukon to lat. 51° 30′, with the Rocky mts. for their E. barrier, and with the Skittagetan, Koluschan, Chimmesyan, and Wakashan families between them and the Pacific. Their S. neighbours are the Salish. They are said to show con-iderable variety of physical appearance, culture and language. The tribes composing this group are, according to Morice, beginning at the E. the Nahane; the Sekani; the Babine (Nataotin), on the shores of a lake bearing that name; the Carriers (Takulli), who occupy the territory from Stuart lake southward to Alexandria on Fraser r., and the Chilcotin (Tsilkotin), who live in the valley of the river to which they have given their name.

The Pacific division consisted formerly of a small band in Washington and of many villages in a strip of nearly continuous territory about 400 m. in length, beginning at the valley of Umpqua r. in Oregon and extending toward the s. along the coast and Coast Range mts. to the headwaters of Eel r. in California. Their territory was cut through at one point by the Yurok ou Klamatlı r. These villages were in many cases separated by low but rugged mountains, and were surrounded by, and here and there surrounded, the small stocks charaeteristic of the region. The culture throughout this territory was by no means uniform, partly on account of the great differences between the eonditions of life on the seacoast and those of inland mountain valleys, and partly because there was little intercourse between the river valleys of the region. For the greater part, in language there was a gradual transition through intermediate dialects from one end of the region to the other. There were probably 5 of these dialects which were mutually unintelligible. There were no tribes in this region, but groups of villages which sometimes joined in a raid against a common enemy and where the same dialect was spoken. The following dialectic

groups made up this division: The Kwalhioqua ¹n Washington; the Umpqua and Coquille (Mishikhwutmetunne), formerly on rivers of these names; the Taltushtuntude, Chastacosta, and Tututunne on Rogue r. and its tributaries, and the Chetco on Chetco r. in Oregon; the Tolowa on Smith r. and about Crescent City: the Hupa and Tlelding on the lower portion of Trinity r.; the Hoilkut on Redwood cr.; the Mattole on the river of that name: the Sinkyone, Lassik, and Kuneste in the valley of Eel r., in California. But few of the members of this division now remain. The Oregon portion has been on the Siletz and Grande Ronde res. for many years; those of California still reside near their ancient homes.

The Southern division held sway over a vast area in the S. W., including most of Arizona and New Mexico, the s. portion of Utah and Colorado, the w. borders of Kansas and Texas, and the N. part of Mexico to lat. 25°. Their principal neighbours were the members of the Shoshonean family and the various Pueblo tribes in the region. So far as is known the language and culture of this division are quite uniform. The peoples composing it are the Navaho s. of San Juan r. in N. E. Arizona and N. W. New Mexico, the Apache (really a group of tribes) on all sides of the Navaho except the N., and the Lipan formerly in W. Texas but now living with the Mescaleros in New Mexico.

Not included in the three divisions described above are the Kiowa Apache, a small band which has maintained its own language while living on intimate terms with the Kiowa. They seem never to have been connected with the Southern division, but appear to have come from the N. many years ago.

The tendency of the members of this family to adopt the culture of neighbouring peoples is so marked that it is difficult to determine and describe any distinctive Athapascan culture or, indeed, to say whether such a culture ever existed. Thus, the tribes of the extreme N., especially in Alaska, had assimilated many of the customs and arts of the Eskimo, the Takulli had adopted the social organization and much of the mythology of the Tsimshian, the western Nahane had adopted the culture of the Tlingit, the Tsilkotin that of the Salish, while the Sarsi and Beavers possessed much in common with their Algonquian neighbours to the S. and E. Passing to the Pacific group, practically no difference is found between the culture which they presented and that of the surrounding tribes of other stocks, and it is evident that the

social organization and many of the rites and ceremonies of the Navaho, and even of the Apache, were due to Pueblo influences. Although in this respect the Athapascan resembles the Salishan and Shoshonean families, its pliability and adaptability appear to have been much greater, a fact noted by missionaries among the northern Athapascans up to the present day.

If a true Athapascan culture may be said to have existed anywhere, it was among the eastern tribes of the Northern group, such as the Chipewyan, Kawchodinne, Stnichamukh, Tatsanottine, and Thlingchadinne, although differing comparatively little from that of the northernmost Algonquian tr besand the neighbouring Eskimo. Although recognizing a certain individuality, these tribes had little coherence, and were subdivided into family groups or loose bands, without clans or gentes, which recognized a kind of patriarchal government and descent. Perhaps the strongest authority was that exercised by the leader of a hunting party. the difference between success and failure on such a quest being frequently the difference between the existence or extinction of a band.

Clothing was made of deerskins in the hair. and the lodges of deer or caribou skins, some times replaced by bark farther s. Their food consisted of caribon, deer, moose, musk-ox, and buffalo, together with smaller animals, such as the beaver and hare, various kinds of birds, and several varieties of fish found in the numerous lakes and rivers. They killed deer by driving them into an angle formed by two converging rows of stakes, where they were shot by hunters lying in wait. The man was complete master in his own lodge, his wife being entirely subservient and assuming the most laborious duties. Infanticide, especially of female children, was common, but had its excuse in the hard life these people were obliged to undergo. In summer, transportation was effected in birch-bark canoes; in winter the dogs earried most of the household goods, except in so far as they were assisted by the women, and on the barren grounds they were provided with sledges. The bodies of the dead were placed on the ground, covered with bark and surrounded by palings, except in the case of noted men, whose bodies were placed in boxes on the branches of trees. Shamans existed, and their savings were of much influence with some of the people, but religion does not seem to have exerted as strong an influence as in most other parts of America. At the same time they had

absolute faith in the necessity and efficacy of certain charms which they tied to their fishing hooks and nets. Nearly all have now been Christianized by Roman Catholic missionaries and seem to be devout converts. For an account of the culture of the remaining Athapasean tribes, see the special articles under the tribal names and articles dealing with other tribes in the same localities.

In 1911, the population of the Canadian Athapaseans was as follows:—Yellow-Knives, 180; Dogribs, 178; Hares, Mackenzie r., approx., 3,500; Slaves, 566; Chipewyan, 1,865; Beavers, 380; Sarsi, 205; Sekani, 98; total, 6,972 (Can. Ind. Aff., 1972, MS.)

For the Northern division of A hapascans see Hearne, Travels, 1795; the numerous writings of Émile Petitot; Morice (1) in Trans, Roy. Soc. Canada, (2) Trans. Canadian Inst., and elsewhere; Richardson, Arct. Searching Exped., 1851; Bancroft, Native Races, I, 1886; Russell, Explor. Far North, 1898; Hardisty and Jones in Smithson, Rep., 1866, 1872. For the Pacific division; Powers in Cont. N. A. Ethnol., III, 1877; Goddard in Pubs. Univ. Cal., I, 1903. (See Treaties.)

In the synonymy which follows the names are not always to be accepted as true equivalents. The Northern Athapascan or Déné are usually meant. (P. E. G. J. R. S.)

Adènè.-Petitot, Diet. Dênê-Dindjié, xix, 1876 - Kawchodinne name). Arahasca.—Petitot in Jour. Roy. Geog. Soc., 641, 1883. Arathapescoas.—Boudinot, Star in the West, 125, 1816. *Atsina Blackio it: ă'-se'-na, said to mean gut people.'—Grinnell, Cf. Aā'niněna, under

^{*}The Atsina note has been inserted because, although not Canadian Indians, there are numerous references to them in narratives of exploration of the Canadian west

Arapaho). A detached branch of the Arapaho at one time associated with the Blackfeet, but now with the Assiniboin under Fort Belknap agency Mont, where in 1904 they numbered 535 steadily decreasing. They called themselve- Aa'niněna, said to mean 'white elay people,' but are known to the other Arapaho as Hitunėna, 'beggars,' or 'spongers,' whence the tribal sign, commonly but incorrectly rendered 'belly people,' or 'big bellies,' the Gros Ventres of the French Canadians and now their popular name. The Atsina are not prominent in history, and in most respects are regarded by the Arapaho proper as interior to them. They have been constantly confused with the Hidatsa, or Gros Ventres of the Missouri

Atsina-Algo. An adjective invented by Schoolcraft (Ind. Tribes, 1, 198, 1853) to describe the confederate Atsina and Siksika.

Attignawantan (Huron: hati 'they,' annioñniën 'bear': 'bear people'). One of the largest tribes of the Huron confederacy, comprising about half the Huron population, formerly living on Nottawasaga bay, Ontario. In 1638 they were settled in 14 towns and villages (Jes. Rel. 1638, 38, 1858). The Jesuit missions of St. Joseph and La Conception were established among them. (J. N. B. II.)

Attikamegue (Chippewa: "idi'k 'earibou,' mag 'fish': 'whitefish.'—W. J.). A band of

the Montagnais residing, when first known, in Quebec province, N. of the St. Maurice basin (Jes. Rel. 1636, 37, 1858), and accustomed to ascend the St. Lawrence to trade with the French. Charlevoix says their chief residence was on a lake connected with the St. Maurice. They were so harassed by the attacks of the Iroquois that a part at least fled to the vicinity of Tadoussae. They were so nearly destroyed by smallpox in 1670 that they became extinct as a tribe. They were esteemed by the missionaries as a quiet, inoffensive people, readily disposed to receive religious instruction. (J.M.)

Altihamaguez.-McKenney and Hall, Ind. Tribes, III 81, 1854. Altikamek.—Hervas quoted by Vater, Mithridates, pt. 3, sec. 3, 347, 1816. Altikameques.— Charlevoix (1743), Voy , 1, 152, 1766. White Fish Indians.-Winsor, Cartier to Frontenac, 171, 1894.

Attikiriniouetch (ŭdi'kwininiwŭg 'caribou people.'—W. J.). A Montagnais tribe formerly living northward from Manikuagan lake, Quebec.

Attik Iriniouetchs.—Bellin, map, 1755. Attikou Iriniouetz.—La Tour, map, 1779. Gens du Caribou.—La Tour, map, 1784 .misprint). Gens du Caribou.—Bellin, map, 1755. Les Caribou.—Lotter, map, ca. 1770.

Aukardneling. A village of the Talirpingmiut division of the Okomiut Eskimo on the w. side of Cumberland sd., Baffin island.

Augardneling.---Boas in 6th Rep. B. A. E., map, 1888.

Aukpatuk ('red'— A Suhinimiut Eskimo vill ge on Ungava bay, Quebec.—Hind, Lab. Pen., п, map, 1863.

Avaudjelling. A summer settlement of Akudnirmiut Eskimo at the N. end of Home bay, Baffin island.—Boas in th Rep. B. A. E., map, 1888.

Awaitlala ('those inside the inlet'). A Kwakiutl tribe on Knight inlet, Brit. Col. Their town is called Kwatsi.

A'wa-ilala.—Boas in Rep. Nat. Mus. 1895, 332, 1897, Acwaē'lela.—Boas in Mem. Am. Mus. Nat. Hist., v. pt. 1, 122, 1902. Oughtella.—Brit. Col. map, Ind. Aff, Victoria, 1872 (given as name of town).

Awausee (awasisi, 'bullhead,' a fish). A Chippewa phratry or gens. According to Warren a phratry including all the fish gentes of the Chippewa. According to Morgan and Tomazin it is a gens in itself. Cf. Quassi.

Ah-wah-sis'-sa.—Morgan, Anc. Soc. 166, 1877. Ah-wa-sis-se.—Tanner, Narr., 315, 1830 ('small catfish'; given by Tanner as a gens. he adds. 'sometimes they call the people of this totem 'thos. who carry their young,' from the habits of the small catfish'.). Awas-sissin.—Gatschet, Ojibwa MS. P. A. E., 1882. A-waus-e.—Warren in Munt. Hist. 50. Coll., v, 44, 1885. A-waus-e-wug.—Ibid. 87. A-w.us-is-ee.—Ramsey in U.S. Ind. Aff. Rep., 91, 1850.

Awighsaghroone. A tribe probably Algonquian, that lived about the upper Great lakes and which sent a friendly message to the Seneca in 1715. Perhaps identical with the Assisagigroone, or Missisauga.

Awighsaghroene.—Livingston (1715) in N. Y. Pool. Col. Hist., v. 446, 1855 — Awighsaghroone.—Ibid.

Axes. The grooved axe takes a prominent place among the stene implements used by the northern tribes. The normal form is that of a thick wedge, with rounded angles and an encircling groove near the top for securing the handle; but there is great variation from the average. Usually the implement is made of some hard, tough stone, as trap, granite, syenite, greenstone, or hematite, where such can be procured; but when these are not available softer material is utilized, as sandstone or slate. Copper axes are of rare occurrence. Among the stone specimens there is a very wide range in size, the largest weighing upward of 39 pounds and the smallest searcely an ounce. As these extreme sizes could serve no economic purpose, they were probably for ceremonial use; the smaller may have been amulets or talismans. The majority range from 1 pound to 6 pounds, which mark close to the limits of utility. As a rule the groove is at a right angle to the longer axis, though sometimes it is oblique, and it may extend entirely or only partially around the axe. In the latter ease it is always one of the narrow sides that is left without a groove, and this is frequently flat. tened or hollowed to accommodate the handles better. Ordinarily the complete or entire groove is pecked in a ridge encircling the axe, leaving a protuberance above and below, while the partial groove is sunken in the body of the implement. Axes with two or more grooves

2 GEORGE V., A. 1912

are rare excepting in the Pueblo country, where multiple grooves are common. The haft was placed parallel with the blade and was usually a withe doubled around the groove and fastened securely with cords or rawhide, but heavier T-shape sticks were sometimes used, the top of the T being set against the flattened or hollow side of the implement and firmly lashed. Axes with holes drilled for the msertion of a handle are common in Europe, but this method of hafting was of very rare occurrence among the American aborigines. When not made from boulders closely approximating in shape the desired implement, the axe was roughed out by chipping and was reduced to the desired shape by pecking with a hard stone and by grinding. Axes of rude shape, made by flaking a flattish boulder along one end and breaking notches in the sides for hafting, are found in some sections. Axes are well distributed over the country wherever good material is readily available. excepting in the Pacific states, British Columbia and Alaska, where specimens are exceedingly rare. Few are found in Florida, and although plentiful in the mound region are seldom found in mounds. The shapes vary with the different regions, examples from the Atlantic slope, for example, being quite unlike those of the Pueblo country.

It is probable that the axe served various purposes in the arts, and especially in war and in the chase. Numerous badly fractured specimens are found in the soapstone quarries of E. United States, where they were used for cutting out masses of this rock. The grooved axe is said to have been used in felling trees and in cutting them up, but it is manifestly not well suited for such work; it would serve, however, to assist in cutting wood in conjunction with charring. The hafted stone axe passed immediately out of use on the introduction by Europeans of the iron axe, which was the first and most obviously useful tool that the Indians saw in the hands of the white man.

A. E., 4883; Thruston, Antiq. Tenn., 1897; Wilson in Smithson, Reps. 1887 and 1888.

(G. F. W. H. H.)

Ayabaskawininiwug. A division of the Cree (q. v.), commonly known as Wood Cree.

Babiche. A thong of skin, particularly of eel skin. The word is derived through Canadian French, in which the term is old, occurring in Hennepin (1688), from one of the eastern dialects of Alg nquian. The original source is probably the old Micmac ababich, 'cord,' 'thread' (Lescarbot, Hist. Nouv. France, 666, 1612). A cognate word is the Chippewa assababish, 'thread.'

Babine ('big lips'). A branch of the Takulli comprising, according to Morice (Trans. Can. Inst., 27, 1893), the Nataotin, the Babine proper, and the Ilwotsotenne tribes living about Babine lake, British Columbia, with a total population of 610 in 7 villages. The name was given to them by French Canadians from the custom of wearing labrets, copied from the Chimmesyan; and indeed their entire culture was greatly affected by that of the coast tribes.

Bagoache. Given by La Chesnaye in 1697 (Margry, Déc., vi. 6, 1886) as the name of a country about the N. shore of lake Superior, with a people of the same name numbering from 200 to 300 men.

Bags and Pouches. Many varieties of bags and pouches were made by the Indians of the United States and were used for a great number of purposes. The costume of the aborigines was universally destitute of pockets, and various pouches served in their stead. On occasion articles were tucked away in the clothing or were tied up in bits of cloth or skin. The blanket also served at times for a bag, and among the Eskimo the woman's coat was enlarged over the shoulders and at the back to form a pouch for carrying the baby. The pouch was a receptacle of flexible material for containing various objects and substances of personal use or ceremony, and was generally an adjunct of costume. The bag, larger and simpler, was used for the gathering, transportation, and storage of game and other food. The material was tawed leather of various kinds, tanned leather, rawhide, fur skins, skins of birds; the bladder, stomach or pericardium of animals; cord of babiche, buckskin or wool, hair, bark, fibre, grass, and the like; basketry, cloth, beadwork, etc. Rectangular or oval pouches were made with a flap or a gatheringstring and with a thong, cord, or strap for attaching them at the shoulder or to the belt. The Eskimo had pouches with a flap that could be wrapped many times around and secured

by means of a string and an ivory fastener. The Zuñi use, among others, crescent-shaped pouches into the horns of which objects are thrust through a central opening. Bags showed less variety of form. They were square or oblong, deep or shallow, flat or cylindrical. Many of these were provided with a shoulder band, many with a carrying-strap and a forehead band. The Eskimo bag was provided with an ivory handle, which was frequently decorated with etching. Small pouches were used for holding toilet articles, paint, medicine, tobacco, pipes, ammunition, trinkets, sewingtools, fetishes, sacred meal, etc. Large pouches or bags, such as the bandolier pouch of the Chippewa, held smaller pouches and articles for personal use.

Bags were made for containing articles to be packed on horses, frequently joined together like saddle-bags. The tribes of the far N. made use of large sleeping bags of fur. Most bags and pouches were ornamented, and in very few other belongings of the Indian were displayed such fertility of invention and such skill in the execution of the decorative and symbolic designs. Skin pouches, elaborately ornamented with beadwork, quillwork, pigments, and dyes, were made by various tribes. Decorated bags and wallets of skin are characteristic of the Aleut, Salish, Nez Percés, the northern Athapascan and Algonquian tribes, and the Plains Indians. Bags of textiles and basketry are similarly diversified. Especially noteworthy are the muskemoots of the Thlingchadinne, made of babiche, the bags of the Nez Percés, made of apocynum fibre and cornhusks, the woven hunting bags of northern woodland tribes, and the painted rawhide pouches and bags of the tribes of the Great plains.

Ba'l play. The common designation of a man's game formerly the favorite athletic game of all the eastern tribes from Hudson bay to the Gulf. It was found also in California and

perhaps elsewhere on the Pacific coast, but was generally superseded in the W. by some form of shinny. It was played with a small ball of deerskin stuffed with hair or moss, or a spherical block of wood, and with 1 or 2 netted rackets, somewhat resembling tennis rackets. Two goals were set up at a distance of several hundred vards from each other, and the object of each party was to drive the ball under the goal of the opposing party by means of the racket without touching it with the hand. After picking up the ball with the racket, however, the player might run with it in his hand until he could throw it again. In the N. the ball was manipulated with a single racket, but in the S, the player used a pair, catching the ball between them. Two settlements or two tribes generally played against each other, the players numbering from 8 or 10 up to hundreds on a side, and high stakes were wagered on the result. Preceding and accompanying the game there was much ceremonial of dancing, fasting, bleeding, anointing, and prayer under the direction of the medicine-men. The allied tribes used this game as a stratagem to obtain entrance to Ft. Mackinaw in 1764. Numerous places bearing the name of Ball Play give evidence of its old popularity among the former tribes of the Gulf states, who have carried it with them to their present homes in Oklahoma, where it is still kept up with the old ceremonial and enthusiasm. Shorn of its ceremonial accompaniments it has been adopted by the Canadians as their national game under the name of *lacrosse*, and by the Louisiana French ereoles as raquette. The Indians of many tribes played other games of ball, noteworthy among which is the kicked ball of the Tarahumare, which, it is said, gave the name to the tribe. Consult Adair, Hist. Am. Inds., 1775; Bartram, Trav., 1792; Catlin, N. A. Inds., 1841; Mooney, Cherokee Ball Play, Am. Anthrep., m, 1890; Culin, Games of N. Am. Inds., in 24th Rep. B. A. E., 1905. Lumholtz, Unknown Mexico, 1902. (j. m.)

Bark. Among the resources of nature utilized by the tribes of North America bark was of prime importance. It was stripped from trees at the right season by hacking all around and taking it off in sheets of desired length. The inner bark of cedar, elm, and other trees was in some localities torn into strips, shredded, twisted, and spun or woven. The bark of wild flax (Apoeynum) and the Asclepias were made into soft textiles. Bark had a multitude of

2 GEORGE V., A. 1912

functions. In connection with the most important of wants, the necessity for food, it supplied many tribes with an article of diet in the spring, their period of greatest need. The name Adirondack, signifying 'they eat trees,' was applied by the Mohawk to certain Algonquian tribes of Canada in allusion to their The N. Pacific and custom of eating bark. some S. W. tribes made cakes of the soft inner bark of the hemlock and spruce; those living about the Great lakes chewed that of the slippery elm, while many Indians chewed the gum that exuded from trees. Drink was made from bark by the Arapaho, Winnebago, and Mescaleres. Willow bark and other kinds were smoked in pipes with or instead of tobacco. and the juices of barks were employed in medicine.

For gathering, carrying, garnering, preparing, and serving food, bark of birch, elm, pine, and other trees was so handy as to discourage the potter's art among non-sedentary tribes. It was wrought into yarn, twine, rope, wallets, baskets, mats, canoes, cooking pots for hot stones, dishes for serving, vessels for storing, and many textile utensils connected with the consumption of food in ordinary and in social life. Both men and women were food gatherers, and thus both sexes were refined through this material; but preparing and serving were women's arts, and here bark aided in developing their skill and intelligence.

Habitations in Canada, E. United States, and s. E. Alaska often had roofs and sides of bark, whole or prepared. The conical house, near kin of the tipi, was frequently covered with this material. Matting was made use of for floors, beds, and partitions. Trays and boxes, receptacles of myriad shapes, could be formed by merely bending large sheets and sewing or simply tying the joints. Bast could be pounded and woven into robes and blankets. The Canadian and Alaskan tribes carried their children in cradles of birch bark, while on the Pacific coast infants were borne in wooden cradles or baskets of woven bark on beds of the bast shredded, their foreheads being often flattened by means of pads of the same material. In the S. W. the baby-board had a cover of matting. Among the Iroquois the dead were buried in coffins of bark. Clothing of bark was made chiefly from the inner portion, which was stripped into ribbons, as for petticoats in the S. W., shredded and fringed; as in the cedarbark country, where it was also woven into garments, or twisted for the warp in weaving articles of dress, with woof from other materials. Dyes were derived from bark and certain kinds also lent themselves to embroidery with quills and overlaying in basketry. Bark was also the material of slow-matches and torches, served as padding for the carrier's head and back and as his wrapping material, and furnished strings, ropes, and bags for his wooden canoes. hunter made all sorts of apparatus from bark, even his bowstring. The fisher wrought implements out of it and poisoned fish with its juices. The beginnings of writing in some localities were favoured by bark, and cartography, winter counts, medical formulas, and tribal history were inscribed thereon. Finally it comes into the service of ceremony and religion. Such a series of masks and dance regalia as Boas and others found among the Kwakintl illustrates how obligingly bark lends itself to co-operative activities, whether in amusement, social functions or adoration of the spirit world. There are also rites connected with gathering and working bark. See Boas in Nat. Mus. Rep. 1895, 1897; in Hoffman in 14th Rep. B. A. E., 1896; Holmes in 3d and 13th Reps. B. A. E., 1884, 1896; Jenks in 19th Rep. B. A. E., 1900; Jones in Smithson, Rep. 1867, 1872; Mason (1) in Rep. Nat. Mus. 1887, 1889, (2) ibid., 1894, 1896, (3) ibid., 1902, 1904; Nibłack, ibid., 1888, 1890; Turner in 11th Rep. В. А. Е., 1894. (о. т. м.)

Basketry. Basketry, including wattling, matting, and bagging, may be defined as the primitive textile art. Its materials include nearly the whole series of North American textile plants, and the Indian women explored the tribal habitat for the best. Constant digging in the same favourite spot for roots and the clearing away of useless plants about the chosen stems constituted a species of primitive agriculture. They knew the time and seasons for gathering, how to harvest, dry, preserve, and prepare the tough and pliable parts for use and to reject the brittle, and in what way to combine different plants with a view to the union of beauty and strength in the product. The tools and apparatus of the basket-maker, who was nearly always a woman, were most skilful fingers, aided by finger nails for gauge, teeth for a third hand or for nippers, a stone knife, a bone awl, and polishers of shell or gritty stone. She knew a multitude of dyes, and in some instances the bark was chewed and the splint drawn between the lips. In later times knives,

awls, seissors, and other utensils and tools of steel were added. In its technic basketry is divided into two species-woven and coiled. Woven basketry has warp and weft, and leads up to loom work in softer materials. Of this species there are the following varieties: Checkerwork, in which the warp and weft pass over and under one another singly and are indistinguishable; twilled work, in which each element of the weft passes over and then under two or more warp elements, producing by varying width and colour an endless variety of effects; wickerwork, in which the warp of one larger or two or more smaller elements is inflexible, and the bending is done in the weft: wrapped work. wherein the warp is not flexed, and the weft, in passing a warp element, is wrapped once around it, varied by drawing both warp and weft tight so as to form half of a square knot; twined work, in which the warp is not bent and the weft is made up of two or more elements, one of them passing behind each warp element as the weaving progresses. Of this last variety there are many styles—plain twined, twilled twined, crossed or divided warp with twined work, wrapped, or bird-cage weaving, threestrand twining after several methods, and three-strand braid. Coiled basketry is not weaving, but sewing, and leads up to point lace. The work is done by sewing or whipping together, in a flat or ascending coil, a continuous foundation of rod, splint, shredded fibre, or grass, and it receives various names from the kinds of foundation employed and the manner of applying the stitches: or the sewing may form genuine lace work of interlocking stitches without foundation. In coiled work in which a foundation is used the interlocking stitches pass either above, through, or quite under the foundation. Of coiled basketry there are the following varieties: Coiled work without foundation; simple interlocking coils with foundation; single-rod foundation; two-rod foundation; rod-and-splint foundation; tworod-and-splint foundation; three-rod foundation; splint foundation; grass-coil foundation; and Fuegian stitches, identical with the buttonhole stitch. By using choice materials, or by adding pitch or other resinous substance, baskets were made water-tight for holding or carrying water for cooking.

The chief use of baskets is as receptacles, hence every activity of the Indians was associated with this art. Basket work was employed, moreover, in fences, game drives, weirs, houses, shields, clothing, cradles, for harvest-

ing, and for the disposal of the dead. This art is interesting, not only on account of the technical processes employed, the great delicacy of technic, and the infinite number of purposes that it serves, but on account of the ornamentation, which is effected by dveing, using materials of different colours, overlaying, beading, and plaiting, besides great variety in form and technic. This is always added in connection with the weaving or sewing, and is further increased with decorative beads, shells, and feathers. In forms, basketry varies from flat wattling, as in gambling and bread plaques, through travs, bowls, pots, cones, jars, and cylinders, to the exquisite California art work. The geometric forms of decussations and stitches gave a mosaic or conventional appearance to all decoration. The motives in ornamentation were various. No doubt a sense for beauty in articles of use and a desire to awaken admiration and envy in others were uppermost. Imitation of pretty objects in nature, such as snake-skins, and designs used by other tribes. were naturally suggested. Such designs pass over into the realms of symbolism and religion. This is now alive and in full vigour among the Hopi of Arizona. The Indian women have left the best witness of what they could do in handiwork and expression in their basketry. In E. United States almost all of the old-fashioned methods of basket making have passed away, but, by taking impressions of pottery, Holmes has been able to reconstruct the ancient processes, showing that they did not differ in the least from those now extant in the tribes w. of the Rocky mts. In the southern states the existence of pliable cane made possible twilled weaving, which may still be found among the Cherokee and the tribes of Louisiana. The Athapascan tribes in the interior of Alaska made coiled basketry from the roots of evergreen trees. The Eskimo about Bering str. manufactured both woven martings and wallets and coiled basketry of pliable grass. The Alcutian islanders are now among the most refined artisans in twined work. South of them the Tlingit and the Ilaida also practise twined work only. From British Columbia, beginning with the Salishan tribes, southward to the borders of Mexico, the greatest variety of basket making in every style of weaving is practised.

Consult Mason, Aboriginal American Basketry, Rep. Nat. Mus. 1902, 1904, and the bibliography therein; also Barrett in Am. Anthrop., vII, no. 4, 1905; Dixon in Bull. Am.

Mus. Nat. Hist., xvii, pt. i, 1902; Kroeber in Univ. Cal. Publ., ii, 1905; Goddard, ibid., Willoughby in Am. Anthrop., vii, no. 1, 1905.

Basque influence. The Basque fishermen who frequented the fishing grounds of the N. E. Atlantic in the 16th and 17th centuries influenced to some extent the Indians of New France and Acadia. But such influence was only of a temporary character, and the relations of the Indians with the Basques were only such as naturally came from the industry pursued by the latter. Lesearbot (Hist. Nouv. France, 695, 1612) states that a sort of jargon had arisen between the French and Basque fishermen and traders and the Indians, in which "a good deal of Basque was mixed," but does not give examples of it. (See Reade, The Basques in North America, in Trans. Rov. Soc. Canada, 1888, sec. 11, pp. 21-39.) Attempts have been made to detect pre-Columbian influences through alleged lexical and other resemblances between Basque and Indian languages, but without success. (A. F. C.)

Batons. As emblems of authority or rank, batons were in common use among the more advanced northern tribes, and probably the most conspicuous modern representatives are the carved wooden batons of the Haida and and other north-western tribes. Here they are carried in the hands of chiefs, shamans, and song leaders on state occasions, and are permitted only to such personages. Weapons of various kinds were similarly used and probably had kindred significance. In prehistoric times long knives of stone, masterpieces of the chipping art, seem to have been a favourite form of ceremonial weapon, and their use still continues among some of the Pacific Slope tribes, especially in California. Batons used in marking time are probably without particular significance as emblems. Among the Kwakiutl and other tribes the club-shaped batons, carved to represent various animals, are used by the leaders in ceremonial dances and serve for beating time. Consult Boas in Rep. Nat. Mus. 1895, 1897; Goddard in Publ. Univ. Cal., 1, no. 1, 1903; Niblack in Rep. Nat. Mus. 1888, 1890; Powers in Cont. N. A. Ethnol., пл, 1877; Rust and Kroeber in Am. Anthrop., VII, no. 4, 1905. (w. H. H.)

Beadwork. Attractive and precious objects, perforated usually through the middle and strung for various purposes, constitute a class of ornaments universally esteemed, which

the Indians of North America did not fail to develop. Akin to beads, and scarcely separable from them, were objects from the same materials called pendants. They were perforated near the end or edge and hung on the person or on garments. All were made from mineral, vegetal, or animal substances, and after the discovery the introduction of heads of glass and porcelain, as well as that of metal tools for making the old varieties, greatly multiplied their employment. Mineral substances showing pretty coloured or brilliant surfaces, from which beads were made, were copper, hematite, all kinds of quartz, serpentine, magnetite, slate, soapstone, turquoise, enerinite sections, pottery, and, in later times, silver and other metals, porcelain, and glass. They were of many sizes and shapes. Among vegetal substances seeds and, especially along the southern tier of states from Florida to California, nuts were widely used for beads, and here and there stems and roots of pretty or scented plants were cut into sections for the same purpose. But far the largest share of beads were made from animal materials—shell, bone, horn, teeth, claws, and ivory. Beads of marine or fresh-water shells were made by grinding off the apex, as in the case of dentalium, or the unchanged shells of bivalves were merely perforated near the hinge. Pearls were bored through the middle, and shells were cut into discs, cylinders, spheres, spindles, etc. In places the columellæ of large conchs were removed and pierced through the long diameter for stringing. Bone beads were usually eylinders produced by cutting sections of various lengths from the thigh or other parts of vertebrate skeletons. When the wall of the bone was thick the ends were ground to give a spherical form. The milk teeth of the elk, the canine teeth of the bear, and the incisors of rodents were highly valued, and, in later times, the incisors of the horse were worn. The beaks of the puffin, the talons of rapacious birds, and bears' claws were wrought into ceremonial dress and paraphernalia. A great deal of taste and manual skill were developed in selecting the materials, and in cutting, grinding, and rolling them into shape and uniform size, as well as in polishing and perforating substances, some of them very hard, as jasper. Many of the cylinders are several inches long. The tribes of N. w. California wrap dental a with snake skin glued on in strips, while the Pomo and their neighbours make large cylinders of a baked mineral (Kroeber).

The general uses to which beads were put are legion. They were tied in the hair, worn singly or in strings from the ears, on the neck, arms, wrist, waist, and lower limbs, or were attached to bark and wooden vessels, matting, basketry, and other textiles. They were woven into fabrics or wrought into network, their varied and bright colours not only enhancing beauty but lending themselves to heraldry. Glass beads thus woven produce effects like those of cathedral glass. Again, they were embroidered on every part of ceremonial costume, sometimes entirely covering head-dress, coat, regalia, leggings, or moceasins, and on all sorts of receptacles. The old-time technic and designs of quillwork are closely imitated. They were largely employed as gifts and as money, also as tokens and in records of hunts or of important events, such as treaties. They were conspicuous accessories in the councils of war and peace in the conventional expression of tribal symbolism, and in traditional story-telling, and were offered in worship. They were regarded as insignia of functions, and were buried, often in vast quantities, with the dead.

In each of the ethnic areas of North America nature provided tractable and attractive material to the bead-maker. In the Arctic region it was walrus ivory and the glossy teeth of mammals. They served not only for personal adornment, but were hung to all sorts of skin receptacles and inlaid upon the surfaces of those made of wood and soft stone. The Danes brought glass to the eastern Eskimo, the whalers to the central, and the Russians to the western tribes. In the St. Lawrence-Atlantic area whole shells were strung, and cylinders, dises, and spindles were cut from the valves of the elam (Venus mercenaria). In Virginia a cheap kind, called roanoke, were made from oyster shelfs. In the N. small white and purple cylinders, called wampum, served for ornament and were used in elaborate treaty belts and as a money standard, also flat discs an inch or more in width being bored through their long diameters. The Cherokee name for beads and money is the same. Subsequently imitated by the colonists, these beads received a fixed value. The mound-builders and other tribes of the Mississippi valley and the Gulf states used pearls and beads of shell, seeds, and rolled eopper. Canine teeth of the elk were most highly esteemed, recently being worth 50 eents to \$I each. They were carefully saved, and a garment covered with them was valued

at as much as \$600 or \$800. The modern tribes also used the teeth of rodents, the claws of bears and carnivores, and the dewclaws of ruminants. Nuts and berries were universally strung and worn, and the Mandan and other Missouri R. tribes pounded and melted glass and moulded it into beads. After the colonization cradles and articles of skin were profusely covered with beadwork replete with symbolism. The Yukon-Mackenzie tribes were most skilful in quillwork, but later decked their garments and other useful things with glass beads. All along the Pacific slope dentalium, abalone, and clam shells furnish the most valuable materials. The length of the wrought bead represented a certain amount of work and established the money value. The price of dentalium shells increased rapidly after a certain length was exceeded. These beads were decorated with grass, skin, and feathers, to enhance their worth. The California eoast tribes and the ancient peoples of Santa Barbara ids, were rich in the little flat-shell discs as well as the stone drill, and they knew how to reduce them to uniform diameter by rolling long strings of them between slabs or through grooves in sandstone. The tribes of the N. portion of the interior basin were not well supplied with bead material, but early made the acquaintance of the trader. A series of Ute costumes made before the advent of glass shows much pretty decoration in dewelaws, bits of goat and sheep horn. and perforated seeds. The Pueblo Indians string the vellow capsules of Solanum, sections of woody stems of plants, seashells, turquoise and other varieties of bright-coloured stones, of which they have great store. The Hyde Expedition found more than 30,000 turquoise beads in a single room at Pueblo Bonito, N. Mex. The Huichol, with colored beads of glass, using wax as an adhesive, make pretty mosaic figures on gourds, carved images of wood, etc.

Beldom. A Missisauga village in Ontario in 1855.—Jones, Ojebway Inds., 229, 1861.

Bellabella (an Indian corruption of Milbanke taken back into English). The popular name of an important Kwakiutl tribe living on Milbanke sd., Brit. Col. Their septs or subtribes are Kokaitk, Oetlitk, and Ocalitk. The following clans are given: Wikoktenok (Eagle), Koetenok (Raven), Halhaiktenok (Killerwhale). Pop. 321 in 1911.

The language spoken by this tribe and shared also by the Kitamat, Kitlope, China Hat, and Wikeno Indians is a peculiar dialect of Kwakiutl, called Heiltsuk from the native name of the Bellabella. These tribes resemble each other furthermore in having a system of clans with descent through the mother—derived probably from their northern neighbours—while the Bellacoola and Kwakiutl to the S. have paternal descent. Anciently the Bellabella were very warlike, a character largely attributable to the fact that they were flanked on one

side by the Tsimshian of Kittizoo and on the other by the Bellaeoola, while war parties of Haida from the Queen Charlotte ids. were constantly raiding their coasts. For this reason, perhaps, the peculiar secret societies of the N. W. eoast, the most important of which evidently had their origin in war eustoms, first arose among them. When voyagers first began frequenting the N. Pacific coast, Milbanke sd., which offers one of the few good openings into the inner ship channel to Alaska, was often visited, and its inhabitants were therefore among the first to be modified by European contact. Together with the other Heiltsuk tribes they have now been Christianized by Protestant missionaries, and most of their aneient culture and ritual have been abandoned.

In 1911, the population of the Bellabella band was 321—Can. Ind. Aff., 1911, 202.

Bellacoola (Bi'lxula). A coast Salish tribe, or rather aggregation of tribes, on N. and s. Bentinek arm, Dean inlet, and Bellacoola r., Brit. Col. This name is that given them by the Kwakiutl, there being no native designation for the entire people. They form the northernmost division of the Salishan stock, from the remaining tribes of which they are separated by the Tsilkotin and the Kwakiutl. In the Canadian reports on Indian affairs the name is restricted by the separation of the Tallion (see Talio) and the Kinisquit (people of Dean inlet), the whole being called the Tallion nation. The population in 1902 was 311.* The chief divisions mentioned are the

^{*}In 1911, the Bellacoola and Tallion band included 225 persons and the Kinisquit band, 47; total, 272.

Kinisquit, Noothlakimish, and Nuhalk. The gentes of the Bellacoola without reference to the tribal divisions are: Hamtsit, Ialostimot. Koökotlane, Smoen, Spatsatlt, Tlakaumoot, Tumkoaakyas. The following are mentioned as gentes of the Nuhalk division: Keltakkaua, Potlas, Siatlhelaak, Spukpukolenik, and Tokoaïs. The Bellacoola villages (chiefly after Boas) are: Aseik, Asenane, Atlklaktl, Koapk, Koatlna, Komkutis, Noutehaoff, Nuiku, Nukaakmats, Nukits, Nusatsem, Nuskek, Nuskelst, Nutltleik, Osmakmiketlp, Peisela, Sakta, Satsk, Selkuta, Senktl, Setlia, Slaaktl, Snutele, Snutlelatl, Sotstl, Stskeitl, Stuik, Talio, Tkeiktskune, Tskoakkane, Tsomootl. Beothukan Family (from the tribal or group name Béothuk, which probably signifies 'man,' or 'human being,' but was employed by Europeans to mean 'Indian,' or 'Red Indian'; in the latter case because the Beothuk coloured themselves and tinted their utensils and arms with red ochre). So far as known only a single tribe, called Beothuk, which inhabited the island of Newfoundland when first discovered, constituted this family, although existing vocabularies indicate marked dialectic differences. At first the Beothuk were classified either as Eskimauan or as Algonquian, but now, largely through the researches of Gatschet, it is deemed best to regard them as constituting a distinct linguistic stock. It is probable that in 1497 Beothukan people were met by Sebastian Cabot when he discovered Newfoundland, as he states that he met people "painted with red oehre," which is a marked characteristic of the Beothuk of later observers. Whitbourne (Chappell, Voy. to Newfoundland, 1818), who visited Newfoundland in 1622, stated that the dwellingplaces of these Indians were in the x, and w. portions of the island, adding that "in war they use bows and arrows, spears, darts, elubs, and slings." The extinction of the Beothuk was due ehiefly to the bitter hostility of the French and to Micmae invasion from Nova Scotia at the beginning of the 18th century, the Miemac settling in w. Newfoundland as hunters and fishermen. For a time these dwelt in amity with the Beothuk, but in 1770, quarrels having arisen, a destructive battle was fought between the two peoples at the N. end of Grand Pond. The Beothuk, however, lived on friendly terms with the Naskapi, or Quebec Montagnais, and the two peoples visited and traded with each other. Exasperated by the petty depredations of these tribes, the French, in the middle of the 18th century, offered a reward for every head of a Beothuk Indian. To gain this reward and to obtain the valuable furs they possessed, the more numerous Miemae hunted and gradually exterminated them as an independent people. The English treated the Beothuk with much less rigour; indeed, in 1810 Sir Thomas Duckworth issued a proclamation for their protection. The banks of the river of Exploits and its tributaries appear to have been their last inhabited territory.

De Laet (Novus Orbis, 34, 1633) describes these Newfoundland Indians as follows: "The height of the body is medium, the hair black, the face broad, the nose flat, and the eyes large; all the males are beardless, and both sexes tint not only their skin but also their garments with a kind of red colour. And they dwell in certain conical lodges and low buts of sticks set in a circle and joined together in the roof. Being nomadic, they frequently change their habitations. They had a kind of eake made with eggs and baked in the sun, and a sort of pudding, stuffed in gut, and composed of seal's fat, livers, eggs, and other ingredients." He deseribes also their peculiar crescent-shaped birchbark canoes, which had sharp keels, requiring much ballast to keep them from overturning; these were not more than 20 feet in length and they could bear at most 5 persons. Remains of their lodges, 30 to 40 feet in circumference and constructed by forming a slender frame of poles overspread with birch bark, are still traceable. They had both summer and winter dwellings, the latter often accommodating about 20 people each. Jukes (Excursions, 1842) describes their deer fences or deer stockades of trees, which often extended for 30 miles along a river. They employed pits or caches for storing food, and used the steam bath in huts covered with skins and heated with hot stones. Some of the characteristics in which the Beothuk differed from most other Indians were a marked lightness of skin colour, the use of trenches in their lodges for sleeping berths. the peculiar form of their canoes, the nondomestication of the dog, and the dearth of evidence of pottery making. Bonnycastle (Newfoundland in 1842) states that the Beothuk used the inner bark of Pinus balsamifera as food, while Lloyd (Jour. Anthrop. Inst., IV, 1875) mentions the fact that they obtained fire by igniting the down of the bluejay from sparks produced by striking together two pieces of iron pyrites. Peyton, cited by Lloyd, declares that the sun was the chief object of their worship. Cormack's expedition, conducted in behalf of the Beothic Society for the Civilization of the Native Savages, in 1827, failed to find a single individual of this once prominent tribe, although the island was crossed centrally in the search. As they were on good terms with the Naskapi of Labrador, they perhaps erossed the strait of Belleisle and became incorporated with them. (J. N. B. H. Beathook.—Leigh quoted by Lloyd in Jour. Anthrop. Inst., IV, 38, 1875. Béhathook.—Gatschet in Proc. Am. Philos. Soc., 410, 1885 (quoting older form). Beothies,-Lloyd in Jour. Anthrop. Inst , IV, 33, 1875. Beothik.—Gatschet, op. cit. Good-night Indians.-Lloyd, following blunder of Latham, in Jour. Anthrop.Inst., v. 229, 1876. Macquaejeet.-Gatschet in Proc. Am. Philos. Soc., 410, Oct., 1885 (Micmae name: 'red man,' evidently a transl of the European 'Red Indian'). Red Indians of Newfoundland .- Cartwright (1768) quoted by Lloyd in Jour. Anthrop. Inst, iv, 22, 1875. Shawatharott.-King quoted by Gatschet in Proc. Am. Philos. Soc., 410, 1885 (='Red Indian man'). Shawdtharut. - Ibid. Ulnohah. - Latham quoted by Gatschet, ibid, 411 (Abnaki name). Ulno mequaegit.—Ibid. (said to be the Micmac name, sig. 'red man,' but evidently a trader's or fisherman's rendering of the European 'Red Indians')

Bersiamite. One of the small Algonquian tribes composing the eastern group of the Montagnais, inhabiting the banks of Bersimis r., which enters St. Lawrence r. 75 miles below Tadoussac. These Indians became known to the French at an early date, and being of a peaceable and tractable disposition, were soon brought under the influence of the missionaries. They were accustomed to assemble once a year with cognate tribes at Tadoussac for the purpose of trade, but these have melted away under the influence of civilization. A trading post called Bersimis,

at the mouth of Bersimis r., had in 1911 some 550 Indians attached to it, but whether any of them were Bersiamite is not stated.

Bible translations. The Bible has been printed in part or in whole in 32 Indian languages x, of Mexico. In 18, one or more portions have been printed; in 9 others, the New Testament or more has appeared; and in 5 languages, namely, the Massachuset, Crec, Labrador Eskimo, Santee Dakota, and Tukkuthkutchin, the whole Bible is in print.

The Norwegian missionaries, Hans and Paul Egede, were the first to translate any part of the Bible into Greenland E-kimo, their version of the New Testament being printed in part in 1744, and as a whole in 1766. A revision of this translation, by Otto Fabricius, was twice printed before the close of the 18th century; and in 1822 the Moravian Brethren brought out a new translation, which ran through several editions. Nearly three-quarters of the Old Testament was printed in the same language between 1822 and 1836, when the work was discontinued. In Labrador Eskimo the earliest printed Bible text was the Harmony of the Gospels, which appeared in 1800. This was followed by the Gospel of St. John in 1810, the complete New Testament in 1840, and all of the Old Testament between 1834 and 1867. In other Eskimo languages there were printed: In Labrador Eskimo some New Testament extracts in 1878 and the Four Gospels in 1897, translated by E. J. Peck; in the Aleutian Unalaska dialect, with adaptation also to the Atka dialect, John Veniaminoff's translation of St. Matthew's Gospel in 1848; and in Kaniagmiut, Elias Tishnoff's translation of the same Gospel, also in 1848

Four languages of the Athapasean family have been provided with Bible translations. The Gospels were translated by Robert McDonald and printed in the Tukkuthkutchin language of Mackenzier. in 1874, and the whole Bible in 1898. In the Chipewyan, Archdeacon Kirkby's translation of the Gospels appeared in 1878 and the whole New Testament in 1881; in the Etchareottine, Kirkby's translation of St. John's Gospel in 1870, and Bishop Bompas' of the New Testament between 1883 and 1891; and in the Tsattine, A. C. Garrioch's version of St. Mark's Gospel in 1886.

Translations have been made into 13 languages of the Algonquian family. In the Cree, William Mason's work comprises several editions of the Gospel of St. John made between 1851 and 1857, the complete New Testament in 1859, and the whole Bible in 1861-62. Archdeaeon Hunter's version of three of the Gospels in the same language appeared in 1853-55 (reprinted in 1876-77). Bishop Horden's Four Gospels in Cree was printed in 1859, and his complete New Testament in 1876. In the Abnaki, St. Mark's Gospel, translated by Wzokhilain, was printed in 1844; in the Micmae, beginning with the printing of St. Matthew's Gospel in 1853, Mr. Rand continued at work until the whole New Testament was published in 1871-75, besides the books of Genesis, Exodus, and the Psalms; and in the Malecite, St. John's Gospel, also translated by Rand, came out in 1870. The Massachuset language, which comes next in geographical order, was the first North American Indian language into which any Bible translation was made; John Eliot began his Natick version in 1653 and finished it in 1661-63, with a revised edition in 1680-85. In 1709 Experience Mayhew published his translation, in the Wampanoag dialect of Martha's Vineyard, of the Psalms and St. John's Gospel. In the Delaware, Dencke's translation of the epistles of St. John was printed in 1818, Zeisberger's Harmony of the Gospels in 1821, and Luckenbach's Scripture Narratives in 1838. In Chippewa, the earliest translations were those of the Gospels of St. Matthew and St. John, by Peter and John Jones, printed in 1829-31. There are three complete translations of the New Testament in this language: One by Edwin James in 1833, another by Henry Blatchford in 1844 (reprinted in 1856 and 1875), and a third by F. A. O'Meara in 1854 (reprinted in 1874). O'Meara also translated the Psalms (1856) and the Pentateuch (1861), and McDonald translated

the Twelve Minor Prophets (1874). In the Shawnee language, St. Matthew's Gospel, by Johnston Lykins, was printed in 1836 and a revision in 1842, and St. John's Gospel, by Francis Barker, in 1846. In the Ottawa, Meeker's translation of St. Matthew and St. John appeared in 1841–44; in the Potawatomi, St. Matthew and the Acts, by Lykins, in 1844; in the Siksika, St. Matthew, by Tims, in 1890: in the Arapaho, St. Luke, by Roberts, in 1903; and in the Cheyenne, the Gospels of St. Luke and St. John by Petter, who has published also some other portions of the Bible.

Three languages of the Iroquoian family possess parts of the Bible. In Mohawk, extracts from the Bible were printed as early as 1715; the Gospel of St. Mark, by Brant, in 1787; and St. John, by Norton, in 1805. Between 1827 and 1836 the rest of the New Testament was translated by H. A. Hill, W. Hess, and J. A. Wilkes, and the whole was printed in successive parts. A new version of the Gospels, by Chief Onasakenrat, was printed in 1880. The only part of the Old Testament in Mohawk is Isaiah, printed in 1839. In the Seneca language, St. Luke, by Harris, was printed in 1829, and the Four Gospels, by Asher Wright, in 1874. In the Cherokee language St. Matthew's Gospel was translated by S. A. Worcester and printed in 1829, the other Gospels and the Epistles following, until the complete New Testament was issued in 1860. Genesis and Exodus, also by Worcester, were printed in 1856 and 1853, respectively, besides some portions of the Psalms, Proverbs, and Isaiah.

In the Kwakiutl language, of the Wakashan family, A. J. Hall's translation of the Gospels of St. Matthew and St. John came out in 1882–84 and the Acts in 1897. In the Tsimshian language, of the Chimmesyan family, the Four Gospels, translated by William Duncan, were printed in 1885–89; and in the Niska language J. B. McCullagh began work on the Gospels in 1894. In the Haida language, of the Skittagetan family, translations of three of the Gospels and of the Acts, by Charles Harrison and J. H. Keen, were printed in 1891–97.

Consult the various bibliographies of Indian languages, by J. C. Pilling, published as bulletins by the Bureau of American Ethnology.

Birch River. A local name applied to the Maskegon (Swampy Cree) res., near lower Sas-

katchewan r., Manitoba, and to the Indians gathered on it.—Can. Ind. Aff., passim.

Bistchonigottine. A division of the Etchaottine on Bistcho lake, north-western Alberta.

Bes-tchonhi-Gottinè.—Petitot, Autour du Lac des Esclaves, 339, 1891.

Blackfoot, Middle, North, and South. Divisions of the Siksika proper, q. v.

Black Kettle. An Onondaga chief, ealled by the French Chaudière Noire. When in the first French war the governor in Montreal sent one of his officers with 300 men to attack the Iroquois at Niagara, Black Kettle, with 80 warriors, gave the invaders a long running fight, from which the latter were the chief sufferers, although his force was in the end wiped out. In the following season he laid waste the French settlements in w. Canada. In 1691 the Iroquois planned the destruction of the French settlements and trading posts w. of Montreal. Their plans were revealed to the French commander by captive Indian women who escaped, and after the defeat of the expeditions the French destroyed parties that were encamped in their hereditary hunting grounds between the Ottawa and St. Lawrence rs. Black Kettle retaliated by killing Indians who traded with Montreal and the French escort sent to guard them. On July 15, 1692, he attacked Montreal and carried off many prisoners, who were retaken by a pursuing party; and in the same season he attacked the party of de Lusignan and killed the leader. In 1697 he arranged a peace with the French, but before it was concluded he was murdered by some Algonkin while hunting near Cattaraugus, although he had notified the French commander at the fort of the peace negotiations.

Blankets. In the popular mind the North American Indian is everywhere associated with the robe or the blanket. The former was the whole hide of a large mammal made soft and pliable by much dressing; or pelts of foxes, wolves, and such creatures were sewed together; or bird, rabbit, or other tender skins were ent into ribbons, which were twisted or woven. The latter were manufactured by basketry processes from wool, hair, fur, feathers, down, bark, cotton, etc., and had many and various functions. They were worn like a toga as protection from the weather, and, in the best examples, were conspicuous in wedding and other ceremonies; in the night they were both

bed and covering; for the home they served for hangings, partitions, doors, awnings, or sunshades; the women dried fruit on them, made vehicles and cradles of them for their babies, and receptacles for a thousand things and burdens; they even then exhausted their patience and skill upon them, producing their finest art work in weaving and embroidery; finally, the blanket became a standard of value and a primitive mechanism of commerce.

In s. E. Alaska originated what is popularly called the Chilkat blanket—a marvel of spinning, weaving, fringing, and mythic designs. The apparatus for this seems inadequate. The woman hangs her warp of mountain goat's wool mixed with shredded cedar bast from a horizontal bar. The long ends are made into balls and covered with membrane to keep them clean. Weft is not even wound on a stick for shuttle, nor is there even the rudest harness or batten. The details of the great mythic design are carefully wrought in by the woman in twined weaving at the same time that a dainty lacework is produced on the selvage. The process ends with a long heavy fringe from the unused warp. Farther southward on the N. W. coast eedar bast finely shredded served for the weaving of soft blankets, which were neatly trimmed with fur.

The Nez Percés and other tribes in the Fraser-Columbia area were extremely skilful in producing a heavy and tastefully decorated blanket in twined weaving from mountain goat's hair with warp of vegetal fibre, and among the Atlantic and Pacific coast tribes generally soft barks, wild hemp, rabbit skins, the down of birds, and the plnmes of feathers were put to the same use. Blankets of cords wound with feathers were produced, not only by the Pueblos and cliff-dwellers but quite extensively in the E. as well as in the N. W. These were all woven with the simplest possible apparatus and by purely aboriginal technical processes. They were the groundwork of great skill and taste and much mythology, and were decorated with strips of fur, fringes, tassels, pendants, beadwork, featherwork, and native money. After the advent of the whites the blanket leaped into sudden prominence with tribes that had no weaving and had previously worn robes, the preparation of which was most exhausting. The Enropean was not slow in observing a widespread want and in supplying the demand. When furs became scarcer blankets were in greater demand everywhere as articles of trade and standards of value. In-

deed, in 1831 a home plant was established in Buffalo for the manufacture of what was called the Mackinaw blanket. The delegations visiting Washington during the 19th century wore this article conspicuously, and in our system of educating them, those tribes that were unwilling to adopt modern dress were called "blanket Indians." In art the drapery and colours have had a fascination for portrait painters, while in citizen's garments the red man ceases to be picturesque.

Boat Harbour. A Micmae village near Pictou, Nova Scotia.—Can. Ind. Aff. Rep. 1880, 46, 1881.

Boats. Under this general term are included various kinds of water-eraft used throughout North America wherever waters favoured. The Eskimo have two forms-the man's boat (kaiak, Russian baidarka) and the woman's boat (umiak, Russian baidarra -made by stretching a covering of seal hide over a framework of whale ribs or of driftwood. The umiak, or woman's boat, is an open scow with little modification of bow and stern, propelled with large oars and a sail made of intestines; but the man's boat is one of the most effective devices for water travel in the world. The man sits in a small hatch, and, in the lighter forms, when his water-tight jacket is lashed to the gunwale he is practically shut in. so that though the water may pass entirely over him, scarcely a drop enters the craft. He moves himself through the water by means of a paddle, in most cases a double one.

Immediately in touch with the skin-boat countries all around the Arctic, from Labrador to Kodiak in Alaska and southward to the line of the white birch, eastward of the Rocky mts., and including the country of the Great lakes, existed the birch-bark canoe. With framework of light spruce wood, the covering or sheathing of bits of tough bark sewed together and made water-tight by means of melted pitch, these boats are interesting subjects of study, as the exigencies of ravel and portage, the quality of the material, and traditional

ideas produce different forms in different areas. Near the mouth of the Yukon, where the water is sometimes turbulent, the canoe is pointed at both ends and partly decked over. On the E. side of Canada the bow and the stern of the canoe are greatly rounded up. A curious form has been reported by travellers among the Beothuk of Newfoundland. On the Kootenay, and all over the plateaus of British Columbia and N. Washington, the Asiatic form, monitor-shaped, pointed at either end under the water, is made from pine bark instead of birch bark.

From the N. boundary of the United States, at least from the streams emptying into the St. Lawrence southward along the Atlantic slope, dugout canoes, or pirogues, were the instruments of navigation. On the Missouri r, and elsewhere a small tub-shaped craft of willow frame covered with rawhide, with no division of bow or stern, locally known as the bull-boat, was used by Sioux, Mandan, Arikara. and Hidatsa women for carrying their goods down or across the rivers. It was so light that when one was emptied a woman could take it on her back and make her way across the land. On the w. coast, from mt. St. Elias southward to Eel r., Cal., excellent digout canoes were made from giant cedar and other light woods, some of them nearly 100 ft. long. The multitude of islands off the N. coast rendered it possible for the natives to pass from one to the other, and thus they were induced to invent sea-going canoes of fine quality. Here also from tribe to tribe the forms differ somewhat as to the shape of the bow and stern and the ornamentation. On the California coast and navigable streams N. of cape Mendocino, wellmade wooden dugout canoes were used: wooden canoes, made chiefly of planks lashed together and caulked, were used in the Santa Barbara 1d. region; both were important elements in influencing the culture of the people of these sections. Everywhere else in California, barring the occasional use of corracles and rafts of logs, transportation by water was conducted by means of balsas, consisting of rushes tied in bundles, generally, if not always, with more or less approximation to a boat of cigar shape. In certain spots in California, as on Clear lake among the Pomo and Tulare lake among the Yokuts, these tule balsas were important factors in native life; elsewhere in the state much less so (Kroeber). On the lower Rio Colorado and in s. central California the Indians made immense corracle-like baskets, called by the Spaniards coritas, which were coated with bitumen or other waterproofing and used for fording the streams, laden with both passengers and merchandise.

Consult Boas, The Central Eskimo, 6th Rep. B. A. E., 1888; Coues, Garcés Diary, 1900; Hoffman, The Menomini Indians, 14th Rep. B. A. E., 1896; Murdoch, Ethnological Results of the Point Barrow-Expedition, 9th Rep. B. A. E., 1892; Nelson, The Eskimo about Bering Strait, 18th Rep. B. A. E., 1899; Niblack, The Coast Indians of Southern Alaska and Northern British Columbia, Rep. Nat. Mus., 1888; Powers in Cont. N. A. Ethnol., 11, 1877; Simms in Am. Anthrop., vi. 191, 1904; Winship in 14th Rep. B. A. E., 407, 1896.

(O. T. M.)

Bœuf. Nation du. Mentioned in the Jesuit Relation of 1662 as a tribe against which the Iroquois that year sent out an expedition. The name signifies 'Buffalo Nation,' but to what people it refers is unknown; it may have designated either the Buffalo clan or gens of some tribe or one of the buffalo-hunting tribes of the W. (J. M.)

Bogan. A marshy cove by a stream; called also bogan hole | Ganong in Proc. and Trans. Roy, Soc. Can., 209, 1896). In a letter (Apr. 8, 1903) Ganong says further: "A word very much used by guides and others who go into the New Brunswick woods is bogan, a still creek or bay branching from a stream. Exactly the same thing the Indians call a pokologan." He thinks bogan, like logan, probably the common name in Maine for the same thing, a corruption of pokologan. Both words, Ganong notes, are in good local use and occur in articles on sporting, etc.—It is possible that "bogan hole" may be a folk etymologizing of pokologan. In the Chippewa language a marsh or hog is to toquia.

(A. F. C.)

Bone-work. The use of bone and related materials, including antler, ivory, horn, whale-bone, turtle-shell, and the teeth, hoofs, beaks, and claws of many creatures, was almost universal among Indian tribes. The hardness and toughness of these materials made them desirable for many kinds of implements and utensils, and their pleasing colour and capacity for high polish caused them to be valued for personal ornaments. Since both man and beasts of various kinds have an important place in aboriginal mythology, it is to be expected that in numerous instances their bones had a special sacred significance and use, as when, for ex-

ample, the skulls and paws of small animals were used for mixing medicine.

Not uncommonly the small bones, teeth, and claws of various animals, the beaks of birds, etc., were strung as beads, were perforated or grooved to be hung as pendant ornaments or rattles, or were sewed on garments or other objects of use. These uses are illustrated in the necklaces of crab claws and the puffin beak ceremonial armlets of the Eskimo, by the beartooth necklaces of many of the tribes, by the elk-tooth embellishments of the buckskin costumes of the women among the Plains Indians, and by the small carved bone pendants attached to the edge of the garments of the ancient Beothuk (see Adorument). Teeth and small bones, such as the metacarpals of the deer, as well as worked bone discs and lozenges, were used as dice in playing games of chance and gaming sticks of many varieties were made of bone. In pre-colonial times bone had to be cut, carved, and engraved with implements of stone, such as knives, scrapers, saws, gravers, drills, and grinding stones, and with some of the tribes the primitive methods still prevail. Although indispensable to primitive tribes everywhere, this material occupies a place of exceptional importance in the far N. beyond the limits of forest growth, where the only available wood is brought oversea from distant shores by winds and currents. The Eskimo have the bones of the whale, seal, walrus, bear, wolf, moose, reindeer, musk-ox, and a wild sheep, and the antlers of the moose and deer, the horns of the sheep and ox, the teeth of the bear, wolf, and reindeer, the ivory of the walrus and narwhal, fossil ivory, the whalebone of the right-whale, and the bones of the smaller quadrupeds and various birds, and their skill in shaping them and adapting them to their needs in the rigorous Arctic environment is truly remarkable. The larger bones, as the ribs of the whale, are employed in constructing houses, eaches, and shelters: for ribs of boats, runners for sleds, and plates for armour (Nelson). Bone, ivory, and antler were utilized for bows, arrows, spears, harpoons, knives, scrapers, pieks, flintflaking implements, clubs, boxes, and a great variety of appliances and tackle employed in rigging boats, in fishing, in hunting, in transportation, in preparing the product of the chase for consumption; for weaving, netting, and sewing implements, household utensils, tobacco pipes, gaming implements, toys, dolls, fetishes, amulets, and artistic carvings of many kinds. Personal ornaments and toilet articles of bone

and kindred materials are more numerous in Alaska, where beads, pendants, hair-pins, combs, labrets, belt clasps, belt ornaments of reindeer teeth, etc., are largely made and ingeniously applied. The artistic work of these northern peoples is shown in their extremely clever carvings in ivory and their engravings of various ornamental and pictorial designs upon objects of use and ornament, but there seems to be sufficient ground for the opinion that these particular phases of their art are largely of recent development and are due to association with white men and as a result of the acquisition of metal tools and perhaps also to some extent to contact with Indian tribes which in their turn have been influenced by the whites. The wide range and vast numbers of the objects of art shaped from these materials by the Arctic peoples of the present period will be more fully appreciated by reference to the works of Boas, Murdoch, Nelson, and Turner, in the annual reports of the Bureau of American Ethnology, and by a visit to the ethnological museums.

Bone and the allied substances have been, and are, favourite materials with the tribes of the Pacific coast. The utensils, implements, ornaments, and totemic and symbolic carvings of the N. W. coast tribes are often admirable and display æsthetic appreciation of a high order (Niblack, Boas). Their carvings in bone, ivory, and antler, often inlaid with abalone, and the graceful and elaborately earved cups, ladles, and spoons of horn, are especially noteworthy. The art of the tribes of the Fraser basin and the Pacific slope 8, of Puget sd. is much more primitive, though bone was in general use for implements, utensils, musical instruments, gaming articles, and ornaments (Abbott, Goddard, Powers, Smith), great numbers being preserved in our museums. Many of the tribes of the arid region, the great divide, the Mississippi valley, and the E. still employ bone, horn, antler, and turtleshell, to a large extent, but metal has largely usurped their place, especially for implements, hence finds from village sites, cemeteries, and burial mounds must be depended on largely for knowledge of the aboriginal bone-work of these regions. The ancient Pueblos inlaid some of their implements and ornaments of bone with bits of turquoise and other bright stones (Fewkes, Pepper). Among the tribes of many sections bones of deer and the larger birds were used for flutes and whistles, and shells of turtles for rattles, and the latter were often

made also of beaks of birds and hoofs and dewclaws of deer and other animals, or by attaching these articles to parts of the costume, or to bands for the wrists and ankles. Champlain illustrates a game drive in which the drivers appear to be beating with bones upon clavicles of some large animal, and among the Plains tribes and the Pueblos a sort of saw-fiddle in which sometimes a scapula is drawn over a notched stick, or over another scapula, for keeping time in ceremonial dances, is employed. The mounds of the Mississippi and Ohio valleys and the Southern states have yielded a wide range of objects, both useful and ornamental. Of the former class, awls, fish-hooks, pins, arrow-points, cutting tools made of beaver teeth, and scraping tools are the most important. Of the latter class, beads, pendants, gorgets, pins, wristlets, etc., are worthy of note. There are also bone whistles and flutes, engraved batons, and various carvings that would seem, rather to be totemic and symbolic than simply useful or ornamental; horns of the buffalo and mountain sheep were made into dippers and cups, and were also, as were the antlers of deer, utilized in head-dresses by the ancient as well as by the present peoples. The scapulæ of large animals formed convenient hoe blades and, as such, were probably universally employed by the native agriculturists. A novel use of bones is that of plating them with copper, illustrated by the plated jawbone of a wolf obtained by Moore from a Florida mound. In the wonderful collection of objects from the Hopewell mound, near Chillicothe, Ohio, is a human femur engraved with intricate and finely executed symbolic figures (Putnam and Willoughby),

The literature of this topic is voluminous, though much scattered, and is embodied mainly in reports on field researches published by the Smithsonian Institution, the National Museum, the Bureau of American Ethnology, the Reports of the Minister of Education, Ontario, the leading museums and academies, and in works of a more general nature, such as Moorehead's Prehistoric Implements and Fowke's Archaeological History of Ohio. (W. H. H.)

Bonne Espérance. A Montagnais settlement on the islands and mainland at the mouth of Eskimo r., on the x. shore, gulf of St. Lawrence. Some Naskapi are probably there also.—Stearns, Labrador, 264, 293, 1884.

Books in Indian languages. In addition to dictionaries, versions of the Bible and the

2 GEORGE V., A. 1912

Prayer Book, whole and in part, Bible stories complete and summarized, catechisms, and eognate works, the literature translated into Indian languages embraces some interesting volumes. In Greenlandic Eskimo there is an abridged version of Stoud-Platon's Geography, by E. A. Wandall (1848); a translation of Thomas à Kempis' Imitation of Christ, by Paul Egede (1787, revised 1824); a History of the World, by C. E. Janssen (1861), and another by S. P. Kleinschmidt (1859). Peter Kragh's translations of Ingemann's Voices in the Wilderness, and The High Game, Krummacher's Parables and Feast Book, the Life of Hans Egede, and other books circulated in manuscript. In the Labrador dialect a geography, by A. F. Elsner, was published in 1880. Under the title Mahpiya ekta oicimani ya, Skv to travelling he went, Rev. S. R. Riggs published in 1857 a translation of Bunyan's Pilgrim's Progress into the Dakota language of the Siouan stock. This same book was translated into Cree by Archbishop Vincent (1886). and into Cheyenne by Rev, R. Petter (1904). In 1879 Rev. D. W. Hemans published a Santee version of Rev. R. Newton's The King's Highway. Into the Massachuset dialect of the Algonquian stock Rev. John Eliot translated in 1664 Baxter's Call to the Unconverted, in 1665 Bayly's Practice of Piety, about 1687 the Rev. W. Perkins' Six Principles of Religion, and in 1689 Shepard's Sincere Convert. A Geography for Beginners was published in Chippewa in 1840, and in Santee Dakota in 1876. In 1839 the Rev. C. A. Goodrich's Child's Book of the Creation was translated into Choctaw by the Rev. L. S. Williams. The civilized tribes of Oklahoma, with the aid of the Cherokee and adapted alphabets, have published many laws, text-books, etc., in the native languages.

Exclusive of occasional texts, more or less brief, in native languages, to be found in the periodical literature of anthropology, in ethnogeical and linguistic monographs, books of gravel and description, etc., there is accumulating a considerable literature of texts by accredited men of science and other competent observers. The Chimmesyan stock is represented by Boas' Tsimshian Texts (Bull. 27, B. A. E., 1902); the Chimookan by Boas' Chimook Texts (Bull. 20, B. A. E., 1904), and Kathlamet Texts (Bull. 26, 1901); the Salishan by Teit and Boas' Traditions of the Thompson River Indians (IS98); the Wakashan (Kwaki-

utl-Nootka) by Boas and Hunt's Kwakiutl Texts (Mem. Am. Mus. Nat. Hist., 1902-05); the Skittagetan by Swanton's Haida Texts (Bull. 29, B. A. E., 1905); the Athapascan by Goddard's Hupa Texts (Publ. Univ. Cal., Am. Archaed and Ethnol., 1, 1901, and his Morphology of the Hupa Language (1905) perhaps belongs here also, likewise Matthew's Navaho Legends (1897) and The Night Chant (1902); the Siouan by Riggs' Dakota Grammar, Texts, and Ethnography (Cont. N. A. Ethnol., IX, 1893), Dorsey's Cegiha Language (Cont. N. A. Ethnol., vi, 1890), Omaha and Ponka Letters (Bull. 11, B. A. E., 1891), and Osage Traditions (6th Rep. B. A. E., 1888); the Iroquoian by Mooney's Sacred Formulas of the Cherokee (7th Rep. B. A. E., 1891), Hewitt's Iroquoian Cosmology (21st Rep. B. A. E., 1903), and Hale's Iroquois Book of Rites (1883)—the second records cosmologic myths, the last the great national ritual of the northern Iroquois. The Algonquian is represented by scattered texts rather than by books, although there are to be mentioned Brinton's Lenape and Their Legends (1885), which contains the text of the Walum Olum, and the Cree and Siksika Legends in Petitot's Traditions Indiennes du Canada Nord-ouest (1887), the seattered texts in the works of Schooleraft, Hoffman, etc.; the Eskimo best by the texts in Boas' Eskimo of Baffin Land and Hudson Bay (Bull. Am. Mns. Nat. Hist., xv, 1901), and other writings on the Eskimo, Thalbitzer's Phonetical Study of the Eskimo Language (1904), and Barnum's Grammatical Fundamentals of the Innuit Language (1901), the last relating to the Tununa dialect of Alaska. The monographs of Miss Alice C. Fletcher on the ceremonies of the Pawnee (22d Rep. B. A. E., 1903), of James Mooney on the Ghost Dance Religion (14th Rep. B. A. E., 1896), the numerous monographs of Dr. Franz Boas on the Bellacoola, the Kwakiutl, etc., contain much textual material. The manuscript collection of the Bureau of American Ethnology is rich in texts of myths, legends, etc. As a whole, the body of linguistic material, here briefly noticed, is of increasing magnitude and value. The literature in the Chinook jargon also furnishes some titles, e. g., the stenographic periodical Kamloops Wawa, by Father Le Jeune, who is also the author of several pamphlets. Worthy of mention is Rev. Myron Eells' Hymns in the Chinook Jargon Language (1878–89), which is not merely a translation of English verse. (A. F. C.)

Boothroyd. A body of Ntlakyapamuk Indians of Salishan stock on Fraser r., Brit. Col. The name seems to have been employed to include the towns of Spaim. Kimus, Tzaumuk, Suk, and Nkattsim. Pop. 158 in 1911 (Can. Ind. Aff. for 1911, 224).

Boulder outlines. Certain outline surface figures, probably of Sionan origin, usually formed of boulders a foot or less in diameter, though a few consisted of buffalo bones. The name "boulder mosaics" was first applied to them by Todd. According to Lewis, structures of this type have been found from w. Iowa and Nebraska to Manitoba, and from w. Minnesota through North and South Dakota to Montana; but they appear to be, or rather to have been, more frequent in South Dakota than in any other section. These remains consist of animal, human, and other figures outlined upon the surface of the ground, usually on elevated sites, the human, turtle, and serpent figures being by far the most numerous. In Dakota the outlines are generally accompanied with small stone circles, known to be old tipi sites In some instances long lines of boulders or buffalo bones and small stone cairns have been found associated with them or occurring in immediate neighbourhood. Like the boulder circles these are more or less embedded in the ground, but this does not necessarily indicate great antiquity; indeed, their frequent association with tipi circles seems to denote that they are comparatively recent. Among the Crows of Montana a boulder outline figure is made in the form of a woman to commemorate the unfaithfulness of a wife.

Consult Lewis in Am. Anthrop., II, Apr., 1889, III, July, 1890; Simms, ibid., n. s., v, 374, 1903; Thomas in 12th Rep. B. A. E., 534, 1894; Todd in Am. Naturalist, Jan., 1884.

(c. T.)

Bouscoutton. The northernmost division of the Cree, living in 1658-71 about the s. shores of Hudson bay. According to Dr. William Jones the Chippewa refer to the northernmost dwelling place of the Cree as Ininiwitōskwūning, 'at the man's elbow,' and Antāwāt-otōskwūning, 'they dwell at the elbow,' This āntāwāt is probably the term usually prefixed, in one form or another, to the name Bouscoutton.

Ataouabouscatouek.—Jes Rel., 1658, 21, 1858 Outaouoisbouscottous.—Tailhan, Perrot, 293, note, 1864. Outaouois, Bouscouttous.—Prise de possession (1671) in Margry, Déc., 1, 97, 1875 (comma evidently inserted by mistake.)

Bowls. With the Indian the bowl serves a multitude of purposes: it is associated with the supply of his simplest needs as well as with his religion. The materials employed in making bowls are stone, especially soapstone, horn, bone, shell, skin, wood, and bark. Bowls are often adapted natural forms, as shells, gourds. and concretions, either unmodified or more or less fully remodelled; and basket bowls are used by many tribes. The use of bowls in the preparation and serving of food is treated under Dishes (q. v.). Bowls are also used in primitive agriculture for gathering, winnowing, drying, and roasting seeds, and in connection with milling. With many tribes bowls are made from large knots, being hollowed out with fire and the knife.

The most ancient permanent cooking utensil of the Plains tribes was a bowl made by hollowing out a stone. The Blackfeet and Chevenne say that in very early times they boiled their meat in bowls made of some kind of soft stone. The Omaha and others had excellent wooden bowls, the standard of beauty being symmetry of outline and the grain of the gnarled roots from which they were made. Among many Indians bowls were used in games of chance and divination. In certain ceremonies of the Wahpeton and Sisseton Sioux and of other tribes a game was played with plum-stone dice thrown from a wooden bowl, in the making of which great skill and care were exercised. In some cases the kind of wood was prescribed. Bowls that had been long in use for these games acquired a polish and colour unattainable by art, and were prized as tribal possessions. The Micmae accorded supernatural powers to certain of their bowls. and thought that water standing over night in gaming bowls would reveal by its appearance past, present, and future events. Some bowls were supposed to have mysterious powers which would affect the person eating or drinking from them. Bowls and trays of basketry were used by the Sioux, Chevenne, Arapaho, and other Plains tribes, though not by the Siksika, in the familiar seed game. These appear to be the only baskets made by these tribes (Grinnell).

Bows. See Arrows.

Boxes and Chests. The distribution of tribes using boxes and chests illustrates in a striking manner the effect of environment on arts and customs. Thus woodland tribes

made boxes of suitable timber, and the culmination of their manufacture is found among the tribes of the N. W. coast. The Eskimo had a great variety of small boxes of bone, wood, whalebone, and ivory, and displayed extraordinary skill and inventiveness in their manufacture. This was in large measure due to their damp and freezing environment, in which, though wood was scarce, boxes were better than pouches for keeping the contents dry. It appears that to the introduction of tobacco, percussion caps, and powder is due the great number of small boxes manufactured by the Eskimo, although they had previously many boxes for trinkets, lanceheads, tinder, etc. Eskimo boxes are provided with cords for fastening them to the person to prevent loss in the snow. Boxes and chests, being difficult of transportation even on water, must be looked for chiefly among sedentary tribes living in a wooded country. Tribes that moved freely about stored and transported their goods in bags, rawhide cases, and basket wallets. Boxes and chests of wood are practically unknown among the Plains tribes, which had abundant skins of large animals out of which to make receptacles for their possessions, and the horse and the dog as pack and draught animals. Some of the Plains tribes, however, made box-like eases or trunks of rawhide similar in shape to the birch-bark boxes of the eastern tribes, and the Sioux made plume boxes of wood. Objects and materials that could be injured by crushing or by dampness usually required a box, the most widespread use of which was for the storing of feathers. The Plains tribes and some others made parfleches, or cases of rawhide, almost as rigid as a wooden box, for head-dresses, arrows, ete.; the Pima, Papago, and Mohave made basket cases for feathers; and the Pueblos employed a box, usually exeavated from a single piece of cottonwood, solely for holding the feathers used in ceremonies. The Yurok of California made a cylindrical wooden box in two sections for storing valuables. The eastern woodland tribes made boxes of birch bark. The N. W. coast tribes as far s. as Washington made large chests of wood for storing food, clothing, etc.; for cooking, for ripening salmon eggs, for the interment of the dead, for drums and other uses, and these were usually decorated with carving or painting, or both. These tribes also made long boxes as quivers for arrows, but smaller boxes were not so common among them as among the Eskimo

Bridge River Indians. A band of Upper Lillooet occupying the village of Kanlax, on Bridge r., which flows into the upper Fraser above Lillooet, Brit. Col.; pop. 94 in 1911.—Can. Ind. Aff., pt. 11, 18, 1911.

Buffalo. Remains of the early species of the bison are found from Alaska to Georgia, but the range of the present type (Bison americanus) was chiefly between the Rocky and Allegheny mts. While traces of the buffalo have been found as far E. as Cavetown, Md. and there is documentary evidence that the animal ranged almost if not quite to the Georgia coast—the lack of remains in the shell-heaps of the Atlantic shore seems to indicate its absence generally from that region, although it was not unknown to some of the tribes living on the rivers. The first authentic knowledge of the bison or buffalo by a European was that gained about 1530 by Alvar Nuñez Cabeza de Vaca, who described the animal living in freedom on the plains of Texas. At that time the herds ranged from below the Rio Grande in Mexico N. w. through what is now E. New Mexico, Utah, Oregon, Washington, and British Columbia; thence crossing the mountains to Great Slave lake they roamed the valleys of Saskatchewan and Red rs., keeping to the w. of I. Winnipeg and I. Superior and s. of I. Michigan and I. Eric to the vicinity of Niagara; there turning southward to w. Pennsylvania and crossing the Alleghenies they spread over the w. portion of Maryland, Virginia, North Carolina, South Carolina, Georgia, and x. Mississippi and Louisiana. All the tribes within this range depended largely on the buffalo for food and clothing, and this dependence, with the influence of the habits of the animal, profoundly affected tribal customs and religious rites. This is more clearly seen in the tribes w. of the Mississippi, where the people were in constant contact with the bulfalo during the summer and winter migrations of the great northern and southern herds. These

great herds were composed of innumerable smaller ones of a few thousand each, for the buffalo was never solitary except by accident. This habit affected the manner of hunting and led to the organization of hunting parties under a leader and to the establishment of rules to insure an equal chance to every member of the party.

Early writers say that among the tribes E. of the Misseuri the hunting party, dividing into four parts, closed the selected herd in a square, then, firing the prairie grass, pressed in upon the herd, which, being hedged by flame, was slaughtered. The accuracy of this statement is questioned by Indians, for, they say, the only time the grass would burn well was in the autumn, and at that time the animal was hunted for the pelt as much as for foed, and fire would injure the fur. Fire was sometimes used in the autumn to drive the deer from the prairie into the woods.

In the N, pens were built of tree trunks lashed together and braced on the outside, into which the herds were driven and there killed. Sometimes, as on the upper Mississippi, a hunter disguised in a buffalo skin acted as a decoy, leading the herd to a precipice where many were killed by the headlong plunge. Upon the plains of Kansas and Nebraska the hunters formed a circle around the herd and then, rushing in, shot the animals with arrows.

The annual summer hunting party generally consisted of the entire tribe. As the main supply of meat and pelts was to be obtained. religious rites were observed throughout the time. "Still hunting" was forbidden under penalty of flogging, and if a man slipped away to hunt for himself, thereby scattering a herd and causing loss to the tribe, he was punished, sometimes even to death. These severe regulations were in force during the tribal or ceremonial hunt. This hunt occurred in June, July, and August, when the animals were fat and the hair thin, the flesh being then in the best condition for food and the pelts easiest to dress on both sides for the making of clothing, shields, packs, bags, ropes, snowshoes, tent and boat covers. The meat was cut into thin sheets and strips and hung upon a framework of poles to dry in the sun. When fully "jerked" it was folded up and put into parfieche packs to keep for winter use. A cow was estimated to yield about 45 pounds of dried meat and 50 pounds of pemmican, besides the marrow, which was preserved in bladder skins, and the tallow, which was poured into skin bags. The sinew of the animal furnished bowstrings, thread for sewing, and fibre for ropes. The horns were made into spoons and drinking vessels, and the tips were used for cupping purposes; the buffalo horn was also worn as insignia of office. The hair of the buffalo was woven into reatas, belts, and personal ornaments. The dried droppings of the animal, known among plainsmen as "buffalo chips," were valuable as fuel.

Tribal regulations controlled the cutting up of the animal and the distribution of the parts. The skin and certain parts of the carcass belonged to the man who had slain the buffalo; the remainder was divided according to fixed rules among the helpers, which afforded an opportunity to the poor and disabled to procure food. Butchering was generally done by men on the field, each man's portion being taken to his tent and given to the women as their property.

The buffalo was hunted in the winter by small, independent but organized parties, not subject to the ceremonial exactions of the tribal hunt. The pelts secured at this time were for bedding and for garments of extra weight and warmth. The texture of the buffalo hide did not admit of fine dressing, hence was used for coarse clothing, moccasins, tent covers, parfleche cases, and other articles. The hide of the heifer killed in the fall or early winter made the finest robe.

The buffalo was supposed to be the instructor of doctors who dealt with the treatment of wounds, teaching them in dreams where to find healing plants and the manner of their use. The multifarious benefits derived from the animal brought the buffalo into close touch with the people: It figured as a gentile totenr, its appearance and movements were referred to in gentile names, its habits gave designations to the months, and it became the symbol of the leader and the type of long life and plenty; ceremonies were held in its honour, myths recounted its creation, and its folk tales delighted old and young. The practical extinction of the buffalo with the last quarter of the 19th century gave a deathblow to the ancient culture of the tribes living within its range.

Consult Allen in Mem. Geol .Survey of Kentucky, I, pt. II, 1876; Chittenden, Fur Trade, 1902; Hornaday in Rep. Nat. Mus. 1887, 1889; Relation of Alvar Nuñez Cabeca de Vaca, B. Smith trans., 1871; Winship Coronado Expedition, 14th Rep. B. A. E ⁴ 1896. (A. C. F.)

Bullroarer. An instrument for producing rhythmic sound, consisting of a narrow, usually rectangular slat of wood, from about 6 in. to 2 ft. long and 2 in. to 2 in, wide, suspended by one end to a cord, the latter often being provided with a wooden handle. The bullroarer, which is often painted with symbolic designs, is whirled rapidly with a uniform motion about the head, and the pulsation of the air against the slat gives a characteristic whizzing or roaring sound. The instrument has also been called whizzer, whizzing stick, lightning stick, and rhombus, and its use was quite general. In North America it has been found among the Eskimo, Kwakiutl, Arapaho, and most western tribes, including the Navaho, Apache, Ute, the central Californian tribes (where, among the Pomo, it is nearly 2 ft. long), Pueblos, and in the ancient cliff-dwellings.

* * * * * The bullroarer is a sacred implement, associated with rain, wind, and lightning, and among the Kwakiutl, according to Boas, with ghosts. By some tribes it retains this sacred character, but among others it has degenerated into a child's toy, for which use its European antitype also survives among civilized nations.

E., 1897; Haddon, Study of Man, 219, 1898; Lang, Custom and Myth, 39, 1885; Mooney, Ghost Dance Religion, 14th Rep. B. A. E., 1896; Murdock in 9th Rep. B. A. E., 1892; Schmeltz in Verh. d. Vereins f. naturw. Unterhaltung zu Hamburg, 1x, 92, 1896. (W. H.)

Burrard Inlet No. 3 Reserve. The name given by the Can. Dept. of Indian Affairs to one of 6 divisions of the Squawmish, q. v.; pop. 39 in 1911.

Burrard Saw Mills Indians. The local name for a body of Squawmish of Fraser River agency, Brit. Col.; noted only in 1884, when their number was given as 232.—Can. Ind. Aff., 187, 1884.

Businausee ('echo maker,' from $b\bar{u}swawag$, 'echo,' referring to the $achich\bar{u}k$, erane). A phratry of the Chippewa.

Bus-in-as-see.—Warren in Minn, Hist, Soc. Coll., v, 46, 1885. Bus-in-aus-e, -1bid, 44. Bus-in-aus-e-wug.—1bid, 88 plurah.

Cabbasagunti. A small body of Indians dwelling in 1807 in the village of "Saint-Francais," on St. Francis r., Quebec, in which they

were named Cabbassaguntiac, i. e., 'people of Cabassaguntiquoke, signifying the place where sturgeon abound,' The form Cobbisseconteag has been replaced by the modern Cobbosseccontee as the name of what formerly was Winthrop pond and outlet which flows into Kennebee r., in Kennebee co., Me. These Indians it is reported, by Kendall, regarded themselves not only as inhabitants of Cabbassaguntiquoke, but also as true cabassas, or sturgeons, because one of their ancestors, having declared that he was a sturgeon, leaped into this stream and never returned in human form. They related a tale that below the falls of Cobbosseecontce r, the rock was hewn by the ax of a mighty manito. (л. к. в. н.)

Cabbassaguntiac.—Kendall, Travels, 111, 124, 1809, Cabbassaguntiquoke.—Ibid, otheir former place of settlement).

Cahiague. A Huron village in Ontario, where the Jesuits had the mission of St. John the Baptist in 1640.

Cahiagué.—Champlain (1615), Œuvres, rv. 29, 1870. S. Iean Baptiste.—Jes. Rel. for 1640, 90, 1858.

Calendar. Although the methods of computing time had been earried to an advanced stage among the cultured tribes of Mexico and Central America, the Indians N. of Mexi o had not brought them beyond the simplest stage. The alternation of day and night and the changes of the moon and the seasons formed the bases of their systems. The budding, blooming, leafing, and fruiting of vegetation, the springing forth, growth, and decay of annuals, and the moulting, migration, pairing, etc., of animals and birds were used to denote the progress of the seasons. The divisions of the day differed, many tribes recognizing 4 diurnal periods—the rising and setting of the sun, noon, and midnight—while full days were usually counted as so many nights or sleeps. The years were generally reckoned, especially in the far N., as so many winters or so many snows; but in the Gulf states, where snow is rare and the heat of summer the dominant feature, the term for year had some reference to this season or to the heat of the sun. As a rule the four seasons—spring, summer, autumn, and winter-were recognized and specific names applied to them, but the natural phenomena by which they were determined, and from which their names were derived, varied according to latitude and environment, and as to whether the tribe was in the agricultural or the hunter state. Some authorities

state that the Indians of Virginia divided the year into five seasons: (1) The budding of spring: (2) the earing of corn, or roasting-ear time: (3) summer, or highest sun; (4 corngathering, or fall of the leaf; and (5) winter (cohonk). According to Mooney the Cherokee and most of the southeastern tribes also divided the year into five seasons. Swanton and Boas state that some of the tribes of the N. W. coast divided the year into two equal parts, with 6 menths or moons to each part, the summer period extending from April to September, the winter period from October to March. Many tribes began the year with the vernal equinox: others began it in the fall, the Kiowa about Oct. I, the Hepi with the "new fire" in November, the Takulli in January, etc. The most important time division to the Indians x. of Mexico was the moon, or month, their count of this period beginning with the new moon. So far as can be ascertained, it was not universal in the past to correlate the moons with the year; where correlation was attempted, in order that the moons should bear a fixed relation to the seasons, 12 was the number usually reckoned; but some of the tribes, as those of New England, the Cree, and some others counted 13. The Kiowa system, although counting 12 moons to the year, presents the peculiarity of half a moon in one of the unequal four seasons, and the other half in the following season, thus beginning the year with the last half of a moon. Among the Zuñi half the months are "nameless," the other half "named." The year is called a "passage of time," the seasons the "steps" of the year, and the months "crescents," probably because each begins with a new moon. The new year is termed "midjourney of the sun," i. e., the middle of the solar trip between one summer solstice and another, and occurring about the 19th of December usually initiates a short season of great religious activity. The first six months have definite and appropriate names, the others, while called the "nameless" months, are designated, in ritualistic speech, Yellow, Blue, Red, White, Variegated, and Black, after the colours of the prayer-sticks sacrificed in rotation at the full of each moon to the gods of the north. west, south, east, zenith, and nadir, respectively represented by those colours Cushing in Millstone, IX, 58, Apr. 1884). There appears to have been an attempt on the part of some tribes to compensate for the surplus days in the solar year. Carver (Trav., 160, 1796), speaking of the Sioux or the Chippewa, says that when

thirty moons have waned they add a supernumerary one, which they term the lost moon. The Haida formerly intercalated what they called a "between month," because between the two periods into which they divided the year, and it is likely that this was sometimes omitted to correct the calendar Swanton in Am. Anthrop., v. 331, 1903). The Creeks counted 1210 moons to the year, adding a moon at the end of every second year, half counted in the preceding and half in the following year, somewhat as did the Kiowa. The Indians generally calculated their ages by some remarkable event or phenomenon which had taken place within their remembrance: but few Indians of mature years could possibly tell their age before learning the white man's way of counting time. Sticks were sometimes notched by the Indians as an aid in time counts. The oldest of these among the Pima (Russell in Am. Anthrop., v. 76, 1903; dates from the meteoric shower of 1833, a notable tally date in Indian time reckoning. Some of the northern tribes kept records of events by means of symbolic figures or pictographs. One of these is an extended calendar history, called the "Lone-dog winter count," said to have been painted originally on a buffalo robe, found among the Dakota, the figures of which cover a period of 71 years from 1800 (Mallery in 10th Rep. B. A. E.). Another series is the calendar history of the Kiowa, described by Mooney in 17th Rep. B. A. E.

Calumet. Norman-French form of literary French chalumet, a parallel of chalumeau for chalemeau, Old French chalemel, Provençal caramel, a tube, pipe, reed, flute, especially a shepherd's pipe; Spanish caramillo, a flute; English, shawm: Low Latin, calamellus, diminutive of Latin calamus, reed). Either one of 2 highly symbolic shafts of reed or wood about 2 in. broad, 14 in. thick, and 18 in. to 4 ft. long, the one representing the male, the other the female shaft, usually perforated for a pathway for the breath or spirit, painted with diverse symbolic colours and adorned with various symbolic objects, and which may, or may not, have a pipe bowl to contain tobacco for making a sacred offering of its benevolent smoke to the gods. In modern usage the term usually includes the pipe. Its colouring and degree of adornment varied somewhat from tribe to tribe and were largely governed by the occasion for which the calumet was used. From the meagre descriptions of the calumet

and its uses it would seem that it has a ceremonially symbolic history independent of that of the pipe; and that when the pipe became an altar, by its employment for burning sacrificial tobacco to the gods, convenience and convention united the already highly symbolic calumet shafts and the sacrificial tobacco altar, the pipe-bowl; hence it became one of the most profoundly sacred objects known to the Indians of northern America. As the colours and the other adornments on the shaft represent symbolically various dominant gods of the Indian polytheon, it follows that the symbolism of the calumet and pipe represented a veritable executive council of the gods. Moreover, in some of the elaborate ceremonies in which it was necessary to portray this symbolism the employment of the two shafts became necessary, because the one with its colours and accessory adornments represented the procreative male power and his aids, and was denominated the male, the fatherhood of nature; and the other with its colours and necessary adornments represented the reproductive female power and her aids, and was denominated the female, the motherhood of nature.

The calumet was employed by ambassadors and travellers as a passport; it was used in ceremonies designed to conciliate foreign and hostile nations and to conclude lasting peace; to ratify the alliance of friendly tribes; to secure favourable weather for journeys; to bring needed rain; and to attest contracts and treatics which could not be violated without incurring the wrath of the gods. The use of the calumet was inculcated by religious precept and example. A chant and a dance have become known as the chant and the dance of the calumet; together they were employed as an invocation to one or more of the gods. By naming in the chant the souls of those against whom war must be waged, such persons were doomed to die at the hands of the person so naming them. The dance and the chant were rather in honour of the calumet than with the calumet. To smoke it was prohibited to a man whose wife was with child, lest be perish and she die in childbirth. The calumet was employed also in banishing evil and for obtaining good. Some, in order to obtain favour of the gods, sacrificed some animals in spirit to them, and, as the visible food was not consumed visibly by the gods, they atc the food and chanted and danced for the calumet.

The following description of the calumet by Hennepin may be given: "The quill, which is commonly two foot and a half long, is made of a pretty strong reed or cane, adorned with feathers of all colours, interlaced with locks of women's hair. They tie to it two wings of the most curious birds they find, which makes their calumet not much unlike Mercury's wand, or that staff ambassadors did formerly carry when they went to treat of peace. They sheath that reed into the neck of birds they call huars floons), which are as big as our geese and spotted with black and white; or else of a sort of ducks who make their nests upon trees, though water be their natural element, and whose feathers are of many different colours. However, every nation adorns the calumet as they think fit, according to their own genius and the birds they have in their own country."

From Charlevoix (1721) it is learned that the calumet is strictly the stem or shaft of what is commonly called the calumet pipe; that in those designed for public ceremonial purposes this shaft is very long, and "is of light wood, painted with different colours, and adorned with the heads, tails, wings, and feathers of the most beautiful birds," which he believed were "only for ornament" rather than for symbolic expression: that among those nations among which the calumet is in use it is as sacred as are the wampum belts and strands among the nations among whom these things are in use; that Pawnce tradition asserts that the calumet is a gift from the sun; that the calumet is in use more among the southern and western nations than among the eastern and northern, and it is more frequently employed for peace than for war. He says that if the calumet is offered and accepted it is the custom to smoke in the calumet, and the engagements contracted are held sacred and inviolable, in just so far as such human things are inviolable. Perrot also says that the Indians believe that the sun gave the calumet to the Pawnee. The Indians profess that the violation of such an engagement never escapes just pnnishment. In the heat of battle, if an adversary offer the calumet to his opponent and he accept it, the weapons on both sides are at once laid down; but to accept or to refuse the offer of the calumet is optional. There are calumets for various kinds of public engagements, and when such bargains are made an exchange of calumets is usual, in this manner rendering the contract or bargain sacred.

When war is contemplated, not only the shaft but the feathers with which it is dressed are coloured red, but the feathers only on one side may be red, and it is claimed that from the disposition of the feathers in some instances it is possible to know to what nation the calumet is to be presented. By smoking together in the calumet the contracting parties intend to invoke the sun and the other gods as witnesses to the mutual obligations assumed by the parties, and as a guarantee the one to the other that they shall be fulfilled. This is accomplished by blowing the smoke toward the sky, the four world-quarters, and the earth, with a suitable invocation. The size and ornaments of the calumets which are presented to persons of distinction on occasions of moment are suited to the requirements of the case. When the calumet is designed to be employed in a treaty of alliance against a third tribe, a serpent may be painted on the shaft, and perhaps some other device indicating the motive of the alliance.

There were calamets for commerce and trade and for other social and political purposes; but the most important were those designed for war and those for peace and brotherhood. It was vitally necessary, however, that they should be distinguishable at once, lest through ignorance and inattention one should become the victim of treachery. The Indians in general chose not or dared not to violate openly the faith attested by the calumet, and sought to deceive an intended victim by the use of a false calumet of peace in an endeavor to make the victim in some measure responsible for the consequences. On one occasion a band of Sioux, seeking to destroy some Indians and their protectors, a French officer and his men, presented, in the guise of friendship, 12 calumets, apparently of peace: but the officer, who was versed in such matters and whose suspicion was aroused by the number offered, consulted an astute Indian attached to his force, who caused him to see that among the 12 one of the calumet shafts was not matted with hair like the others, and that on the shaft was graven the figure of a viper, coiled around it. The officer was made to understand that this was the sign of covert treachery, thus frustrating the intended Sioux plot.

The use of the calumet, sometimes called "peace-pipe" and "war pipe," was widespread in the Mississippi valley generally. It has been found among the Potawatomi, Cheyenne, Shoshoni, Pawnee Loups, Piegan, Santee, Yankto-

nais, Sihasapa, Kansa, Siksika, Crows, Cree, Skitswish, Nez Percés, Illinois, Chickasaw, Choctaw, Chitimacha, Chippewa, Winnebago, and Natchez. In the Ohio and St. Lawrence valleys and southward its use is not so definitely shown.

Camas. Any species of plant belonging to the genus Quamasia (Camassia of some later authors), especially Quamasia quamash; also the edible bulb of these plants. Camas is usually blue-flowered and in other respects also much resembles the hyacinth, to which it is botanically related. It is sometimes called wild hyacinth, and in Canadian French, but improperly, pomnæ blanche and pomme des prairies. The bulbs, which were a staple food of several x, w, coast tribes, and are still much used, are prepared for food by prolonged steaming. Camas is found from w. Washington and Oregon to N. California and British Columbia, and eastward to the northern Rocky mts. It was most extensively utilized in the valleys of the upper Columbia r. watershed. The word, spelled also camass, quamash, kamass, quamish, and in other ways, came into English through the Chinook jargon. Its ultimate source is chamas, signifying 'sweet' in the Nootka language of Vancouver id. The camas prairies of the w. slopes of the Rocky mts, were long famous. From its habit of feeding on this root the camas rat received its name. From camas have also been named villages in Fremont co., Idaho; Missoula co., Mont.; and Clarke co., Wash.; likewise a Camas valley in Douglas co., Oreg., and a town, Kamas, in Summit co., Utah. The Latin name of the plant also preserves the Indian appellation.

(A. F. C. F. V. C.)

Camping and Camp circles. Each North American tribe claimed a certain locality as its habitat and dwelt in communities or villages about which stretched its lunting grounds. As all the inland people depended for food largely on the gathering of acorns, seeds, and roots, the catching of salmon when ascending the streams, or on hunting for meat and skin clothing, they camped in makeshift shelters or portable dwellings during a considerable part of the year. These dwellings were brush shelters, the mat house and birch-bark lodge of the forest tribes, and the skin tent of the plains. The rush mats of different sizes, woven by the women, were rolled into a long bundle when a party was travelling. The oblong frame was made of saplings tied together with bark fibre. The longest and widest mats were fastened outside the frame to form the walls, and smaller ones were overlapped to make a rain-proof roof, an opening being left in the middle for the escape of the smoke from the central fire. For the skin tent, 10 to 20 poles were cut and trimmed by the men and preserved from year to year. To tan, cut, fit, and sew the skin cover and to set up the tent was the special work of women. Dogs formerly transported the long tent poles by means of travois, but, in later years, they were dragged by ponies.

Hunting, visiting or war parties were more or less organized. The leader was generally the head of a family or of a kindred group, or he was appointed to his office with certain ceremonies. He decided the length of a day's journey and where the camp should be made at night. As all property, save a man's personal clothing, weapons, and riding horses, belonged to the woman, its care during a journey fell upon her. On the tribal hunt the old men, the women and ehildren, and the laden ponies formed the body of the slowly moving procession, protected on either side by the warriors, who walked or rode, encumbered only by their weapons. The details of the camp were controlled by the women, except with war parties, when men did the work.

When a camping place was reached the mat houses were erected as most convenient for the family group, but the skin tents were set up in a circle, near of kin being neighbours. If danger from enemies was apprehended, the ponies and other valuable possessions were kept within the space inclosed by the circle of tents. Long journeys were frequently undertaken for friendly visits or for inter-tribal ceremonies. When travelling and camping the people kept well together under their leader, but when near their destination, the party halted and dispatched one or two young men in gala dress with the little packet of tobacco to apprise the leading men of the village of their approach. While the messengers were gone the prairie

became a vast dressing room, and men, women, and children shook off the dust of travely painted their faces, and donned their best garments to be ready to receive the escort which was always sent to welcome the guests.

When the tribes of the buffalo country went on their annual hunt, ceremonies attended every stage, from the initial rites, when the leader was chosen, throughout the journeyings, to the thanksgiving ceremony which closed the expedition. The long procession was escorted by warriors selected by the leader and the chiefs for their trustiness and valour. They acted as a police guard to prevent any straggling that might result in personal or tribal danger, and they prevented any private hunting, as it might stampede a herd that might be in the vicinity. When on the annual hunt the tribe camped in a circle and preserved its political divisions, and the circle was often a quarter of a mile or more in diameter. Sometimes the camp was in concentric circles, each circle representing a political group of kindred, The Dakota call themselves the "seven council fires," and say that they formerly camped in two divisions or groups, one composed of 4 and the other of 3 concentric circles. The Omaha and close cognates, when on the annual buffalo hunt and during the great tribal ceremonies camped in a circle. Each of the 10 Omaha gentes had its unchangeable place in the line. The women of each gens knew where their tents belonged, and when a camping ground was reached each drove her ponies to the proper place, so that when the tents of the tribe were all up each gens was in the position to which it was entitled by the regulations that were connected with ancient beliefs and customs. For particular ceremonies, especially the great annual sun dance (q. v.), the Kiowa, Cheyenne, and others camped in a circle made up of the different political divisions in fixed and regular order.

The tribal circle, each segment composed of a clan, gens, or band, made a living picture of tribal organization and responsibilities. It impressed upon the beholder the relative position of kinship groups and their interdependence, both for the maintenance of order and government within and for defense against enemies from without, while the opening to the E. and the position of the ceremonial tents recalled the religious rites and obligations by which the many parts were held together in a compact whole.

Canada. (Huron: kanāda, 'village,' 'settlement.'-Cartier). A term used to designate all the Indians of Canada, and also by early writers in a more restricted sense. Cartier designates the chief of Stadaconé (Quebec) as the king of Canada, and applies the nams Canada to the country immediately adjacent. His vocabularies indicate an Iroquoian (Huron) people living there. The early French writers used the term Canadiens to designate the Algonquian tribes on or near the St. Lawrence, especially the Naskapi and the Montagnais tribes below the Saguenay, as distinguished from the Algonkin and Micmac. The New England writers sometimes designated as Canada Indians those Abnaki who had removed from Maine to St. Francis and Bécancour.

Cannibalism. In one form or another cannibalism has been practised among probably all peoples at some period of their tribal life. In America there are numerous recorded references to its occurrence within historic. times among the Brazilians, Carib of northern South America, the Aztec and other Mexican tribes, and among many of the Indians N. of Mexico. The word itself, now more commonly used than the older term anthropophagy, is derived from Carib through Spanish corruption. Restricting treatment of the subject to the tribes N. of Mexico, many evidences of cannibalism in some form are found—from the ingestion, perhaps obligatory, of small quantities of human flesh, blood, brain, or marrow, as a matter of ceremony, to the consumption of such parts for food under stress of hunger, or even as a matter of taste. Among the tribes which practised it, in one or another of these forms, may be mentioned the Montagnais, and some of the tribes of Maine; the Algonkin, Armouchiquois, Miemac, and Iroquois; farther w. the Assiniboin, Cree, Foxes, Miami, Ottawa, Chippewa, Illinois, Kickapoo, Sioux, and Winnebago; in the s. the people who built the mounds in Florida (see Calusa), and the Tonkawa, Attacapa, Karankawa, Kiowa, Caddo,

and Comanche(?); in the N. W. and W. portions of the continent, the Thlingchadinneh and other Athapascan tribes, the Tlingit, Heiltsuk, Kwakiutl, Tsimshian, Nootka, Siksika, some of the Californian tribes, and the Ute. There is also a tradition of the practice among the Hopi, and allusions to the custom among other tribes of Arizona and New Mexico. The Mohawk, and the Attacapa, Tonkawa, and other Texas tribes were known to their neighbours as "man-eaters."

Taking all the evidence into consideration, it appears that cannibalism N. of the Mexican boundary existed in two chief forms. One of these was accidental, from necessity as a result of famine, and has been witnessed among the Huron, Micmac, Chippewa, Etcharcottine, and others. In most of such instances recourse was had to the bodies of those who had recently died, but cases are recorded in which individuals were killed to satisfy hunger. The second and prevalent form of cannibalism was a part of war custom and was based principally on the belief that bravery and other desirable qualities of an enemy would pass, through actual ingetion of a part of his body, into that of the consumer. Such qualities were supposed to have their special seat in the heart, hence this organ was chiefly sought, though blood, brain, marrow, and flesh were in many instances also swallowed. The parts were eaten either raw or cooked. The heart belonged usually to the warriors, but other parts were oceasionally consumed by boys or even by women and children. In some cases a small portion of the heart or of some other part of an enemy might be eaten in order to free the eater from some tabu (Grinnell). The idea of eating any other human being than a brave enemy was to most Indians repulsive. One of the means of torture among the Indians of Canada and New York was the forcing of a prisoner to swallow pieces of his own flesh.

Among the Iroquois, according to one of the Jesuit fathers, the eating of captives was considered a religious duty. Among the Heiltsuk, and recently among the Tsimshian and Kwaki-utl, cannibalism formed a part of one of their ceremonies. Several instances are recorded in which cannibalism was indulged in by individuals while in a frenzied state. Finally, it seems that among a few tribes, as the Tonkawa, Iroquois, and others, man-eating, though still with captives as the victims, was practised on a larger scale, and with the acquired taste for human flesh as one, if not the chief, incentive;

yet the Tonkawa, as well as some men long associated with them, declared that the eating of human flesh by them was only ceremonial.

Indian mythology and beliefs are replete with references to man-eating giants, monsters, and deities, which point to the possibility that anthropophagy in some form was a practice with which the aborigines have long been acquainted.

Canoe Creek. A Shuswap village and band near upper Fraser r., Brit. Col., about 300 m. from its mouth; pop. 128 in 1911.—Can. Ind. Aff., pt. u, 18, 1911.

Canoe Lake Indians. The local name for a body of Shuswap of Kamloops-Okanagan agency, Brit. Col.; pop. 129 in 1902, including the Chuckchuqualk, q. v.—Can. Ind. Aff. for 1879, 309.

Cape Breton. One of the seven districts of the country of the Micmac, on Cape Breton id., Nova Scotia. The chief of this district was the head chief of the tribe (Rand, First Micmac Reading Book, 1875). The name occurs in a list of 1760 as the location of a Micmac village or band. (J. M.)

Cape Magdalen. An Algonkin mission established on the St. Lawrence in 1670, 3 leagues below Three Rivers, Quebec, by Indians who removed from the latter place on account of smallpox. It was abandoned before 1760.—Jefferys, Fr. Dom. Am., pt. 1, 10, 110, 1761.

Cape Sable Indians. A name applied by early New England writers to those Micmae living near cape Sable, in s. Nova Scotia. The term is used by Hubbard as early as 1680. They were especially active in the wars on the New England settlements. (J. M.)

Captives. The treatment accorded captives was governed by those limited ethical

concepts which went hand in hand with clan. gentile, and other consanguineal organizations of Indian society. From the members of his own consanguineal group, or what was considered such, certain ethical duties were exacted of an Indian which could not be neglected without destroying the fabric of society or outlawing the transgressor. Toward other clans, gentes, or bands of the same tribe his actions were also governed by well recognized customs and usages which had grown up during ages of intercourse, but with remote bands or tribes good relations were assured only by some formal peace-making ceremony. A peace of this kind was very tenuous, however, especially where there had been a long-standing fend, and might be broken in an instant. Toward a person belonging to some tribe with which there was neither war nor peace, the attitude was governed largely by the interest of the moment. In such cases the virtues of the clan or gentile organizations as peace-making factors made themselves evident, for if the stranger belonged to a clan or gens represented in the tribe he was among, the members of that clan or gens usually greeted him as a brother and extended their protection over him. Another defence for the stranger was—what with civilized people is one of the best guaranties against war—the fear of disturbing or deflecting trade. If he brought among them certain much-desired commodities, the first impulse might be to take these from him by force and seize or destroy his person, but it would quickly be seen by wiser heads that the source of further supplies of this kind might thereby be imperilled, if not entirely cut off. If nothing were to be had from the stranger, he might be entirely ignored. And finally, the existence of a higher ethical feeling toward strangers, even when there was apparently no self-interest to be served in extending hospitality, is often in evidence. There are not wanting stories of great misfortune overtaking one who refused hospitality to a person in distress, and of great good fortune accrning to him who offered succour.

At the same time the attitude assumed toward a person thrown among Indians too far from his own people to be protected by any ulterior hopes or fears on the part of his captors was usually that of master to slave. This was particularly the ease on the N. Pacific coast, where slavery was an institution. Thus John Jewitt, at the beginning of the 19th century, was preserved as a slave by the Nootka chief

Maquinna, because he was an ironworker and would be valuable property. Most of the other whites who fell into the hands of Indians on this coast were treated in a similar manner.

The majority of captives, however, were those taken in war. These were considered to have forfeited their lives and to have been actually dead as to their previous existence. It was often thought that the captive's supernatural helper had been destroyed or made to submit to that of the eaptor, though where not put to death with torture to satisfy the victor's desire for revenge and to give the captive an opportunity to show his fortitude, he might in a way be reborn by undergoing a form of adoption.

It is learned from the numerous accounts of white persons who had been taken by Indians that the principal immediate hardships they endured were due to the rapid movements of their eaptors in order to escape pursuers, and the continual threats to which they were subjected. These threats were not usually carried out, however, unless they attempted escape or were unable to keep up with the band, or unless the band was pursued too hotly. Each person taken was considered the property of the one who first laid hands on him, and the character of this individual had much to do in determining the extent of his hardships. When two or more claimed a prisoner he was sometimes kept by all conjointly, but sometimes they settled the controversy by torturing him to death on the spot. The rapid retreat of a war party bore particularly hard upon women and children, vet a certain amount of consideration was often shown them. Sometimes the male captives were allowed to help them along, sometimes they were drawn on an improvised sledge or travois, and, if there were horses in the party these might be placed at their disposal, while one instance is recorded in which the child of a female captive was carried by her master for several days. It is worthy of remark that the honour of a white woman was almost always respected by her captors among the tribes E. of the Mississippi; but w. of that limit, on the plains, in the Columbia r. region, and in the s. w., the contrary was often the case.

Among the eastern tribes, on arriving at the village a dance was held, at which the captives were expected to play a conspicuous part. They were often placed in the centre of a circle of dancers, were sometimes compelled to sing and dance also, and a few were usually subjected to revolting tortures and finally burned

at the stake. Instances of cannibalism are recorded in connection with these dances after the return from war, and among some of the Texas and Louisiana tribes this disposition of the bodies of captives appears to have been something more than occasional. The Iroquois, some Algonquians, and several western tribes forced prisoners to run between two lines of people armed with clubs, tomahawks, and other weapons, and spared, at least temporarily, those who reached the chief's house, a certain post, or some other goal. Among many other tribes an escaped captive who reached the chief's house was regarded as safe, while the Creek peace towns also secured immunity from pursuit to the persons who entered them. Offering food to a visitor was usually equivalent to extending the host's protection over him.

From the experiences of the Spaniard, Juan Ortiz, taken prisoner by the Florida chief Ucita, in 1528, as well as those of other whites, it would appear that captives were sometimes held in a sort of bondage elsewhere than on the N. Pacific coast, but usually where their lives were spared they were held for ransom or adopted into the tribe. J. O. Dorsey says of some Siouan tribes, however, that their captives were allowed either to go home or settle among themselves, but were neither tortured nor regularly adopted. Although the custom among the eastern Indians of holding white prisoners for ransom dates from early times, it is questionable whether it was founded on aboriginal usage. The ransoming or sale of captives, however, was common among the Plains and s. w. tribes, while the custom of ransoming slaves on the N. Pacific coast was certainly pre-Columbian. In most of North America, however, it was probably a rare procedure, especially since many tribes are said to have disowned any person who once had been taken prisoner. Doubtless it became common in dealing with white captives owing to the difficulty of reconciling adult whites to Indian life and customs, while captives taken from another tribe no doubt settled down into their new relationships and surroundings very contentedly.

The usual object in thus adopting a prisoner was that he might fill the place of someone who had died, and it is affirmed by one writer that, whatever his own character, he was treated exactly as if he possessed the character of his predecessor. John Gyles, who was captured by the Abnaki in 1689, informs us that a prisoner was brought out to be beaten and tor-

tured during the war dances unless his master paid over a certain amount of property. Women and children were generally preserved and adopted, though there are instances in which white women were tortured to death, and it is said of the Ute that female captives from other Indian tribes were given over to the women to be tortured, while make prisoners who had distinguished themselves were sometimes dismissed unhurt. Among tribes possessing clans the adoption of captured women was of special importance, as it often resulted in the formation of a new clan from their descendants. Such, no doubt, was the origin of the Zuñi and Mexican clans of the Navaho. The Ute clan of the latter was recruited by a systematic capture and purchase of Ute girls undertaken with the object of supplying the tribe with good basket makers (Culin). Among the Plains tribes captives, especially children, were sometimes taken for the express purpose of being trained to the performance of certain ceremonial duties. Besides the numbers of white persons carried away by Indians and subsequently ransomed, it is evident from all the accounts that have reached us that many of English, French, and Spanish descent were taken into the tribe of their captors and, either because carried off when very young or because they developed a taste for their new life, never returned. Some of these even rose to high positions, as in the case of a Frenchman who became chief of the Attacapa, of a Mexican who is recorded as the most prominent and successful war chief of the Comanche in 1855, and of another Mexican still a man of influence among the Zuñi. The present chief of the Comanche, Quanah Parker (q. v.), is the son of a captive American woman. The confederated tribes of Comanche, Kiowa, and Kiowa Apache still hold at least 50 adopted white captives, and it is probable that fully one-third of the whole population have a traceable percentage of captive blood. The same is probably true in nearly equal measure of the Apache of Arizona.

From Oregon to s. Alaska a different treatment of captives was brought about by the existence of a slave class. Since slaves were the most valuable property a man could have, the lives of those taken in war were always spared unless such captives had committed some great injury to the victorious tribe that prompted immediate revenge. After this they might be killed at any moment by their masters; but such a fate seldom overtook them

until they grew too old to work, unless their masters became involved in a property contest, or the people of the town from which they had been taken had committed depredations. Among the Tlingit, however, slaves were killed during mortuary feasts, and bodies of slaves were thrown into the holes dug for the posts of a new house. Slave women, especially if they were known to be of noble descent, sometimes married their captors and became free. Four prominent Haida clans and one clan among the Tsimshian are said to have originated from marriages of this kind, while another prominent Haida clan was called "the Slaves," though it is impossible to say whether they were descended from slaves or whether the term is applied ironically. Whether male slaves ever rose to a high position is doubtful, owing to the strong caste system that here prevailed. Instead of receiving commendation, a slave who had escaped suffered a certain opprobrium which could be removed only by the expenditure of a great amount of property. At the same time it is related of the greatest Skidegate chief that he had been enslayed in his youth.

Carcajou. The Canadian French form of the Algonquian (Montagnais kar-ka-joo) name for the wolverene (Gulo luscus). The Chippewa gwingwaage (Baraga), gwin-gwaw-uh-ga (Tanner), the Cree quiquakatch (Mackenzie), kikkwāhākès (Lacombe), quecquehatch (Dobbs), the Algonkin qwingwaage (Cuoq), and quickhatch, quiquihatch, etc., of various authors,

are parallels. By a freak of popular etymology this animal received the name of "glutton." Its Finnish name is fial-frass, 'dweller among rocks,' corrupted by the Germans into vielfrass, 'glutton.' The name carcajon has been incorrectly applied to several animals. For instance Charlevoix, in describing one of the enemies of the deer, says the most cruel is "the carcajou or quincajou, a kind of eat, with a tail so long that it twists it several times around his body," a description taken evidently not from nature, but from the Algonquian myth of the fire-dragon. Among the Canadian French diable des bois is also a name of this little beast.

(J. N. B. H.)

Carhagouha 'in the forest'—Hewitt). A Huron village in Tiny tp., about 2 m. N. w. of Lafontaine, Ontario, about 1640.

Carhagoua.—Champlain :1615), Œuvres, IV. 28, 1870. Carragouha.—Shea, Cath. Miss., 166, 1855. Cartagoua.—Doc. of 1637 in Margry, Déc., I. 3, 1878.

Caribou. The common name of the American reindeer, of which there are two chief species, the woodland caribou (Rangifer caribou) and the barren-ground caribou R. arcticus.) The word came into English from the French of Canada, in which it is old, Sagard-Théodat using it in 1632. Josselyn has the Quinnipiae form maccarib and the synonym pohano. The origin of the word is seen in the cognate Micmae valibu and the Passamaquoddy megal'ip, the name of this animal in these eastern Algonquian dialects. According to Gatschet (Bull. Free Mus. Sci. and Art, Phila., II. 191, 1900) these words signify 'pawer' or 'scratcher,' the animal being so called from its habit of shovelling the snow with its forelegs to find the food covered by snow. In Micmae \alibu mul-\adequet means 'the caribou is scratching or shovelling.' Formerly the word was often spelled cariboo, which gave name to the Cariboo district in British Columbia, famous for its gold mines, and to other places in Canada and the United States.

Caribous. Wood, in 1769 (Hawkins, Missions, 361, 1845), speaks of the "Micmaes, Marashites [Malecite], and Carribous, the three tribes of New Brunswick," as all understanding the Micmae language. Probably the Abnaki or a part of them, as one of their gentes is the Maguⁿleboo, or Caribou.

Carmanah. A Nitinat village near Bonilla pt., s. w. coast of Vancouver id.; pop. 46 in 1902.—Can. Ind. Aff., 264, 1902.

Caucus. This word, defined by Bartlett (Dict. of Americanisms, 106, 1877 "as a private meeting of the leading politicians of a party, to agree upon the plans to be pursued in an approaching election," and by Norton (Polit, Americanisms, 28, 1890) as "a meeting of partisans, congressional or otherwise, to decide upon the action to be taken by the party," has now a legal signification. In Massachusetts it is defined as "any public meeting of the voters of a ward of a city, or of a town, or of a representative district, held for the nomination of a candidate for election. for the election of a political committee, or of delegates to a political convention." The origin of the word is not clear. Trumbull Trans. Am. Philo. Assoc., 30, 1872; sugsested a derivation from cawcawaassough, a word in the Virginian dialect of Algonquian. perhaps identical with cockarouse. It signifies 'one who advises, urges, encourages, pushes on.' Related words in other Algonquian dialects are the Abnaki kakesoman, 'to encourage, incite, arouse, speak to,' and the Chippewa gagansonia. From caucus, which is used both as a noun and a verb, are derived caucuser, caucusing, etc.

Caughnawaga Gö-hnä-wä''-ge, 'at the rapids.'. An Iroquois settlement on the Sault St. Louis* on St. Lawrence r., Quebec. When the hostility of the pagan Iroquois to the missions established in their territory frustrated the object of the French to attach the former to their interests, the Jesuits determined to draw their converts from the confederacy and to establish them in a new mission village near the French settlements on the St. Lawrence. In accordance with this plan these Indians were finally induced to settle, in 1668 at Laprairie, near Montreal. These converts were usually called 'French Praying Indians" or "French Mohawks" by the English settlers, in contradistinction to the Iroquois, who adhered to their own customs and to the English interests. In 1676 they were removed from this place to Sault St. Louis, where Caughnawaga and the Jesuit mission of St. François-du-Sault were founded. The village has been removed several times within a limited area. The majority of the emigrants came from the Oneida and Mohawk. and the Mohawk tongue, somewhat modified, became the speech of the whole body of this village. The Iroquois made several unsuccess-

^{*}At the head of the Lachine rappli-

ful efforts to induce the converts to return to the confederacy, and finally renounced them in 1684, from which time Caughnawaga became an important auxiliary of the French in their wars with the English and the Iroquois. After the peace of Paris, in 1763, many of them left their village on the Sault St. Louis and took up their residence in the valley of Ohio r., principally about Sandusky and Scioto rs., where they numbered 200 at the outbreak of the American Revolution. From their contact with the wilder tribes of that region many of them relapsed into paganism, although they still retained their French allegiance and maintained connection with their brethren on the St. Lawrence. About 1755 a colony from Caughnawaga formed a new settlement at St. Regis, some distance farther up the St. Lawrence. As the fur traders pushed their way westward from the Great lakes they were accompanied by Caughnawaga hunters. As early as 1820 a considerable number of this tribe was incorporated with the Salish, while others found their way about the same period down to the mouth of Columbia r. in Oregon. and x, as far as Peace r, in Alberta, the W. they are commonly known as Iroquois. Some of the Indians from St. Regis also undertook these distant wanderings. In 1884, Caughnawaga had a population of 1,485, while St. Regis (in Canada and New York) had about 2.075, and there were besides a considerable number from the two towns who were scattered throughout the W. In 1911 there were 2,240 on the Caughnawaga res. and 1,515 at St. Regis, Que., and about 1,200 on the St. Regis reserve, N. Y.

Cayuga (Kwěñio'gwěn', 'the place where locusts were taken out.'-Hewitt). A tribe of the Iroquoian confederation, formerly occupying the shores of Cayuga lake, N.Y. Its local council was composed of 4 clan phratries, and this form became the pattern, tradition says, of that of the confederation of the Five Nations of the Iroquois, in which the Cavuga had 10 delegates. In 1660 they were estimated to number 1,500, and in 1778, 1,100. At the beginning of the American Revolution a large part of the tribe removed to Canada and never returned, while the rest were scattered among the other tribes of the confederacy. Soon after the Revolution these latter sold their lands in New York; some went to Ohio. where they joined other Iroquois and became known as the Seneca of the Sandusky. These are now in Oklahoma; others are with the Oncida in Wisconsin; 175 are with the Iroquois still in New York, while the majority, numhering 1,063, are on the Six Nation res., near Brantford, Ont. In 1670 they had three villages-Goiogouen, Tiohero, and Onnontare. Goiogouen was the principal village; Gayagaanha, given by Morgan, was their chief village in modern times. Their other villages of the modern period, according to Morgan, were Ganogeh, Gewauga, and Neodakheat. Others were Chonodote, Gandaseteigon, Kawauka, Kente, Oneniote, and Onvadeakahyat. Their clans were those common to the Iro-(J. M. J. N. B. H.)

Cayuse. An Indian pony; from the name of a Waiilatpuan tribe. The horses, after the Indians had come into contact with the whites, were bred by the Cayuse, and from a merely local use the word has attained an extended currency in w. Canada and the N. W. Pacific states.

(A. F. C.)

Cements. The Indians used cements of animal, vegetal, and mineral origin, and sometimes combined two of these or added mineral substances for colouring. Animal eement was obtained by the Yokuts of California by boiling the joints of various animals and combining the product with pitch (Powers, Tribes of Cal., 373, 1877). The Hupa boiled the gland of the lower jaw and nose of the sturgeon and dried the products in balls (Ray in Smithson. Rep., 229, 1886). Capt. John Smith states that with sinew of deer and the

tops of deer horns boiled to a jelly the Virginia Indians made glue that would not dissolve in cold water. The Plains tribes boiled the skin of the head of animals until it was softened into glue, which they dried in masses on sticks. Such glue-sticks formed a part of the equipment of the bow-and-arrow maker, and the horn arrow-straighteners of the S.W. tribes are often filled with resin. Sometimes one end of the hearth of the fire-drill bears a mass of resin, as a convenient way to carry this substance, which may readily be melted at the fire and applied to various uses. Wax and albumen from eggs had a limited use, and the Eskimo used blood mixed with soot. The chief use of animal cement was in the manufacture of bows and arrows, and, among the Plains tribes, in joining the stems of certain kinds of pipes. The only mineral cement known to the tribes was bitumen, which was used by the Indians of s. Arizona and Cali-Vegetal cements were numerous, fornia and chief among these was the exudation from coniferous trees, employed by northern tribes for pitching the seams of bark canoes, baskets

Ceremony. A ceremony is the performance in a prescribed order of a series of formal acts often constituting a drama which has an ultimate object. Ceremonies spring from many diverse tendencies, which are the expression of some phase of religious emotion. Many features of the culture of the North American Indians are regarded as ceremonies, such as the rites which pertain to birth, puberty, marriage, death, war, etc., but in the arbitrarily restricted sense in which the term is here used a ceremony is understood to be a religious performance of at least one day's duration. These ceremonies generally refer to one or the other of the solstices, to the germination or ripening of a crop, or to the most important food supply. There are eeremonies of less importance that are connected with the practices of medicine-men or are the property of cult societies. Ceremonies may be divided into those in which the whole tribe participates and those which are the exclusive property of a society, generally a secret one, or of a group of men of special rank, such as chiefs or medicine-men, or of an individual. Practically all ceremonies of extended duration contain many rites in common. An examination of these rites, as they are successively performed, reveals the fact

that they follow one another in prescribed order, as do the events or episodes of the ritual.

The ritual, or that part of the ceremony which is spoken or sung, predominates among some tribes, as the Pawnee; among others, as the Hopi, it is greatly subordinated to the drama.

In enumerating the rites of the ceremonies it may be noted, first, that they may be divided into secret and public, the secret rites being proprietary, and, as a rule, occupying the major part of the ceremony. The rites of the public performance may be considered as the actual play or drama. The secret rites are almost invariably performed in a specially constructed lodge, room, or chamber, into which none but the priests or initiated may enter, and which is generally indicated in such a manner that the public may not mistake it. Early in point of time in the secret rites is the procession of the priests for objects or raw material to be used in the preparation of an altar, which may be either secret or public, or to be used for paraphernalia or otherwise in the public performance. This procession of priests is generally symbolic, and the uninitiated may not accompany them. The remaining secret performances include such rites as smoking, which may be either fraternal or direct offerings in the nature of a sacrifice to the gods; thurification, similar in origin to the rite of smoking, in which the smoke of some sweet-smelling herb is offered direct to the deity, or the priest bathes his body, or some object of a special ceremonial nature, in the smoke of the incense; sweatlodge purification; a ceremonial feast, preceded or followed by a sacrifice of food; the offering of prayers, which may be in the form of a direct appeal to the gods or through the instrumentality of material prayer offerings, upon which, or into which, the prayer has been breathed; and the manufacture or redecoration of ceremonial masks and garments to be worn during the public performance, either by the priests exclusively or by all those taking part in the ceremony.

Occupying in point of time a period between the exclusively secret performances and the public presentation of the drama may be certain semi-public performances, which take place in the open but which are undertaken by priests exclusively. Such is the preparation of the site of the public performance, or the erection of a bower or lodge within which it is to take place. Either within this enclos-

ure, or lodge, or within the secret lodge of preparation, an altar may be erected. is especially the case with the ceremonies of the Pueblos and of the Plains tribes (see Altars), among which it is always symbolic. and its explanation must generally be sought in the ritual. It often symbolizes, as a whole, the earth or the heavens, or some god or the home of a god or the gods. The most prominent feature of the altar is a palladium, which may consist of a buffalo skull, an ear of corn, a flint knife, or some other object of supposed efficacious nature, within which it is supposed to reside or which is typical or symbolic of the spirit or deity. On the altar, also, is generally found a recognition in one form or another of the gods of the four or six world-quarters, of the rainbow, of the lightning, of vegetation, etc. Falling within this semi-public period is often a contest, generally a foot race, the winner being favoured by the gods or receiving some tangible object which possesses magic potency.

The public performance is usually ushered in by a stately procession of priests, the singing of traditional songs, rites of smoking, sacrifice of food, and offerings of prayer. The most prominent feature is the dance, which, as a rule, is of a dignified and stately nature, the dancers being appropriately costumed and otherwise adorned. The costume worn in public is often supplemented with paint upon the body, or by masks over the face. The dancer, thus arrayed, generally represents a minor deity, or he places himself, by virtue of the character of his costume, in an attitude of defiance to the deity and thus opposes his magic power to that of the supernatural. Following the dance, which may vary in duration from a few minutes to several days, is generally a ceremonial removal of the costume, whereupon the dancers undergo a purification rite, often in the form of a powerful emetic. This may be followed by an act of self-inflicted torture, which, however, often forms an intrinsic part of the public performance. During the entire ceremony, as a rule, certain tabus are enforced, the most common being a prohibition of the presence of women during menstruation.

The time of the performance of ceremonies varies. Some are held annually, or biennially, at stated periods; such are the solstitial or seasonal ceremonies, for which no special provision is necessarily made. Some are held during certain seasons of the year, but

are dependent on the will of an individual who may have pledged or taken a vow to perform the ecremony. Others are held at any season, whenever occasion may demand; such are the ceremonies of the medicine-men.

Inasmuch as ceremonies form intrinsic features and may be regarded as only phases of culture, their special character depends on the state of culture of the people by which they are performed; hence there are at least as many kinds of ceremonies as there are phases of culture in North America. A few characteristic ceremonies may be considered for some of the better-defined areas.

Among the Plains tribes the most speetacular eeremony is the Sun dance. This varied from an annual performance, as among the Ponca and some other Siouan tribes, to a presentation only as the direct result of a yew, as among the Cheyenne, Arapaho, and Siksika. In the Sun dance of all tribes are found certain common features, such as the secret tipi or tipis of preparation; the manufacture of objects to be used on the public altar; the procession of priests in search of an object generally symbolic of spying out the world; the ceremonial erection of the great lodge, of which the centre pole is the most prominent feature; the erection of the altar; and the characteristic dance lasting from 1 to 1 days. During the public performance the dancers are symbolically painted and otherwise so adorned that their evolutions are supposed to lead to a distinct result—the production of rain. While the Sun dance varies from tribe to tribe, not only in its symbolism but also in many important details, it seems primarily to have been a rain ceremony, and its ritual generally recounts the origin or the rebirth of mankind. The second group of ceremonies are those performed by cult societies, generally four or more in number. Each society has its special esoteric songs, its own paraphernalia, and often distinct gradations in rank. The membership is generally exclusively male, although a limited number of maidens are admitted into the societies of the Chevenne, while the Arapaho have a society which belongs exclusively to the women, of which there are several gradations of rank. The third group comprises the performances of cult societies in which the warrior element does not predominate; these are often spoken of as dances, although they are, strictly speaking, ceremonies. Among the best known of these are the Buffalo, the Bear and the Elk. The basis is usually the acquisition and perpetuation of magic power, which, primarily, was derived from the animal after which the society takes its name and from which it is supposed to have originated. A fourth group comprises those of the medicine-men, and are either ceremonies in which one or more medicinemen perform for the benefit of the sick, or, more often, in which all the medicine-men of the tribe join in a performance to make public demonstration of magic power through sleightof-hand. The last group of Plains ceremonies includes those connected with the planting and reaping of the maize, or the first killing of game in the hunting season, or the first coming of the fish-all, it may be noted, connected with the gift of food for the sustenance of life.

On the N. Pacific coast, extending from Columbia r. to s. Alaska, ceremonies of from 1 to I days' duration abound. These are performances of cult societies, generally secret, or of chiefs or lesser individuals who make it an opportunity to display personal wealth. In the ceremonies of the cult societies masks are worn. Those of the Kwakiutl of this region are held in winter, at which time the cult societies replace the gentile organization which prevails in summer. Membership into the society is acquired by marriage or through war. The object of the winter eeremony is "to bring back the youth who is supposed to stay with the supernatural being who is the protector of his society, and then, when he has returned in a state of cestasy, to exorcise the spirit which possesses him and to restore him from his holy madness. These objects are attained by songs and dances." During the performance of these ceremonies special paraphernalia are worn in which the mask, substantially made of wood, predominates, the remainder consisting largely of rings of cedar bark (see Bark) which constitute the badges of the ceremony. The tribes to the N. have societies and winter ceremonies similar to those of the Kwakiutl, from whom they are probably mainly derived.

Among the Eskimo extended ceremonies, such as prevail over a large portion of North America, are not found. They are rather to be characterized as dances or festivals. These are generally held in winter and are of short duration. The most important of these are the Feasts to the Dead; others among the

Alaskan Eskimo are the Asking festival, the Bladder feast, and the performances of the medicine-men. In some of the festivals wooden masks, representing supernatural or superhuman beings, are worn.

As stated at the outset, the root of ceremonies may be discovered only by taking into consideration universal human tendencies which develop along certain lines according to historical or geographical environment. It may therefore be noted that the need for them among the Indians of North America varied in accordance with the character of their life. Thus it is found that in those tribes or in those areas extended forms abound where there exists a sessile population or a strong form of tribal government. Hence the greatest number of extended and complicated ceremonies are formed among the Pueblo people of the S. W. and in the village communities of the x. Pacific coast. Second only in importance to the ceremonics of these two areas are those which are found among the tribes of the Plains among which ceremonies abound, in which the strongest system of government is found. As a ceremony of any extended duration makes great demands upon the tribe, and pre-supposes law and order, highly developed and extended ones are not possible among the Eskimo or the tribes of California. (G. A. D.

Cexeminuth. A tribe or division about Queen Charlotte sd., Brit. Col.; possibly a Gyeksem gens of the Kwakiutl.

Cex-e-ni-nuth.—Kane, Wand, in N. Am, app. 1859 Ex e ni nuth.—Schooleraft, Ind. Tribes, v, 488, 1855 (misspelt).

Chaahl (Tetā'al). A former Haida town on the N. w. coast of Moresby id., Queen Charlotte ids., Brit. Col. This seems to have been the Kow-welth of John Wark, who assigned to it 35 houses with 561 inhabitants in 1836-41. Old people recall the names of 28 houses, but many more are said to have existed before a great fire which destroyed a large part of the town. In later times the people moved to New Gold Harbour, on the E. end of Maude id., and thence into Skidegate.—Swanton, Cont. Haida, 280, 1905.

Cha-atl.—Dawson, Q. Charlotte Ids, Geol Surv, Can, 1688, 1880. Kaw-welth.—Kane, Wand in N Am., app., 1859 (probably the same, misprint from Wark, 1836-41). Kow-welth.—Schoolcraft, Ind Tribe, v, 489, 1855 (probably the same; from Wark's table).

Chaahl (*Tc!ā'al*). A former Haida town on the E. coast of North id., Queen Charlotte

ids., Brit. Col. It was occupied by a family of the same name who afterward moved to Alaska and settled at Howkan.—Swanton, Cont. Haida, 281, 1905.

Chabin (from q_{ℓ} , 'mountain'). A division of the Assiniboin.—Maximilian, Trav., 194, 1843.

Gens des Montagnes.--Ibid.

Chahthulelpil. A body of Salish of the old Victoria superintendency. Brit. Col.; pop. 104 in 1881.—Can. Ind. Aff., 258, 1882.

Chaicelesaht (To'r'k'llisath, 'large-cut-inbay people'. A Nootka tribe on Ououkmsh and Nasparti inlets, w. coast of Vancouver id., numbering 61 in 1911. Acous is their principal town.

Chaic-cles-aht.—Can Ind Aft, 357, 1897 Chay-kisaht.—Sproat, Say Lite, 308, 1868 Checklesit.—Can Ind. Aft, 158, 1901 Naspatt.—Jacob in Jour Anthrop. Soc. Lond., xi, Feb., 1864 Naspatte.—Latham, Nat Hist Man, 301, 1850 Naspatte.—Scouler (1846) in Jour Ethnol Soc. Charts A Squawmish village community on Burrard inlet, Brit. Col.

Tcānts.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900,

Chatelech Coutside water'. The present town of the Seechelt Indians on Trail bay, at the neck of Seechelt penin., Brit. Col. As a permanent settlement it dates only from Bishop Durien's time (ca. 1890), not having been occupied before for fear of the Lekwiltok. Teatslete.—Hill-Tout in Jour. Anthrop. Inst., 21, 1904.

2 GEORGE V., A. 1912

Chats-hadai Teāts xā'du-i, "Teats river people'). A subdivision of the Koetas, a Haida family belonging to the Kaigani group. They were probably so named from a camping place.—Swanton, Cont. Haida, 272, 1905.

Chawagis-stustae 'Teawā'qis st. Astā'-i, 'the Stustas from Low-tide r.'). A subdivision of the Stustas, a great Haida family of the Eagle clan. The creek where they camped and which gave them the name is on the coast a short distance s. of Naikun or Rose spit, Graham id., Brit. Col.—Swanton, Cont. Haida, 276, 1905.

Tsiqua'gis stastaai'. -Boas, 12th Rep. N. W. Tribes, Can., 23, 1898.

Cheam. A town said to belong to the Pilalt, a Cowichan tribe of lower Chilliwak r., Brit. Col., but evidently containing representatives of other tribes as well; pop. 100 in 1902.

Che-ahm.—Brit. Col. map, Victoria, 1872. Cheam.— Can Ind Aff., pt. n., 158, 1901. Tcč'iām.—Boas in Rep. Brit. A. A. 8., 454, 1894.

Chechelmen. A Squawmish village community on Burrard inlet, Brit. Col.

Tcetcē'Imen.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Chechilkok. A Squawmish village community at Seymour er., Burrard inlet, Brit. Col.; pop. 18 in 1911.

Seymour Creek.—Can. Ind. Aff., pt. 11, 160, 1900
 Tcētcilqōk.—Hill-Tout in Rep. Brit, A. A. S., 475, 1900.

Cheerno. A body of Songish at Becher bay, s. E. end of Vancouver id. It perhaps includes the Kekayaken gens. Pop. 32 in 1911.

Cheerno.—Can. Ind. Aff., 66, 1902. Tche-a-nook. —Can. Ind. Aff., 308, 1879 (probably the same).

Cheewack. A body of Salish under Williams Lake agency, Brit. Col.; pop. 9 in 1891, when the name last appears.

Chawack.—Can. Ind. Aff. 78, 1878.—Cheewack.— Ibid., 251, 1891.

Chegwalis ('spotted frog'). A gens of the Abnaki.

Chehalis (StsEc'lis). A Cowichan tribe living along the middle course of Harrison r., Brit. Col. Chehalis and Koalekt were their villages. Pop. (of tribe or village) 1,171 in 1911.

Chehales.—Can Ind Aff. for 1880, 317. Chehalis.— Ibid., 1901, pt. n., 158. Saelis.—Brit. Col. map. Ind., Aff., Victoria, 1872.—Stspē'lis.—Boas in Rep. Brit. A. A. S., 454, 1899. the village). Chekoalch. A Squawmish village community on Burrard inlet, Brit, Col.

 $Teek\bar{o}'altc.$ —Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Chemainus. A Cowichan settlement on the E. coast of Vancouver id., presumably on the bay and river of the same name.

Chemainis. Can Ind. Aff. for 1891, map. Chemanis.- Brit Col. map, Victoria, 1872

Chenachaath (Te'ë'natc'aath. A division of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. tribes Can., 32, 1890.

Chentsithala. A Naskotin village on Fraser r., Brit. Col., at the mouth of Quesnel r.

Chichula.—Brit. Col. map, Victoria, 1872. Quesnel.
—Morrice, Notes on W. Dénés, 24, 1893. Quesnelle
Mouth.—Tolmie and Dawson, Vocabs. Brit Col., map,
1884. Tcentsithal'a.—Morice in Trans. Roy. Soc.
Can., x, sec. 2, 109, 1892

Cheshish. The principal village of the Muchalat, situated back of Bligh id., Nootka sd., Vancouver id.—Can. Ind. Aff., 264, 1902.

Chetawe. A village of the Ntlakyapamuk, on the E. side of Fraser r., about 16½ m. above Yale, Brit. Col. Pop. 16 in 1897, the last time it was separately enumerated.

Chataway.—Can. Ind. Aff. for 1884, 230. Chatowe.— Brit. Col. map, Ind. Aff., Victoria, 1872. Tca'tñā.— Hill-Tout in Rep. on Ethnol. Surv. Can. for Brit. A. A. S., 5, 1899. Tcê'tawe.—Teit in Mem. Am. Mus. Nat. Hist., II, 169, 1900.

Chets (*Tcēts*). A Haida town, formerly occupied by the Chets-gitunai and Djushade, on an island at the mouth of Tsooskahli, Masset inlet, Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Chetsgitunai (Tcēts-gitAnā'-i, 'Gituns of Chets id.'). A Haida family of the Eagle clan, so named from an island in the upper expansion of Masset inlet, Brit. Col., at the mouth of Tsooskahli, where they once lived. Afterward they moved to the mouth of Masset inlet. They formed one group with the Widjagitunai, Tohlka-gitunai, and Diushade.—Swanton, Cont. Haida, 275, 1905.

Chichkitone.—Harrison in Proc. Roy. Soc. Can., sec. II, 124, 1895.—Tsēts gyit'inai'.—Boas, 12th Rep. N. W. Tribes Can., 23, 1898.

Cheuek. A village of the Ntlakyapamuk on Fraser r., above Lytton, Brit. Col.

TCEUC'Q.-Hill-Tout in Rep. Ethnol. Surv. Can. for Brit. A. A. A. S., 4, 1899.

Chewas. A Squawmish village on the w. side of Howe sd., Brit. Col.

Tcē'was.--Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Chiakamish. A Squawmish village community on a creek of the same name, a tributary of Skwamish r., B. C.

Tcīā'kamic.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900. Tcīā'qamic.—Boas MS., B. A. E., 1887.

Chiaktel. A Chilliwak village in s. Brit. Col.; pop. 43 in 1904.

Tcia'kte'l.—Hill-Tout în Ethnol Surv. Can, 4, 1902 Tyeachten.—Can, Ind. Aff., pt. 11, 160, 1901. Tzeachten.—Ibid, 224, 1902.

Chibaouinani (Shībā,n,naning, 'passage-way.—W. J.). A former Missisauga village, also known as La Cloche, on Cloche id., in lake Huron, x. of Manitoulin id.

Chibaouinani.—La Galissonière (1748) in N. Y. Doc. Col. Hist, x, 183, 1858—La Cloche.—Ibid.

Chichigoue (seemingly eognate with Chippewa shishikwe, 'rattlesnake,'—W. J.). A tribe mentioned by La Chesnaye as living N. of lake Superior in 1697, and generally trading with the English on Hudson bay. They cannot be identified with any known tribe, but they were evidently Algonquian.

(r se)

Chichigoue.—La Chesnaye (1697) in Margry, Déc., vi. 7, 1886. Chichigoueks.—La Potherie, Hist. de l'Amér., II, 49, 1753.

Chichilek. A Squawmish village community on Burrard inlet, Brit. Col.

Tcitcile'ek,---Hill-Tout in Rep. Brit. A A S , 475, 1900.

Chicoutimi. The name of a locality, the head of ship navigation of Saguenay r., Quebee, by which the Lake St. John band of Montagnais was sometimes referred to (Jes. Rel. 1661, 13, 1858). The French formerly had a mission of the same name on the right bank of the Saguenay. In 1911 the Montagnais of L. St. John numbered 583 and most of them resided on a reservation at Pointe Bleue. (J. M.)

Checoutimi.—Jefferys, French Dom. Am., 1, 18, 1761. Checoutimiens.—Hold.— Chegoutimis.—Jes. Rel. 1661, 14, 1858. Chekoutimiens.—Bellin, map, 1755. Chekoutimis.—La Tour, map, 1784.—Chicontami.—Johnson (1764) in N. Y. Doc. Col. Hist., vii, 658, 1856 (misprint).—Chicoutimie.—Lords of Trade (1764), ibid., 635.—Chicoutimi.—Jes. Rel. 1661, 13, 1858.—Chixoutimi.—Johnson (1764) in N. Y. Doc. Col. Hist., vii, 664, 1856.—Montagnais of Lake St. John.—Can. Ind. Aff. Rep. 1884, pt. i, 185, 1885

Chiefs. Among the North American Indians a chief may be generally defined as a political officer whose distinctive functions are to execute the ascertained will of a definite group of persons united by the possession of a common territory or range and of certain exclusive rights, immunities, and obligations,

and to conserve their customs, traditions, and religion. He exercises legislative, judicative, and executive powers delegated to him in accordance with custom for the conservation and promotion of the common weal.

The wandering band of men with their women and children contains the simplest type of chieftaincy found among the American Indians, for such a group has no permanently fixed territorial limits, and no definite social and political relations exist between it and any other body of persons. The clan or gens. the tribe, and the confederation present more complex forms of social and political organization. The clan or gens embraces several such chieftaincies, and has a more highly developed internal political structure with definite land boundaries. The tribe is constituted of several clans or gentes and the confederation of several tribes. Among the different Indian communities the social and political structure varied greatly. stages of social progress lay between the small band under a single chief and the intricate permanent confederation of highly organized tribes, with several kinds of officers and varying grades of councils of diverse but interrelated jurisdictions. With the advance in political organization political powers and functions were multiplied and diversified, and the multiplicity and diversity of duties and functions required different grades of officers to perform them; hence various kinds and grades of chiefs are found. There were in certain communities, as the Iroquois and Creeks, civil chiefs and subchiefs, chosen for personal merit, and permanent and temporary war chiefs. These several grades of chiefs bear distinctive titles, indicative of their diverse jurisdiction. The title to the dignity belongs to the community, usually to its women, not to the chief, who usually owes his nomination to the suffrages of his female constituents, but in most communities he is installed by some authority higher than that of his chieftaincy. Both in the lowest and the highest form of government the chiefs are the creatures of law, expressed in welldefined customs, rites, and traditions. Only where agriculture is wholly absent may the simplest type of chieftaincy be found

Where the civil structure is permanent there exist permanent military chieftainships, as among the Iroquois. To reward personal merit and statesmanship the Iroquois instituted a class of chiefs whose office, upon the death of the holder, remained vacant. This latter provision was made to obviate a large representation and avoid a change in the established roll of chiefs. They were called "the solitary pine trees,"and were installed in the same manner as the others. They could not be deposed, but merely ostracized, if they committed crimes rendering them unworthy of giving counsel.

Where the civil organization was of the simplest character the authority of the chiefs was most nearly despotic; even in some instances where the civil structure was complex as among the Natchez, the rule of the chiefs at times became in a measure tyrannical, but this was due largely to the recognition of social castes and the domination of certain religious beliefs and considerations.

The chieftainship was usually hereditary in certain families of the community, although in some communities any person by virtue of the acquisition of wealth could proclaim himself a chief. Descent of blood, property, and official titles were generally traced through the mother. Early writers usually called the chief who acted as the chairman of the federal conneil the "head chief" and sometimes, when the tribe or confederation was powerful and important, "king" or "emperor," as in the case of Powhatan. In the Creek confederation and in that of the Iroquois, the most complex aboriginal government x. of Mexico, there was, in fact, no head chief. The first chief of the Onondaga federal roll acted as the chairman of the federal council, and by virtue of his office he called the federal council together. With this, all pre-eminence over the other chiefs ended, for the governing power of the confederation was lodged in the federal council. The federal council was composed of the federal chiefs of the several component tribes; the tribal council consisted of the federal chiefs and subchiefs of the tribe.

Communities are formed on the basis of a union of interests and obligations. By the union of several rudimentary communities for mutual aid and protection, in which each retained part of its original freedom and delegated certain social and political powers and jurisdiction to the united community, was evolved an assembly of representatives of the united bands in a tribal council having a definite jurisdiction. To these chiefs were sometimes added subchiefs, whose jurisdiction though subordinate, was concurrent with that of the chiefs. The enlarged community con-

stitutes a tribe. From tribes were organized confederations. There were therefore several grades of councils constituted. In the council of the Iroquois confederation the subchiefs had no voice or recognition.

Among the Plains tribes the chieftainey seems to have been chiefly non-hereditary. Any ambitious and courageous warrior could apparently, in strict accordance with custom, make himself a chief by the acquisition of suitable property and through his own force of character.

(J. N. B. H.)

Note.—*By the terms of the Indian Act, Cap. 81, R.S. of Canada, Sec. 94, Life Chiefs and Councillors and head men now living may continue to hold rank until death or resignation or until their removal by the Governor-in-Council for dishonesty, immorality, intemperance or incompetency. The Act also provides for the election of Chicfs and Councillors for a term of three years. No Band is allowed more than one Chief and 15 Councillors and the latter may be in the proportion of two for every two hundred Indians. Elections may be set aside by the Covernor-in-Council for cause and Chiefs and Councillors may be deposed by the same authority on the ground of dishonesty, immorality, intemperance or incompetency. Chief and Councillors may make rules and regulations under the 98th clause of the Act for the government of the Band. A Municipal system may also be adopted by the bands whenever the Governorin-Council deems it advisable. (D. C. Scott, MS., 1912.)

Chikauach. A Songish band at McNeill bay, s. end of Vancouver id., Brit. Col. Tcik.au'atc.—Boas in 6th Rep. on N. W. Tribes Can., 17, 1890

Child life. The subject of Indian child life has been but very lightly treated by ethnologists, although the child is in fact the strongest bond of family life under a system which allowed polygamy and easy separation. Both parents alike were entirely devoted to their children, and bestowed upon them the fullest expression of affection and solicitude. The relation of parent to child brings out all the highest traits of Indian character.

Among some tribes, notably those of the plains, in anticipation of the new arrival the

^{*}Memorandum from Dept of Indian Affairs, Canada.

father prepares the wooden frame of the eradle which is to be its portable bed until it is able to walk. The body of the cradle, with its ornamentation of bead or quill design, fringes and bangles, is made either by the grandmother or by some woman noted in the tribe for her superior expertness. There were many well-marked varieties of cradle, differing with the tribe. Among the Choctaw, Catawba, and other former tribes of the Southern states, and among the Chinookan and Salishan tribes of the Columbia, there was used a special attachment which, by continued pressure upon the forchead while the bones were still soft, produced the so-called "flat-head," esteemed with these tribes a point of beauty. One cradle was used for successive infants in the same family.

The newborn infant is commonly treated at once to a cold bath, and turned over to another matron to nurse until the mother's health is restored. Among the Hopi, ashes or sacred meal are rubbed on the newborn babe. Lactation is long continued, even for 2 years or more, and in rare cases much longer. With all the affection of the mother, the women are almost completely ignorant of ordinary sanitary rules as to feeding, exposure, etc., with the result that infant mortality is exceedingly high in almost every tribe, many children being born, but only a small proportion coming to maturity, so that even in former times the tribal population remained almost stationary. The child's sisters or cousins of the baby are its attendants, while the mother is occupied with other duties, and perform their work with the instinct of little mothers. The child is kept in its cradle usually only during a jonrney or while being carried about, and not, as is commonly supposed, during most of the time. At home it rolls about upon the grass or on the bed without restraint. Formerly, except in extreme weather, no clothing was worn during waking hours up to the age of from 5 to 10 years, according to the tribe and climate, and in some tribes this practice still prevails. The child may be named soon after birth, or not for a year or more after, this child name. like the first teeth, being discarded as the boy or girl grows up for another of more important significance. The child name is often bestowed by the grandparent. *

Twins are usually regarded as uncanny, and are rather feared, as possessing occult power. With some Oregon and other coast tribes they were formerly regarded as abnormal and one or both were killed. There are well authenticated instances of deformed children being put to death at birth. On the other hand, children crippled by accident are treated by parents and companions with the greatest tenderness.

Among the Plains tribes the ceremonial boring of the ears for the insertion of pendants is often made the occasion of a more or less public celebration, while the investment of the boy with the breechcloth at the age of 9 or 10 years is observed with a quiet family rejoicing. The first tatooing and the first insertion of the labret are also celebrated among the tribes practising such customs. In many or most tribes the boys passed through an initiation ordeal at an early age, sometimes as with the Zuñi, as young as 5 years see Ordeals. With the Hopi and Zuñi the child is lightly whipped with vucca switches when initiated into the Kachina priesthood. With the Powhatan of Virginia, if we can believe the old chroniclers, the boys, who may have been about 10 years of age at the time, were actually rendered unconscious, the declared purpose being to take away the memory of childish things so that they should wake up as men. On the plains the boys at about the same age were formally enrolled into the first degree of the warrior society and put under regular instruction for their later responsibilities.

Children of both sexes have toys and games, the girls inclining to dolls and "playing house," while the boys turn to bows, riding. and marksmanship. Tops, skates of rib-bones, darts, hummers, balls, slanny, and hunt-thebutton games are all favourites, and wherever it is possible nearly half the time in warm weather is spent in the water. They are very fond of pets, particularly puppies, which the little girls frequently dress and carry, upon their backs like babies, in imitation of their mothers. Among the Zuni and Hopi wooden figurines of the principal mythologic characters are distributed as dolls to the children at ceremonial performances, thus impressing the sacred traditions in tangible form.

Girls are their mothers' companions and are initiated at an early period into all the arts of home life—sewing, cooking, weaving, and whatever else may pertain to their later duties. The boys as naturally pattern from their fathers in hunting, riding, or boating

Boys and girls alike are carefully instructed by their elders, not only in household arts and hunting methods, but also in the code of ethics, the traditions, and the religious ideas pertaining to the tribe. The special ceremonial observances are in the keeping of the various societies. The prevalent idea that the Indian child grows up without instruction is entirely wrong, although it may be said that he grows up practically without restraint, as instruction and obedience are enforced by moral sussion alone, physical punishment very rarely going beyond a mere slap in a moment of anger. As aggressiveness and the idea of individual ownership are less strong with the Indian than with his white brother, so quarrels are less frequent among the children, and fighting is almost unknown. Everything is shared alike in the circle of playmates. The Indian child has to learn his language as other children learn theirs, lisping his words and confusing the grammatical distinctions at first; but with the precocity incident to a wild, free life, he usually acquires correct expression at an earlier age than the average white child.

At about 15 years of age in the old days, throughout the eastern and central region, the boy made solitary fast and vigil to obtain communication with the medicine spirit which was to be his protector through life; then, after the initiatory ordeal to which, in some tribes, he was subjected, the youth was competent to take his place as a man among the warriors. For a year or more before his admission to full manhood responsibilities the young man cultivated a degree of reserve amounting even to bashfulness in the presence of strangers. At about the same time, or perhaps a vear or two earlier, his sister's friends gathered to celebrate her puberty dance, and thenceforth child life for both was at an end.

Chimmesyan Family (from Tsimshian, 'people of Skeena r.'). A small linguistic family on Nass and Skeena rs., N. Brit. Col. and the neighbouring coast as fars, as Milbanke sd. The 3 main divisions are the Tsimshian of lower Skeena r., the Gitksan of upper Skeena r., and the Niska of Nass r. elosest cultural affinities of these people are with the Haida of Oueen Charlotte ids, and the Tlingit of the Alaskan coast, though their language is strikingly different and must be placed in a class by itself among the tongues of the N.W. According to their own traditions and those of neighbouring tribes, they have descended Nass and Skeena is, in comparatively recent times to the coast, displacing the Thingit.

In physical characters and social organization the Chimmesyan resemble the Haida and Tlingit, but the Kitksan, living farther inland, seem to have mixed with the Athapascan tribes, and more nearly approach their type. The Chimmesyan language is characterized by a very extensive use of adverbial prefixes principally signifying local relations, by an extreme use of reduplication, a great abundance of plural forms, and numerous temporal and modal particles (Boas). Like other coast tribes, they obtain the largest part of their food from the sea and the rivers. The annual runs of salmon on the Skeena and of eulachon into the Nass furnish them with an abundance of provisions at certain seasons. Eulachon are a great source of revenue to the Niska, the oil being in great demand all along the coast, and indispensable for the great winter potlatches. Bear, mountain goats, and other wild animals are hunted, particularly by the interior tribes. The horns of mountain goats are carved into handles for spoons used at feasts and potlatches, and are sold to other tribes for the same purpose. Although good carvers and canoe builders, the Chimmesyan are surpassed by the Haida, from whom they still purchase canoes. Their houses were often huge structures made of immense cedar beams and planks, and accommodating from 20 to 30 people. Each

was presided over by a house chief, while every family and every town had a superior chief; under him were the members of his household, his more distant clan relations, and the servants and slaves.

There were four clans or phratries: Kanhada or Raven, Lakyebo ('On the Wolf'), Lakskiyek ('On the Eagle'), and Gyispawaduweda or Grizzly Bear. Each clan comprised a great number of subdivisions, concerning which the information is conflicting, some regarding them simply as names for the people of certain towns, while others treat them as family groups, not necessarily confined to one place. If their organization was anything like that of the Haida, the subdivisions were at one time local groups; but it is probable that many of them have been displaced from their ancient sents or have settled in more than one place. This view is corroborated by the account of the Niska tribes given by Boas (10th Rep. N. W. Tribes Can., 48, 49). Their names, as far as obtainable, will be found under the separate divisional headings. Descent is reekoned in the female line. While the present culture of the Chimmesvan tribes is similar to that of the neighbouring coast peoples, there is some evidence of their recent assimilation. In most of the Tsimshian myths they appear primarily as an inland tribe that lived by hunting, and their ancestral home is described as on a prairie at the headwaters of Skeena r. This suggests an inland origin of the tribe, and the historical value of the traditional evidence is increased by the peculiar divergence of their mythological tales from those of neighbouring tribes; the most characteristic tales of the Tsimshian being more like the animal tales of the w. plateaus and of the plains than like the tales of the N. W. Coast tribes, in which the human element plays an important part. The Chimmesyan tribes have also adopted customs of their s. neighbours on the coast, more particularly the winter ceremonial with its cannibal ceremonies, which they obtained from the Bellabella. In 1902 there were reported 3,389 Chimmesyan in British Columbia; and with the 952 enumerated as forming Mr. Duncan's colony in Alaska in 1890, the total is about 4,341.

Tcinlak.--Morice, Notes on W. Dénés, 25, 1893.

Chinook jargon. The Indian trade language of the Columbia River region and the adjacent Pacific coast from California far up into Alaska. It was first brought to public notice in the early days of the Oregon fur trade, about 1810. In addition to the Indian elements it has now incorporated numerous words from various European languages, but there can be no doubt that the jargon existed as an inter-tribal medium of communication long before the advent of the whites, having its parallel in the so-called "Mobilian language" of the Gulf tribes and the sign language of the plains, all three being the outgrowth of an extensive aboriginal system of inter-tribal trade and travel. The Indian foundation of the jargon is the Chinook proper, with Nootka, Salish and other languages, to which were added, after contact with the fur companies, corrupted English, French, and possibly Russian terms. Hale, in 1841, estimated the number of words in the jargon at 250; Gibbs, in 1863, recorded about 500; Eells, in 1894, counted 740 words actually in use, although his dictionary cites 1,402, 662 being obsolete, and 1,552 phrases, combinations of mamook ('do'), yielding 209. The following table shows the share of certain languages in the jargon as recorded at various periods of its existence, although there are great differences in the constituent elements of the jargon as spoken in different parts of the country:

Words contributed	i i		
	1841	1863	1891
Nootka	18	21	23
Chinook	111	221	198
English	41	67	570
French .	34	91	153
Other languages	15	79	138

There is much local variation in the way Chinook is spoken on the Pacific coast. While it tends to disappear in the country of its origin, it is taking on new life farther N., where it is evidently destined to live for many years; but in s. E. Alaska it is little used, being displaced by English or Tlingit. This jargon has been of great service to both the Indian and the white man, and its role in the development of inter-tribal and inter-racial relations on the N. Pacific coast has been important. For works bearing on the subject see Pilling, Bibliography of the Chinookan Languages, Bull. B. A. E., 1893.

(A. F. C.)

Chee-Chinook.—Bulmer, MS, ented by Pilling, op. cit Chinook Jargon.—Cox. Columbia R, u, 134, 1831. Oregon jargon.—McKee (1851) in Sen. Ex. Doc. 4, 32d Cong., spec. sess., 169, 1853. Oregon Trade Language.—Hale, Manual of Oregon Trade Lang., 1890.

Chinook salmon. A name of the Columbia r. salmon (Oncorhynchus chouicha), more commonly known as the quinnat, and also called the tyee salmon. (A. f. c.)

Chinook wind. A name applied to eertain winds of N. w. United States and British Columbia. According to Burrows (Yearbook Dept. Agric., 555, 1901) there are three different winds, each essentially a warm wind whose effect is most noticeable in winter. that are called chinooks. There is a wet chinook, a dry chinook, and a third wind of an intermediate sort. The term was first applied to a warm s. w. wind which blew from over the Chinook camp to the trading post established by the Hudson's Bay Company at Fort George, [Astoria], Oreg. Under the influence of these chinook winds snow is melted with astonishing rapidity, and the weather soon becomes balmy and springlike. The name is derived from Chinook, the appellation of one of the Indian tribes of this region.

(A. F. C.)

Chintagottine (people 'of the woods'). A division of the Kawchodinneh, dwelling on

Mackenzie r., Northwest Territories, Canada, n. of Ft. Good Hope and between the river and Great Bear lake. Petitot often uses the term synonymously with Kawchodinneh.

Gāh-tau'-go ten'-ni.—Ross, MS notes on Tinne, B A. E. Gāh-tāw-gō tin'-ni.—Kennicott, Hare Ind MS, vocab, B A E. Gens du Poil.—Petitot, Expl du grand lac des Ours, 349, 1893. Chipewyan (pointed skins,' Cree Chibwayanawok, from chipwa 'pointed,' weyanaw 'skin,' ok plural sign: Cree name for the parkas, or shirts of many northern Athapascan tribes, pointed and ornamented with tails before and behind; hence, the people who wear them). An Athapascan linguistic group, embracing the Desnedekenade and Athabaska. called the Chipewyan proper, the Thilanottine, Etheneldeli, and Tatsanottine. The term was originally applied to the Chipewvan who assailed the Cree about lake Athabaska; subsequently the Cree and, following their example, the whites, extended it to include all Athapascan tribes known to them, the whites using it as a synonym of Tinneh, but it is now confined to the linguistic group above referred to, although the Tatsanottine, or Yellow-knives, are generally separated in popular usage. The deerskin shirts worn by these people sometimes had the queue behind only, like a poncho, and the tales told by the early travellers of a race of people living in the far N., having a tail and being in a transition stage between animal and man, had their foundation in the misrepresentation of the descriptions given by other Indians of these people with the pointed shirts. Petitot (La Mer Glaciale, 303, 1887) characterized these people as innocent and natural in their lives and manners, imbued with a sense of justice, endowed with sound sense and judgment, and not devoid of originality. Ross (Notes on the Tinné, MS., B. A. E.) gave the habitat of the Chipewyan as Churchill r., and Athabaska and Great Slave lakes. Kennicott (MS., B. A. E.) said their territory extended as far N. as Ft. Resolution on the s. shore of Great Slave lake, N. W. T., and Drake (Bk. Inds., vii, 1848) noted that they claimed from lat. 60° to 65° and from long. 100° to 110°, and numbered 7.500 in 1812. In 1718, according to Petitot, the Chipewvan were living on Peace r., which they called

Tsades, the river of beavers, the shores of lake Athabaska and the forest between it and Great Slave lake being then the domain of the Etchareottine. The Cree, after they had obtained guns from the French, attacked these latter and drove them from their hunting grounds, but were forced back again by the Chipewyan tribes. As a result of this contest the Thilanottine obtained for themselves the upper waters of Churchill r. about He-a-la-Crosse lake, the Chipewvan proper the former domain of the Etchareottine, while a part went to live in the neighbourhood of the English post of Fort Churchill, newly established on Hudson bay at the mouth of Churchill r. for trade with the Eskimo, Maskegon, and Cree. These last became known as the Etheneldeli, 'eaters of reindeer meat,' or Theyeottine, 'stone-house people,' the latter being the name that they gave their protectors, the English. In 1779 the French Canadians brought smallpox to the shores of He-a-la-Crosse and Athabaska lakes. Cree and Chipewvan were decimated by the malady. and the former, already driven back to the s. shore of lake Athabaska by the martial attitude of the Chipewyan, were now willing to conclude a lasting peace (Petitot, La Mer Glaciale, 297, 1887). There were 230 Cree at La-Crosse lake in 1873, and 600 Thilanottine Chipewyan. many of whom were half-breeds bearing French names. The Report of the Department of Indian Affairs for 1911 enumerates 1,885 Chipewyans in the Northwest Territories, Alberta, and Saskatchewan.

Chipmunk. The common name of the striped ground squirrel (Tamias striatus), of which the variants chipmonk, chipmuck, chitmunk, and others occur. The word has been usually derived from the "chipping" of the animal, but (Chamberlain in Am. Notes and Queries, III, 155, 1889) it is clearly of Algonquian origin. The word chipmunk is really identical with the adjidaumo ('tail-in-air') of Longfellow's Hiawatha, the Chippewa atchitamon, the name of the ordinary red squirrel (Sciurus hudsonicus). The Chippewa vocabulary of Long (1791) gives for squirrel chetamon, and Mrs. Traill, in her Canadian Crusoes, 1854, writes the English word as chitmunk. By folk etymology, therefore, the Algonquian word represented by the Chippewa atchitamon has become, by way of chitmunk, our familiar chipmunk. The Chippewa word signifies head first,' from atchit 'headlong,' am 'mouth,' from the animal's habit of descending trees. The Indian word applied originally to the common red squirrel and not to the chipmunk.

Chippewa (popular adaptation of Ojibway, 'to roast till puckered up,' referring to the puckered seam on their moceasins; from ojib 'to pucker-up,' ub-way 'to roast'). One of the largest tribes x, of Mexico, whose range was formerly along both shores of lake Huron and lake Superior, extending across Minnesota to Turtle mt., Manitoba. Although strong in numbers and occupying an extensive territory, the Chippewa were never prominent in history, owing to their remoteness from the frontier during the period of the colonial wars. According to tradition they are part of an Algonquian

(A. F. C.)

body, including the Ottawa and Potawatomi, which separated into divisions when it reached Mackinaw in its westward movement, having come from some point x, or x, E, of Mackinaw. Warren (Minn. Hist. Soc. Coll., v. 1885) asserts that they were settled in a large village at La Pointe, Wis., about the time of the discovery of America, and Verwyst (Missionary Labours, 1886) says that about 1612, they suddenly abandoned this locality, many of them going back to the Sault, while others settled at the w. end of lake Superior, where Father Allouez found them in 1665-67. There is nothing found to sustain the statement of Warren and Verwyst in regard to the early residence of the tribe at La Pointe. They were first noticed in the Jesuit Relation of 1640 under the name Baouichtigouin (probably Bāwa'tigōwininiwŭg, 'people of the Sault'), as residing at the Sault, and it is possible that Nicollet met them in 1634 or 1639. In 1642 they were visited by Raymbaut and Jogues, who found them at the Sault and at war with a people to the w., doubtless the Sioux. A remnant or offshoot of the tribe resided N. of lake Superior after the main body moved s. to Sault Ste. Marie, or when it had reached the vicinity of the Sault. The Marameg, a tribe closely related to, if not an actual division of the Chippewa, who dwelt along the north shore of the lake, were apparently incorporated with the latter while they were at the Sault, or at any rate prior to 1670 (Jesuit Rel., 1670). On the N. the Chippewa are so closely connected with the Cree and Maskegon that the three can be distinguished only by those intimately acquainted with their dialects and customs, while on the s. the Chippewa, Ottawa, and Potawatomi have always formed a sort of loose confederacy, frequently designated in the last century the Three Fires. It seems to be well established that some of the Chippewa have resided N. of lake Superior from time immemorial. These and the Marameg claimed the N. side of the lake as their country. According to Perrot some of the Chippewa living s. of lake Superior in 1670-99, although relying chiefly on the chase, cultivated some maize, and were then at peace with the neighbouring Sioux. It is singular that this anthor omits to mention wild rice (Zizania aquatica) among their food supplies, since the possession of wild-rice fields was one of the ehief causes of their wars with the Dakota, Foxes, and other nations, and according to Jenks (19th

Rep. B. A. E., 1900) 10,000 Chippewa in the United States use it at the present time. About this time they first came into possession of firearms, and were pushing their way westward, alternately at peace and at war with the Sioux and in almost constant conflict with the Foxes. The French, in 1692, reëstablished a trading post at Shaugawaumikong, now La Pointe, Ashland co., Wis., which became an important Chippewa settlement. In the beginning of the 18th century the Chippewa succeeded in driving the Foxes, already reduced by a war with the French, from x. Wisconsin, compelling them to take refuge with the Sauk. They then turned against the Sioux, driving them across the Mississippi, and s. to Minnesota r., and continued their westward march across Minnesota and North Dakota until they occupied the headwaters of Red r., and established their westernmost band in Turtle Mt. dist. It was not until after 1736 that they obtained a foothold w. of lake Superior. While the main divisions of the tribe were thus extending their possessions in the w., others overran the peninsula between lake Huron and lake Erie, which had long been claimed by the Iroquois through conquest. The Iroquois were forced to withdraw, and the whole region was occupied by the Chippewa bands, most of whom are now known as Missisanga, although they still call themselves Ojibwa. The Chippewa took part with the other tribes of the N.W. in all the wars against the frontier settlements to the close of the war of 1812. Those living within the United States made a treaty with the Government in 1815, and have since remained peaceful, all residing on reservations or allotted lands within their original territory Michigan, Wisconsin, Minnesota, and North Dakota, with the exception of the small band of Swan Creek and Black River Chippewa, who sold their lands in s. Michigan in 1836 and are now with the Munsee in Franklin eo., Kans.

Schoolcraft, who was personally acquainted with the Chippewa and married a woman of the tribe, describes the Chippewa warriors as equalling in physical appearance the best formed of the N. W. Indians, with the possible exception of the Foxes. Their long and successful contest with the Sioux and Foxes exhibited their bravery and determination, yet they were uniformly friendly in their relations with the French. The Chippewa are a timber people Although they have long

been in friendly relations with the whites, Christianity has had but little effect on them, owing largely to the conservatism of the native medicine-men. It is affirmed by Warren, who is not disposed to accept any statement that tends to disparage the character of his people, that, according to tradition, the division of the tribe residing at La Pointe practised cannibalism, while Father Belcourt affirms that, although the Chippewa of Canada treated the vanguished with most horrible barbarity and at these times ate human flesh, they looked upon cannibalism, except under such conditions, with horror. According to Dr. William Jones infin. 1905, the Pillagers of Bear id, assert that cannibalism was occasionally practised ceremonially by the Chippewa of Leech lake, and that since 1902 the eating of human flesh occurred on Rainy r. during stress of hunger. It was the custom of the Pillager band to allow a warrior who scalped an enemy to wear on his head two eagle feathers, and the act of capturing a wounded prisoner on the battlefield earned the distinction of wearing five. Like the Ottawa. they were expert in the use of the canoe, and in their early history depended largely on fish for food. There is abundant evidence that polygamy was common, and indeed it still occurs among the more wandering bands (Jones). Their wigwams were made of birch bark or of grass mats; poles were first planted in the ground in a circle, the tops bent together and tied, and the bark or mats thrown over them, leaving a smoke hole at the top. They imagined that the shade, after the death of the body, followed a wide beaten path, leading toward the w., finally arriving in a country abounding in everything the Indian desires. It is a general belief among the northern Chippewa that the spirit often returns to visit the grave, so long as the body is not reduced to dust. Their creation myth is that common among the northern Algonquians. Like most other tribes they believe that a mysterious power dwells in all objects, animate and inanimate. Such objects are manitus, which are ever wakeful and quick to hear everything in the summer, but in winter after snow falls, are in a torpid state. The Chippewa regard dreams as revelations, and some object which appears therein is often chosen as a tutelary deity. The Medewiwin, or grand medicine society (see Hoffman, 7th Rep. B. A. E., 1891), was formerly a powerful organization of the Chippewa, which controlled the movements of the tribe and was a formidable obstacle to the introduction of Christianity. When a Chippewa died it was customary to place the body in a grave facing w., often in a sitting posture, or to scoop a shallow cavity in the earth and deposit the body therein on its back or side, covering it with earth so as to form a small mound, over which boards, poles or birch bark were placed. According to McKenney (Tour to the Lakes, 1827), the Chippewa of Fond du Lac, Wis., practised scaffold burial, the corpse in winter being wrapped in birch bark. Mourning for a lost relative continued for a year, unless shortened by the meda or by certain exploits in war.

Authors differ as to the names and number of the Chippewa gentes, which range all the way from 11 to 23. Warren gives 21 gentes, of which the following are not included among those named by Morgan: Manumaig (Catfish), Nebauuaubay (Merman), Besheu (Lynx), Mous (Moose), Nekah (Goose), Udekumaig (Whitefish), Gyaushk (Gull). Some of them, Warren says, have but few members and are not known to the tribe at large. The Maskegon sprang from the Reindeer, Lynx, and Pike (Pickerel) gentes, which went to the x. of lake Superior when the tribe moved w. from Sault Ste. Maric. Among some of the Chippewa these gentes are associated in 5 phratries: the Awausee, Businausee, Ahahweh, Noka, and Mousonee. The Awausee phratry includes the Catfish, Merman, Sturgeon, Pike (Pickerel), Whitefish and Sucker gentes-all the Fish gentes. The Businausee phratry includes the Crane and Eagle gentes, businausee, 'ccho-maker,' being a name for the erane. The Ahahweh phratry includes the Loon, Goose, and Cormorant gentes, abahweb being a name for the loon, though the Loon gens is called Mong. Morgan makes Aliahweh distinct and called them the 'Duck' gens. The Neka (No-1)e, Bear) phratry included the B ar gentes, of which there were formerly several named from different parts of the bear's body; but these are now consolidated and no differences are recognized excepting between the common and the grizzly bears. The Mousonee phratry includes the Marten, Moose and Reindeer gentes. Mousonee seems to be the proper name of the phratry, though it is also called Waubishashe, from the important Marten gens which is said to have sprung from the incorporated remnant of the Mundua. Morgan (Anc. Soc., 166, 1877) names the

following 23 gentes: Myeengun (Wolf), Makwa (Bear), Ahmik (Beaver), Mesheka (Mud turtle), Mikonoh (Snapping turtle), Meskwadare (Little turtle), Ahdik (Reindeer), Chueskweskewa (Snipe), Ojecjok (Crane), Kakake (Pigeon hawk), [=Kagagi, Raven], Omegeeze (Bald Eagle), Mong (Loon), Ahahwch (Duck), [=Wäewäe, Swan], Sheshebe (Duck), Kenabig (Snake), Wazhush (Muskrat) Wabezhaze (Marten), Mooshkaooze (Heron), Ahwahsissa (Bullhead), Namabin (Carp [Catfish]), Nama (Sturgeon), Kenozhe (Pike) [=Kinozha, Pickerel]. Tanner gives also the Pepegewizzains (Sparrow-hawk), dummo (Water Snake), and the forked tree as totems among the Ottawa and Chippewa.

It is impossible to determine the past or present numbers of the Chippewa, as in former times only a small part of the tribe came in contact with the whites at any period, and they are now so mixed with other tribes in many quarters that no separate returns are given. The principal estimates are as follow: In 1764, about 25,000; 1783 and 1794, about 15,000; 1843, about 30,000; 1851, about 28,000. It is probable that most of these estimates take no account of more remote bands. In 1884 there were in Dakota 914; in Minnesota, 5,885; in Wisconsin, 3,656; in Michigan, 3,500 returned separately, and 6,000 Chippewa and Ottawa, of whom perhaps one-third are Chippewa; in Kansas, 76 Chippewa and Munsee. The entire number in the United States at this time was therefore about 16,000. In Canada those of Ontario including the Nipissing, numbered in 1911 about 13,000, while in Manitoba, Saskatchewan and the Northwest Territories there were about 8,000 under the same agencies. The Chippewa now (1912) probably number 35,000-38,000-21,000 in Canada and 14,000 in the United States, exclusive of about 3,000 in Michigan.

As the Chippewa were scattered over a region extending 1,000 m. from E. to w., they had a large number of villages, bands, and local divisions. Some of the bands bore the name of the village, lake, or river near which they resided, but these were grouped under larger divisions or sub-tribes which occupied certain fixed limits and were distinguished by marked differences. According to Warren there were 10 of these principal divisions: Kechegumme-wininewug, on the s. shore of lake Superior; Betonukeengainubejig, in N. Wisconsin; Munominikasheenhug, on the headwaters of St

Croix r. in Wisconsin and Minnesota; Wahsuahgunewininewug, at the head of Wisconsin r.; Ottawa Lake Men, on Lac Courte Oreilles, Wis.; Kitchisibiwininiwug, on the upper Mississippi in Minnesota; Mukmeduawininewug, or Pillagers, on Leech lake, Minn.; Sugwaundugahwininewug, N. of lake Superior; Kojejewininewug, on Rainy lake and r. about the N. boundary of Minnesota; and Omushkasug, on the x. w. side of lake Superior at the Canadian border. Besides these general divisions the following collective or local names are recognized as belonging to various settlements, bands, or divisions of the tribe in Canada: Nawash, Caradoc, Mississagi River, Spanish River, Beausoleil, Cockburn Island, Sheshegwaning, West Bay, Maganetawan, Sheguiandah, Sucker Creek, Tahgaiwinini, Wikwemikong, Parry Island, Fort William, Lake Nipigon, Long Lake, Pavs Plat, Pic River, Rama, Sarnia, Saugeen, Batchawana, Garden River, Mattawan, Dokis, Nipissing, Timagami, Manitou Rapids, Lae la Croix, Assabaska, Eagle Lake, Islington, Lac des Mille Lacs, Lac Seul, Wabigoon, Ogeschekgagamioulimy, Walpole Island, Obidgewong, Michipicoten, Bagoache, Epinette (1744), Ouasouarini, Mishtawayawininiwak, Nopeming, and Nameulini, in Ontario; Portage de Prairie in Manitoba; and Nibowisibiwininiwak in Saskatchewan.

Chippewa of Lake Nipigon. A Chippewa band officially known by this name hunting in the vicinity of lake Nipigon, N. of lake Superior in Ontario. They occupy reserves at Jackfish island, 286 acres, Grand bay, 585 acres and Gull bay, 7,500 acres; all in lake Nipegon The aggregate number in 1884 was 426, in 1901,518,in1911,406. They are connected with the band at Red Rock on Nipigon bay. (J. M.) Allenemipigous.—Denonville (1687), in Margry, Déc., vi., 52, 1886.

Chisedec. A Montagnais tribe, band, or settlement about the bay of Seven Islands on the N. shore of the gulf of St. Lawrence. The name appears to have been applied to a locality and the people of that locality, as it is stated in the Jesuit Relation of 1645 that certain savages boasted of their warlike actions "at Chichedek, country of the Bersiamites, where they had killed 7 savages," probably Eskimo. In the Relation of 1640 it is stated that in ascending the St. Lawrence, after passing the Eskimo, "we meet with the people of Chisedech and the

Bersiamites, two small nations of which we have but slight knowledge." Lescarbot says that in his time (1609) the name of the river which enters into or near the bay of Seven Islands was changed to Chi-sche-dec, an Indian appellation (Hind). A Dutch map of 1621 names the bay or locality Chichedec. It is possible, therefore, that the name applied to the Indians, who seem to have been closely connected with and possibly were a part of the Bersiamite tribe, was that of the river and referred only to a settlement. The name Ouakouiechidek, used in 1660 as that of a tribe in connection with the Outabitibek (Abitibi), if intended for the Chisedec would indicate a locality in the distant N. As the designation of a people the name dropped from history at an early date. (C. T.) Chichedec.-Dutch map (1621) in N Y Doc. Col. Hist, r, 1856. Chichedek.-Jes. Rel. 1645, 37, 1858. Chisedech.-Ibid., 1640, 34, 1858 Ouaksiechidek.-Ibid, 1660, 12, 1858 (same?) Wakouiechiwek.—Ibid, 111. index, 1858.

Chiserhonon. A former Canadian tribe subordinate to the Ottawa.—Sagard (1632), Canada, iv. 1866.

Chkungen. A Songish band at McNeill bay, s. end of Vancouver id.

Tck'uñgē'n.—Boas in 6th Rep. N. W. tribes Can., 17, 1890.

Chomaath (*Tcō'māath*). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Chomonchouaniste. A name given on several maps as that of a tribe formerly living N. w. of lake St. John, Quebec. Probably a Montagnais band or settlement.

Chemonchovanistes.—Esnauts and Rapilly map, 1777. Chomonchouanistes.—Bellin map, 1755. Chomoncouanistes.—Lotter map, ca 1755. Chomonehouanistes.—Lattré map, 1784.

Chuchunayha. A body of Okinagan, of the Similkameen group, in s. w. British Columbia; pop. 52 in 1901.

Cheh-chewe-hem.—Can. Ind. Aff. for 1883, 191. Chuchunayha.—Ibid , 1901, pt. n, 166. Chuchuwayha.—Ibid , 1894, 278.

Chuckchuqualk ('red place'). A Shuswap village on North Thompson r., Brit. Col.; pop. 128 in 1911.

Chakchuqualk.—Can. Ind. Aff. 1894, 277, 1895. Chuchuqualk.—Ibid., 244, 1902 Chukchukualk.—Ibid., 1892, 312, 1893. Chuk-chu-quaeh-u.—Ibid., 1885, 196, 1886. Chuk-chu-quaek.—Ibid., 1886, 230, 1887. North River.—Ibid., 78, 1878. North Thompson.—Ibid., 74, 1878. Tsuk-tsuk-kwäik'.—Dawson in Trans Roy Soc. Can., sec. 11, 44, 1891

Chueskweskewa ('snipe.') A gens of the Chippewa. (J. M.)

Chuga (Tc/ħ'uga, 'to go for cedar planks'). A Haida town of the Gunghetgitunai, near Houston Stewart channel and the abandoned town of Ninstints, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 277, 1905.

Chukchukts. A Squawmish village community on the left bank of Skwamish r., Brit, Col.

Tcuk'tcuk'ts.—Hill-Tout in Rep Brit A A S, 374, 1900.

Chukeu *Teuq!e-n', 'mouth of the tide'). A Haida town on the s. w. coast of Moresby id., N. w. Brit. Col., said to have been so named from an inlet in and out of which the tide rushes with great force. It was occupied by the Sakikegawai, a family of Nin-tints.—Swanton, Cont. Haida, 277, 1905.

Chutil named from a slough on which it was situated. A former village or camp of the Pilalt, a Cowichan tribe of lower Chilliwak r., Brit, Col.

Tcūti'l.-Hall-Tout in Ethnol Surv Can , 48, 1902.

Cisco. A name applied to various species of fish found in the region of the great lakes, particularly the lake herring (Coregonus artedi) and the lake noon-eye (C. hoyi). The word is said to be taken from one of the Algonquian dialects of the region, but its origin is not clear. Perhaps it is a reduction of ciscoette or siskowit.

(A. F. C.)

Cisco (Ni'ska, 'unele'). A village of the Lytton band of Ntlakyapamuk on Fraser r., 8 m. below Lytton, Brit. Col.; pop. 32 in 1902. Si'ska.—Teit in Mem. Am. Mus. Nat. Hist., r., 171, 1900. Siska Flat.—Can. Ind. Aff. for 1880, 317.

Civilization. To the aboriginal inhabitant of this continent, civilization entailed the overturning of his ancient form of government, the abolition of many of his social usages, the readjustment of his ideas of property and personal rights, and change of occupation. No community of natives was devoid of a social organization and a form of government. These varied, some tribes being much more highly organized than others see Clan and Gens), but all possessed rules of conduct which must be obeyed, else punishment would follow. Native organization was based on kinship, which carried with it the obligation of mutual protection. The tribe, wherever it chanced to be, whether resting at home in the village, wandering on the plains in pursuit of game, or scattered in quest of fish on the rivers or sea, always preserved its organization and authority intact, whereas the organization which civilization imposes on the native is based on locality, those living within certain limits being, regardless of relationship, subject to common laws and having equal responsibilities; mere kinship warrants no claim, and the family is differently constituted. In the tribal family husband and wife very often must belong to different units. According to the custom of the particular tribe the children trace descent through their father and belong to his gens, or through their mother and are members of her Medern civilization demands the abrogation of the clan or gens, and children must inherit from both parents and be subject to their authority, not that of a clan or gens.

Most of the common occupations of tribal life are wiped out by civilization. Inter-tribal wars have ceased, and war honours are no longer possible; the herds of buffalo and other animals are gone, and with them the hunter, and the makers of bows, arrows, spears, and other implements of the chase. The results of generations of training are of little avail to the civilized male Indian.

Under tribal conditions woman held, in many cases, a place in the management of tribal affairs. Upon her devolved partly the cultivation of the fields, the dressing of skins, the making of clothing, the production of pottery and baskets, the preparing of food, and all that went to conserve the home. Civilization puts an end to her outdoor work and consigns her to the kitchen and the washtub, while the white man's factories supply cloth, clothing, pots, pans, and baskets, for none of the native industries can survive in competition with machinery. Woman, moreover, loses her importance in public affairs and the independent owner-hip of property that was her right by tribal law. No group of peoples on the continent were destitute of religious beliefs or of rites and ceremonies expressive of them. These beliefs were based on the idea that man, in common with all created things, was endowed with life by some power that pervaded the universe. The methods of appealing to this power varied with the environment of the peoples, but the incentive was the desire for food, health, and long life, while the rites and ceremonies inculcated certain ethical relations between man and man. As among all races, priesteraft overlaid many of the higher thoughts and

teachings of native religion and led to unworthy practices. Nevertheless the breaking down of the ancient forms of worship through the many changes and restrictions incident to the settlement of the country has caused the natives much distress and mental confusion. It is not surprising that it has been a slow and difficult process for the aborigines to accept and conform to such radical changes of organization, enstoms, and beliefs as are required by civilization. Yet many have done so, showing a grasp of mind, a power to apprehend the value of new ideals, and a willingness to accept the inevitable, and evincing a degree of courage, self-restraint, and strength of character that can not fail to win the admiration of thinking men. The younger generation, born under the new conditions, are spared the abrupt change through which their fathers had to struggle. Wherever the environment permits. the employments of the white race are now those of the Indian. In one branch of the Eskimo change has come through the introduction of the reindeer. Already the Indian is to be found tilling his farm, plying the trades, employed on the railroads, working in mines and logging camps, and holding positions of trust in banks and mercantile houses. Indians, of pure race or of mixed blood, are practising as lawyers, physicians, and clergymen; they have made their way in literature and art, and are serving the public in national and state offices, from that of road master to that of legislator. The school, the missionary, and the altered conditions of life are slowly but surely changing the Indian's mode of thought as well as his mode of living, and the old life of his tribe and race is becoming more and more a memory and a tradition.

Clahoose. A Salish tribe on Toba inlet, Brit. Col., speaking the Comox dialect; pop. 68 in 1911.

Clahoose.—Mayne, Brit Col., 243, 1862 Clayhoosh.
—Whymper, Alaska, 49, 1869 Cle-Hure.—Kane,
Wand, in N. A., app., 1859. Cle-Huse.—Schoolcraft,

for 1874, 142. Klahose.—Ibid., 1891, map. Klahous.
—Downie in Mayne, Brit Col., app., 449, 1862 (name of
inlet). Klashoose.—Can. Ind. Aff. for 1874, 144.
Tlahoos.—Telmie and Dawson, Vocabs, Brit. Col.,
1198, 1884. Tlahū's.—Boas, M8, B. A. E., 1887.

Clan and Gens. An American Indian clan or gens is an intra-tribal exogamic group of persons either actually or theoretically consanguine, organized to promote their social and political welfare, the members being usually denoted by a common class name derived

generally from some fact relating to the habitat of the group or to its usual tutelary being. In the clan lineal descent, inheritance of personal and common property, and the hereditary right to public office and trust are traced through the female line, while in the gens they devolve through the male line. Clan and gentile organizations are by no means universal among the North American tribes: and totemism, the possession or even the worship of personal or communal totems by individuals or groups of persons, is not an essential feature of clan and gentile organizations. The terms clan and gens as defined and employed by Powell denote useful discriminations in social and political organization, and, no better names having been proposed, they are used here practically as defined by Powell.

Consanguine kinship among the Iroquoian and Muskhogean tribes is traced through the blood of the woman only, and membership in a clan constitutes citizenship in the tribe, conferring certain social, political, and religious privileges, duties, and rights that are denied to aliens. By the legal fiction of adoption the blood of the alien might be changed into one of the strains of Iroquoian blood, and thus citizenship in the tribe could be conferred on a person of alien lineage. The primary unit of the social and political organization of Iroquoian and Muskhogean tribes is the ohwachira, a Mohawk term signifying the family, comprising all the male and female progeny of a woman and of all her female descendants in the female line and of such other persons as may be adopted into the ohwachira. An ohwachira never bears the name of a tutelary or other deity. Its head is usually the eldest woman in it. It may be composed of one or more firesides, and one or more ohvachiras may constitute a elan. The members of an ohwachira have (1) the right to the name of the clan of which their ohwachira is a member; (2) the right of inheriting property from deceased members; and (3) the right to take part in councils of the ohwachira. The titles of chief and sub-chief were the heritage of particular ohwachiras. In the development of a clan by the coalescence of two or more actually or theoretically related ohwachiras, only certain ohwachiras obtained the inheritance and enstody of the titles of and consequently the right to choose chief and subchief. Very rarely were the offspring of an adopted alien constituted an ohwachira having chiefship or subchiefship titles. The married women of childbearing age of such an ohwa-

chira had the right to hold a council for the purpose of choosing candidates for chief and subchief of the clan, the chief matron of one of the ohwachiras being the trustee of the titles, and the initial step in the deposition of a chief or sub-chief was taken by the women's council of the ohwachira to whom the title belongs. There were clans in which several ohwachiras possessed titles to chiefships. The Mohawk and Oneida tribes have only 3 clans, each of which, however, has 3 chiefships and 3 subchiefships. Every ohwachira of the Iroquois possessed and worshiped, in addition to those owned by individuals, one or more tutelary deities, called oiaron or ochinagenda, which were customarily the charge of wise women. An alien could be taken into the clan and into the tribe only through adoption into one of the ohwachiras. All the land of an ohwachira was the exclusive property of its women. The ohwachira was bound to purchase the life of a member who had forfeited it by the killing of a member of the tribe or of an allied tribe, and it possessed the right to spare or to take the life of prisoners made in its behalf or offered to it for adoption.

The clan among the Iroquoian and the Muskhogean peoples is generally constituted of one or more ohwachiras. It was developed apparently through the coalescence of two or more ohwachiras having a common abode. Amalgamation naturally resulted in a higher organization and an enlargement and multiplication of rights, privileges, and obligations. Where a single oloraclica represents a clan it was almost always due to the extinction of sister ohwachiras. In the event of the extinction of an ohwachira through death, one of the fundamental rules of the constitution of the League of the Iroquois provides for the preservation of the titles of chief and sub-chief of the ohwachira, by placing these titles in trust with a sister ohwachira of the same clan, if there be such, during the pleasure of the League council. The following are some of the characteristic rights and privileges of the approximately identical Iroquoian and Muskhogean clans: (1) The right to a common clan name, which is usually that of an animal, bird, reptile, or natural object that may formerly have been regarded as a guardian deity. (2) Representation in the council of the tribe. (3) Its share in the communal property of the tribe. (4) The right to have its elected chief and sub-chief of the clan confirmed and installed by the tribal council, among the Iroquois in later times by the League

council. (5) The right to the protection of tle tribe. (6) The right to the titles of the chiefships and sub-chiefships hereditary in its ohwachiras. (7) The right to certain songs, chants, and religious observances. (8) The right of its men or women, or both together, to hold eouncils. (9) The right to certain personal names, to be bestowed upon its members. (10) The right to adopt aliens through the action of a constituent ohwachira. (11) The right to a common burial ground. (12) The right of the child-bearing women of the ohwachiras in which such titles are hereditary to elect the chief and sub-chief. (13) The right of such women to impeach and thus institute proceedings for the deposition of chiefs and sub-chiefs. (14) The right to share in the religious rites, ceremonies, and public festivals of the tribe. The duties incident to clan membership were the following: +t+ The obligation not to marry within the clan, formerly not even within the phratry to which the clan belonged; the phratry being a brotherhood of clans, the male members of it mutually regarded themselves as brothers and the female members as sisters. (2) The joint obligation to purchase the life of a member of the clan which has been forfeited by the homicide of a member of the tribe or of an allied tribe. (3) The obligation to aid and defend fellow-members by supplying their needs, redressing their wrongs and injuries, and avenging their death. (4) The joint obligation to obtain prisoners or other persons to replace members lost or killed of any ohwachira of a clan to which they are related as father's clansmen, the matron of such ohwachira having the right to ask that this obligation be fulfilled. All these rights and obligations, however, are not always found together.

The clan or gentile name is not usually the common name of the animal or object after which the clan may be called, but denotes some salient feature or characteristic or the favourite haunt of it, or may be an archaic name of it. One of the Seneca clans is named from the deer, eommonly earlied $neoge_{\chi}$, 'cloven foot', while the clan name is hadiniongwaiiu', 'those whose nostrils are large and finelooking.' Another Seneca clan is named from the sandpiper, which has the onomatopætic name dowisdowi', but the clan name is hodi'nesiio', 'those who come from the clean sand,' referring to the sandpiper's habit of running along the water's edge where the sand is washed by the waves. Still another clan is called after the turtle, commonly named ha'nowa from its earapace, but the clan designation is hadiniadéñ', 'they have upright necks.' The number of clans in the different Iroquois tribes varies. The smallest number is 3, found in the Mohawk and Oneida, while the Seneca have 9, the Onondaga 8, and the Wyandot 12.

Clans and gentes are generally organized into phratries and phratries into tribes. Usually only 2 phratries are found in the modern organization of tribes. The Huron and the Cayuga appear formerly to have had 4, but the Cayuga to-day assemble in 2 phratries. One or more clans may compose a phratry. The clans of the phratries are regarded as brothers one to another and cousins to the members of the other phratry, and are so addressed. The phratry has a certain allotted space in every assembly, usually the side of the fire opposite to that held by the other phratry. A clansman in speaking of a person of the opposite phratry may also say "He is my father's clansman," or "He is a child whom I have made," hence the obligation resting on members of a phratry to "find the word" of the dream of a child of the other phratry. The phratry is the unit of organization of the people for ceremonial and other assemblages and festivals, but as a phratry it has no officers; the chiefs and elders of the clans composing it serve as its directors.

The government of a clan or gens, when analytically studied, is seemingly a development from that of the *ohwachira*. The government of a tribe is developed from that of the clan or gens, and a confederation, such as the League of the Iroquois, is governed on the same principle.

The simpler unit of organization surrendered some of its autonomy to the higher unit so that the whole was closely interdependent and cohesive. The establishment of each higher unit necessarily produced new duties, rights, and privileges.

According to Boas the tribes of the N. W. coast, as the Tlingit, Haida, Tsimshian, Heiltsuk, and Kitimat, have animal totems, and a "maternal organization" in which the totem groups are exogamic. The Kwakiutl, however, although belonging to the same stock as the last two, do not have animal totems, because they are in "a peculiar transitional stage." The Kwakiutlis exogamic. In the N. portion of this coast area a woman's rank and privileges always descend to her children. As the crest, or totemic emblem, descends in the female line through marriage among the Kwakiutl, a

somewhat similar result has been brought about among them. Among the Haida and the Tlingit there are respectively 2 phratries; the Tsimshian have 4, the Heiltsuk 3, and the Kitimat 6. The tribes of the s. portion of the coast, according to the same authority, are "purely paternally organized." Natives do not always consider themselves descendants of the totem, but rather of some ancestor of the clan who obtained the totem. An adopted remnant of a tribe may sometimes constitute a clan.

(J. N. B. H.)

Clayoquot. A Nootka tribe living on Meares id. and Torfino inlet, Clayoquot sd., Vancouver id., pop. 209 in 1911; having become reduced from about 1,100 in 67 years. Claiakwat.-swan, MS, B. A. E. Clo-oose. A Nitinat village at the mouth of Suwany r., s. w coast of Vancouver id.; pop. 80 in 1902.—Can. Ind. Aff., 264, 1902.

Clothing. The tribes of northern America belong in general to the wholly clothed peoples, the exceptions being those inhabiting the warmer regions of s. United States and the

Pacific coast, who were semi-clothed. Tanned skin of the deer family was generally the material for clothing throughout the greater portion of the country, and dressed fur skins and pelts of birds sewed together were invariably used by the Eskimo. The hide of the buffalo was worn for robes by tribes of the plains, and even for dresses and leggings by older people, but the leather was too harsh for clothing generally, while elk or moose skin, although soft, was too thick. Fabrics of bark, hair, fur, mountainsheep wool, and feathers were made in the N. Pacific, Pueblo, and southern regions, and cotton has been woven by the Hopi from ancient times. Climate, environment, elevation, and oceanic currents determined the materials used for clothing as well as the demand for clothing. Sinew from the tendons of the larger animals was the usual sewing material, but fibres of plants, especially the agave, were also employed. Bone awls were used in sewing; bone needles were rarely employed and were too large for The older needlework is of excepfine work. tionally good character and shows great skill with the awl. Unlike many other arts, sewing was practised by both sexes, and each sex usually made its own clothing. The typical and more familiar costume of the Indian man. was of tanned buckskin and consisted of a shirt, a breechcloth, leggings tied to a belt or waist-strap, and low moceasins. The shirt, which hung free over the hips, was provided with sleeves and was designed to be drawn over the head. The woman's costume differed from that of the man in the length of the shirt, which had short sleeves hanging loosely over the upper arm, and in the absence of the breechcloth. Women also wore the belt to confine the garment at the waist. Robes of skin, woven fabrics, or of feathers were also worn, but blankets (q.v.) were substituted for these later. The costume presented tribal differences in cut, colour, and ornamentation. The free edges were generally fringed, and quill embroidery and beadwork, painting, scalp-locks, tails of animals, feathers, claws, hoofs, shells, etc., were applied as ornaments or charms. The typical dress of the Pueblo Indians is generally similar to that of the Plains tribes, except that it is made largely of woven fabrics.

The Alaskan Eskimo costume also is quite similar, but the woman's coat is provided with a hood, and legging and moccasin are made into one garment, while the men wear breeches and boots. Besides the heavy fur outer clothing, under-coat, under-trousers, and stockings

(the latter in s. Alaska of twined grass) are found necessary by the Eskimo as a protection from the cold. They also make waterproof coats of the intestines of seal and walrus, which are worn on hunting trips in the kaiak. In s. Alaska a long outer dress without hood, made of squirrel pelts, is worn, a costume indicating Russian influence. In general the Eskimo costume was more complete than that of any tribes within the United States. The British Columbia tribes made twined robes of frayed cedar bark and sagebrush bark, and bordered them with otter fur. The Chilkat of s. E. Alaska still weave remarkable ceremonial blankets of mountain-goat wool over a warp of twisted wool and bark.

Among the Pacific Coast tribes, and those along the Mexican border, the Gulf, and the Atlantic coast, the customary garment of women was a fringe-like skirt of bark, cord, strung seeds, or peltry, worn around the foins. In certain seasons or during special occupations only the loin band was worn. For occasional use in cooler weather a skin robe or cape was thrown about the shoulders, or, under exceptional conditions, a large robe woven of strips of rabbit skin. Ceremonial costume was much more elaborate than that for ordinary wear. Moccasins and leggings were worn throughout much of this area, but in the warmer parts and in California their use was unusual. Some tribes near the Mexican boundary wear sandals, and sandal-wearing tribes once ranged widely in the S. W. Those have also been found in Kentucky caverns. Hats, usually of basketry, were worn by many Pacific Coast tribes. Mittens were used by the Eskimo and other tribes of the far N. Belts of various materials and ornamentation not only confined the clothing but supported pouches, trinket bags, paint bags, etc. Larger pouches and pipe bags of fur or deerskin, beaded or ornamented with quillwork, and of plain skin, netting, or woven stuff, were slung from the shoulder. Neeklaces, earrings, charms, and bracelets in infinite variety formed a part of the clothing, and the wrist-guard to protect the arm from the recoil of the bow-string was general.

Shortly after the advent of whites, Indian costume was profoundly modified over a vast area of America by the copying of European dress and the use of traders' stuffs. Knowledge of pre-historic and early historic primitive textile fabrics has been derived from impressions of fabrics on pottery and from fabrics themselves that have been preserved by char-

ring in fire, contact with copper, or protection from the elements in caves.

A synopsis of the costumes worn by tribes living in the 11 geographical regions of northern America follows. The list is necessarily incomplete, for on account of the abandonment of tribal costumes the data are chiefly historical.

- (1) Eskimo (Northern). Men: Shirt-coat with hood, trousers, half or full boots, stockings, mittens, Women: Shirt-coat with large hood, trousers or legging-moccasins, belt and mittens, needle-case, workbag, etc. (Southern.) Men: Robe, gown, trousers, boots, hood on gown or cap.
- (2) Athapascan (Mackenzic and Yukon). Men: Shirt-coat, legging-moccasins, breecheloth, hat and hood. Women: Long shirt-coat, legging-moccasins, belt.
- (3) ALGONQUIAN-IROQUOIS (Northern). Men: Robe, shirt-coat, long coat, trousers, leggings, moccasins, breecheloth, turban.
- (Western.) Men: Robe, long dress-shirt, long leggings, moccasins, bandoleer bag. Women: Long dress-shirt, short leggings, moccasins, belt. (Arctic.) Men: Long coat, open in front, short breeches, leggings, moccasins, gloves or mittens, cap or head-dress. Women: Robe, shirt-dress, leggings, moccasins, belt, cap, and sometimes a shoulder mantle.
- (5) Plains. Men: Buffalo robe, shirt to knees or longer, breechcloth, thigh-leggings, moccasins, head-dress. Women: Long shirtdress with short ample cape sleeves, belt, leggings to the knees, moccasins.
- (6) NORTH PACIFIC (Chilkat). Men: Blanket or bark mat robe, shirt-coat (rare), legging-moccasins, basket hat. Women: Tanned skin shoulder-robe, shirt-dress with sleeves, fringed apron, leggings(?), moccasins, breechcloth(?).

(W. H.)

Clubs. Every tribe in America used clubs, but, after the adoption of more effectual weapons, as the bow and the lance, clubs became in many cases merely a part of the costume, or were relegated to ceremonial, domestic, and special functions. There was great variety in the forms of this weapon or implement. Most clubs were designed for warfare. Starting from the simple knobstick, the elaboration of the war-club may be followed in one line through the straight-shafted maul-headed club of the Zuñi, Pima, Mohave, Paiute, Kickapoo, Kiowa, and Oto, to the slungshot club of other Pueblos, the Apache, Navaho, Ute, Oto, and Sioux, to the club with a fixed stone head of the Ute, Shoshoni, Comanche, Kiowa, and the Siouan tribes. Another line begins with the carved, often flattened, club of the typical pueblos, the Zuñi and Hopi, and includes the musket-shaped club of the northern Sioux, and the Sauk and Fox and other Algonouian tribes, and the flat, curved club with a knobbed head (Alg. pogamoggan, Fr. cassetête : belonging to some Sioux, and to the Chippewa. Menominee, and other timber Algonquians. Clubs of this type are often set with spikes, lanceheads, knife-blades, or the like, and the clk horn with sharpened prongs belongs to this class.

The Plains tribes and those of the N. forest country furnish many examples of dangerous looking ceremonial clubs of this character. There is, however, archæological evidence that rows of flint splinters or horn points were set in clubs by the Iroquois and the Indians of North Carolina, forming a weapon like the Aztec maquahuitl (Morgan, League of Iroquois, 359, 1851).

A series of interesting paddle-shaped clubs, ancient and modern, often with carved handles, are found in the culture area of the Salishan tribes. They are from 18 to 24 in, long, made of bone, stone, wood, and, rarely, copper. Shorter clubs, that could be concealed about the person, were also used. Le Moyne figures paddle-shaped clubs that were employed by Floridian tribes which in structure and function suggest a transition toward the sword.

Outside the Pueblos few missile clubs are found. Most Indian clubs are furnished with a thong for the wrist, and others have pendants, often a eow's tail, a bunch of hawk or owl feathers, or a single eagle feather.

The stone-headed clubs were usually made by paring thin the upper end of a wooden staff, bending it round the stone in the groove, and eovering the withe part and the rest of the staff with wet raw-hide, which shrank in drying and held all fast. In many cases, especially on the plains, the handle was inserted in a socket bored in the stone head, but this, it would seem, is a modern process. The head of the slungshot club was a round or oval stone, entirely inclosed in rawhide, and the handle was so attached as to leave a pliable neck, 2 or 3 in, long, between the head and the upper end of the handle, also inclosed in rawhide.

The heads of the rigid clubs were of hard stone, grooved and otherwise worked into shape, in modern times often double-pointed and polished, catlinite being sometimes the material. The perminean mail had only one working face, the other end of the stone being capped with rawhide. The hide-working mail followed the form of the typical club, but was usually much smaller.

The tribes of British Columbia and s. E. Alaska made a variety of clubs for killing slaves, enemies, salmon, seal, etc., and for ceremony. These clubs were usually handsomely carved, inlaid, and painted. The Eskimo did not make clubs for war, but a few clublike mallets of ivory and deer-horn in their domestic arts.

Mauls resembling clubs, and which could be used as such on occasion, were found among most tribes, the common form being a stone set on a short handle by means of rawhide, employed by women for driving stakes, beating bark and hide, and pounding penmican.

Ceremonial clubs and batons were used. though few specimens of these now exist. The chief man of the Mohave carried a potatomasher-shaped club in battle, and clubs of similar shape have been found in caves in s. Arizona. The Zuñi employ in certain ceremonies huge batons made of agave flower stalks, as well as some of their ordinary club weapons, and in the New-fire ceremony of the Hopi a priest earries an agave-stalk club in the form of a plumed serpent (Fewkes). Batons were often carried as badges of office by certain officers of the Plains tribes and those of the N. W. coast. Captain John Smith describes clubs 3 ells long. The coup stick was often a ceremonial club. It is noteworthy that the parrying club was not known in America.

Commerce. Evidences of widespread commerce and tude media of exchange in North America are found in ancient shell-heaps, mounds, and graves, the objects having passed from hand to hand often many times. Overland, this trade was done on foot, the only domestic animal for long-distance transportation being the dog, used as a pack beast and for the travois and the sled. In this respect the north temperate zone of America was in marvellous contrast with the same latitudes of the Old World, where most of the commercial animals originated.

The deficiency in the means of land commerce was made up by the waters. Natural conditions in the section of the New World along the Arctic circle and on Hudson bay, continuously inhabited by the homogeneous Eskimo, in the inlets of the Atlantic coast, in the neighbouring Caribbean area, and in the archipelagoes of British Columbia and s. E. Alaska, encouraged and developed excellent water craft for commerce. Better still by far for the trader were the fresh-water rivers, navigable for canoes, of the Yukon, Mackenzie, St. Lawrence, Atlantic, Mississippi, and Columbia systems, in which neighbouring waters are connected for traffic by easy portages, a condition contrasting with that of Siberia, whose great rivers all end in frozen tundras and arctic wastes.

The North American continent is divided into culture areas in a way conducive to primitive commerce. Certain resources of particular areas were in universal demand, such as copper, jade, soapstone, obsidian, micapaint-stones, and shells for decoration and money, as dentalium, abalone, conus, olivella, and clam shells.

The Eskimo, to whom the Arctic area belonged, carried on extensive commerce among themselves and with the western Athapascan tribes and the Algonquian tribes to the E. They knew where soapstone for lamps, jade for blades, and driftwood for sleds and harpoons could be found, and used them for traffic. They lived beyond the timber line; hence the Athapascans brought vessels of wood and baskets to trade with them for oil and other arctic products.

The Mackenzie-Yukon tribes were in the lands of the reindeer and of soft fur-bearing animals. These they traded in every direction for supplies to satisfy their needs (see Furtrade). The Russians in Alaska and the Hudson's Bay Co. stimulated them to the utmost and taught them new means of capture, including the use of firearms. Remnants of Iroquois bands that were employed in the fur trade have been found on Rainy lake, on Red and Saskatchewan rs., even as far n. as the Polar sea and as far w. as the Siksika of the plains and the Takulli of British Columbia (Havard in Smithson, Rep., 318, 1879; Chamberlain in Am. Anthrop., vi. 459, 1904; Morice, N. Int. Brit. Col., 1904.) See Caughnawaaa.

The Atlantic slope from Labrador to Georgia was the special home of Algonquian and froquoian tribes. Inland were found deer, bears, foxes, and turkeys. The salt-water bays and inlets not only supplied mollnses, erustaceans, fish, and aquatic birds in vast numbers, but stimulated easy transportation and commerce. The Great lakes and the St. Lawrence, moreover, placed the tribes about them in touch with the copper mines of lake Superior. Through this enlarging influence the Iroquois were ennobled and became the leading family of this area. A medium of exchange was invented in the shape of wampum, made from clam shells. The mounds of the s. portion of this slope reveal artifacts of copper, obsidian, and shell, which must have been transported commercially from afar along the water highways in birch-bark canoes and dugouts.

The Mississippi area was a vast receiving depot of commerce, having easy touch with other areas about it by means of portages between the headwaters of innumerable

streams; with the Chesapeake bay, the Great lakes, and the Mackenzie basins through the Ohio and the main stream; with the E. Rockies and Columbia r. through the Missouri and other great branches of the Mississippi in the w. Buffalo skins and horns were demanded by the Pueblos, while pennnican and beads enlivened trade. The mounds reveal dentalium shells from the Pacific, obsidian from the Rockies, copper from lake Superior, pipes of catlinite, and black steatite from Minnesota and Canada, and objects from the Atlantic.

The Pacific Coast tribes occupied two areas that present quite opposite conditions in regard to commercial activity. From mount St. Elias s. to California, trade was active, transportation being effected in excellent dugout canoes; the waters and the lands offered natural products easy of access that stimulated barter. Copper, horn for spoons, eulachon, and Chilkat blankets were exchanged for abalone and dentalium shells, and baskets were bartered for other baskets and the teeth of a large southern shark, also for the furs of the interior Indians. The Haida regularly visited their Tsimshian neighbours, to exchange canoes for eulaehon oil, wood suitable for boxes, and mountain-goat horn, while the Tlingit were intermediaries in diffusing the copper that came from the N. On the Columbia r. camass and moose were articles of commerce.

Commerce was greatly stimulated through the coming of the whites by the introduction of domestic animals, especially horses, mules, donkeys, cattle, sheep, goats and poultry; by the vastly enlarged demand for skins of animals, ivory, fish, and native manufactures; by offering in exchange iron tools and implements, woven goods, and other European products desired by the Indians. The effects of this stimulated trade were profound, both for good and evil. Indians were drawn far from home. The Iroquois, for example, travelled with the fur traders into N. W. Canada.

Many kinds of Indian handiwork have entered into world commerce. Money is lavished on fine basketry, beadwork, wampum belts, ivory carvings, horn spoons, wooden dishes, silver work, costumes, feather and quill work, and especially Navaho blankets and Hopi and Zuñi textiles. In ancient times

there were inter-tribal laws of commerce, and to its agents were guaranteed freedom and safety.

(O. T. M.)

Comox. An important coast Salish tribe on both sides of Discovery passage, between Chancellor channel and cape Mudge, Brit. Col. Their proper name, Catlo Itx, has been taken by Boas as the designation of one dialect of coast Salish, including, besides this, the Clahoose, Eeksen, Kakekt, Kaake, Tatpoos, Homalko, and Sliammon. Pop. of the tribe 38 in 1911; of those speaking the dialect, about 300.

Catlo'Itq.—Boas in 5th Rep. N. W. Tribes of Can., 10, 1889. Commagsheak.—Scouler (1840) in Jour. Ethnol. Soc. Lond., 1, 234, 1848. Co-moux.—School-craft, Ind. Tribes, v, 488, 1855. Comox.—Mayne. Brit. Col., 181, 1861. Comuxes.—Grant in Jour. Roy. Geog. Soc., 293, 1857. K'ō'moks.—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Ko-mookhs.—Gibbs in Cont. N. A. Ethnol. t, 269, 1877. Komux.—Sproat, Savage Life, 31, 1868. Kowmook.—Tolmie and Dawson, Vocabs. Brit. Col., 1208, 1884. S'komook.—Gibbs in Cont. N. A. Ethnol., t, 269, 1877. (Uguultas name). S'tlaht-tohtlt-hu.—Ibid. (own name). Xōmoks.—Boas, MS., B. A. E., 1887 (Lekwiltok name).

Confederation. A political league for offense and defense was sometimes formed by two or more tribes, who entered into a compact or formal statement of principles to govern their separate and collective action. A looser, less formal, and less cohesive alliance of tribes was sometimes formed to meet some grave temporary emergency. The unit of a confederation is the organized tribe, just as the clan or gens is the unit of the tribe. The confederation has a supreme council composed of representatives from the several contracting tribes of which it is composed. The tribes forming a confederation surrendered to the league certain powers and rights which they had exercised individually. The executive, legislative, and judicial functions of the confederation were exercised by the supreme couneil through instruments appointed in the compact or afterward devised. Every tribe of the confederation was generally entitled to representation in the supreme federal council. The chiefs of the federal council and the sub-chiefs of each tribe constituted the local council of the tribe. The confirmation of officials and their installation were functions delegated to the officers of the confederation. The supreme federal council had practically the same officers as a tribal council, namely, a speaker, firekeeper, door-keeper, and wampum-keeper or

2 GEORGE V., A. 1912

annalist. In the Iroquoian confederation the original 5 tribes severally had a supreme warchief, the name and the title of whom were hereditary in certain specified clans. The supreme federal council, sitting as a court without a jury, heard and determined causes in accordance with established principles and rules. The representation in the council of the Iroquois confederation was not based on the clan as its unit, for many clans had no representative in the federal council, while others had several. The supreme federal council of this confederation was organized on the basis of tribal phratries or brotherhoods of tribes, of which one phratry acted as do the presiding judges of a court sitting without a jury, having power to confirm, or on constitutional or other grounds to reject, the votes or conclusions of the two other phratries acting individually, but having no right to discuss any question beyond suggesting means to the other phratries for reaching an agreement or compromise, in the event that they offer differing votes or opinions, and at all times being jealously careful of the customs, rules, principles, and precedents of the council, requiring procedure strictly to conform to these where possible. The constituent tribes of the Iroquois confederation, the Mohawk, Oneida, Onondaga, Cayuga, and Seneca, constituted three tribal phratries, of which the Mohawk and Seneca formed the first, the Oneida and Caynga the second, and the Onondaga the third; but in ceremonial and festal assemblies the last tribe affiliated with the Mohawk-Seneca phratry.

Among the looser confederations, properly alliances, may be mentioned that of the Chippewa. Ottawa, and Potawatomi; the 7 council fires of the Dakota; and the alliance of the tribes of Virginia and Maryland called the Powhatan confederacy. To these may be added the loose Caddo confederacy, which, like the others, was held together largely by religious affiliation. The records are insufficient to define with accuracy the political organization of these groups.

Cook Ferry. A body of Ntlakyapamuk, probably belonging to the Nicola band, under the K daloops agency, Brit. Col.; pop. 282 in 1882, 183 in 1911.—Can. Ind. Aff. Reps.

Cooptee. A Nootka winter village near the head of Nootka sd., w. coast of Vancouver id. Coopte. C.a. Ind. Aff. Rep. 1902, app., 83. Cooptee. Janut, Narr., 104, 1849.

Copper. Copper had come into very general assemining the tribes N. of Mexico before the arrival of the white race in the Mississippi valley and the region of the Great lakes. The reign of stone, which in early times had been undisputed, was beginning to give way to the dominion of metal. It is probable that copper came into use in the N. as a result of the discovery of nuggets or small masses of the native metal among the debris deposited over a large area s. of the lakes by the sheets of glacial ice that swept from the N. across the fully exposed surface of the copper-bearing rocks of the lake Superior region.

These pieces of copper were at first doubtless treated and used as were stones of similar size and shape, but the peculiar qualities of the metal must in time have impressed themselves upon the acute native mind, and implement 8 were shaped by hammering instead of by pecking. At first the forms produced would be much the same as those of the stone implements of the same people, but after a while the celts, hatchets, awls, knives, drills, spearheads, ete., would take on new forms, suggested by the peculiar properties of the material, and other varieties of implements would be evolved. The metal was too soft to wholly supersede stone as a material for the manufacture of implements, but its pleasing colour and its capaeity for taking a high polish must be verled at an early date to its use for personal equaments, and on the arrival of the whites it was in great demand for this purpose over nearly the entire country.

A knowledge of the discovery of deposits of copper in the lake region passed in course of time beyond the local tribes, and it is not unlikely that it extended to Mexico, where the metallurgic arts had made remarkable headway and where the red metal was in great demand. That any extensive trade sprang up between the N. and the far S., however, seems improb-

able, since such communication would have led inevitably to the introduction of southern methods of manipulation among the more advanced tribes of the Mississippi valley and the Gulf coast and to the frequent presence of peculiarly Mexican artifacts in the burial mounds.

There can be no question that the supply of copper used by the tribes of E. United States came mainly from the Lake Superior region, although native copper in small quantities is found in Virginia, North Carolina, Tennessee, Arizona, New Mexico, and Nova Scotia. It is not at all certain, however, that the natives utilized these latter sources of supply to any considerable extent before the coming of the whites. There seems to be little doubt that copper was somewhat extensively used in Alaska before the arrival of Europeans. It is possible that a small percentage of the copper found in mounds in the Southern states came from Cuba and Mexico, but there is no way of satisfactorily determining this point. The Lake Superior copper can often be distinguished from other copper by the dissemination through it of minute particles of silver.

The processes employed in shaping copper were at first probably confined to cold hammering and grinding, but heat was employed to facilitate hammering and in annealing, and possibly rude forms of swedging in moulds and even of casting were known, although little evidence to this effect has vet been obtained. It appears that in dealing with thin sheets of the metal, which were readily made by hammering with stone implements and by grinding, pressure with suitable tools was employed to produce repoussé effects, the sheet being laid for treatment on a mould of stone or wood, or on a pliable pad or a plastic surface. Certain objects of sheet copper with repoussé designs obtained from Indian mounds in Illinois, Onic. Georgia, and Florida have attracted much attention on account of the very skilful treatment shown. That primitive methods of manipulation well within the reach of the aborigines are adequate to accomplish similar results is shown, however, by experiments conducted by Cushing.

The very considerable progress of the native metallurgist in copper working is well shown by examples of plating recovered from the mounds in Ohio and elsewhere. A head-dress belonging to a personage of importance buried in one of the Hopewell mounds, near Chillicothe, Ohio, found by Moorehead, consists of a

high frontal piece made of sheets of copper covered with indented figures, out of which rise a pair of antlers imitating those of a deer. The antlers are formed of wood and neatly covered or plated with sheet copper (Putnam). Other examples from the same source are spoollike objects, probably ear ornaments, formed of thin sheets of copper over a wood base, and most skilfully executed. Willoughby has very effectively imitated this work, using a bit of native copper with boulders and pebbles from the beach as tools. Of the same kind of workmanship are numerous specimens obtained by Moore from mounds on St. Johns r., Fla., the most interesting being jaw-bones of wolves plated with thin sheets of copper. Other objects similarly treated are dises of limestone and beads of shell, bone, wood, and possibly other materials.

A popular belief exists that the Egyptians and other ancient nations, including the Mexicans and Peruvians, had a process for hardening copper, but there is no real foundation for this belief. The reputed hardened product is always an alloy. No specimen of pure copper has been found which has a greater degree of hardness than can be produced by hammering.

Although copper probably came into use among the northern tribes in comparatively recent times, considering the whole period of aboriginal occupancy, there can be no doubt of its extensive and widespread utilization before the coming of the whites. That the ancient mines of the Lake Superior region are purely aboriginal is amply shown by their character and by the implements left on the ground; and the vast extent of the work warrants the conclusion that they had been operated hundreds of years before the white man set foot on American shores. It is true that the influence of French and English explorers and colonists was soon felt in the copper-producing districts, and led in time to modifications in the methods of shaping the metal and in the forms of the articles made from it, and that, later, foreign copper became an important article of trade, so that, as a result, it is now difficult to draw a very definite line between the aboriginal and the accultural phases of the art; but that most of the articles recovered from aboriginal sites are aboriginal and made of native metal cannot be seriously questioned.

Considerable discussion has arisen regarding the origin and antiquity of certain objects of sheet copper, the most conspicuous of which are several human figures in elaborate repoussé work, from one of the Etowah mounds in Georgia, and a large number of objects of sheet copper cut in conventional patterns, found in a mound on Hopewell farm, Ross co., Ohio. Analysis of the metal in this and similar cases gives no encouragement to the theory of foreign origin (Moore). The evident antiquity of the mounds in which these objects were found and the absence in them of other objects open to the suspicion of foreign (European) origin or influence tend to confirm the belief in their American origin and pre-Columbian age.

The state of preservation of the implements, utensils, and ornaments found in mounds and other places of burial varies greatly, but many specimens are in perfect condition, some having retained the high, surface polish acquired in long use. It happens that the presence of copper objects in association with more perishable objects of wood, bone, shell, and textile materials, has, through the action of the copper carbonates, resulted in the preservation of many precious things which otherwise would have entirely disappeared.

Of the various implements of copper, the celt, or chisel-like hatchet, has the widest distribution. The forms are greatly diversified, and the weight ranges from a few ounces to several pounds. The implement is never perforated for hafting, although hafts were undoubtedly used, portions of these having been preserved in a few cases. As with our own axes, the blade is sometimes widened toward the cutting edge, which is convex in outline. Many specimens, however, are nearly straight on the sides, while others are long and somewhat narrower toward the point. They could be hafted to serve as axes, adzes, or gouges. Some have one face flat and the other slightly ridged, suggesting the adze or gouge. The celt forms grade into other more slender shapes which have chisel edges, and these into drills and graver-like tools, while following in turn are needles and poniards, the latter being generally cylindrical, with long, tapering points, the largest examples being 2 or 3 ft. in length and weighing several pounds. The grooved axe is of rare occurrence, and where found appears to repeat the stone forms of the particular district. Squier and Davis illustrate a twoedged specimen with a hole through the middle of the blade from face to face, supposed to have been intended to aid in fixing the haft. Related in general shape to the axe is another type of implement sometimes called a spud. Its

distribution is limited to the district lying immediately s. of the Great lakes. The socket is usually formed by hammering out lateral wings at the upper end of the implement and bending them inward. The purpose of this implement is not fully determined. With a long and straight handle it would serve as a spade or digging tool; with the handle sharply bent near the point of insertion it would become a hatchet or an adze, according to the relative position of the blade and handle. The natives had already come to appreciate the value of copper for knives, and blades of various forms were in use; usually these are drawn out into a long point at the haft end for insertion into a wood or bone handle. Arrowheads of various ordinary shapes are common, as are also lance and spear heads, the latter being sometimes shaped for insertion into the end of the wooden shaft, but more frequently having a socket, made as in the spud, for the insertion of the handle. Drills, needles, pins, fishhooks, etc., occur in considerable numbers, especially in the Northern states.

Personal ornaments are of great variety, including beads, pendants, pins, ear-discs, earrings, bracelets, gorgets, etc. The most interesting objects of copper do not come within either of the ordinary classes of ornaments, although they doubtless served in some way as adornments for the person, probably in connection with the ceremonial head-dress. These are made of sheet copper, and certain of their features are suggestive of exotic, though not of European, influence. The best examples are from one of the Etowah mounds in Georgia. Other remarkable objects found in mounds at Hopewell farm, Ross co., Ohio, appear to have been intended for some special symbolic use rather than for personal adornment, as usual means of attachment are not provided. The early voyagers, especially along the Atlantic coast, mention the use of tobacco pipes of copper. There is much evidence that implements as well as ornaments and other objects of copper were regarded as having exceptional virtues and magical powers, and certain early writers aver that some of the tribes of the Great lakes held all copper as sacred, making no practical use of it whatever.

Copper was not extensively used within the area of the Pacific states, but was employed for various purposes by the tribes of the N. W., who are skilful metal workers, employing to some extent methods introduced by the whites. Formerly the natives obtained copper

from the valley of Copper r. and elsewhere, but the market is now well supplied with the imported metal. It is used very largely for ornaments, for utensils, especially knives, and whistles, rattles, and masks are sometimes made of it. Perhaps the most noteworthy product is the unique, shield-like "coppers" made of sheet metal and highly esteemed as symbols of wealth or distinction. The origin of these "coppers" and of their peculiar form and use is not known. The largest are about 3 ft. in length. The upper, wider portion, and in eases the lower part, or stem, are ornamented with designs representing mythical creatures (Niblack, Boas).

The literature of copper is extensive; the principal works, especially those contributing original material, are: Beauchamp in Bull. N. Y. State. Mus. no. 73, 1903; Boas in Nat. Mus. Rep. 1895, 1897; Butler in Wis. Hist. Soc. Coll., vii, 1876; Cushing (1) in The Archæologist, 11, no. 5, 1894, (2) in Am. Anthrop., vii, no. 1, 1894; Davis iu Smithson. Rep. 1874, 1875; Farguharson in Proc. Davenport Acad., 1, 1876; Foster, Prehist, Races, 1878; Foster and Whitney, Rep. on Geol. and Topog. L. Superior Land District (H. R. Doc. 69, 31st Cong., 1st sess., 1850; Fowke, Archæol. Hist. Ohio, 1902; Gillman in Smithson, Rep. 1873, 1874: Hamilton in Wis. Archaeol., r, no. 3, 1902; Hearne, Journey, 1796; Helmes in Am. (W. H. H.)

Copway, George (Kagigegabo, 'he who stands forever.'-W. J.). A young Chippewa ehief, born near the mouth of Trent r., Ontario, in the autumn of 1818. His parents were Chippewa, and his father, until his conversion, was a medicine-man. George was educated in Illinois, and after acquiring considerable knowledge in English books returned to his people as a Weslevan missionary. For many years he was connected with the press of New York city and lectured extensively in Europe and the United States, but he is noted chiefly as one of the few Indian authors. Among his published writings are: The Life, History, and Travels of Kah-ge-ga-gah-bowh (George Copway), Albany, 1847, and Philadelphia, 1847; The Life, Letters, and Speeches of Kah-ge-gagah-bowh, New York, 1850; The Traditional History and Characteristic Sketches of the Ojibway Nation, London and Dublin, 1850, and Boston, 1851: Recollections of a Forest Life, London, Edinburgh, and Dublin, 1851, and London, 1855; Indian Life and Indian History, Boston, 1858; The Ojibway Conquest, a Tale of the Northwest, New York, 1850; Organization of a New Indian Territory East of the Missouri River, New York, 1850; Running Sketches of Men and Places in England, France, Germany, Belgium and Scotland, New York, 1851. Copway also wrote a hymn in the Chippewa language (London, 1551) and cooperated with the Rev. Sherman Hall in the translation of the Gospel of St. Luke Boston, 1837) and the Acts of the Apostles (Boston, 1838). He died at Pontiac, Mich., about 1863.

Coquitlam. A coast Salish tribe speaking the Cowichan dialect and inhabiting Fraser valley just above the delta, in British Columbia. They owned no land, being practically slaves of the Kwantlen. Pop. 24 in 1911.

Can., 54, 1992.

Counting. Two systems of counting were formerly in use among the Indians of North America, the decimal and the vigesimal. The latter, which was used in Mexico and Central America, was also in general use x, of Columbia r., on the Pacific slope, while between that area and the border of Mexico it was employed by only a few tribes, as the Pomo, Tuolumne, Konkau, Nishinam, and Achomawi. On the Atlantic side the decimal system was used by all except the Eskimo tribes. systems, based apparently on the finger and hand count, were as a rule fundamentally quinary. There are some indications, however, of a more primitive count, with minor tribal differences. In Siouan and Algonquian the word for 2 is generally related to that for arms or hands, and in Athapascan dialects to the term for feet. In a few languages, the Siksika, Catawba, Gabrieleño, and some others, 3 is expressed by joining the words for 2 and 1. In many others the name for 4 signifies 2 and 2, or 2 times 2, as in most of the Shoshonean dialects, and in Catawba, Haida, Tlingit, and apparently Kiowa; the Pawnee formerly applied a name signifying 'all the fingers,' or the 'fingers of the hand,' thus excluding the thumb. Five has usually a distinct name, which in most cases refers to one hand or fist. The numbers from 6 to 9 are generally based on 5, thus, 6=5+1, 7=5+2, etc.; or the names refer to the fingers of the second hand as used in counting; thus, among the Eskimo of Pt. Barrow 6 is 'to the other hand 1', 7 'to the other hand 2', and in many dialects 6='1 on the other hand.' There are exceptions to this rule, however: for example, 6 is 3 and 3 in Haida and some other dialects; in Bellacoola the name signifies 'second 1,' and in Montagnais (Algonquian), '3 on each side.' Although 7 is usually 'the second finger on the second hand,' in some eases it is based on 4, as among the Montagnais, who say '4 and 3.' Eight is generally expressed by 'the third finger on the second hand'; but the Montagnais say '4 on each side,' and the Haida '4 and 4'; in Karankawa it signifies '2 fathers,' and in the Kwakiuth and some other languages it is '2 from 10.' Im a number of languages the name for 9 signifies 1 from 10, as with the Kwakiutl, the Eskimo of N. W. Alaska, the Pawnee, and the Heiltsuk.

The numbers from 11 to 19 are usually formed in both systems by adding 1, 2, 3, 4, etc., to 10; but in the vigesimal the quinary

count is carried out, 16 being 15+1, 17=15+2, etc., or, in some dialects, 17=10+5+2. Many of the Indians could count to 1,000, some by a regular system, while in a number of languages, as Tlingit, Cherokee, etc., its signification is 'great 100.' In Ottawa the meaning was 'one body'; in Abnaki, 'one box'; in Iroquois dialects, 'ten hand-claps,' that is ten hundreds; in Kiowa, 'the whole hand hundred.' Baraga and Cuoq give terms for figures up to a million or more, but it is doubtful if such were actually in use before contact with Europeans.

The common Indian method of counting on the hands, as perhaps is usual with most savage or uncivilized peoples, was to "tell off" the fingers of the left hand, beginning with the little finger, the thumb being the fifth or 5; while in counting the right hand the order was usually reversed, the thumb being counted 6, the forefinger 7, and so on to the little finger, which would be 10. The movement was therefore sinistral. Although the order in counting the first 5 on the left hand was in most cases as given above, the order of counting the second 5 was subject to greater variation. It was a common habit to bend the fingers inward as counted, but there were several western tribes whose custom was to begin with the clenched hand, opening the fingers as the count proceeded, as among the Zuñi. Among the tribes using the vigesimal system, the count of the second 10 was practically or theoretically performed on the feet, the 20 making the complete "man," and often, as among the Eskimo and Tlingit, receiving names having reference to the feet. The Zuñi, however, counted the second 10 back on the knuckles.

Indians often made use of numeral classifiers in counting, that is, the number name was modified according to the articles counted; thus, in the Takulli dialect of Athapascan tha means 3 things; thane, 3 persons; that, 3 times; thatsen, in 3 places; thauh, in 3 ways; thailtoh, all 3 things, etc. Such classifiers are found in many dialects, and in some are quite numerous.

Certain numbers have been held as sacred by most tribes; thus 4, probably owing to the frequent reference to the cardinal points in ceremonies and religious acts, has become sacred or ceremonial. Among the Creeks, Cherekee, Zuñi, and most of the Plains tribes, 7 is also considered a sacred number. For the Zuñi, Cushing says it refers to the 4 ear-

dinal points plus the zenith, nadir, and centre or ego. Some of the Pacific Coast Indians regard 5 as their sacred number. Although 13 appears in most of the calendar and ceremonial counts of the cultured nations of Mexico and Central America, its use as a sacred or ceremonial number among the Indians N. of Mexico was rare, the Pawnee. Hopi, and Zuñi being notable exceptions.

Ass'n, 1874; Wilson, Indian Numerals, Canad. Ind., 1, 272, 1891.

blow, stroke . The French-Coup Canadian term adopted to designate the formal token or signal of victory in battle, as used among the Plains tribes. Coups are usually "counted," as it was termed—that is, credit of victory was taken, for three brave deeds, viz., killing an enemy, scalping an enemy, or being first to strike an enemy either alive or dead. Each one of these entitled a man to rank as a warrior and to recount the exploit in publie: but to be first to touch the enemy was regarded as the bravest deed of all, as it implied close approach during battle. Among the Chevenne it was even a point of brayado for a single warrior to rush in among the enemy and strike one with quirt or gun before attempting to fire, thus doubly risking his own life. Three different coups might thus be counted by as many different persons upon the body of the same enemy, and in a few tribes 4 were allowed. The stealing of a horse from a hostile camp also carried the right to count coup. The stroke coupmight be made with whatever was most convenient, even with the naked hand, the simple touch scoring the victory. In ceremonial parades and functions an ornamented quirt or rod was sometimes carried and used as a conp stick. The warrior who could strike a tipi of the enemy in a charge upon a home camp thus counted coup upon it and was entitled to reproduce its particular design upon the next new tipi which he made for his own use and to perpetnate the pattern in his family. In this way he was said to "capture" the tipi. Warriors who had made coups of distinguished bravery, such as striking an enemy within his own tipi or behind a breastwork, were selected to preside over the dedication of a new tipi. The noted Sioux chief Red Cloud stated in 1891 that he had counted coup 80 times.

J. M.)

Cowichan. A group of Salish tribes speaking a single dialect and occupying the s. E coast of Vancouver id, between Nancose bay and Sasnich inlet, and the valley of lower Fraser 1. nearly to Spuzzum, Brit. Col. The various bands and tribes belonging to this group aggregated 2,991 in 1902. The following list of Cowiclean tribes is based on information obtained from Boas: On Vancouver id.-Clemclemalats, Comiakin, Hell-lt, Kenipsim, Kilpanlus, Koksilah, Kulleets, Lilmalehe, Malakut, Nanaumo, Penelakut, Ouamichan, Siccameen, Snonowas, Somenos, Tateke, and Yekolaos. On lower Fraser r.—Chehalis, Chilliwak, Coquitlam, Ewawoos, Katsey, Kelatl, Kwantlen, Matsqui, Musqueam, Nicomen, Ohamil, Pilalt, Popkum, Scowlitz, Siyita, Sewathen, Snonkweametl, Skawawalooks, Squawtits, Sumas, Tait, Tsakuam, and Tsenes.

Cowichan Lake. A local name for Nootka Indians who in summer live on a reservation at the N. end of Cowichan lake, s. Vancouver id. There were only 6 there in 1911.—Can. Ind. Aff., pt. 11, 10, 1911.

Cradles. In North American ethnology, the device in which the infant was bound during the first months of life. It served for both cradle and baby's carriage, more especially the latter. In the arctic region, where the extreme cold would have been fatal, eradies were not used, the infant being carried about in the hood of the mother's fur parka; the Mackenzie River tribes put the baby in a bag of moss. In the warmer regions also, from the boundary of Mexico southward, frames were not universal, but the child, wearing little clothing, was in some way attached to the mother and borne on her hip. where it partly rode and partly clung, or rested in hammock-like swings. The territory between these extremes was the home of the eradle, which is found in great variety. The parts of the cradle are the body, the bed and covering, the pillow and other appliances for the head, including those for head flattening, the lashing, the foot-rest, the bow, the awning, the devices for suspension, and the trinkets and amulets, such as dewclaws. serving for rattles and moving attractions as well as for keeping away evil spirits. Cradles differ in form, technic, and decoration. Materials and designs were often selected with great care and much ceremony, the former being those best adapted for the purpose that nature provided in each culture area. and they, quite as much as the wish of the maker, decided the form and decoration.

Bark Cradles. These were used in the interior of Alaska and in the Mackenzie drainage basin. They were made of a single piece of birch or other bark, bent into the form of a trough, with a hood, and tastefully adorned with quillwork. The bed was of soft fur, the lashing of babiche. They were carried on the mother's back by means of a forchead band.

Skin cradles. Adopted in the area of the buffalo and other great mammals. The hide with the hair on was rolled up, instead of bark, and in much the same way, to hold the infant; when composed of hide only they were seldom decorated.

Lattice cradles.—On the piains, eradles made of dressed skins were lashed to a lattice of flat sticks, especially among the Kiowa, Comanche, and others; but all the tribes now borrow from one another. In these are to be seen the perfection of this device. The infant, wrapped in furs, was entirely encased. Over the face was bent a flat bow adorned

with pendants or amulets and covered, in the best examples, with a costly hood. The whole upper surface of the hide was a field of beadwork, quillwork, or other decoration, in which symbolic and heraldic devices were wrought. The frame was supported and earried on the mother's back or swung from the pommel of a saddle by means of bands attached to the lattice frame in the rear. Among some tribes the upper ends of the frame projected upward and were decorated.

Board cradles.— Nearly akin to the last named is the form seen among the Iroquoian and Algonquian tribes of the E., in which a thin, rectangular board takes the place of the lattice. It was frequently carved and gorgeously painted, and had a projecting foot-rest. The bow was also bent to a right angle and decorated. The infant, after swaddling, was laid upon the board, and lashed fast by means of a long band. The tree for the Pawnee cradleboard was earefully selected, and the middle taken out so that the heart or life should be preserved, else the child would die. Equal care was taken that the head of the eradle should follow the grain. The spots on the wildcat skin used for a cover symbolized the stars, the bow the sky, and the erooked furrow cut thereon signified the lightning, whose power was typified by the arrows tied to the bow (Fletcher). All the parts were symbolic.

Dugout cradles—On the N. Pacific coast the infant was placed in a little box of cedar. The region furnished material, and the adze habit, acquired in canoe excavation, made the manufacture easy. Interesting peculiarities of these cradles are the method of suspending them horizontally, as in Siberia, the pads of shredded bark for head flattening, and the relaxation of the child's body in place of straight lacing. Decorative features are almost wanting.

Matting cradles.—Closely allied to dugout eradles and similar in the arrangement of parts are those found in contiguous areas made from the bast of cedar.

Basket cradles.—On the Pacific slope and throughout the interior basin the basket eradle predominates and exists in great variety. Form, structure and decoration are borrowed from contiguous regions. In British Columbia the dugout eradle is beautifully copied in coiled work and decorated with imbrications. The Salish have developed such variety in basketry technic that mixed types of eradles are not surprising. In the coast region of N.

California and Oregon eradles are more like little chairs: the child's feet are free, and it sits in the basket as if getting ready for emancipation from restraint. The woman lavishes her skill upon this vehicle for the object of her affection. Trinkets, face protectors, and soft beds complete the outfit. Elsewhere in California the baby lies flat. In the interior basin the use of basketry in eradles is characteristic of the Shoshonean tribes. In certain pueblos of New Mexico wicker coverings are placed over them.

Hurdle cradles,—These consist of a number of rods or small canes or sticks arranged in a plane on an oblong hoop and held in place by lashing with splints or cords. The Yuman tribes and the Wichita so made them. The bed is of cottonwood bast, shredded, and the child is held in place in some examples by an artistic wrapping of coloured woven belts. The Apache, Navaho, and Pueblo tribes combine the basket, the hurdle, and the board cradles, the Navaho covering the framework with drapery of the softest buckskin and loading it with ornaments. The ancient cliff-dwellers used both the board and the hurdle forms.

Hammock cradles.—Here and there were tribes that placed their infants in network or wooden hammocks snspended by the ends. In these the true function of the eradle as a sleeping place is better fulfilled, other varieties serving rather for carrying.

Among the San Carlos Apache at least the eradle is made after the baby is born, to fit the body; later on a larger one is prepared. The infant was not placed at once after birth into the cradle after the washing; a certain number of days elapsed before the act was performed with appropriate ceremonies. When the mother was working about the home the infant was not kept in the cradle, but was laid on a robe or mat and allowed free play of body and limbs. The final escape was gradual, the process taking a year or more. The cradle distorted the head by flattening the occiput as a natural consequence of contact between the resistant pillow and the immature bone, and among certain tribes this action was enhanced by pressure of pads. The Navaho are said to adjust the padding under the shoulders also. Hrdlicka finds skull deformations more pronounced and common in males than in females. In many tribes scented herbs were placed in the bedding. Among the Yuma difference was sometimes made in adorning boys' and girls' eradles, the former being

much more costly. Some tribes make a new cradle for each child, but among the Pueblo tribes, particularly, the eradle was a sacred object, handed down in the family, and the number of children it had carried was frequently shown by notches on the frame. Its sale would, it is thought, result in the death of the child. If the infant died while in the helpless age, the cradle was either thrown away Walapai and Tonto broken up, burned, or placed on the grave (Navaho and Apachet, or buried with the corpse, laced up inside, as in life (cliff-dwellers, Kiowa). The grief of a mother on the death of an infant is intensely pathetic. The doll and the cradle were everywhere playthings of Indian girls.

Consult Fewkes in 15th Rep. B. A. E., 1897; Hrdlicka in Am. Anthrop., vii, nos. 2, 3, 1905; Mason in Rep. Nat. Mus., 161-212, 1887; Porter, ibid., 213-235.

(O. T. M.)

Credit Indians. A Missisauga band formerly living on Credit r., 10 m. west of Toronto. About 1850 they removed to Tuscarora tp., on Grand r., Ontario, by invitation of the Iroquois.—(Jones, Ojebway Inds., 211, 1861.) Pop. in 1911, 264 (Dept. Ind; Aff., pt. 1, 22, 1911.)

Cree (contracted from Kristinaux, French form of Kenistenoag, given as one of their own names). An important Algonquian tribe of British America whose former habitat was in Manitoba and Saskatchewan, between Red and Saskatchewan rs. They ranged northcastward down Nelson r, to the vicinity of Hudson bay, and northwestward almost to Athabaska lake. When they first became known to the Jesuit missionaries a part of them resided in the region of James bay, as it is stated as early as 1640 that "they dwell on the rivers of the north sea where Nipissings go to trade with them"; but the Jesnit Relations of 1661 and 1667 indicate a region farther to the N. w. as the home of the larger part of the tribe. A portion of the Cree, as appears from the tradition given by Lacombe (Dict. Lang. Crist, inhabited for a time the region about Red r., intermingled with the Chippewa and Maskegon, but were attracted to the plains by the buffalo, the Cree, like the Chippewa, being essentially a forest people. Many bands of Cree were virtually nomads, their movements being governed largely by the food supply. The Cree are closely related, hinguistically and otherwise, to the Chippewa. Hayden regarded them as an offshoot of the latter, and the Maskegon another division of the same ethnic group.

At some comparatively recent time the Assimiboin, a branch of the Sioux, in consequence of a quarrel, broke away from their beethren and sought alliance with the Cree. The latter received them cordially and granted them a home in their territory, thereby forming friendly relations that have continued to the present day. The united tribes attacked and drove southwestward the Siksika and allied tribes who formerly dwelt along the Saskatchewan. The enmity between these tribes and both the Siksika and the Sioux has ever since continued. After the Cree obtained firearms they made raids into the Athapascan country, even to the Rocky mts, and as far N. as Mackenzie r. Mackenzie, speaking of the region of Churchill r., says the original people of this area, probably Slaves, were driven out by the Cree.

As the people of this tribe have been friendly from their first intercourse with both the English and the French, and until quite recently were left comparatively undisturbed in the enjoyment of their territory, there has been but little recorded in regard to their history. This consists almost wholly of their contests with neighbouring tribes and their relations with the Hudson's Bay Co. In 1786, according to Hind, these Indians, as well as those of surrounding tribes, were reduced to less than half their former numbers by smallpox. The same disease again swept off at least half the prairie tribes in 1838. They were thus reduced, according to Hind, to one-sixth or one-eighth of their former population. In more recent years, since game has become scarce, they have lived chiefly in scattered bands, depending largely on trade with the agents of the Hudson's Bay Co. At present they are gathered chiefly in bands on various reserves in Manitoba, mostly with the Chippewa.

Their dispersion into bands subject to different conditions with regard to the supply and character of their food has resulted in varying physical characteristics; hence the varying descriptions given by explorers. Mackenzie, who describes the Cree comprehensively, says they are of moderate stature, well proportioned, and of great activity. Their complexion is copper-coloured and their hair black, as is common among Indians. Their eyes are black, keen, and penetrating; their countenance open and agreeable. In regard to the women

he says: "Of all the nations which I have seen on this continent, the Knisteneaux women are the most comely. Their figure is generally well proportioned, and the regularity of their features would be acknowledged by the more civilized people of Europe. Their complexion has less of that dark tinge which is common to those savages who have less cleanly habits." Umfreville, from whom Mackenzie appears to have copied in part what is here stated, says that they are more inclined to be lean of body than otherwise, a corpulent Indian being "a much greater curiosity than a sober one." Clark (Sign Language, 1885) describes the Cree seen by him as wretchedly poor and mentally and physically inferior to the Plains Indians: and Harmon says that those of the tribe who inhabit the plains are fairer and more cleanly than the others.

Their hair was cut in various fashions, according to the tribal divisions, and by some left in its natural state. Henry says the young men shaved off the hair except a small spot on the erown of the head. Their dress consisted of tight leggings, reaching nearly to the hip, a strip of cloth or leather about 1 ft. wide and 5 ft. long passing between the legs and under a belt around the waist, the ends being allowed to hang down in front and behind; a vest or shirt reaching to the hips; sometimes a cap for the head made of a piece of fur or a small skin, and sometimes a robe thrown over the dress. These articles, with moccasins and mittens, constituted their apparel. The dress of the women consisted of the same materials, but the shirt extended to the knees, being fastened over the shoulders with cords and at the waist with a belt, and having a flap at the shoulders; the arms were covered to the wrist with detached sleeves. Umfreville says that in trading, fraud, cunning, Indian finesse, and every concomitant vice was practised by them from the boy of 12 years to the octogenarian, but where trade was not concerned they were scrupulously honest. Mackenzie says that they were naturally mild and affable, as well as just in their dealings among themselves and with strangers; that any deviation from these traits is to be attributed to the influence of the white traders. He also describes them as generous, hospitable, and exceedingly good natured except when under the influence of spirituous liquor. Chastity was not considered a virtue among them, though infidelity of a wife was sometimes severely punished. Polygamy was common; and when a man's wife died it was considered

his duty to marry her sister, if she had one. The arms and utensils used before trade articles were introduced by the whites were pots of stone, arrow-points, spearheads, hatchets, and other edged tools of flint, knives of buffalo rib, fishhooks made out of sturgeon bones, and awls from bones of the moose. The fibrous roots of the white pine were used as twine for sewing their bark canoes, and a kind of thread from a weed for making nets. Spoons and pans were fashioned from the horns of the moose (Havden). They sometimes made fishhooks by inserting a piece of bone obliquely into a stick and sharpening the point. Their lines were either thongs fastened together or braided willow bark. Their skin tipis, like those of the N. Athapascans, were raised on poles set up in conical form, but were usually more commodious. They occasionally erect a larger structure of lattice work, covered with birch bark, in which 40 men or more can assemble for council, feasting, or religious rites.

The dead were usually buried in shallow graves, the body being covered with a pile of stones and earth to protect it from beasts of prey. The grave was fined with branches, some of the articles belonging to the deceased being placed in it, and in some sections a sort of canopy was erected over it. Where the deceased had distinguished himself in war his body was laid, according to Mackenzie, on a kind of scaffolding; but at a later date Hayden says they did not practise tree or scaffold burial. Tattooing was almost universal among the Cree before it was abandoned through the influence of the whites. The women were content with having a line or two drawn from the corners of the mouth toward the angles of the lower jaw; but some of the men covered their bodies with lines and figures. The Cree of the Woods are expert canoemen and the women lighten considerably their labours by the use of the canoe, especially where lakes aud rivers abound. A double-head drum and a rattle are used in all religious ceremonies except those which take place in the sweat house. Their religious beliefs are generally similar to those of the Chippewa.

The gentile form of social organization appears to be wanting. On account of the uncertain application of the divisional names given by the Jesuit missionaries and other early writers it is impossible to identify them with those more modernly recognized. Richardson says: "It would, however, be an end-less task to attempt to determine the precise

people designated by the early French writers. Every small band, naming itself from its hunting grounds, was described as a different nation." The first notice of the Cree divisions is given in the Jesuit Relation of 1658, which states that they are composed of four nations or peoples, as follows: Alimibegouek, Kilistinons of the bay of Ataouabouscatouek, Kilistinons of the Nipisiriniens, and Nisibourounik. At least 3 of these divisions are erroneously located on the Creuxius map of 1660, and it is evident from the Relation that at least 3 of them were supposed by the writer to have been situated somewhere s. or s. w. of James bay. Nothing additional is heard of them in the subsequent notices of the tribe, which is otherwise divided into the Paskwawininiwug and Sakawininiwug (people of the plains and of the woods), the former subdivided into Sipiwininiwug and Mamikininiwug (river and lowland people), the latter into Sakittawawininiwug and Ayabaskawininiwug (those of Cross *lake and those of N. Alberta). In 1856 the Cree were divided, according to Hayden, into the following bands, all or nearly all taking their names from their chiefs: Apistekaihe, Cokah, Kiaskusis, Mataitaikeok, Muskwoikakenut, Muskwoikauepawit, Peisiekan, Piskakauakis, Shemaukan, and Wikvuwamkamusenaikata, besides several smaller bands and a considerable number around lac Ile-a-la-Crosse in N. Saskatchewan who were not attached to any band. So far as now known the ethnic divisions, aside from the Cree proper, are the Maskegon, and the Monsoni. Although these are treated as distinct tribes, they form, beyond doubt, integral parts of the Cree. It was to the Maskegon, according to Richardson, that the name Kilistenaux, in its many forms, was anciently applied, a conclusion with which Henry apparently agrees.

In 1776, before smallpox had greatly reduced them, the population of the Cree proper was estimated at about 15,000. Most of the estimates during the last century give them from 2,500 to 3,000.** In 1911, there were approximately 18,000 Crees in Canada.

Ana.—Pentot, Kutchin MS vocab, B A. E., 1869 (foes): Kutchin name). Annah.—Mackenzie, Voy, 291, 1862 (foes): Chipewyan name). Ayisiyiniwok.—Petitot in Jour Roy. Geog. Soc., 649, 1883 (name used by themselves). Castanoe.—Stanway conf. (1759 in Rupp, West Penn., app., 140, 1846. Chahis.—Max.

Cumshewa (corrupted from Gó'mshewah, or Gó'msewa, the name of its chief). A former Haida town at the N. entrance of Cumshewa inlet, Queen Charlotte ids.. Brit. Col. By the natives it was known as Illkenul. It was almost entirely occupied by the Stawas-haidagai, (q. v.) According to John Wark's estimate, 1836–41, there were then 20 houses in the place and 286 people. This agrees closely with that still given by Cumshewa people as the former number. Cumshewa was one of the last towns abandoned when all the Indians of this region went to Skidegote.—Swanton, Cont. Haida, 279, 1905.

Casswer.—Downie in Jour. Roy. Geog. Soc., xxxi, 251, 1861. Comshewars.—Dunc. Hist. Oreg., 281, 1844. Crosswer.—Downie, op. at. Cumshawas.—Seculer in Jour. Roy. Geog. Soc., xi, 219, 1841. Kit-ta-wās.—Dawson, Q. Charlotte Ids., 168, 1880. Tsin.sham namet. Koumchaouas.—Puffet de Mofras, Oreg., t., 337, 1844. Kumshahas.—Latham in Trans. Plinel. Soc. Lond., 73, 1856. Kumshewa.—Dawson, op. cit., 168. Kumshiwa.—Tolmie and Dawson, Vocabs. Brit. Col., 26, 1884. Łkéźn.l.—Swanton, Cent. Haida, 279, 1905. (Haida name). Tikinool.—Dawson, op. cit., 168.

Dadens (Da'dens). A Haida town on the s. coast of North id., fronting Parry passage, Queen Charlotte ids., British Columbia. It was the chief town of the Yaku-lanas previous to their migration to Prince of Wales id.; afterward the site was used as a camp, but, it is said, was not reoccupied as a town. It figures prominently in accounts of early voyagers, from which it would appear either that it was still occupied in their time or that it had only recently been abandoned. (J. R. S.)

Da'dens Inagā'-i.—Swanton, Cont. Haida, 281, 1905 (lnagā'-i='town'). Tartanee.—Douglas quoted by Dawson, Queen Charlotte Ids., 162, 1880.

Dadjingits (Dadji\(^n\)gits, 'common-hat village'). A Haida town on the N. shore of Bearskin bay. Skidegate inlet, Queen Charlotte ids., Brit. Col. It was occupied for a brief time by part of the Gitins of Skidegate, afterward known as Nasagas-haidagai, during a temporary difference with the other branch of the group.—Swanton, Cont. Haida, 279, 1905.

Dagangasels (Dāgañaséls, 'common foodsteamers'). A subdivision of the Kona-kegawai of the Haida. They were of low social rank, and the name was used probably in contempt.—Swanton, Cont. Haida, 273, 1905.

Sharp-pointed, edged imple-Daggers. ments, intended to thrust and stab. Daggers of stone do not take a prominent place among the weapons of the northern tribes, and they are not readily distinguished from knives, poniards, lance-heads, and projectile points, save in rare cases where the handle was worked in a single piece with the blade. Bone was well suited for the making of stabbing implements and the long 2-pointed copper poniard of the region of the Great lakes was a formidable weapon. The exact use of this group of objects as employed in prehistoric times must remain largely a matter of conjecture. The introduction of iron soon led to the making of keen-pointed knives, as the dirk, and among the N.W. Coast tribes the manufacture of broad-bladed daggers of copper and iron or steel, modelled after European and Asiatic patterns, became an important industry.

For daggers of stone consult Moorehead, Prehist, Impls, 1900: Rau in Smithson, Cont., XXII, 1876; Thruston, Antiq. of Tenn., 1897; for metal daggers, see Niblack in Rep. Nat. Mus. 1888, 1890. (w. h. H.)

Dahua (Da'rua). A Haida town N. of Lawn hill, at the mouth of Skidegate inlet, Queen Charlotte id., Brit. Col. It belonged to the Djahui-skwahladagai, and was noted in legend as the place where arose the troubles which resulted in separating the later N. W. Coast Indians from those of Skidegate inlet. It was also the scene of a great battle between the inlet people and those of the N. W. coast, in which the latter were defeated.—Swanton, Cont. Haida, 279, 1905.

Daiyu (Daiyū', 'giving-food-to-others town'). A Haida town on Shingle bay, E. of

Welcome point, Moresby al., w. Brit. Col.—It was owned by a small band, the Daiyuahi-lanas or Kusta-kegawai, which received one of its names from that of the town.—Swanton, Cont. Haida, 279, 1905.

Daiyuahl-Ianas (Daiyā al lā'nas, 'people of the town where they always give away food'). A division of the Rayen clan of the Haida, named from one of its towns. A second name for the band was Kasta-kegawai (Q!ā'sta qē'ga-wa-i), 'those born at Skidegate er.' It formerly occupied the coast between Alliford bay and Cumshewa point, but is now nearly extinct.—Swanton, Cont. Haida, 269, 1905.

K'āstak'ē'rauāi.—Boas, Fifth Rep. N. W. Tribes Canada, 26, 1889. Q!ā'sta qē'gawa-i.—Swanton, op. cit. Tai'ōtl lā'nas.—Boas, Twelfth Rep. N. W. Tribes Canada, 24, 1898

Dance. Nature is prodigal of life and energy. The dance is universal and instinctive. Primarily the dance expresses the joy of biotic exultation, the exuberance of life and energy; it is the ready physical means of manifesting the emotions of joy and of expressing the exultation of conscious strength and the eestasy of successful achievement-the fruitage of well-directed energy. Like modern music, through long development and divergent growth the dance has been adapted to the environment of many and diverse planes of culture and thought; hence it is found among both savage and enlightened peoples in many complex and differing forms and kinds. the dance of the older time was fraught with symbolism and mystic meaning which it has lost in civilization and enlightenment. It is confined to no one country of the world, to no period of ancient or modern time, and to no plane of human culture.

Strictly interpreted, therefore, the dance seems to constitute an important adjunct rather than the basis of the social, military, religious, and other activities designed to avoid evil and to secure welfare. A contrary view renders a general definition and interpretation of the dance complex and difficult, apparently requiring a detailed description of the various activities of which it became a part. For if the dance is to be regarded as the basis of these activities, then these ceremonies and observances must be defined strictly as normal developments of the dance, a procedure which is plainly erroneous. The truth appears to be that the dance is only an element, not the basis. of the several festivals, rites, and ceremonies performed in accordance with well-defined rules

and usages, of which it has become a part. The dance was a powerful impulse to their performance, not the motive of their observance.

Among the Indians x, of Mexico the dance usually consists of rhythmic and not always graceful gestures, attitudes, and movements of the body and limbs, accompanied by steps usually made to accord with the time of some form of music, produced either by the dancer or dancers or by one or more attendant singers. Drums, rattles, and sometimes bone or reed flutes are used to aid the singers. Every kind and class of dance has its own peculiar steps, attitudes, rhythm, figures, song or songs with words and accompanying music, and costumes.

The word or logos of the song or chant in savage and barbaric planes of thought and culture expressed the action of the orenda, or esoteric magic power, regarded as immanent in the rite or ceremony of which the dance was a dominant adjunct and impulse. In the lower planes of thought the dance was inseparable from the song or chant, which not only started and accompanied but also embodied it.

Some dances are peculiar to men and others to women. Some dances are performed by a single dancer, others belong respectively to individuals, like those of the Onthonrontha ('one chants') among the Iroquois; other dances are for all who may wish to take part, the number then being limited only by the space available; still others are for specified classes of persons, members of certain orders, societies, or fraternities. There are, therefore, personal, fraternal, clan or gentile, tribal, and inter-tribal dances; there are also social, erotic, comic, mimic, patriotic, military or warlike, invocative, offertory, and mourning dances, as well as those expressive of gratitude and thanksgiving. Morgan (League of the Iroquois, 1, 278, 1904) gives a list of 32 leading dances of the Seneca Iroquois, of which 6 are costume dances, 14 are for both men and women, 11 for men only, and 7 for women only. Three of the costume dances occur in those exclusively for men, and the other 3 in those for both men and women.

In general among the American Indians the heel and the ball of the foot are lifted and then brought down with great force and swiftness in such wise as to produce a resounding concussion. Usually the changes of position of the dancer are slow, but the changes of attitude are sometimes rapid and violent. The women employ several steps, sometimes employed also by the men, among which are the shuffle, the

glide, and the hop or leap. Holding both feet together and usually facing the song altar, the women generally take a leap or hop sidewise in advance and then a shorter one in recoil, so that every two hops the position is slightly advanced. They do not employ the violent steps and forceful attitudes in vogue among the men. They keep the body quite erect, alternately advancing either shoulder slightly. which gives them a peculiar swaying or rocking motion, resembling the waving of a windrocked stalk of corn. Indeed, among the Onondaga, Cavuga, and other Iroquois tribes, one of the names for "woman" (wathonwisas, 'she sways or rocks') is a term taken from this rocking or swaving motion.

Among some tribes, when the warriors were absent on a hunting or war expedition, the women performed appropriate dances to insure their safety and success. Among the same people in the dances in which women may take part, these, under the conduct of a leader with one or more aids, form a circle around the song altar (the mat or bench provided for the singer or singers), maintaining an interval of from 2 to 5 feet. Then, outside of this circle the men, under like leadership, form another circle at a suitable distance from that of the women. Then the two circles, which are usually not closed between the leaders and the ends of the eircles, move around the song altar from the right to the left in such manner that at all times the heads of the circles of dancers move along a course meeting the advancing sun (their elder brother), whose apparent motion is conversely from the left to the right of the observer. In the Santee Dakota dance a similar movement around the centre of the circle from right to left is also observed. Among the Muskhogean tribes, however, the two circles move in opposite directions, the men with the course of the sun and the women contrary to it (Bartram). Among the Santee the women may dance only at the meeting of the "medicine society" of which they are members; they alone dance the scalp dance while the warriors sing. Rev. John Eastman says that in dancing the Santee form 3 circles, the innermost composed of men, the middle of children, and the outermost of women. According to Le Page Du Pratz, these circles, among the Natchez, moved in opposite directions, the women turning from left to right, and the men from right to left. This movement of the circles from right to left seems designed to prevent the dancer in the entire course around the song altar from turning his back to the sun.

The Mandan and other Siouan tribes dance in an elaborate ceremony, called the Buffalo dance, to bring game when food is scarce, in accordance with a well-defined ritual. In like manner the Indians of the arid region of the S. W. perform long and intricate ceremonies with the accompaniment of the dance ceremonies which, in the main, are invocations or prayers for rain and bountiful harvests and the creation of life. Among the Iroquois, in the so-called green-corn dance, the shamans urge the people to participate in order to show gratitude for bountiful harvests, the preservation of their lives, and appreciation of the blessings of the expiring years. The ghost dance, the snake dance, the sun dance, the scalp dance, and the calumet dance, each performed for one or more purposes, are not developments from the dance, but rather the dance has become only a part of the ritual of each of these important observances, which by metonymy have been called by the name of only a small but conspicuous part or element of the entire ceremony.

Consult Bartram, Travels, 1792; Jesuit Relations, Thwaites, ed. i-lxxiii, 1896-1901; Margry, Déc., i-vi. 1875-86; Morgan, League of the Iroquois, 1857, 1904; Lafitau, Mœurs des Sauvages, 1724; Le Page du Pratz, Hist. de la Louisiane, 1758. (J. N. B. H.)

Dasoak ('flying'). A clan of the Huron.

Deer Skins. Apparently a division of the northern Athapascans, as they are mentioned as belonging to a group including the Beaver Hunters, Flatside Dogs (Thlingchadinne), and Slaves.—De Smet, Oregon Missions 164, 1847.

Dekanawida ('two river-currents flowing together.'—Hewitt). An Iroquois prophet, statesman, and lawgiver, who lived probably during the second and third quarters of the 15th century, and who, conjointly with Hiawatha, planned and founded the historical confederation of the five Iroquois tribes. According to a circumstantial tradition, he was born in the vicinity of Kingston, Ontario. in what then was probably Huron territory, He was reputed to have been one of 7 brothers. Definite tradition gives him rank with the demigods, owing to the masterful orenda or magic power with which he worked tirelessly to overcome the obstacles and difficulties of his task, the astuteness he displayed in negotia-

2 GEORGE V., A. 1912

tion, and the wisdom he exhibited in framing the laws and in establishing the fundamental principles on which they were based and on which rested the entire structure of the Iroquois confederation. Omens foreshadowed his birth, and portents accompanying this event revealed the fact to his virgin mother that Dekanawida would be the source of evil to her people, referring to the destruction of the Huron confederation by that of the Iroquois. Hence at his birth his mother and grandmother with true womanly patriotism, sought to spare their country woes by attempting to drown the new-born infant by thrusting it through a hole made in the ice covering a neighbouring river. Three attenpts were made, but in the morning after each attempt the young Dekanawida was found unharmed in the arms of the astonished mother. Thereupon the two women decided that it was decreed that he should live, and so re-olved to rear him. Rapidly he grew to man's estate, and then, saying that he must take up his fore-ordained work, departed southward, first assuring his mother that in the event of his death by violence or sorcery, the ofter skin flaved entire which, with the head downward, he had hung in a corner of the lodge, would vomit blood. Dekanawida was probably a Huron by blood, but perhaps an Iroquois by adoption. In the long and tedious negotiations preceding the final establishment of the historical confederation of the five Iroquois tribes, he endeavoured to persuade the Erie and the Neuter tribes also to join the confederation; these tribes, so far as known, were always friendly with the Huron people, and their representatives probably knew of Dekanawida's Huron extraction. Many of the con-titutional principles, laws. and regulations of the confederation are attributed to him. His chiefship did not belong to the hereditary class, but to the merit class, commonly styled the 'pine-tree chiefs.' Hence, he could forbid the appointment of a successor to his office, and could exclaim, "To others let there be successors, for like them they can advise you. I have established your commonwealth, and none has done what I have." But it is probable that prohibition was attributed to him in later times when the true nature of the merit chiefs had become obscured. Hence it is the peculiar honour of the merit chiefs of to-day not to be condoled officially after death, nor to have successors to their chieftaincies. For these reasons the title Dekanawida does

not belong to the roll of 50 federal league chief-ships. (1, N. B. H.)

Dekanisora. An Onondaga chief who came into prominence in the latter part of the 17th century, chiefly through his oratorical powers and his efforts to maintain peace with both the French and the English. He was first mentioned by Charlevoix in 1682 as a member of an embassy from the Iroquois to the French at Montreal. He was also one of the embassy to the French in 1688, which was captured by Adario (Le Rat), and then released by the wily captor under the plea that there had been a mistake, blaming the French for the purpose of widening the breach between them and the Iroquois. Colden (Hist. Five Nat., 1, 165, 1755) says Dekanisora was tall and well made, and that he "had for many years the greatest reputation among the Five Nations for speaking, and was generally employed as their speaker in their negotiations with both French and English." His death is supposed to have occurred about 1730, as he was a very old man when he was a member of an embassy at Albany in 1726. (c. T.)

Dekaury, Konoka. The eldest son and successor of Choukeka Dekaury, born in 1747. He was named Konoka ('Eldest') Dekaury, and is often mentioned as "Old Dekaury," but is equally well known as Schachipkaka. Before his father's death, in 1816, Konoka had joined a band of Winnebago who took part, in 1813, in the attack led by Proetor on Ft. Stephenson, on lower Sandusky r., Ohio, which was defended by Maj. George Croghan. He fought also in the battle of the Thames, in Canada. He was held for a time, in 1827, as a hostage at Prairie du Chien for the delivery of Red Bird. His band usually encamped at the portage of Wisconsin r., the site of the present Portage, Wis. Mrs. Kinzie (Wau-Bnn, 89, 1856) describes him as "the most noble, dignified, and venerable of his own or indeed of any other tribe," having a fine Roman countenance, his head bald except for a solitary tuft of long, silvery hair neatly tied and falling back on his shoulders, and exhibiting a demeanour always courteous, while his dress was always neat and unostentatious. He signed the treaty of Prairie du Chien Aug. 19, 1825, on behalf of the Winnebago, and died on Wisconsin r. Apr. 20, 1836.

Other members of the family, whose name has been variously written DeKaury, DeKau-

ray, DayKauray, Day Korah, Dacorah, and DeCorrah, were noted. From Choukeka's daughters, who married white men, are descended several well-known families of Wisconsin and Minnesota.

(c. T.)

Delaware. A confederacy, formerly the most important of the Algonquian stock, occupying the entire basin of Delaware r. in E. Pennsylvania and s. E. New York, together with most of New Jersey and Delaware. They ealled themselves Lenàpe or Leni-lenàpe, equivalent to 'real men,' or 'native, genuine men'; the English knew them as Delawares from the name of their principal river; the French called them Loups, 'wolves,' a term probably applied originally to the Mahican on Hudson r., afterwards extended to the Munsee division and to the whole group. To the more remote Algonquian tribes they, together with all their cognate tribes along the coast far up into New England, were known as Wapanachki, 'easterners,' or 'eastern land people,' a term which appears also as a specific tribal designation in the form of Abnaki. By virtue of admitted priority of political rank and of occupying the central home territory, from which most of the cognate tribes had diverged, they were accorded by all the Algonquian tribes the respectful title of "grandfather," a recognition accorded by courtesy also by the Huron. The Nanticoke, Conoy, Shawnee, and Mahican claimed close connection with the Delawares and preserved the tradition of a common origin.

The Lenàpe, or Delawares proper, were composed of 3 principal tribes, treated by Morgan as phratries, viz: Munsee, Unami, and Unalachtigo, besides which some of the New Jersey bands may have constituted a fourth. Each of these had its own territory and dialect, with more or less separate identity, the Munsee particularly being so far differentiated as frequently to be considered an independent people.

The early traditional history of the Lenàpe is contained in their national legend, the Walam Olum. When they made their first treaty with Penn, in 1682, the Delawares had their Council fire at Shackamaxon, about the present Germantown, suburb of Philadelphia, and under various local names occupied the whole country along the river. To this early period belongs their great chief, Tamenend, from whom the Tammany Society takes its name. The different bands

frequently acted separately, but regarded themselves as part of one great body. About the year 1720 the Iroquois assumed dominion over them, forbidding them to make war or sales of lands, a condition which lasted until about the opening of the French and Indian war. As the whites, under the sanction of the Iroquois, crowded them out of their ancient homes, the Delawares removed to the Susquehanna, settling at Wyoming and other points about 1742. They soon crossed the mountains to the headwaters of the Allegheny the first of them having settled upon that stream in 1724. In 1751, by invitation of the Huron, they began to form settlements in E. Ohio, and in a few years the greater part of the Delawares were fixed upon the Mnskingum and other streams in E. Ohio, together with the Munsee and Mahican, who had accompanied them from the E., being driver out by the same pressure and afterward consolidating with them. The Delawares being now within reach of the French and backed by the western tribes, asserted their independence of the Iroquois, and in the subsequent wars up to the treaty of Greenville in 1795 showed themselves the most determined opponents of the advancing whites. The work of the devoted Moravian missionaries in the 17th and 18th centuries forms an important part of the history of these tribes (see Missions). About the year 1770 the Delawares received permission from the Mianni and Piankishaw to occupy the country between the Ohio and White rs., in Indiana, where at one time they had 6 villages. In 1789, by permission of the Spanish government, a part of them removed to Missouri, and afterward to Arkansas, together with a band of Shawnee. By 1820 the two bands had found their way to Texas, where the Delawares numbered at that time probably at least 700. By the year 1835 most of the tribe had been gathered on a reservation in Kansas, from which they removed, in 1867, to Oklahoma and incorporated with the Cherokee Nation. Another band is affiliated with the Caddo and Wichita in w. Oklahoma, besides which there are a few scattered remnants in the United States, with several hundred in Canada, under the various names of Delawares, Munsee, and Moravians.

It is impossible to get a definite idea of the numbers of the Delawares at any given period, owing to the fact that they have always been closely connected with other tribes, and have hardly formed one compact body since leaving the Atlantic coast. All the estimates of the last century give them and their connected tribes from about 2,400 to 3,000, while the estimates within the present century are much lower. Their present population, including the Munsee, is about 1,900, distributed as follows: "Moravians of the Thames," Ontario, 335; "Munsees of the Thames," Ontario, 112, with Six Nations on Grand r., Ontario, 171. Incorporated with Cherokee Nation, Okla., 870; Wichita res., Oklahoma, 95; Munsee, with Stockbridges, in Wisconsin, perhaps 260; Munsee, with Chippewa, in Kansas, perhaps 45.

According to Morgan (Anc. Soc., 171, 1877 the Delawares have three clans (called by him gentes), or phratries, divided into 34 subclans, not including 2 subclans now extinct. These clans, which are the same among the Munsee and Mahican, are: (1 Took-seat fround paw.) 'wolf'). (2 Pokekooungo : 'crawling,' turtle'). (3) Pullaook ('non-chewing,' 'turkey'). These clans-Wolf, Turtle, and Turkey-are commonly given as synonymous with Munsee, Unami, and Unalachtigo, the 3 divisions of the Delawares, exclusive of the New Jersey branch. According to Brinton they are not clans, but mere totemic emblems of the 3 geographic divisions above named. Of these the Unami held the hereditary chieftainship. The New Jersey branch probably formed a fourth division, but those bands broke up at an early period and became incorporated with the others. Many of them had originally removed from the w. bank of Delaware r. to escape the inroads of the Conestoga. The 3 clans as given by Morgan are treated under the better known geographic names.

The Took-seat, or Wolf clan, has the following 12 subdivisions: (1) Maangreet (big feet); (2) Weesowhetko (yellow tree); (3) Pasakunamon (pulling corn); (4) Weyarnihkato (care enterer), i.e. cave enterer?); (5) Tooshwarkama across the river); (6) Olumane (vermilion); (7) Punaryou (dog standing by fireside); (8) Kwineckeha (long body); (9) Moonhartarne (digging); (10) Nonharmin (pulling up stream); (11) Longushharkarto (brush log); (12) Mawsootoh (bringing along).

The Pokekooungo, or Turtle clan, has the following 10 subdivisions, 2 others being extinct: (1) Okahoki ruler:; (2) Takoongoto (high bank shore); (3) Secharongoto (drawing down hill); (4) Oleharkarmekarto (elector); (5) Maharolukti brave: (6) Tooshkipakwisi

(green leaves; .7) Tungulungsi (smallest turtle; .8 Wehmungsi (little turtle); .(9) Leekwinai (snapping turtle); .(10) Kwisaesekeesto (deer).

The Pullacok, or Turkey clan, has the following 12 subdivisions; 1: Moharala (big bird); (2: Lelewayou (bird's cry); (3) Mookwungwahoki (cyc pain); (4) Mooharmowikarnu (scratch the path); (5) Opinghaki (opossum ground); (6) Muhhowekaken (old shin); (7) Tongonaoto (drift log); (8) Noolamarlarmo (living in water); (9) Muhkrentharne (root digger); (10) Muhkarmhukse (red face); (11) Koowahoke (pine region); 12: Oochukham (ground scratcher).

The divisions of the Munsee, according to Ruttenber, were the Minisink, Waoranee, Waranawonkong, Mamekoting, Wawarsink, and Catskill. He names among the Unami divisions the Navasink, Raritan, Hackensack, Aquackanonk, Tappan, and Haverstraw, all in S. New Jersey, but there were others in Pennsylvania. Among the Unalachtigo divisions in Pennsylvania and Delaware were probably the Neshamini, Shackamaxon, Passayonk, Okahoki, Hickory Indians (?), and Nantuxets. The Gachwechnagechga, or Lehigh Indians, were probably of the Unami division. Among the New Jersey bands not classified are the Yacomanshaghking, Kahansuk, Konckotay, Meletecunk, Matanakons, Eriwonec, Asomoche, Pompton (probably a Munsee division. Rancocas, Tirans, Siconesses Chiconessex . Sewapoo . perhaps in Delaware), Kechemeche, Mosilian, Axion, Calcefar, Assunpink, Naraticon, and Manta (perhaps a Munsee division). The Nyack band, or village, in Rockland co., N.Y., may have belonged to the Unami. The Papagonk band and the Wysox probably belonged to the Munsee.

The following were Delaware villages: Achsinnink, Ahasimus (Unami ?), Alamingo, Allaquippa, Alleghany, Aquackanonk, Au Glaize, Bald Eagle's Nest, Beaversville, Bethlehem (Moravian), Black Hawk, Black Leg's village, Buckstown, Bullets Town (?), Cashiehtunk (Munsec?), Catawaweshink (?), Chikohoki (Unalachtigo), Chilohocki (?), Chinklacamoose (?), Clistowacka, Communipaw (Hackensacka, Conemangh (?), Coshocton, Crossweeksung, Custaloga's Town, Edgpilliik, Eriwonec, Frankstown, (?), Friedenshuetten (Moravian), Fridensstädt (Moravian), Gekelemukpechnenk, Gnadenhuetten (Moravian), Goshgoshunk, Grapevine Town (?), Greentown (?),

Gweghkongh (Unami(?), Hespatingh (Unami (?), Hickorytown, Hockhocken, Hogstown (?), Hopogan, Jacob's Cabins (?), Jeromestown (?), Kalbauvane (?), Kanestio, Kanhanghton, Katamoonchink (?), Kickenapawling (?), Killbuck's Town, Kishakoquilla, Kiskiminetas, Kiskominitoes, Kittaning, Kohhokking, Kuskuski, Lackawaxen (?), Languntennenk, (Moravian) Lawunkhannek (Moravian), Lichtenau (Moravian), Macharienkonck (Minisink), Macock, Mahoning, Mamalty, Matawoma, Mechgachkamic (Unami ?.) Meggeckessou (?). Meniolagomeka, Meochkonck (Minisink), Minisink (Minisink), Mohiekon John's Town (Mahican ?), Munceytown (Munsee), Muskingum, Nain, (Moravian), Newcomerstown, New Town, Nyaek (Unami), Ostonwackin, Outaunink (Munsee), Owl's Town, Pakadasank (Munsee?), Pakataghkon, Papagonk (?), Passayonk, Passycotcung (Munsce?), Peckwes (?), Peixtan (Nanticoke?), Pematuning (?), Pequottink (Moravian), Playwickey, Pohkopophnnk, Oueenashawakee. Rancocas, Remahenone (Unami), Roymount, Salen (Moravian), Salt Lick, Sawcunk (with Shawnee and Mingo), Sawkin (?), Schepinaikonek (Munsee), Schipston (?), Schoenbrunn (Moravian), Seven Houses, Shackamaxon, Shamokin (with Seneca and Tutelo), Shannopin's Town, Shenango (with others). Sheshequin, Skehandowa (with Mahicans and Shawnee), Snakestown (?), Sonpnapka(?) Three Legs Tewn (?), Tioga (with Munsee and others), Tom's Town, Tullihas, Tuscarawas, Venango (?), Wakatomica (with Mingo), Wechquetank (Moravian), Wekeeponall, Welagamika, White Eyes, White Woman, Will's Town (?), Wapeminskink, Wapicomekoke, Wyalusing, Wyoming, Wysox (J. M.)

Desnedekenade ('people of the great river'). A tribe of the Chipewyan group of the Athapascan family living along the banks of Slave r., Alberta and Mackenzie. There were 129 enumerated at Ft. Resolution and 227 at Fort Smith in 1911.

Des-nèdhè-kkè-nadè.—Petitot, Autour du lac des Esclaves, 363, 1891

Desnedeyarelottine ('people of the great river below'). An Etcharcottine division living on the banks of the upper Mackenzie r., Nor, West, Ter.

Des-nèdhè-ya: è-l'Ottinè.—Petitot, Autour du lac des Esclaves, 363, 1891. Gens du Fort Norman.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Tess-cho tinneh.— Ross quoted by Gibbs, MS, B. A. E., 1866. Tṛl-kka-Gottinè.—Petitot, Autour, op. cit. ('people on the water').

Dictionaries. Dictionaries have been made of at least 63 different North American Indian languages belonging to 19 linguistic families, besides many vocabularies of other languages. Of 122 dictionaries mentioned below more than half are still in manuscript.

Beginning with the Eskimauan family, vocabularies of Greenland Eskimo have been supplied by the labours of Egede (1750), Fabricius (1804), Kleinschmidt (1871), Rink (1877), and Kjer and Rasmussen (1893); of Labrador Eskimo, by Erdmann (1864); of Chiglit (Kopagmiut), by Petitot (1876); and there are collections by Pinart of the Aleutian Fox (Unalaskan Aleut) dialect (1871, M8.), and of that of the Kaniagmiut (1871-72, M8.).

In the Athapascan languages there are the dictionaries of Végréville for the Chipewyan (1853-90, MS.), the threefold dictionary of Petitot for the Montagnais (Chipewyan), Peau de Lièvre (Kawchodinne), and Loucheux (Kutchin) (1876); of Radloff for the Kenai (Knaiakhotana) (1874); of Garrioch (1885) for the Beaver (Tsattine); of Morice for the Tsilkotin (1884, MS.); of Matthews (1890, MS.) and Weber (1905, MS.) for the Navaho; and of Goddard for the Hupa (1904, MS.).

Of the languages of the Algonquian family, the Cree has dictionaries by Watkins (1865), Lacombe (1874), and Végréville (ca. 1800, MS.); the Montagnais, by Silvy (ca. 1678, MS.), Favre (1696, MS.), Laure (1726, MS.), and Lemoine (1901); the Algonkin, 3 by anonymous Jesuit fathers (1661, 1662, 1667, all MS.) and 1 each by André (ca. 1688, MS.), Thavenet (ca. 1815, MS.), and Cuoq (1886); the Micmac, by Rand (Micmac-English, 1854, MS., and English-Micmac, 1888); the Malecite-Passamaquoddy, by Demillier (ca. 1840, MS.); the Abnaki, by Rasles (1691, first printed in 1833 ; Aubéry (1712-15, MS.), Lesueur (ca. 1750, MS., Nudénans (1760, MS.), Mathevet (ca. 1780, MS.), and Vetronile (1855–75, MS.); the Natick Massachuset, by Trumbull (1903); the Delaware, by Ettwein (ca. 1788, MS.), Dencke (ca. 1820, MS.), Henry (1860, MS.),

Zeisberger (1887), and Brinton and Anthony (1888); the Ojibwa (Chippewa), by Belcourt (ca. 1840, MS.), Baraga (1853, new ed. 1878–80), Wilson (1874), and Férard (1890, MS.); the Potawatomi, by Bourassa (ca. 1840, MS.) and Gailland (ca. 1870, MS.); the Ottawa, by Jaunay (ca. 1740, MS.); the Shawnee, by Gatschet (1894, MS.); the Peoria Illinois, by Gravier (ca. 1710, MS.) and Gatschet (1893, MS.); the Miami Illinois, by Le Boulanger (ca. 1720, MS.); the Menominee, by Krake (1882–89, MS.) and Iloffman (1892); the Blackfoot (Siksika), by Lacombe (1882–83, MS.), Tims (1889), and McLean (1890, MS.)

In the Iroquoian languages there are dictionaries of the Huron (Wyandot), by Le Caron (1616–25, MS.), Sagard (1632, repr. 1865), Brebœuf (ca. 1640, MS.), Chaumonot (ca. 1680, MS.), and Carheil (1744, MS.); of the Iroquois Mohawk, by Bruyas (1862), Marcoux (1844, MS.), and Cnoq (1882); of the Iroquois Seneca, by Jesuit fathers (MS.); the Iroquois Onondaga, by Jesuit fathers (printed in 1860); of the Iroquois Tuscarora, by Mrs. E. A. Smith (1880–82, MS.) and Hewitt (1886, MS.); besides extended glossaries of the Cherokee, by Gatschet (1881, MS.) and Mooney (1885, MS.; and 1900, 19th Rep. B. A. E.).

Other linguistic families are represented by dictionaries or extended glossaries as follows: Koluschan, Chilkat, by Everette (ca. 1880, MS.); Chimmesyan, Tsimshian, by Boas (1898, MS.); Salishan, Kalispel by Giorda (1877-79), Twana by Eells (ca. 1880, MS.), and Nisqualli by Gibbs (1877); Chinookan, Chinook by Gibbs (1863) and Boas (1900, MS.), and Chinook jargon by Blanchet (1856), Gibbs (1863), Demers (1871), Gill (1882), Prosch (1888), Tate (1889), Coones (1891), Bulmer (1891, MS.), St. Onge (1892, MS.), and Eells (1893, MS.); Kitunahan, Kutenai, by Chamberlain (1891–1905, MS.). (W. E.)

Dishes. Vessels for the preparation and serving of food and other purposes were manufactured by all Indian tribes. While their use as receptacles prescribes a concavity of circular, oval, or oblong outline, there is a great variety of shape, decoration, etc., according to individual taste or tribal custom, and a wide range of material, as stone, shell, bone, ivory, horn, rawhide, bark, wood, gourd, pottery, and basketry.

The vessels for serving food were not used to hold individual portions, for the Indians ate in common; but the little dishes held salt and other condiments, small quantities of delicate foods, etc. The larger dishes contained preparations of corn and other soft vegetables, and the trays and platters were for game, bread, etc., or for mixing or preparing food. In many cases the cooking pot held the common meal, and portions were taken out by means of small dishes and ladles, in which they were cooled and eaten. Some dishes had special uses, as platters, mats, and trays for drying fruits, roasting seeds, etc., and as ceremonial bowls, baskets, etc.

From archæological sites have been collected many examples of dishes. Some made of soapstone were found in several Eastern and Southern states, and in Wyoming and California. Vessels formed of seashells, cut principally from Busycon, and also from Cassis, Strombus, and Fasciolaria, were found in Ohio, Indiana, Illinois, Iowa, Arkansas, Georgia and Florida. Dishes of pottery come from many parts of the United States and some made of wood from Florida.

The Indians in general used dishes of wood, and even where pottery, basketry and bark were common, wooden vessels were made. Each region supplied suitable woods. A predilection for burl wood and knots was general. The majority of existing wooden vessels were fashioned with iron tools, but before metal was introduced they were excavated by means of fire and stone tools. Eskimo wooden dishes were sometimes cut from a single piece, but they usually had a rim of bent wood fastened to the exeavated bottom and were oval in shape. Those of the N. W. Coast tribes were boxes of rectangular shape, with searfed and bent sides attached to the bottom; but the Indians also had excavated dishes carved to represent animal forms in great variety, and small bowls of horn occur. The Salishan tribes made dishes of wood and horn which were elaborately carved. The northern Athapascans as a rule used dishes, platters, and trays of birch bark folded and sewed, but among some tribes the dishes were like those of the Eskimo.

The Chippewa had well-finished wooden dishes of rectangular, oval, or circular shape. The troquois made excellent dishes, cups, bowls, etc., of burl wood, and sometimes furnished them with handles. The Plains Indians also used in preference burl or knot wood, and while as a rule their dishes were simple in outline and homely, some specimens were well carved and finished.

Consult Goddard in Univ. Cal. Publ., Am. Archæol. and Ethnol., 1, No. 1, 1903; Holmes in 20th Rep. B. A. E., 1903; Moore in Jour. Acad. Nat. Sei. Phila., x-xn, 1894-1903; Murdoch in 9th Rep. B. A. E., 1892; Nelson in 18th Rep. B. A. E., 1899; Niblack in Rep. Nat. Mus. 1888, 1890; Swanton in Mem. Am. Mns. Nat. Hist., v, 1905; Turner in 11th Rep. B. A. E., 1894 (w.H.)

Djahul-gitinai (Djarui' gitinā'i, 'seaward Eagles'). A division of the Eagle clan of the Haida. They considered themselves a part of the Gitins of Skidegate, being simply those who lived farthest outward down Skidegate inlet, Queen Charlotte ids., Brit. Col. They formed the main part of the Eagle population at Naikun and cape Ball.—Swanton, Cont. Haida, 274, 1905.

Dj'āaquīg'it 'ena'i.—Boas, 5th Rep. N. W. Tribes Can., 26, 1889; ibid., 12th Rep., 25, 1898. Tsāagwi' gyit'-inai'.—Ibid.

Djahui-hlgahet-kegawal (Djaxui'lgā'-xet qē' gawa-i, 'those born on the seaward side of Pebble town'). A subdivision of the Hlgahet-gitinai, of the Haida of Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 274, 1905.

Djahul-skwahladawai (Djaxui' sqoā'lada-ga-i, 'down-the-inlet Skwahladas'). A division of the Raven elan of the Haida. They were probably once a part of the Skwahladas who lived on the w. coast of Queen Charlotte ids., Brit. Col., being distinguished from them by the fact that they lived seaward (djahui) down Skidegate inlet.—Swanton, Cont. Haida, 269, 1905.

Djāaqui'sk'uatl'adagā'i.—Boas, 5th Rep. N. W. Tribes Can., 26, 1889. Tsāagwīsguatl'adegai'.—Ibid., 12th Rep., 25, 1898.

Djigogiga (Djiqoqī'ga). A legendary Haida town of the Kasta-kegawai on Copper bay,
Moresby id., Queen Charlotte ids., Brit. Col.
Swanton, Cont. Haida, 279, 1905.

Djigua (Djī'gua). A legendary Haida town on the N. shore of Crumshewa inlet, Queen Charlotte ids., Brit. Col, whence the ancestress of the Djiguaahl-lanas, Kaiahl-lanas, Kona-kegewai, and Stawas-haidagai is said to have come.—Swanton, Cont. Haida, 94, 1905.

Djiguaahl-lanas (Djī'gua al la'nas, 'Djl'-guatown people'). A prominent division of

the Eagle clan of the Haida, so named from a legendary town on the x. side of Cumshewa inlet, whence their ancestress, who was also the ancestress of the Kaiahl-lanas, Konakegawai, and Stawas-haidagai, is said to have come. They lived in the town of Kloo.—Swanton, Cont. Haida, 273, 1905.

Tsēgoati lā'nas.—Boas, 12th Rep. N. W. Tribes Can, 25, 1898.

Djihuagits (Djiruagits, Masset dialect Chawagis, 'always low water'). A Haida town on a creek just s. of Naikun, E. coast of Graham id., N.W. Brit. Col. Anciently it belonged to the Naikun-kegawai, but afterward to the Chawagis-stustae.—Swanton, Cont. Haida, 280, 1905.

Djus-hade (Djus-xadé, 'people of the Djns island'). A division of the Eagle clan of the Haida, living on an island of the same name at the entrance of Tsooskahli, Queen Charlotte ids., and closely related to the Widjagitunai, Tohlka-gitunai, and Chets-gitunai. They afterwards moved to the mouth of Masset inlet. A branch of the Kuna-lanas received the same name.—Swanton, Cont. Haida, 275, 1905.

Dzős hāedral'.—Boas, 12th Rep. N. W. Tribes Can., 23, 1898.

Dog Creek. A Shuswap village or band on upper Fraser r. below the mouth of Chileotin r., Brit. Col. Pop. 14 in 1904.—Can. Ind. Aff. 1904, pt. 2, 72, 1904.

Do-gitunai (Do-gitanā'-i, 'Gitans of the west coast'). A division of the Eagle clan of the Haida. They are said to have branched off from the Mamun-gitunai, and, as the name implies, their towns and camping places were on the w. coast of Queen Charlotte id., Brit. Col.—Swanton, Cont. Haida, 275, 1905.

Togylt'inal'.—Boas, 12th Rep. N. W. Tribes, Can., 22, 1898.

Dokis Band. A Chippewa band, so named from their chief, residing on a reservation of 39,030 acres at the head of French r., where it leaves lake Nipissing, Ontario. They have a large admixture of French blood, are Roman Catholics, and obtain a livelihood by hunting and fishing and by working in adjacent lumber camps. The sale of valuable timber has made their band the wealthiest in Ontario; their capital funds amount to \$757,000.00. The band numbered 62 in 1884 and 89 in 1911.

(J. N.)

Domestication. The Indian learned a great deal from and was helped in his efforts by the actions of animals in their wild state. The period of domestication began when he held them in captivity for the gratification of his desires or they became attached to him for mutual benefit. In this process there are gradations:

- 1. Commensalism begins when food is left for serviceable animals to devour, so that these may give notice of danger or advantage. The coyote is said to reveal the presence of the mountain lion. Small animals are tolerated for their skins and flesh. Plants would be sown to attract such creatures as bees, and tame animals would be regularly fed at later stages.
- 2. Confinement is represented by such activities as keeping fish and other aquatic animals in ponds; caging birds and carrying off their vonng, gallinaceous fowl last; tving up dogs or muzzling them; corralling ruminants, and hobbling or tethering wild horses so as to have them near, keep them away from their enemies, or fatten them for eating. The aborigines had no difficulty in breeding some animals in confinement, but few wild birds will thus propagate, and the Indians could obtain those to tame only by robbing nests. Lawson says of the Congaree of North Carolina that "they take storks and cranes before they can fly and breed them as tame and familiar as dung-hill fowls."
- 3. Keeping animals for their service or produce, as dogs for retrieving game or catching fish, hawks for killing birds; various creatures for their fleece, hides, feathers, flesh, milk, etc., and taming them for amusement and for ceremonial or other purposes, were a later development. Roger Williams says the Narraganset Indians of Rhode Island kept tame hawks about their cabins to frighten small birds from the fields.
- 4. Actually breaking them to work, training dogs, horses, and cattle for packing, sledding, hauling travois, and, later, for riding, constitutes complete domestication.

In pre-Columbian times the dog was the most perfectly subdued animal of the North Americans, as much so as the llama in w. South America. But other species of mammals, as well as birds, were in different degrees rendered tractable. After the coming of the whites the methods of domesticating animals were perfected, and their uses multiplied. Moreover,

horses, sheep, cattle, donkeys, hogs, and poultry were added to the list, and these profoundly modified the manners and customs of many Indian tribes.

Domestication of animals increased the food supply, furnished pets for old and young, aided in raising the Indian above the plane of low savagery, helped him to go about, multiplied his wants, furnished a standard of property and a medium of exchange, took the load from the back of women, and provided more abundant material for economic, artistic, and ceremonial purposes.

Domestication had a different development in each culture area. In the Arctic region the dog was pre-eminent; it was reared with unremitting care, the women often suckling the puppies; all its life it was trained to the sled. As the dogs were never perfectly tamed, it was no easy task to drive a team of them; vet by the aid of dogs and sleds, in combination with umiaks, the whole polar area of America was exploited by the Eskimo, who found these an excellent means of rapid transit from Asia to the Atlantic. In recent years the successful introduction of the reindeer among the Alaskan tribes has proved a blessing.* The Mackenzie-Yukon district is a canoe country, and domestication of the dog was not vigorously prosecuted until the Hudson's Bay Company gave the stimulus. But southward, among the Algonquian and Siouan tribes of the Great lakes and the plains, this animal attained its best as a hunter and a beast of burden and traction. It was also reared for food and for ceremonial purposes. Not more than 50 pounds could be borne by one dog, but twice that amount could be moved on a travois. The coming of the horse (q. v.) to the Great plains was a boon to the Indian tribes, all of which at once adopted the new instrument of travel and transportation. The horse was apotheosized; it became a standard of value, and fostered a greater diversity of occupations. But the more primitive methods of domestication were still practised throughout the middle region. In the N. Pacific area dogs were trained to hunt; but here and elsewhere this use of the dog was doubtless learned from the whites. Morice writes of the Athapascan tribes of the interior of British Columbia: "Owing to the semisedentary state of those Indians and the character of their country, only the dog was ever

domesticated among them in the common sense of the word. This had a sort of wolfish aspect. and was small, with pointed, erect ears, and uniformly gray, circumstances which would seem to imply that the domesticating process had remained incomplete. The flesh of these wolf dogs was relished by the employees of the North West and Hudson's Bay companies, who did not generally eat that of those of European descent. In a broader sense, those aborigines also occasionally domesticated and have continued to domesticate other animals, such as black bears, marmots, foxes, etc., which they took when young and kept as pets, tied up to the tent post or free. Such animals, as long as they remained in a state of subjection, were considered as members of the family and regarded as dogs, though often called by the endearing names of 'sons,' 'daughters,' 'grandsons,' etc. Birds were never caged, but might be seen at times hobbling about with the tips of their wings cut." * * (O. T. M.)

Donnacona. A Huron chief found by Jacques Cartier, in 1535, residing with his people at the junction of St. Croix (present St. Charles r.) and St. Lawrence rs., Quebec. Although Cartier was well received and kindly treated by this chief, he managed, partly by stratagem and partly by force, to convey the latter aboard his vessel and carry him to France where he soon died.

(C. T.)

Doosedoowe ('plover.'—Hewitt). A clan of the Iroquois.

Asco.—French writer (1666) in N. Y. Doc. Col. Hist., IX, 47, 1855. Don-ese-doo-wé.—Morgan, League Iroq., 46, 1851 (Seneca form). NIcohès.—French writer (1666), op. cit. Tä-wis-tä-wis.—Hewitt, inf'n, 1886 (Tuscarora name).

Dostlan-lnagai (Dō-sL!an-lnagā'-i, 'west-coast rear-town people'). A local subdivision of the Stlenga-lanas, one of the larger Haida divisions on the Raven side, who lived on the N. w. coast of Queen Charlotte ids., Brit. Col. A small section of them was called Kaiihll-anas.—Swanton, Cont. Haida, 271, 1905.

Dū Hāadē.—Harrison in Proc. and Trans. Roy. Soc.
Can., 2d s., 11, sec. 2, 124, 1895. Töstlengilnagai'.—
Boas, 12th Rep. N. W. Tribes Can., 22, 1898.

Dotuskustl $(D\bar{v}'t!Ask!AsL)$, 'those who left the west coast'). A subdivision of the Sagualanas, a division of the Eagle clan of the Haida. The name seems to imply that they formerly lived on the w. coast of Queen Charlotte ids., Brit. Col., but in historical times they were in

^{*}Have also been introduced into N. W. Canada and Labrador.

2 GEORGE V., A. 1912

the town of Kung, in Naden harbour, with the other Sagua-lanas.—Swanton, Cont. Haida, 275, 1905.

Douglas. The local name for a body of Lower Lillooet between Lillooet and Harrison lakes, Brit. Col.; pop. 67 in 1911.

Dramatic representation. Among many tribes ceremonies were dramatic in character. Every religious rite had its dramatic phases or episodes expressive of beliefs, emotions, or desires, but in certain instances the dramatic element dominated and became differentiated from the ceremony. In such cases there were masked and costumed actors with stage setting, effigies, and other properties, and events, historical or mythical, in the cultural history or life of the tribe were represented. The most elaborate of these exhibitions were those of the Pueblo peoples and the tribes of the N. W. coast.

* * * * * * *

In the large wooden dwellings of the N. W. myths and legends were dramatized. The performance took place at one end of the house, where concealed openings in the painted wall admitted the actors who personated gods and heroes, and there were devices to give realistic effect to strange and magical scenes. Songs and dances accompanied the dramatic presentation.

Some of the great tribal ceremonies of the inland peoples, while religious in initiative, were social in general character. They portrayed episodes in the past history of the tribe for the instruction of the younger generation. There were societies a part of whose function was to preserve the history of its membership. This was done by means of song and the dramatic representation of the acts the song commemorated.

The Pawnee were remarkable for their skill in sleight-of-hand performances. Seeds were sown, plants grew, blossomed, and yielded fruit; spears were thrust through the body and many other surprising feats performed in the open lodge with no apparent means of concealment. During many dramatic representations, particularly those which took place in the open air, episodes were introduced in which a humorous turn was given to some current event in the tribe. Sometimes clowns appeared and by their antics relieved the tensity of the dramatic presentation. Among the Pueblo Indians these "delight-makers," as

Bandelier translates the name of the Koshare of the Queres villagers, constitute a society which performs comedies in the intervals of the public dances.

Consult Bandelier, Delight Makers, 1900; Boas in Rep. Nat. Mus., 1895; Dorsey and Voth in Field Columb. Mus. Publ., Anthrop. ser.; Fewkes (1) in 15th and 19th Reps. B. A. E., 1897, 1900; (2) Proc. Wash. Acad. Sci., II, 1900; (3) various articles in Am. Anthrop. and Jour. Am. Folklore; Fletcher in Proc. A. A. A. S., XLV, 1896; Matthews in Mem. Am. Mus. Nat. Hist., VI, 1902; Powell in 19th Rep. B. A. E., 1900; Stevenson in 23d Rep. B. A. E., 1905. (A. C. F.)

Dreams and Visions. Most revelations of what was regarded by the Indians as coming from the supernatural powers were believed to be received in dreams or visions. Through them were bestowed on man magical abilities and the capacity to foresee future events, to control disease, and to become able to fill the office of priest or of leader. It was the common belief of the Indians that these dreams or visions must be sought through the observance of some rite involving more or less personal privation; an exception is found in the Mohave who believe that the dream seeks the individual, coming to him before birth, or during infancy, as well as in mature life. In general the initiation of a man's personal relations to the unseen through dreams and visions took place during the fast which occurred at puterty, and the thing seen at that time became the medium of supernatural help and knowledge, and in some tribes determined his affiliations. It was his sacred object. It had no reference to his kindred, but was strictly personal in its efficacy, and he painted it on his person or his belongings as a prayer for assistance—a call for help in directing his actions. Any dream of ordinary sleep in which this object appeared had meaning for him and its suggestions were heeded. Men with a natural turn of mind toward the mysterious frequently became shamans and leaders in rites which dealt with the occult. Such persons, from the time of their first fast, cultivated their ability to dream and to have visions; the dreams came during natural sleep, the visions during an ecstasy when the man was either wholly or partially unconscious of his surroundings. It was generally believed that such men had power to bring or to avert disaster through direct communication with the unseen.

Many of the elaborate ceremonies observed among the tribes were said to have been received through visions, the actual performance following faithfully in detail the prefiguration of the vision. So, too, many of the shrines and their contents were believed to have been supernaturally bestowed in a vision upon some one person whose descendants were to be the hereditary keepers of the sacred articles. The time for the performance of rites connected with a shrine, and also other ceremonies, frequently depended on an intimation received in a dream.

The dreams of a man filling an important position, as the leader of a war party, were often regarded as significant, especially if he had carried with him some one of the sacred tribal objects as a medium of supernatural communication. This object was supposed to speak to him in dreams and give him directions which would insure safety and success. Forecasting the future was deemed possible by means of artificially induced visions. The skin of a freshly killed animal, or one that had been well soaked for the purpose, was wound around the neck of a man until the gentle pressure on the veins eaused insensibility, then in a vision he saw the place toward which his party was going and all that was to take place was prefigured. In some tribes a skin kept for this special purpose was held sacred and used for divining by means of an induced vision. Some Indians employed plants, as the peyote, or mescal button, for like purposes. That the spirit left the body and travelled independently, and was able to discern objects distant both in time and space, was believed by certain tribes; others thought that the vision came to the man as a picture or in the form of a complete dramatic ceremony.

The general belief concerning dreams and visions seems to have been that the mental images seen with closed eyes were not fancies but actual glimpses of the unseen world where dwelt the generic types of all things and where all events that were to take place in the visible world were determined and prefigured.

Consult Fletcher in 22d Rep. B. A. E., 1903; Kroeber in Am. Anthrop., 1v, no. 2, 1902; Mooney in 14th Rep. B. A. E., 1896.

(A. C. F.)

Drills and Drilling. The first drill was a development of the primitive awl, a sharppointed instrument of bone, stone, or copper which was held in one hand, pressed against

the object, and turned back and forth until a hole was bored. The point was set in a socket of bone or wood. By setting it in a transverse handle increased pressure and leverage were obtained, with increased penetrating power. Artificially perforated objects of bone, fish bones, ivory, pottery, stone, and wood, common to all periods of the world's history, are found in mounds, caves, shell-heaps, and burial places of the Indians. The holes vary from an eighth to a half inch in diameter, and from a fourth of an inch to 6 in, or more in depth. Shell, bone, and stone were drilled to make beads. Stone pipes with bowl and stem openings of different sizes were common, and whistles were made of stone and bone. Tubes in stone, several inches long, with walls scarcely an eighth of an inch thick, were accurately drilled. The columella of the Busycon shell was bored through for beads. The graceful butterfly-shaped objects found throughout E. United States were perforated with surprising accuracy. It has been said that in prehistoric times the natives bored holes through pearls by means of heated copper spindles. The points of drills were made of copper rolled into a hollow cylinder or of pieces of reed, or of solid metal, stone, shell, or wood. Boring by means of hollow drills was usual among all early races of Europe, Asia, and Africa; it was common also in Mexico, and instances are not rare in the mounds of Ohio and elsewhere in the United States, but in North America solid drill points were generally employed. Grass and bristles were also used as drills, being worked by twirling between the thumb and the index finger. Points of hard stone or metal usually cut by direct contact, but where the points were of wood, dry or wet sand proved more effectual. At times the points were separate from the shafts and were firmly attached to the latter by strings of hide or vegetal fibre. The rapidity with which a drill cuts depends on the velocity of the revolution, the weight and size of its different parts, the hardness of the abrading material and of the object drilled, the diameter of the hole, and its depth. The point used is indicated by the form of the perforation. The frequency with which objects are found bored from both sides is proof that the Indian appreciated the advantage of reducing friction. Progress in the elaboration of drills consisted mainly in heightening speed of revolution. If the drill-point be of wood, much depends on its hardness, for when too hard the wood grinds the sand to powder

while if it be too soft the grains catch at the base of the cavity and cut away the shaft. Only wood of proper texture holds the sand as in a matrix and enables it to cut to the best advantage. The insides of drill holes show by the character of their strice whether the cutting was accomplished by direct pressure or with the aid of sand.

The simplest form of drill was a straight shaft, varying from a fourth to three-fourths of an inch in diameter and from 10 in. to 2 ft. in length. This shaft was revolved in alternating directions between the hands, or, when the shaft was held horizontally, it was rolled up and down the thigh with the right hand, the point of the drill being pressed against the object held in the left hand; or at times the object was held between the naked feet while the drill was revolved between the hands. This drill was in use at the time of Columbus and is the only one represented in the Mexican codices (Kingsborough, Antiq. of Mex., I, pl. 39). With the exception of the strap drill, which was apparently used only in the far N., this is the only form of drill referred to by early American writers.

The strap drill, used both as a fire drill and as a perforator, is an improvement on the shaft drill, both in the number of its revolutions and in the pressure which may be imparted to the shaft. The shaft is kept in position by means of the headpiece of wood, which is held in the teeth. A thong that is wound once round the shaft, one end being held in each hand, is pulled alternately to the right and to the left. The thong was sometimes furnished with hand pieces of bone or bear's teeth to give a firmer grip to the strap. This drill, apparently known to the cave people of France, as it certainly was to the early peoples of Greece, Egypt, and India, has been used by the Greenlanders from early times and is employed also by the Alcut. To a person using the strap drill the jar to the teeth and head is at first quite severe, but much of the disagreeable sensation disappears with use.

Closely related to the strap drill, but a great improvement over the latter, is the bow drill, which can be revolved with much greater speed. The head piece of the bow drill is held in position with the left hand, while the strap is attached to the two ends of a bow, and after wrapping around the shaft, as with the strap drill, is alternately revolved by a backward and forward motion of the bow

The pump drill, still employed in the arts, is said to have been known to the Iroquois and is used by the Pueblo Indians. This drill consists of a shaft which passes through a dise of stone, pottery, or wood, and a cross piece through which the shaft also runs; to each end of the cross-piece is attached a string or buckskin thong having sufficient play to allow it to eross the top of the shaft and to permit the eross-piece to reach elose to the disc. This dise is turned to wind the string about the shaft; this raises the crosspiece. By pressing down the crosspiece after a few turns have been taken, the shaft is made to revolve and the disc receives sufficient impetus to rewind the string, which by successive pressure and release, continues the reciprocal movement necessary to cutting. The speed attained by the pump drill is much greater than with the bow drill or the strap drill, and the right hand is left free to hold the object that is being drilled. The pump drill, although long in common use among the Pueblo Indians, is probably of foreign origin.

Consult Hough, Firemaking Apparatus, Rep. Nat. Mus. for 1888; McGuirc, A Study of the Primitive Methods of Drilling, Rep. Nat. Mus. for 1894. (J. D. M.)

Duck Lake. A local name for a band of Okinagan in s. w. British Columbia; pop. 24 in 1901.—Can. Ind. Aff. for 1901, pt. II, 166.

Dyes and Pigments. Most of the Indian tribes of North America made permanent dyes from organic materials. The demand for these dyes arose when basketry, quillwork, and other textile industries had reached a considerable degree of advancement, and there was need of diversity of colour in ornamentation, as well as permanency of colour, which pigments alone could not supply.

Dyes. The California tribes and many others who made baskets were usually satisfied with natural colours. These are the red and black of bark, the white of grass stems, the pale yellow of peeled rods or rushes, and the brown of root bark. A few dyes were known, however, notably a black or dark grey on splints which had been buried in mud. The Hupa obtained bright yellow from lichens, another colour from the roots of the Oregon grape, and a brownish red from alder bark. Most of the tribes of the S. W. use only black for designs on baskets, and, rarely, red dyes. The Hopi, however, have a larger

number of native dyes for basketry splints than any other tribe, and the Apache, Walapai, and Havasupai have a number of vegetal dyes that are not used in basketry. The Abnaki and other tribes made fugitive stains from pokeberries and fruits of the blueberry and elder. Lichens, goldenseal, bloodroot, and the bark of the butternut and other trees were also used by the northern and eastern tribes, and in southern regions the prickly The Virginia Indians, according to Hariot, used sumach, a kind of seed, a small root, and the bark of a tree to dye their bair, as well as to colour their faces red and to dye mantles of deerskin and the rushes for baskets and mats. The tribes of the N.W. coast employed a number of harmonious vegetal colours in their baskets. Most of the native dyes of the Indians were superseded by others introduced, especially, in late years, by aniline colours.

Quillwork, formerly widespread, was generally superseded by beadwork, and the native dyes employed in the art have fallen almost into disuse. Some of the N. W. Coast tribes, the Eskimo, and the northern Athapascans alone practise quillworking in its purity, but its former range was extensive.

Native vegetal blanket dyes are found in use only among the Chilkat of Alaska, who still retain them in weaving their eeremonial shawls. The Nez Percés and the Navaho formerly used permanent vegetal dyes of pleasing colours for wool. With the latter these dyes have given way so recently to aniline colours that the details of their manufacture have not become lost. The use of dyes required a knowledge of mordants; for this purpose urine was commonly employed by the Navaho, Hopi, and Zuñi, besides an impure native alum, and an iron salt mixed with organic acids to produce black. It has been assumed that, since the weaver's art seems to be accultural with the Navaho, the mordant dyes may have been derived from the Pueblos, who, in turn, may have received them from the Spaniards. Matthews, however, controverts the opinion that the Navaho learned the art of weaving from the Pueblos; and, indeed, there is no reason why the Indians should not have become acquainted with various mordants through the practice of the culinary art or other domestic arts in which fire is employed.

Pigments. The inorganic colours used by the Indians were mostly derived from ironbearing minerals, such as others and other ores, and stained earths. These furnished various tints, as brown, red, green, blue, yellow, orange, and purple. The search for good colours was assiduously pursued; quarries were opened and a commerce in their products was carried on. White was derived from kaolin, limestone and gypsum; black from graphite, powdered coal, charcoal, or soot; green and blue from copper ores, phosphate of iron, etc. Pigments were used for facial decoration, red being most prized, for which reason the vermilion of the trader was eagerly adopted, but the intent of face painting was generally totemic or religious, and not merely orna-Pigments were rubbed into soft mental. tanned skins, giving the effect of dye, and were mixed with various media for painting the wood and leather of boxes, arrows, spears, shields, tipis, robes, parfleche cases, etc. Among the Southwestern tribes, in particular, pigments were mixed with sand for dry paintings while pigments of iron earths or kaolin were employed for decorating pottery. In connection with the preparation and use of pigments are grinding slabs and mullers, mortars and pestles, brushes and paint sticks, and a great variety of pouches and pots for carrying or for preserving them. The media for applying the pigments varied with the objects to be decorated and with tribal or personal In general, face paint was mixed with grease or saliva, while the medium for wood or skin was grease or glue. The N.W. Coast Indians put grease on their faces before applying the paint. Among some of the Pueblos, at least, an emulsion of fat seeds was made with the pigment, and this was applied by spurting from the mouth.

Eagle. Among the many birds held in superstitious and appreciative regard by the aborigines of North America, the eagle, by reason of its majestic, solitary, and mysterious nature, became an especial object of worship. This is expressed in the employment of the eagle by the Indian for religious and æsthetic purposes only. The wing bones were fashioned into whistles to be carried by warriors or used in ceremonies, and the talons formed powerful amulets or fetishes, having secondary value as ornaments; the feathers were, however, of the greatest importance. The capture of eagles for their feathers was a hazardous branch of hunting, requiring great skill. Among some tribes eagle-killing was delegated to certain men. Owing to the difficulty of getting within bowshot of the bird, it was often trapped, or the eyrie was visited to secure the young. Eagles are still kept in captivity by the Pueblo Indians as in the time of Coronado (14th Rep. B. A. E., 516, 1896). The striking war bonnet of the Plains tribes was made of eagle feathers and was highly valued, for it is said that one pony was the price of a perfect tail of 12 feathers of the "war eagle," i. e., the white plumes with black tips. Other varieties, with bars across the feathers, are regarded as inferior (Mooney). Warriors of the Plains tribes usually wore the feathers of the golden eagle only, and it is probable that the customs of many tribes prescribed like discriminations as to feathers of different species. Many tribes wore one or more eagle feathers in the hair, and these feathers were often cut, coloured, or otherwise decorated with some cognizance of the wearer. It was the custom of the Pillager Chippewa to allow a warrior who sealped an enemy to wear on his head two eagle feathers, and the act of capturing a wounded prisoner on the battlefield earned the distinction of wearing five. Fans made of the primary feathers of the eagle formed an accessory to the costume of the Sioux and other tribes. Eagle feathers were also attached as ornaments to the buckskin shirts worn by men, and war costumes and paraphernalia, including shields, were ornamented with them. As one of the prominent totemic animals, the eagle gave its name to many clans and religious fraternities. It is probable that nearly every tribe in the United States recognizing clan or gentile organization had an eagle clan or gens at some period in its history.

The eagle held an important place in symbolic art. It was depicted by all the methods

of art expression known to the Indian, appearing on pottery, basketry, textiles, beadwork, quillwork, shields, erests, totem poles, house and grave posts, pipes, rattles, and objects pertaining to cult and ceremony. It was also represented in the primitive drama connected with ceremonies. Many tribes possessed eagle deities, as the Kwahu, the eagle kachina of the Hopi of Arizona, and the Eagle god of the Miwok of California.

Among the Haida, passes made with eagle fans were thought to be effectual in conjuring. and this use reappears in many tribes. The wing-bones were often employed as sucking tubes, with which medicine-men pretended to remove disease. The Thingit and other North Pacific tribes used eagle down for ceremonial sprinkling on the hair, masks, and dance eostume; it was also scattered in the air, being blown through a tube or sprinkled by hand. The Pawnee and other Plains tribes as well as the Pueblos also used the down in ceremonies, and it was probably a general eustom. Among the Hopi the eagle is generally associated with the Sky god, and its feathers are used with discs to represent the Sun god (Fewkes).

The use of eagle feathers in religion is nowhere better shown than among the Pueblos, when downy plumes are attached to masks, rattles, prayer-sticks, and other cult objects entering into ceremonies. For this purpose a great quantity of feathers is yearly required. The Hopi clans claimed the eagle nests in the localities where they formerly resided, and caught in traps or took from the nests eaglets, whose down was used in ceremonies. The eaglets, when required for feathers, have their heads washed; they are killed by pressure on the thorax, and buried with appropriate rites in special cemeteries, in which offerings of small wooden images and bows and arrows are yearly deposited. The interior Salish also are said by Teit to have property in eagles. Near the present Hopi villages there are shrines in which offerings of eagle eggs carved from wood are placed during the winter solstice for the increase of eagles. Among the Zuñi, feathers shed by their captive eagles have special significance, though the feathers are also regularly plucked and form a staple article of trade.

The mythology of almost every tribe is replete with eagle beings, and the wide-spread thunderbird myth relates in some cases to the eagle. In Hopi myth the Man-eagle is a sky

being who lays aside his plumage after flights in which he spreads devastation, and the hero who slays him is carried to the house in the sky by eagles of several species, each one in its turn bearing him higher. The Man-eagle myth is widely diffused, most tribes regarding this being as a manifestation of either helpful or maleficent power.

See Fewkes, Property Rights in Eagles among the Hopi, Am. Anthrop., 11, 690–707, 1900; Hoffman in 14th Rep. B. A. E., 1896; Mooney (1) ibid., (2) in 19th Rep. B. A. E., 1900. (w. n.)

Eagle Hills Assiniboin. A band of Assiniboin of 35 lodges living in 1808 between Bear hills and South Saskatchewan r., Saskatchewan.—Henry-Thompson Jour., Coues ed., n, 523, 1897.

Ecorce. A band of Nipissing living at Oka, Quebec, in 1736. Their totem was the birch. Chauvignerie ealls them L'Ecoree, evidently intended for L'Ecorce.

Bark tribe.—Chauvignerie (1736) transl. in N. Y. Doc. Col. Hist., 1x, 1053, 1855. L'Ecoree.—Chauvignerie quoted by Schoolcraft, Ind. Tribes, 111, 554, 1853.

Ecureuil (French: 'squirrel'). Spoken of as a tribe formerly living between Tadoussac and Hudson bay, Quebee; destroyed by the Iroquois in 1661. Probably a Montagnais band living about the headwaters of the St. Maurice r., possibly about the lake named Ouapichiouanon in the Jesuit Relations.*

Escurieux.—Jes. Rel., 20, 1661. L'Ecureuil.—Mc-Kenney and Hall, Ind. Tribes, 111, 79, 1854.

Edenshaw (or Edensaw, from a Thingit word referring to the glacier). The Haida chief best known to the whites. He succeeded early in the 19th century to the chieftainship of the strong Stustas kinship group which centered in the town of Kioosta on the coast of Graham id. opposite North id., Brit. Col. Shortly after 1860, his people having fallen off in numbers, he moved with them to Kung, at the mouth of Naden harbour, where he erected a large house, which is still standing. Through the exercise of his exceptional abilities in trade and in various other ways he became one of the wealthiest of the Haida chiefs. His relations

with the whites were always cordial, and it was through his influence that a missionary was sent to Masset. Among other good offices to the whites, he protected the crew of an American vessel when threatened by other natives. He died about 1885. A monument mentioning his kind treatment of the whites stands in Masset.

(J. R. S.)

Edjao (³I'djao). A Haida town situated around a hill of the same name, at the E end. of Masset village, Queen Charlotte ids., Brit. Col. It was occupied by the Aoyaku-Inagai, a branch of the Yaku-Ianas, and, according to the old men, consisted in later times of about 6 houses, which would have contained nearly a hundred persons. Later it came to be included within the limits of Masset.—Swanton, Cont. Haida, 99, 1905.

Hai'ts'au.—Boas, Twelfth Rep. N. W. Tribes Can., 23, 1898. Hā-jū hādē.—Krause, Tlinkit-Indianer, 304, 1885 ('people of Edjao'; probably the same).

Edjieretrukenade ('buffalo people'). An Athapascan tribe of the Chipewyan group living along the banks of Buffalo r., Alberta.

Edjiére-t@ou-kkè-nadé.—Petitot, Autour du lac des Esclaves, 363, 1891 ('buffalo people').

Education. The aborigines of North America had their own systems of education, through which the young were instructed in their coming labours and obligations, embracing not only the whole round of economic pursuits -hunting, fishing, handieraft, agriculture, and household work—but speech, fine art, customs, etiquette, social obligations, and tribal lore. By unconscious absorption and by constant inculcation the boy and girl became the accomplished man and woman. Motives of pride or shame, the stimulus of flattery or disparagement, wrought constantly upon the child, male or female, who was the charge, not of the parents and grandparents alone but of the whole tribe (Heckewelder). Loskiel (p. 139) says the Iroquois are particularly attentive to the education of the young people for the future government of the state, and for this purpose admit a boy, generally the nephew of the principal chief, to the council and solemn feast following it.

The Eskimo were most careful in teaching their girls and boys, setting them difficult problems in canoeing, sledding, and hunting, showing them how to solve them, and asking boys how they would meet a given emergency (see *Child life*. Everywhere there was the closest association, for education, of parents

^{• &}quot;Coucoucache; river and lake, Champlain co.; about 1660 a party of Iroquois hid at the mouth of the Coucoucache river, and, to draw their enemies into an ambush, imitated the cry of the owl. The Attikamegs thinking there was a flock (wache) of owls (cou-cou) landed to hunt there, and were shot down by the Iroquois; later, "coucou-kwache" became 'coucoucache'." (White, Place Names in Quebec.)

2 GEORGE V., A. 1912

with children, who learned the names and uses of things in nature. At a tender age they played at serious business, girls attending to household duties, boys following men's pursuits. Children were furnished with appropriate toys; they became little basket makers, weavers, potters, water carriers, cooks, archers, stone workers, watchers of crops and flocks, the range of instruction being limited only by tribal custom. Personal responsibilities were laid on them, and they were stimulated by the tribal law of personal property, which was inviolable. Among the Pueblos cult images and paraphernalia were their playthings, and they early joined the fraternities, looking forward to social duties and initiation. The Apache boy had for pedagogues his father and grandfather, who began early to teach him counting, to run on level ground, then up and down hill, to break branches from trees, to jump into cold water, and to race, the whole training tending to make him skilful, strong, and fearless. The girl was trained in part by her mother, but chiefly by the grandmother, the discipline beginning as soon as the child could control her movements, but never becoming regular or severe. It consisted in rising early, carrying water, helping about the home, cooking, and minding children. At 6 the little girl took her first lessons in basketry with yucca leaves. Later on decorated baskets, saddle-bags, beadwork, and dress were her care.

On the coming of the whites a new era of secular education, designed and undesigned, began. All the natives, young and old, were pupils, and all the whites who came in contact with them were instructors, whether purposely or through the influence of their example and patronage. The undesigned instruction can not be measured, but its effect was profound. The Indian passed at once into the iron age; the stone period, except in ceremony, was moribund. So radical was the change in the eastern tribes that it is difficult now to illustrate their true life in museum collections.

An account of the designed instruction would embrace all attempts to change manners, customs, and motives, to teach reading and writing in the foreign tongue, to acquaint the Indians with new arts and industries, and to impress or force upon them the social organization of their conquerors. The history of this systematic instruction divides itself into the period of (1) discovery and exploration, (2) colonization and settlement, (3) Colonial and Revolutionary times, (4) the growth of the national policy, and (5) the present system.

Portions of the area here considered were discovered and explored by several European nations at dates wide apart. All of them aroused the same wonder at first view, traded manufactures for Indian products, smoked the pipe of peace, and opened friendly relations. The Norwegians began their acculturation of Greenland in the year 1000. Spanish pioneers were Ponce de Léon, Narvaez, Cabeza de Vaca, Marcos de Niza, De Soto. Coronado, Cabrillo, and many others. French appeared in Canada and in the Mississippi valley, and were followed by the English in Virginia and in New England, the Dutch in New York, the Swedes in New Jersey, the Quakers in Pennsylvania, and the Russians in Alaska. Instruction, designed and undesigned, immediately ensued, teaching the Indians many foreign industrial processes, the bettering of their own, and the adoption of firearms, and metal tools and utensils. Domestic animals (horses, donkeys, cattle, sheep, goats, poultry) and many vegetables found congenial environment. It was through these and other practical lessons that the missionaries and teachers of the early days, who came to Christianize young Indians and bestow on them an education, were more successful instructors than they knew. By the subtle process of suggestion, the inevitable action of mind upon mind, the Indians received incalculable training in all arts and the fashion of living. Failures to accomplish the most cherished object of the missionaries grew out of the great distance which separated the two races, and of the contrary influences of many of the whites who were first on the spot, not from lack of zeal or ability. The Roman Catholic clergy were at first the most efficient agents of direct instruction; besides carrying on their proper missionary work they exerted themselves to mitigate the harsh treatment visited on the Indian. In the 16th century the expedition of Narvaez to Florida was a companied by Franciscans under Padre Juan Juarez, and the appearance of Cabeza de Vaca in Mexico prompted Fray Marcos de Niza's journey to the N. as far as Znňi, and of the expedition of Coronado, who left Fray Juan de Padilla and a lay brother in Quivira, on the Kansas plains, as well as a friar and a lay brother at Tiguex and Pecos, respectively, all destined to be killed by the natives.

The subsequent history of the S. W. records a series of disasters to the immediate undertakings, but permanent success in practical education.

In 1567 the agricultural education of Indians was tried in Florida by the Jesuit Fray Rogel, who selected lands, procured agricultural implements, and built commodious houses (Shea).

Early in the 17th century Franciscan missions were established among the Apalachee and neighbouring tribes, afterward to be abandoned, but forming the first link in the chain of causes which has brought these Indians through their minority under guardianship to mature self-dependence. Concentration for practical instruction was established in California by the Franciscans. The results achieved by the missions in he S. W. were chiefly practical and social. Domestic animals, with the art of domestication and industries depending on their products, were permanently acquired. Foreign plants, including wheat, peaches, and grapes, were introduced, gunpowder was adopted in place of the bow, and new practices and customs, good and bad, came into vogue. The early French missions in North America were among (1) the Abnaki in Maine, (2) the Huron in Ontario, Michigan and Ohio, (3) the Iroquois in New York, (4) the Ottawa in Wisconsin and Michigan, (5) the Illinois in the middle W., and (6) the tribes of Louisiana. Bishop Laval founded a school at Quebec for French and Indian youth, Father de Smet planted the first Catholic mission among the Salish tribes, and Canadian priests visited the natives on Puget sd. and along the coast of Washington.

One of the objects in colonizing Virginia, mentioned in the charter of 1606 and repeated in that of 1621, was to bring the infidels and savages to human civility and a settled and quiet government (Neill). Henrico College was founded in 1618. The council of Jamestown in 1619 voted to educate Indian children in religion, a civil course of life, and in some useful trade. George Thorpe, superintendent of education at Henrico, gave a cheering account of his labours in 1621. Many youths were taken to England to be educated. William and Mary College was founded in 1691, and special provisions were made in the charter of Virginia for the instruction of Indians (Hist. College of William and Mary, 1874). Brasserton manor was purchased through the charity of Robert Boyle, the yearly rents and profits being devoted to a boarding-school foundation in Wil-

liam and Mary College. In Maryland no schools were founded, but the settlers and Indians exchanged knowledge of a practical kind. The interesting chapter of Indian education in New England includes, during the 17th century, the offering of their children for instruction, the translation of the Bible (1646-90) into their language by Eliot, the founding of Natick, the appointment of a superintendent of Indians (Daniel Gookin, 1656-86), and the provision for Indian youth in Harvard. The spirit and methods of instruction in the 18th century are revealed in the adoption of Indian children by the colonists (Samson Occum, for example), the founding of Moor's charity school, Bishop Berkeley's gift to Yale, the labours of Eleazer Wheelock (1729), and the founding of Dartmouth College in 1754 (see Fletcher, Ind. Education and Civilization, 1888). In New York and other northern states large sums of money were appropriated for the instruction of Indians, and in Princeton College special provisions were made for their education.

The Moravians, models of thrift and good will, had in their hearts wherever they went the welfare of the aborigines as a private and public burden.

Between 1741 and 1761 began, under Vitus Bering and his successors, the series of lessons given for the acculturation of the Aleut, Eskimo, and Indians of Alaska. Schools were formally opened in Kodiak in 1794, and a little later in Sitka. This chapter in education includes the Russian Company's schools, as well as military, Government, and church schools. Pupils were taught the Russian and English languages, geography, history, arithmetic, geometry, trigonometry, and navigation. Industrial training was compulsory in many cases. Dall (Alaska, 1870) speaks of the great aptness of the Aleuts in receiving instruction. In all areas the voyageur, the trapper, the trader, the missionary, the settler, the school-teacher, and Government authorities were partners in education. The contact, whenever it took place, had its effect in a generation or two. The making of treaties with the Indians afforded an object lesson in practical affairs. Old things passed away whose nature and very existence and structure can be proved now only by impressions on ancient pottery or remains in caverns and graves. The twofold education embraced new dietaries, utensils, and modes of preparing and eating food; new materials and fashions in dress and implements for making

elothing; new or modified habitations and their appurtenances and furniture; new productive industries and new methods of quarrying, and mining, woodcraft, hunting, trapping, and fishing; the introduction of gunpowder, domestic animals, and foreign handicrafts; the adoption of calendars and clocks, and the habit of steady employment for wages; new social institutions, manners, customs, and fashions, not always for the better; foreign words and jargons for new ideas and activities; new æsthetic ideas; changes in the clan and tribal life, and accessions to native beliefs and forms of worship borrowed from the conquerors.

In the Canadian colonies little was done for secular and industrial education by the provineial governments prior to confederation. The Roman Catholic missions inherited from the French, Anglican missions sent from the mother country, the New England Company's missions among the Six Nations and Mohawk, and Methodist schools founded by Lord Elgin and others, as well as those managed by Presbyterians, Baptists, and Congregationalists, all combined common school instruction and training in the practical arts with their special work (see Missions). After the confederation (1867) the subject was taken up systematically and contract schools were established and put into the hands of the Christian denominations. In the older provinces agriculture and other industries had largely taken the place of primitive arts. After the admission of British Columbia, Manitoba, and the Northwest Territory into the Dominion, steps were taken to establish systematic training in those provinces. In 1911, there were 19 industrial, 54 boarding, and 251 day schools in operation throughout the Dominion. Day schools among the tribes aim to secure the co-operation of the parents; the boarding schools especially cultivate industrial training for various breadwinning trades; normal schools and girls' homes have been established to teach self-support under new conditions. Improvement in dwellings has developed a stronger attachment to home, as well as bettered health and raised the moral tone, for when houses are furnished with stoves, beds, tables, chairs, musical instruments, and sewing machines, the tastes of the occupants are elevated and other thoughts stimulated. Indians become individual owners of farms and of flocks and herds and sell the produce; they partake of the benefits of commerce and transportation and acquire thrift.

Competition in fairs and exhibitions stimulates proficiency in both the old and the new activities. The purpose of the Canadian government has been to encourage the Indians to emerge from a condition of tutelage and continue voluntarily what they have learned under elose supervision. The schools discourage premature marriages and educate the young prospective mothers. Education has made the aborigmes law-respecting, prosperous, and eontented. Far from being a menaee to or a burden upon the commonwealth, they contribute in many ways to its welfare. The ablebodied in the mixed farming districts have become practically self-supporting (Pedley in Can. Ind. Aff. for 1904).

Eeksen (E'exsen). A Salish tribe about Oyster bay, E. coast of Vancouver id., speaking the Comox dialect.—Boas, MS., B. A. E., 1887.

Eesteytoch. Given as a tribe on the Cascade inlet, Brit, Col.; probably a village group of the Bellacoola.

Ees-tey-toch.—Kane, Wand, in N. Am., app., 1859.

Egan. An Algonquian settlement in Maniwaki township, Ottawa co., Quebec, containing 421 Indians in 1911.

Ehatisaht. A Nootka tribe on Esperanza inlet, w. coast of Vancouver id., Brit. Col.; pop. 101 in 1902, 93 in 1911. Their principal village is Oke. From their waters came the larger part of the supply of dentalium shells extensively used on the Pacific coast as media of exchange.

Ai-tiz-zarts.—Jewitt, Nar., 36, 1849. Aitzarts.—Armstrong, Oregon, 136, 1857. Ayhuttisaht.—Sproat, 8av. Life, 308, 1868. Eh-aht-tis-aht.—Can. Ind. Aff., 52, 1875. Ehateset.—Mayne, Brit. Col., 251, 1862. Ehatisaht.—Can. Ind. Aff. 1901, pt. 2, 158. E'hatis-ath.—Boas, 6th Rep. N. W. Tribes, Can. 31, 1890. Ehatt-is-aht.—Can. Ind. Aff. 1897, 357.

Ehouae ('one battered it'.—Hewitt). A village of the Tionontati existing in 1640.

Eh8ae.—Jes. Rel. 1641, 69, 1858. Ehwae.—Shea, note in Charlevoix, New France, 11, 153, 1866. Sainct Pierre et sainct Paul.—Jes. Rel. 1640, 95, 1858.

Ehressaronon. The Huron name of a tribe mentioned by Raguenean in 1640 as living s. of St. Lawrence r. (Jes. Rel. 1640, 35, 1858). It can not now be identified with any tribe s. of the St. Lawrence. Perhaps Iroquoian, as are some of the tribes mentioned in the same list.

Einake (*Ē-tn'-a-ke*, 'eatchers,' or 'soldiers'). A society of the Ikunuhkatsi, or All Comrades, in the Piegan tribe; it has been obsolete since about 1860, and perhaps earlier.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Ekaentoton. The Huron name of Manitoulin id. and of the Indians (Amikwa) living on it in 1649. It was the ancient home of the Ottawa.

Ekaentoton.—Jes. Rel. 1649, 11, 6, 1858. I'Isle de Saincte Marie.—Ibid.

Ekaloaping. A Padlimint Eskimo settlement in Padli fiord, Baffin island.

Exaloaping.—Bnas in 6th Rep. B. A. E., 441, 1888.

Ekaluakdjuin. A summer settlement of the Saumingmiut subtribe of the Okomiut Eskimo, N. of Cumberland sd., Baffin island. Exaluaqdjuin.—Boas in 6th Rep. B. A. E., 439, 1888.

Ekalualuin. A summer settlement of the Akudnirmiut Eskimo on Home bay, Baffin island.

Exalualulu.-Boas in 6th Rep. B. A. E , 441, 1888.

Ekaluin. A summer settlement of the Nugumiut Eskimo of Baffin island at the head of Frobisher bay.

Exaluin.-Boas in 6th Rep. B. A. E., map, 1888.

Ekaluin. A summer settlement of Talirpingmiut Eskimo on the s. shore of Cumberland sd., Baffin island.

Exoluin.-Boas in 6th Rep. B. A. Ε., map, 1888.

Ekalukdjuak. A summer settlement of the Kingua Okomiut Eskimo at the head of Cumberland sd., Baffin island.

Exaluqdjuaq.—Boas in 6th Rep. B. A. E., map, 1888.

Ekatopistaks (half-dead 'meat'—Morgan'; 'the band that have finished packing'—Haydden). A division of the Piegan tribe of the Siksika (q. v.), probably extinct.

e-ka-to'-pi-staks.—Hayden, Ethnog, and Philol. Mo. Val., 264, 1862. E-ko'-to-pis-taxe.—Morgan, Anc. Soc., 171, 1878.

Ekiondatsaan. A Huron village in Ontario about 1640.

Ekhiondaitsaan.—Jes. Rel. 1637, 162, 1858 — Ekiondaitsaan.—Jes. Rel. III, index, 1858 — Khiondaësahan.—Jes. Rel. 1637, 70, 1858.

Ekoolthaht ('bushes-on-hill people'). A Nootka tribe formerly inhabiting the shores of Barkley sd., w. coast of Vancouver id.; pop. 48 in 1879. They have now joined the Seshart. E-koolth-aht.—Can. Ind. Aff., 308, 1879. Ekū'-lath.—Boas, 6th Rep. N. W. Tribes Can., 31, 1890. Equalett.—Kelley, Oregon, 68, 1830.

Ekuhkahshatin. A Shuswap village on a small branch of Deadman er., a N. affluent of Thompson r., Brit. Col. Pop., with Skichistan (q. v.), 118 in 1904.

E-kuh-kah'-sha-tin.—Dawson in Trans. Roy. Soc. Can. for 1891, sec. II, 44.

Ekuks. A Squawmish village community on the right bank of Skwamish r., Howe sd., B.C. Ē'kuiks.—Boas, MS., B. A. E., 1887. Ēk'ūks.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Eleidlinottine ('people of the fork'). An Etchareottine tribe at the confluence of Liard and Mackenzie rs., whose territory extends to La Martre, Grandin, and Taché lakes, Mackenzie, N.W.T.

Él'é-idlin-Gottlne.—Petitot, Autour du lac des Esclaves, 363, 1891. Élè-idlin-ottinè.—Petitot in Bull Soc. de Geog. Paris, chart, 1875. Gens de la fourche du Mackenzie.—Petitot, Dict. Dènè Dindjié, xx, 1876.

Elhlateese. The principal village of the Uchucklesit (q. v.) at the head of Uchucklesit harbour, Alberni canal, Vancouver id.; pop. 35 in 1911.—Can. Ind. Aff., 265, 1911.

Elothet. Given by Kelley (Oregon, 68, 1830) as a Nootka town on Vancouver id. under chief Wickaninish; possibly intended for Ucluelet.

Emitahpahksaiyiks ('dogs naked'). A division of the Siksika.

Dogs Naked.—Grinnell, Blackfoot Lodge Tales, 208, 1892. E'-ml-tah-pahk-sal-yiks.—Ibid.

Emitaks (E'-mi-taks, 'dogs'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe; it is composed of old men who dress like, and dance with and like, the Issui, though forming a different society.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

English influence. The first English visitors to the coast of Virginia-Carolina were well received by the Indians, whom the early chronielers, as Hariot, for example, describe as peaceful and amiable people. So, too, were in the beginning the natives of the New England coast, but in 1605 Capt. Weymouth forcibly earried off five Indians, and he soon had many imitators. The good character ascribed by Pastor Cushman in 1620 to the Indians of Plymouth colony was forgotten when theological zeal saw in the aborigines of the New World "the accursed seed of Canaan," which it was the duty of good Christians to exterminate.

When the political ambitions of the English colonists were aroused conflicts with the Indians soon occurred, and the former came to regard the latter as the natural enemies of the whites in the onward march of civilization. Unlike the French, they paid little attention to the pride of the Indians, despising the heathen ways and institutions more and more as their power grew and their land hunger increased. With a few noble exceptions, like Roger Williams and John Eliot, the elergy of the English colonies were not nearly so sympathetic toward the natives as were the French missionaries in Acadia and New France. Scotchmen, however, in the S., in the W., in the old provinces of Canada, and in the Hudson's Bay Company's territories have played a conspicuous part as associates and leaders of the Indians. Even men like Canonicus were always suspicions of their English friends, and never really opened their hearts to them. The introduction of

rum and brandy among the Indians worked infinite damage. Some of the New England tribes, such as the Pequot, for example, foreseeing, perhaps, the result of their advent, were inimical to the English from the first, and the extermination of these Indians ensued when the whites were strong enough to accomplish it. It appears, however, that the English colonists paid for most of the land that they took from the Indians (Thomas in 18th Rep. B. A. E., 549, 1899). English influence on tribal government and land tenare was perceptible as early as 1641. The success of deliberately planned educational institutions for the benefit of the Indian during the early periods of American history does not seem to have been proportionate to the hopes and ideals of their founders. Harvard, Dartmouth, and the College of William and Mary all began, in whole or in part, as colleges for Indian youth, but their graduates of aboriginal blood have been few indeed, while they are now all high-class institutions for white men (see Education). The royal charter of Dartmonth College (1769) specifically states that it is to be "for the education and instruction of youths of the Indian tribes in this land," and "for civilizing and Christianizing the children of pagans." That of Harvard looked to "the education of the English and Indian vonth in knowledge and godliness." Harvard had during the colonial period one Indian graduate, Caleb Cheeshateaumuck, of whom hardly more than his name is known (see James, English Institutions and the American Indian, 1894). The aim of the English has ever been to transform the aborigines and lift them at once to their own plane. When commissioners visited the Cherokee they induced these to elect an "emperor," with whom treaties could be made. The Friends, from the time of William Penn (1682) down to the present (see Mooney in 17th Rep. B. A. E., 193, 1898), seem to have furnished many individuals capable, like the Baptist Roger Williams (1636), of exercising great personal influence over the Indians. The Quakers still continue their work, e.g., among the eastern Cherokee (Mooney in 19th Rep. B. A.E., 176, 1900) and the Tlingit of Alaska. The New England Company established for the propagation of the gospel in America (1649), whose operations were transferred to Canada in 1822, carries on at the present time work on the Brantford Iroquois reserve and in other parts of Ontario, at Kuper id., Brit. Col., and else_

where. Its Mohawk institute, near Brantford, has had a powerful influence among the Iroquois of Ontario. The pagan members of these Indians have recently been investigated by Boyle (Jonr. Anthrop. Inst. G. B., n. s., III, 263-273, 1900), who tells us that "all for which Iroquois paganism is indebted to European culture" is the possession of some ideas about God or the Great Spirit and "a few suggestions respecting conduct, based on the Christian code of morals." The constant mingling of the young men with their white neighbours and the going of the young women out to service are nevertheless weakening more and more the old ideas which are doomed "to disappear as a system long before the people die out." That they have survived so long is remarkable.

English influence made itself felt in colonial days in the introduction of improved weapons, tools, etc., which facilitated hunting and fishing and made possible the manufacture with less labour and in greater abundance of ornaments, trinkets, and other articles of trade. The supplying of the Indians with domestic animals also took place at an early period. Spinning wheels and looms were introduced among the Cherokee shortly before the Revolution, and in 1801 the agent reported that at the Cherokee agency the wheel, the loom, and the plough were in pretty general use. The intermarriage of Englishmen and Indians has been greater all over the country than is commonly believed, and importance must consequently be attached to the effects of such intermingling in modifying Indian customs and institutions. Clothing and certain ornaments, and, after these, English beds and other furniture were adopted by many Indians in colonial days, as is now being done by the tribes of the N. Pacific coast.

English influence on the languages of some of the aborigines has been considerable. The word Kinjames, 'King James,' in use among the Canadian Abnaki, testifies to the power of English ideas in the 17th century. The vocabularies of the eastern Algonquian tribes who have come in contact with the English contain other loan-words. Rand's English-Micmae Dictionary (1888) contains, among others, the following: Jak-ass, cheesawa, 'cheese'; koppee, 'coffce'; mulugeeh, 'milk'; gubulnol, 'governor.' Brinton and Anthony's Lenape-English Dictionary (1889), representing the language of about 1825, has amel, 'hammer'; apel, 'apple'; mbil, 'beer'; mellik, 'milk'; skulin, 'to keep school,' which may be partly from English and partly from German. A Shawnee vocabulary of 1819 has for 'sugar' melassa, which seems to be English 'molasses': and a Miemae vocabulary of 1800 has blaakeet, 'blanket.' The English 'cheese' has passed into the Nipissing dialect of Algonquian as tchis. The Chinook jargon (q. v.) contained 41 words of English origin in 1804, and 57 in 1863, while in 1894, out of 1,082 words (the total number is 1.402) whose origin is known. Eells cites 570 as English. Of recent years "many words of Indian origin have been dropped, English words having taken their places." In colonial days English doubtless had some influence on the grammatical form and sentence-contruction of Indian languages, and this influence still continues: the recent studies by Prince and Speck of the Pegnot-Mohegan (Am. Anthrop., n. s., vi, 18-45, 469-476, 1904), contain evidence of this. English influence has made itself felt also in the languages of the N.W. Hill-Tout (Rep. Ethnol. Surv. Can., 18, 1902) observes, concerning certain Salishan tribes, that "the spread and use of English among the Indians is very seriously affecting the purity of the native speech." Even the Athapascan Nahane of N. British Columbia have, according to Morice (Trans. Canad. Inst., 529, 1903), added a few English words to their vocabulary. See also Friederici, Indianer und Anglo-Amerikaner 1900; MacMahon, The Anglo-Saxon and the North American Indian, 1876; Manypenny, Our Indian Wards, 1880. (A. F. C.)

Englishman. See Sagaunash.

Although Engraving. extensively employed in pictographic work and in decoration, the engraver's art did not rise to a high degree of artistic excellence among the tribes N. of Mexico. As no definite line can be drawn between the lower forms of relief sculpture and engraving, all ordinary petroglyphs may be classed as engravings, since the work is executed in shallow lines upon smooth rock surfaces. Point work is common on wood, bone, horn, shell, bark, metal, clay, and other surfaces. Each material has its own particular technique, and the designs run the entire gamut of style from graphic to purely conventional representations, and the full range of significance from purely symbolic through æsthetic to simply trivial motives.

Perhaps the most artistic and technically perfect examples of engraving are those of the N.W. Coast tribes of the present day, executed on slate utensils and on ornaments of metal (Niblack), yet the graphic productions of the Eskimo on ivory, bone, and antler have sometimes a considerable degree of merit (Boas, Hoffman, Murdoch, Nelson, Turner). With both of these peoples the processes employed and the style of representation have probably undergone much change in recent times through contact with white people. The steel point is superior to the point of stone, and this alone would have a marked effect on the execution. The picture writings on bark of many of the northern tribes, executed with hone or other hard points, are good examples of the native engraver's art, although these are not designed either for simply pictorial or for decorative effect. The ancient mound builders were clever engravers, the technical excellence of their work being well illustrated by examples from the mounds and dwelling sites of Ross co., Ohio (Putnam and Willoughby), and by others from the Turner mounds in Hamilton co., Ohio. Shell also was a favorite material for the graver's point, as is illustrated by numerous ornaments recovered from mounds in the middle Mississippi vallev.

In decorating their earthenware the native tribes often used the stylus with excellent effect. The yielding clay afforded a tempting surface, and in some cases considerable skill was shown, especially by the ancient potters of the lower Gulf states, who executed elaborate scroll designs with great precision (Moore, The point was used for incising, Holmes). trailing and indenting, and among ancient Pueblo potters was sometimes used upon darkpainted surfaces to develop delicate figures in the light colour of the underlying paste. Examples of engraving are given by Boas in 6th Rep. B. A. E., 1888; Fewkes in 17th Rep. B. A. E., 1898; Hoffman in Nat. Mus. Rep., 1895, 1897; Holmes (1) in 2d Rep. B. A. E., 1883, (2) in 20th Rep. B. A. E., 1903; Hough in Nat. Mus. Rep., 1901; Moore, various memoirs in Jour. Acad. Nat. Sci. Phila., x-x11, 1894-1903; Murdoch in 9th Rep. B. A. E., 1892; Nelson in 18th Rep. B. A. E., 1899; Niblack in Rep. Nat. Mus. 1888, 1890; Putnam and Willoughby in Proc. A. A. A. S., XLIV, 1896; Turner in 11th Rep. B. A. E., 1894. (w. H. H.)

Enias. A local name for a body of Upper Lillooet on Seton lake, in 1902 reduced to a single individual.—Can. Ind. Aff., pt. 11, 72, 1902.

Environment. The natural phenomena that surrounded the aborigines of North America, stimulating and conditioning their life and activities, contrasted greatly with those of the European-Asiatic continent. The differences in the two environments do not lie alone in physical geography and in plant and animal life, but are largely meteorologic, the sun operating on air, land, and water, producing variations in temperature and water supply, and as a result entirely new vegetal and animal forms. The planets and stars also affected cultural development, since lore and mythology were hased on them. Within the American continent N. of Mexico there were ethnic environments which set bounds for the tribes and modified their industrial, æsthetic, social, intellectual, and religious lives. Omitting the Eskimo, practically all the peoples dwelt in the temperate zone. Few impassable barriers separated the culture areas, as in Asia. In some respects, indeed, the entire region formed one environment, having easy communications N. and s. and few barriers E. and w. The climate zones which Merriam has worked out for the U.S. Department of Agriculture in regard to their animal and vegetal life correspond in a measure with the areas of linguistic families as delimited on Powell's map (see Linguistic families). The environmental factors that determine cultural development of various kinds and degrees are (1) physical geography; (2) climate, to which primitive peoples are especially amenable; (3) predominant plants, animals, and minerals that supply the materials of drink, food, medicines, clothing, ornaments, houses, fuel, furniture and utensils, and the objects of hunting, war, the industrial arts, and activities connected with travel, transportation, and commerce. Twelve ethnic environments may be distinguished. There are cosmopolitan characters common to several, but in each area there is an ensemble of qualities that impressed themselves on their inhabitants and differentiated them.

(1) Arctic.—The characteristics of this environment are an intensely cold climate; about six months day and six months night; predominance of ice and snow; immense archipelagos, and no accessible elevations: good stone for lamps and tools; driftwood, but no timber and little fruit; polar bear, blue fox,

aquatic mammals in profusion, migratory birds, and fish, supplying food, clothing, fire, light, and other wants in the exacting climate.

- (2) Yukon-Mackenzie.—This is Merriam's transcontinental coniferous belt, separated from the arctic environment by the timber line, but draining into arctic seas. It has poor material resources, and barren grounds here and there. Its saving riches are an abundance of birch, yielding bark utensils, canoes, binding materials, and houses, and of spruce, furnishing textile roots and other necessaries: caribou, musk-ox, bear, red fox, wolf, white rabbit, and other fur-bearing mammals, and porcupines, migrating birds, and fish. Snow necessitates snowshoes of fine mesh, and immense inland waters make portages easy for bark canoes. Into this area came the Athapascan tribes who developed through its resources their special culture,"
- (3) St. Laurence and Lake region.—This is a transition belt having no distinct lines of separation from the areas on the n. and s. It occupies the entire drainage of the great lakes and includes Manitoba, E. Canada and N. New England. It was the home of the Iroquois, Abnaki, Chippewa, and their nearest kindred. The climate is boreal. There are a vast expanse of lowlands and numerous extensive inland waters. The natural products are abundant-evergreens, birch, sugar maple, elm, berries, and wild rice in the w.; maize, squash and beans in the s.; moose, deer, bear, beaver, porcupines, land and water birds in immense flocks, whitefish, and, on the seacoast, marine products in greatest variety and abundance. Canoe travel; pottery scarce.
- (7) Plains.—This environment lies between the Rocky mts. and the fertile lands w. of the Mississippi. To the N. it stretches into N. Alta. and Sask., and it terminates at the s. about the Rio Grande. The tribes were Siouan, Algonquian, Kiowan, Caddoan, and Shoshonean. The Missouri and Arkansas and many tributaries drain the area. The plants were bois d'arc, and other hard woods for bows, cedar for lodge poles, willows for beds, the pomme blanche for roots, etc., but there were no fine textile fibres. Dependence on the buffalo and the herbivorous animals associated with it compelled a meat diet, skin clothing and dwellings, a roving life, and industrial arts depending on the flesh, bones, hair, sinew, hide and horns of those animals. Artistic and symbolic designs were painted on the rawhide, and the

- myths and tales related largely to the buffalo. Travel was on foot, with or without snowshoes, and transportation was effected by the aid of the dog and travois. The horse afterward wrought profound changes. The social order and habit of semi-nomadic wandering about fixed centres were the direct result of the surroundings and discouraged agriculture or much pottery. No canoes or other craft than the Mandan and Hidatsa skin boats.
- (8) Narth Pacific coast. From mount St. Elias to the Columbia mouth, lying along the archipelago and cut off from the interior by mountains covered with snow, was the area inhabited by the Tlingit, Haida, Tsimshian, Nootka, and coast Salish. It has a moist, temperate climate, a mountainous coast, with extensive, island groups and landlocked waters favourable to canoe travel. The shores are bathed by the warm current of the N. Pacific. The days in different seasons vary greatly in length. The material resources are black slate for carving and good stone for pecking, grinding and sawing; immense forests of cedar, spruce and other evergreen trees for houses, canoes, totem-posts, and basketry; mountain goat and bighorn, bear, beaver, birds, and sea food in great variety and in quantities inexhaustible by savages. This environment induced a diet of fish, mixed with berries, clothing of bark and hair, large communal dwellings, exquisite twined and checkered basketry to the discouragement of pottery, carving in wood and stone, and unfettered travel in dugout canoes, which provided opportunity for the full development of the dispersive clan
- (9) Columbia-Fraser region.—This includes the adjoining basins of these streams and contiguous patches, inhabited principally by Salishan, Shahaptian, and Chinookan tribes. In the s. is a coast destitute of islands. the headwaters of its rivers it communicates with the areas lying to the E. across the mountains. Rich lands, a mild climate, good minerals for industries, textile plants, excellent forests, and an abundance of edible roots and fruits, fish, molluscs, and waterfowl ready at hand characterize this environment, with skin and wool for clothing. The manifold resources and varied physical features fostered a great variety of activities.

(O. T. M.)

Epinette. A Chippewa band which formerly lived on the N. shore of lake Superior, E. of Michipicoten r., Ontario.—Dobbs, Hudson's Bay, 32, 1744.

Erie (Huron: yčñrcsh, 'it is long-tailed,' referring to the eastern puma or panther; Tuscarora, kěn'rāks, 'lion,' a modern use, Gallieised into Eri and Ri, whence the locatives Eri'e, Rigué, and Riqué, 'at the place of the panther,' are derived. Compare the forms Ericehronon, Ericehronon, and Riquéronon of the Jesuit Relations, signifying 'people of the panther.' It is probable that in Iroquois the puma and the lynx originally had generically the same name and that the defining term has remained as the name of the puma or panther). A populous sedentary Iroquoian tribe, inhabiting in the 17th century the territory extending s. from lake Erie probably to Ohio r., E, to the lands of the Conestoga along the E. watershed of Allegheny r. and to those of the Seneca along the line of the w. watershed of Genesee r., and N. to those of the Neutral Nation, probably on a line running eastward from the head of Niagara r. (for the Jesuit Relation for 1640-41 says that the territory of the Erie and their allies joined that of the Neutral Nation at the end of lake Erie), and w. to the w. watershed of lake Erie and Miami r. to Ohio r. Their lands probably adjoined those of the Neutral Nation w. of lake Erie. The Jesuit Relation for 1653, speaking of lake Erie, says that it "was at one time inhabited toward the s. by certain peoples whom we call the Cat Nation; but they were forced to proceed farther inland in order to escape their enemies whom they have toward the w." In this eastward movement of the Erie is probably found an explanation of the emigration of the Awenrehronon (Wenrohronon) to the Huron country in 1639 from the E. border of the lands of the Neutral Nation, although the reason there given is that they had for some unknown reason ruptured their relations with the Neutral Nation, with whom, it is stated, they had been allied, and that, consequently, losing the powerful support of the populous Neutral Nation, the Wenrohronon, were left a prey to their enemies, the Iroquois. But the earlier Jesuit Relation (for 1640-41), referring undoubtedly to this people, says that a certain strange nation, the Awenrehronon, dwelt beyond the Cat Nation, thus placing them at this time E. of the Erie and apparently separate from the Neutral Nation; so that at that time the Wenrohronon may have been either entirely independent or else confederated with the Erie.

Historically little is definitely known of the Erie and their political and social organization, but it may be inferred to have been similar to that of the Hurons. The Jesuit Relations give only a few glimpses of them while describing their last wars with the Iroquois confederation; tradition, however, reeords the probable fact that the Erie had bad many previous wars with these hostile tribes. From the Relations mentioned it is learned that the Erie had many sedentary towns and villages, that they were constituted of several divisions, and that they cultivated the soil and spoke a language resembling that of the Hurons, although it is not stated which of the four or five Huron dialects, usually called "Wendat" (Wyandot) by themselves, was meant. From the same source it is possible to make a rough estimate of the population of the Erie at the period of this final war. At the taking of the Erie town of Riqué in 1654 it is claimed that the defenders numbered between 3,000 and 4,000 combatants, exclusive of women and children; but as it is not likely that all the warriors of the tribe were present, 14,500 would probably be a conservative estimate of the population of the Erie at this period.

The Jesuit Relation for 1655-56 (chap. xI) gives the occasion of the final struggle. Thirty ambassadors of the Cat Nation had been delegated, as was customary, to Sonontouan, the Seneca capital, to renew the existing peace.

But through the misfortune of an accident one of the men of the Cat Nation killed a Sen-This act so incensed the Seneca that they massacred all except 5 of the ambassadors in their hands. These acts kindled the final war between the Erie and the confederated tribes of the Iroquois, especially the Seneca, Cayuga, Oneida, and Onondaga, called by the French the 'upper four tribes,' or 'les lroquois supérieurs.' It is further learned from the Jesuit Relation for 1654 that on the political destruction of their country some Hurons sought asylum among the Erie, and that it was they who were actively fomenting the war that was then striking terror among the Iroquois tribes. The Erie were reputed brave and warlike, employing only bows and poisoned arrows, although the Jesuit Relation for 1656 declares that they were unable to defend one of their palisades against the Iroquois on account of the failure of their munitions, especially powder, which would indicate that they used firearms. It is also said that they "fight like Frenchmen, bravely sustaining the first charge of the Iroquois, who are armed with our muskets, and then falling upon them with a hailstorm of poisoned arrows," discharging 8 or 10 before a musket could be reloaded. Following the rupture of amicable relations between the Erie and the Iroquois tribes in 1653, the former assaulted and burned a Seneca town, pursued an Iroquois war party returning from the region of the Great lakes, and cut to pieces its rear guard of 80 picked men, while the Erie scouts had come to the very gates of one of the Iroquois palisaded towns and seized and carried into captivity Annenraes (Annencraos), "one of the greatest captains." roused the Iroquois tribes, which raised 1,800 men to chastise the Erie for these losses. A young chief, one of the two leaders of this levy, was converted by Father Simon Le Moine, who chanced to be in the country at the time, and was baptized. These two chiefs dressed as Frenchmen, in order to frighten the Erie by the novelty of their garments. When this army of invaders had surrounded one of the Erie strongholds, the converted chief gently asked the besieged to surrender, lest they be destroyed should they permit an assault, telling them: "The Master of Life fights for us; you will be ruined if you resist him." "Who is this Master of our lives?" the Erie defiantly replied. "We acknowledge none but our arms and hatchets." No quarter

was asked or given on either side in this war. After a stubborn resistance the Erie palisade was carried, and the Onondaga "entered the fort and there wrought such carnage among the women and children that blood was kneedeep in certain places." This was at the town of Riqué, which was defended by between 3,000 and 4,000 combatants, exclusive of women and children, and was assailed by about 1,800 Iroquois. This devastating war lasted until about the close of 1656, when the Erie power was broken and the people were destroyed or dispersed or led into captivity. Six hundred surrendered at one time and were led to the Iroquois country to be adopted as one of the constituent people of the Iroquois tribes. The victory at Riqué was won at a great loss to the Iroquois, who were compelled to remain in the enemy's country two months to care for the wounded and to bury the dead.

Only two of the Erie villages are known by name—Riqué and Gentaienton. A portion of the so-called Seneca now living in Oklahoma are probably descendants of Erie refugees.

(J. N. B. H.)

Esbataottine (? 'bighorn people'). A Nahane tribe living in the mountains between Liard and Peace rs., Brit. Col. They are said to be of a very low grade of culture and to practise cannibalism, probably under stress of hunger.

Dounle Espa-tra-Ottinè.—Petitot, Autour de grand lac des Esclaves, 301, 1891 (='goat people'). Esba-t'a-ottinè.—Petitot, Ethnog, chart in Bull. Soc. de Géogr. Paris, July, 1875 (='dwellers among the argali'). Espā-tn-tl-na.—Dawson in Rep. Geol. Surv. Can. for 1887, 202n, 1889. Espa-tra-Ottinè.—Petitot, Autour du lac des Esclaves, 362, 1891 (trans. 'bighorn people'). Gens des Bois.—Dall in Cont. N. A. Ethnol. 1, 32, 1877 (so called by Hudson's Bay people). Gens des chèvres.—Petitot, Autour du lac des Esclaves, 301, 1891. Knife Indians.—Campbell, quoted by Dawson, op. cit.

Escoumains (probably from ashkimin, or ashkimin, 'early berry.'—W.J.). A Montagnais band living on a reserve of 97 acres on the s.w. side of Esconmains r., on the N. shore of the St. Lawrence, in Saguenay co., Quebec. They numbered 53 in 1884, 54 in 1911.

Escoumains.—Can. Ind. Aff. Rep. for 1884, pt. 1, 185, 1885.

Eskegawaage. One of the 7 districts of the territory of the Micmae as recognized by themselves. It includes E. Nova Scotia from Canso to Halifax.—Rand, First Micmae Reading Book, SI, 1875.

Eskimauan Family. A linguistic stock of North American aborigines, comprising two well-marked divisions, the Eskimo and the Aleut. See Powell in 7th Rep. B. A. E., 71, 1891. (The following synonymy of the family is chronologic.)

>Eskimaux.-Gallatin in Trans. and Coll. Am. Antiq. Soc', 11, 9, 305, 1836; Gallatin in Trans. Am. Ethnol. Soc., n, pt. 1, xeix, 77, 1848; Gallatin in Schoolcraft, Ind. Tribes, 111, 401, 1853. = Eskimo. - Berghaus (1845) Physik. Atlas, map 17, 1848; ibid., 1852; Latham, Nat. Hist. Man. 288, 1850 (general remarks on origin and habitat); Buschmann, Spuren der aztek. Sprache, 689, 1859; Latham, Elem. Comp. Philol., 385, 1862; Bancroft, Nat. Races, III, 562, 574, 1882. > Esquimaux.-Prichard, Phys. Hist. Mankind, v, 367-371, 1847 (follows Gallatin); Latham in Jour. Ethnol Soc. Lond., 1, 182-191, 1848; Latham, Opusculs, 266-274, 1860. >Eskimo.-Dall in Proc. A.A.A.S., 266, 1869 (treats of Alaskan Eskimo and Tuski only); Berghaus, Physik. Atlas, map 72, 1887 (excludes the Aleutian). >Eskimos .- Keane, app. to Stanford's Compend., Cent. and So. Am, 460, 1878 (excludes Aleutian). >Ounángan .- Veniaminoff, Zapiski, 11, 1, 1840 (Aleutians only). >Unuğun,-Dall in Cont. N. A. Ethnol, 1, 22, 1877 (Aleuts a division of his Orarian group). > Unangan.-Berghaus, Physik. Atlas, map 72, 1887. XNorthern.-Scouler in Jour. Roy. Goog. Soc., XI, 218, 1841 (includes Ugalentzes of present family). XHaidah.-Scouler, ibid., 224, 1841 (same as his Northern family). > Ugaijachmutzi.-Gallatin in Schoolcraft, Ind. Tribes, III, 402, 1853 (lat. 60°, between Prince William sd. and mount St. Elias, perhaps Athapascan). > Aleuten .-Holmberg, Ethnog. Skizzen, 1855. > Aleutlans .- Dall in Proc. A.A.A.S., 266, 1869; Dall, Alaska, 374, 1870 (in both places a division of his Orarian family). >Aleuta.-Keane, app. to Stanford's Compend, Cent. and So, Am., 460, 1878 (consist of Unalaskans of mainland and of Fox and Shumagin ids., with Akkhas of res' of Aleutian arch.). > Aleut.—Bancroft, Nat. Races, 111 562, 1882 (two dialects, Unalaska and Atkha). > Konjagen.—Holmberg, Ethnog. Skizzen, 1855 (island in Koniag or Kadaik). = Orarians.—Dall in Proc. A.A.A.S., 265, 1869 (group name; includes Innuit, Aleutians, Tuski); Dall, Alaska, 374, 1870; Dall in Cont. N. A. Ethnol., 1, 8, 9, 1877. XTinneh.—Dall in Proc. A.A.A.S., 269, 1869 (includes "Ugalensé"). > Innüit.—Dall in Cont. N. A. Ethnol., 1, 9, 1877 ("Major group") of Orarians: treats of Alaska Innuit only); Bergbaus, Physik. Atlas, map 72, 1887 (excludes the Aleutians).

Eskimo. A group of American aborigines, forming part of the Eskimauan linguistic stock, which formerly occupied nearly all the coasts and islands of Arctic America from E. Greenand the N. end of Newfoundland to the westernmost Aleutian ids., even extending to the E. coast of Siberia, a distance of more than 5,000 m. From remains found in Smith sd. it is evident that bands formerly wintered as far N. as lat. 79° and had summer camps up to 82°. At the present time they have receded from this extreme range and in the s. have abandoned the N. shore of the gulf of St. Lawrence, the N. end of Newfoundland, James bay, and the s. shores of Hudson bay. while in Alaska one Eskimo tribe, the Ugalakmiut, has practically become Tlingit through intermarriage. The name Eskimo (in the form Excomminguois) seems to have been first given by Biard in 1611. It is said to come from the Abnaki Esquimantsic, or from Ashkimeq, the Chippewa equivalent, signifying 'eaters of raw flesh.' They call themselves Innuit, meaning 'people.' The Eskimo constitute physically a distinct type. They are of medium stature, but possess uncommon strength and endurance; their skin is light brownish yellow with a ruddy tint on the exposed parts; their hands and feet are small and well formed; their eyes, like those of other American tribes, have a Mongoloid character, which circumstance has induced many ethnographers to class them with the Asiatic peoples. They are characterized by very broad faces and narrow, high noses; their heads are also exceptionally high. This type is most marked among the tribes E. of Mackenzie r. In disposition the Eskimo may be described as peaceable, cheerful, truthful and honest, but exceptionally loose in sexual morality.

The Eskimo have permanent settlements, conveniently situated for marking certain hunting and fishing grounds. In summer they hunt caribou, musk-oxen, and various birds; in winter they live principally on sea mammals, particularly the seal. Although

their houses differ with the region, they conform in the main to three types: In summer, when they travel, they occupy tents of deer or seal skins stretched on poles. Their winter dwellings are made either in shallow excavations covered with turf and earth laid upon a framework of wood or whale ribs, or they are built of snow. Their clothing is of skins, and their personal adornments are few. Among most tribes, however, the women tattoo their faces, and some Alaskan tribes wear studs in openings through their cheeks. Considering their degree of culture, the Eskimo are excellent draughtsmen and carvers, their designs usually consisting either of simple linear incisions or of animal forms executed with much life and freedom. The people about Bering strait make some use of paints.

There has always been extensive intertribal communication. The Eskimo have an exceptional knowledge of the geography of their country. Poetry and music play an important part in their life, especially in connection with their religious observances.

The Eskimauan social organization is exceedingly loose. In general the village is the largest unit, although persons inhabiting a certain geographical area have sometimes taken the name of that area as a more general designation, and it is often convenient for the ethnographer to make a more extended use of this native custom. In matters of government cach settlement is entirely independent, and the same might almost be said for each family, although there are customs and precedents, especially with regard to hunting and fishing, which define the relations existing between them. Although hardly deserving the name of chief, there is usually some advisory head in each settlement whose dictum in certain matters, particularly as to the change of village sites, has much weight, but he has no power to enforce his opinions.

The men engage in hunting and fishing, while all the household duties fall to the lot of the women—they must cook, make and mend clothes, and repair the kaiaks and boat covers, pitch the tents, and dry the fish and meat and stow them away for the winter. In some tribes skin dressing is done by the men, in others by the women. Monogamy, polygamy and polyandry are all practised, their occurrence being governed somewhat by the relative proportion of the sexes; but a second marriage is unusual where a man's first wife has borne him children. The execution of

law is largely left to the individual, and blood-revenge is universally exacted.

The Eskimo believe in spirits inhabiting animals and inanimate objects. Their chief deity, however, is an old woman who resides in the ocean and may cause storms or withhold seals and other marine animals if any of her tabus are infringed. Her power over these animals arises from the fact that they are sections of her fingers cut off by her father at the time when she first took up her abode in the sea. The chief duty of angakoks, or shamans, is to find who has infringed the tabus and thus brought down the wrath of the supernatural beings and to compel the offender to make atonement by public confession or confession to the angakok. The central Eskimo suppose two spirits to reside in a man's body, one of which stays with it when it dies and may temporarily enter the body of some child, who is then named after the departed. while the other goes to one of several lands of the souls. Some of the lands of the souls lie above the earth's surface, some beneath, and the latter are generally more desirable.

Although the theory of Asiatic origin of the Eskimo was long popular, many of their ethnic peculiarities are opposed to such a notion, and recent researches seem to indicate that their movements have rather been from E. to W. They are peculiar as being the only race of American aborigines who certainly had contact with white people before the days of Columbus, for Greenland was occupied during the 10th and 11th centuries by Norwegians, whose expeditions did not extend as far as the American mainland. Later Frobisher and other European navigators encountered the Eskimo along the E. coasts, while the Russians discovered and annexed the w. portion of their domain. This occupancy in its earlier period proved disastrous to the Aleut in particular, who were harshly dealt with and whose number was greatly reduced during the Russian domination. The larger portion of the Greenland and Labrador Eskimo have been Christianized by Moravian and Danish missionaries, while the Alaskan representatives of the family have had Russian missionaries among them for more than a century. Those of the central groups, however, owing to the remoteness of their situation have always been much less affected by outside The Eskimo have proved almost influences. indispensable assistants to Arctic explorers.

The Eskimauan stock embraces two well-marked divisions, the Eskimo proper and the

inhabitants of the Aleutian ids., the Aleut. Other divisions are rather geographical than political or dialectic, there being great similarity in language and customs from one end of the Eskimo domain to the other. They can be separated, however, into the following fairly well marked ethnological groups (based on information furnished by Dr. Franz Boas):

1. The Greenland Eskimo, subdivided into the East Greenlanders, West Greenlanders, and Ita Eskimo, the last transitional between the Greenland Eskimo proper and the next group.

11. The Eskimo, of s. Baffin island, Ungava, and Labrador, embracing the following divisions: Akudnirmiut, Akuliarmiut, Itivimiut, Kaumauangmiut, Kigiktagmiut, Nugumiut, Okomiut, Padlimiut, Sikosuilarmiut, Suhinimiut, Tahagmiut.

III. The Eskimo of Melville penin., Devon island, N. Baffin island, and the N. W. shore of Hudson bay, embracing the Agomiut, Aivilirmiut, Amitormiut, Iglulirmiut, Inuissuitmiut, Kinipetu, Koungmiut, Pilingmiut, Sauniktumiut.

IV. The Sagdlirmiut of Southampton id., now extinct.

V. The Eskimo of Boothia penin, King William island, and the neighbouring mainland. These include the Netchilirmiut, Sinimiut, Ugjulirmiut, Ukusiksalirmiut.

VI. The Eskimo of Victoria island and Coronation gulf, including the Kangormiut and Kidnelik, which may, perhaps, be one tribe.

VII. The Eskimo between cape Bathurst and Herschel id., including the mouth of Mackenzie r. Provisionally they may be divided into the Kitegareut at cape Bathurst and on Anderson r., the Nageuktormiut at the mouth of Coppermine r., and the Kopagmiut of Mackenzie r. This group approximates the next very closely.

VIII. The Alaskan Eskimo, embraeing all those within the American territory. This group includes the Aglemiut, Chingigmiut, Chnagmiut, Chugachigmiut, Ikogmiut, Imaklimiut, Inguklimiut, Kaialigmiut, Kangmaligmiut, Kaniagmiut, Kavagmiut, Kevalingamiut, Kiatagmiut, Kinugumiut, Kowagmiut, Kukpaurungmiut, Kunmiut, Kuskwogmiut, Magemiut, Malemiut, Nunatogmiut, Nunivagmiut, Nuwukmiut, Nushagagmiut, Selawigmiut, Sidarumiut, Tikeramiut, Togiagmiut, Ugalakmiut, Unaligmiut, Utukamiut, and Utkiavimiut.

IX. The Yuit of Siberia.

Holm (1884-85) placed the number of East Greenland Eskimo at 550. The w. coast Greenlanders were given as 10,122 by the Royal Greenland Co. in 1888, and the Ita Eskimo numbered 234 in 1897, giving a total for this group of 10,906. The Eskimo of Labrador were estimated at 1,300 in a recent report by the Government of Newfoundland, and the Dominion Government, in 1912, estimated the Canadian Eskimo at 4,600. According to the census of 1890, there were on the Aretic coast of Alaska from the British border to Norton sd., 2,729 Eskimo; on the s. shore of Norton sd. and in the Yukon valley, 1,439; in Kuskokwim valley, 5,254; in the valley of Nushagak r., 1,952; on the s. coast, 1,670. The Ugalakmiut of Prince William sd., numbering 154, are reekoned with the Tlingit, but they were originally Eskimo, and for our present purposes are best placed in that category. Adding these, therefore, the total for this group, exclusive of the 968 Alcut, is 13,298. The Yuit of Siberia are estimated by Bogoras at 1,200. The Eskimo proper, therefore, number about 31,200, and the stock about 32.170. (H. W. H. J. R. S.)

Aguskemaig.-Tanner, Narr., 316, 1830. yê'lnirt.—Bogoras, Chuckchee, 11, 1904 (Chukchi: 'those nf alien language'). Anda-køæn.-Petitot, Diet. Dènè Dindjié, 169, 1876 (Loucheux name: trans. 'ennemispieds'). Ara-k'è.-Ibid. (Bastard Loucheux name, same meaning). Enua-k'è.-Ibid., (Peaux de Lièvre name, same meaning). En-na-k'ié.—Ibid. (Slave name: trans. 'steppes-ennemis'). Escoumins .- Jes. Rel., III, index, 1858. Eshkibod.-Baraga, Otchipwe-Eng. Dict., 114, 1880 (Ojibwa: 'those who eat their food raw'). Eskeemoes.-Gordon, Hist. Mem. of N. Am., 117, 1820. Am., map, 1776. Eskimaux.-Lahontan, New Voy., 1, 208, 1703. Eskimeaux.-Jefferys, French Dom. Am., pt. 1, map, 1760. Eskimesi.—Hervas, Idea dell' Universo, xvii, 86, 1784. Eskimo.-Buschmann, Spuren d. Aztek. Spr., 669, 1859. Eskimos.-Hutchins (1770) quoted by Richardson, Arct. Exped., II, 38, 1851. Esquimantsic .- Prichard, Phys. Hist., v. 367, 1847. Esquimau .-Petitot, Dict. Dènè Dindjié, 169, 1876. Esquimaux.-Morse, Hist. Am., 126, 1798. Esquimeaux Indians.— McKeevor, Voy. Hudson's Bay, 27, 1819. Esquimones.-Hennepin, Cont. of New Discov., 95, 1698. Eusquemays.—Potts (1754) quoted by Boyle, Archæol. Rep. Ont., 1905. Excomminqui.—Jes. Rel. 1612-14, Thwaites ed., II, 67, 1896 (='excommunicated'). Excomminquois.—Biard in Jes. Rel. 1611, 7, 1858. Huskemaw.—Packard in Am. Natural., xix, 555, 1885 (name given by a missionary in Labrador). Hūs'ky.--Dall in Cont. N. A. Ethnol., I, 9, 1877 (Hudson Bay jargon). Innoït .- Petitot in Bib. Ling. et Ethnol. Am. III, pt. 2, 29, 1876 (sing. Innok). In-nu.-Lyon, Repulse Bay, 40, 1825. Innuees.-Parry, Sec. Voy., 414, 1824. In'nüit.-Dall in Cont. N. A. Ethnol., I, 9,

1877 (own name). Inuin.-Murdoch in 9th Rep. B.A. E., 42, 1892. Inuit.—Bessels in Archiv f. Anthrop., viii, 107, 1875. Kaladlit.-Nansen, Eskimo Life, 13, 1893 (name which the Greenland Eskimo give themselves, said to be a corruption of Danish Skraeling). Kālālik.-Richardson, Polar Regions, 300, 1861. Kalalit.--Kesne in Stanford's Compend., 517, 1878. Karaler.-Crantz, Greenland, II, 291, 1820. Karalit.—Mass. Hist. Soc. Coll., 2d s., 1x, 233, 1822. Keralite.-Heriot, Travels, 34, 1813. Kı'ımılıt.-Bogoras, Chukchee, 21, 1904 (from kī'xmi, an inhabitaut of C. Prince of Wales: Yuit name). Nochways .- Dobbs, Hudson Bay, 12, 1744 (Algonkin: 'snakes,' 'enemies,' applied to people of alien race regarded as natural enemies). Nodways .-Dobbs, Hudson Bay, 12, 1744 ('snakes': Siksika name). Enné.-Petitot, Dict. Dènè Dindjié, 169, 1876 (Loucheux name: 'enemies'). Orarians.—Dall in Proc. A.A.A.S., xviii, 265, 1870. Ot'el'nna,—Petitot, Dict. Dènè Dindjié, 169, 1876 (Montagnais name: trans. 'steppes-ennemis'). Pa-erks.-Hooper, Tents of Tuski, 137, 1853 (Chukchi name for Eskimo of American coast). Paya-irkets.—Ibid , 103. Ro'č'htlit.—Bogoras, Chukchee, 21, 1904 ('opposite shore people': Yuit name). Seymòs.—Richardson, Arct. Exped., 1, 340, 1851 (used by sailors of Hudson's Bay Co.'s ships: derived from the Eskimo cry of greeting Seymo or Teymo). Skraelings .-Schultz in Trans. Roy. Soc. Can., XIII, pt. 2, 114, 1895. Skrællingar.-Richardson, Polar Regions, 295, 1861 (Scaudinavian name: 'small people'). S Krællings .-Crantz, Greenland, 1, 123, 1820 (applied by the Norwegians). Skrellings .- Amer. Hist. Soc., 2d ser., 1, Portland, 1869. Skroelingues .- Morse, Hist. Am., 126, 1778. Sückemòs.-Richardson, Arct. Exped , 1, 340, 1851 (same derivation as Seymòs). Ta-kutchi.-Ibid. (Kutchin name: 'ocean people'). Tchiechrone.—Pyrlæus (ca. 1748) quoted in Am. Antiq., IV, 75, 1881 (German form of Seneca name: 'seal people'). Tciěckrúnèn.—Hewitt, inf'n (Seneca name). Ultsehaga.— Richardson, Arct. Exped., 1, 408, 1851 (Kenai name: 'slaves'). Ultsehna.—Ihid. Uskee-mès.—Ibid., 55. Uskee'mi.—Dall in Cont. N. A. Ethnol , 1, 9, 1877 (Athapascan name). Uskees .-- O'Reilly, Greenland, 59, 1818. Uskimay.-Middleton in Dobbs, Hudson Bay, 189, 1744. Usquemows.—Costs, Geog. of Hudson Bay, 15, 1852. Weashklmek.—Belcourt (before 1853) in Minn. Hist. Coll., 1, 226, 1872 (Saulteur name: 'eaters of raw flesh'). Yikirga'ulit.-Bogorss, Chukchee, 21, 1904 (Yuit name).

Esksinaitupiks ('worm people'). A division of the Piegan.

Esk'-sin-al-tup-ïks.—Grinnell, Blackfoot Lodge Tales, 209, 1892. is-ksi'-na-tup-l.—Hayden, Ethnog. and Philol. Mo. Val., 264, 1862. Worm People.—Grinnell, Blackfoot Lodge Tales, 225, 1892.

Eskusone (now Eskasoni) A Micmac village formerly in Cape Breton.—Rand, First Micmae Reading Book, 87, 1875.

Espamichkon. A small Montagnais tribe N. of the St. Lawrence in 1643 (Jes. Rel. 1643, 38, 1858), probably about the headwaters of Saguenay or St. Maurice r.

Esquimalt. The local name for a body of Songish at the s. E. end of Vancouver id., under the Cowichan agency; pop. 15 in 1901,

16 in 1911.—Can. Ind. Aff., pt. 11, 66, 1902; pt. 11, 8, 1911.

Esquimaux Point. A Montagnais mission settlement on the N. bank of the St. Lawrence, about 20 m. E. of Mingan, Ouebec.

Esquimaux Point.—Stearns, Labrador, 271, 1884. Pointe des Esquimaux.—Hind, Lab. Penin., II, 180, 1863.

Etagottine ('people in the air'). A Nahane band or division in the valleys of the Rocky mts. between the Esbataottine and the Tukkuthkutchin, lat. 66°, British America. Their totem is the lynx.

Dābo'-tenā-Ross quoted by Dawson in Rep. Geol. Surv. Can. 1887-88, 200B, 1889. Daha-dinneh.-Dunn, Hist. Oregon, 79, 1844. Dahadinnès.-Richardson, Arct. Exped., 1, 180, 1851. Gens en l'air.-Petitot, Autour, op. cit , 262. Hunters.-Prichard, Phys, Hist., v, 377, 1847. Mountain Indian.—Richardson, Arct. Exped., I, 400, 1851 Naha-'tdinné.—Ibid. Noh'ha-l-è.—Ibid., II, 7, 1851 (so called by Kutchin). Sicanees.—Dall in Cont. N. A. Ethnol., 1, 33, 1877 (sometimes so called by traders). Yéta-ottiné.-Petitot, Autour du Grand lac des Esclaves, 363. 1891 (trans. 'dwellers in the air').

Etatchogottine ('hair people'). A division of the Kawchodinnch dwelling N. and E. of Great Bear lake and on Great cape, Mackenzie, N. W. T. Their totem is a white wolf.

Ehta-tchô-Gottinè.—Petitot, Grand lac des Ours, 66, 1893.

Etchaottine. An Etchareottine division living w. and n. w. of Great Slave lake between Liard r. and the divide, along Black, Beaver, and Willow rs., Brit. Col. and Mackenzie. The Bistchonigottine and Krayiragottine are two of the divisions.

Dènè Étcha-Ottinè.—Petitot, Autour du lac des Esclaves, 301, 1891. Esclaves.—Ibid. Etcha-Ottinè. —Ibid. Gens du lac la Truite.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Slaves proper.—Kennicott, MS. vocab., B. A. E.

Etchareottine ('people dwelling in the shelter'). An Athapascan tribe occupying the country w. of Great Slave lake and upper

Mackenzie r. to the Rocky mts., including the lower Liard valley, Mackenzie, N.W.T. Their range extends from Hay r. to Ft. Good Hope, and they once lived on the shores of lake Athabaska and in the forests stretching northward to Great Slave lake. They were a timid, pacific people, called 'the people sheltered by willows' by the Chipewyan, indicating a riparian fisher folk. Their Cree neighbours, who harried and plundered them and carried them off into bondage, ealled them Awokanak, 'slaves,' an epithet which in its French and English forms came to be the name under which they are best known. Early in the 18th century they were dispossessed of their home, rich in fish and game, and driven northward to Great Slave lake, whither they were still followed by the Cree, known only as Enna, 'the enemy,' a name still mentioned with horror as far as Great Bear lake. On the islands where they took refuge a fresh carnage took place. The Thlingehadinneh and Kawchodinneh, who speak the same dialect with them and bear a like reputation for timidity, probably comprehended under the name Awokanak, by the Cree, began their northerly migration at the same time, probably under the same impulsion (Petitot, La Mer Glaciale, 292, 1887). Petitot found among them a variety of physiognomy that he ascribed to a mixture of races. Many of the males are circumeised in infancy; those who are not are called dogs, not opprobriously, but rather affectionately. The bands or divisions are Eleidlinottine, Etchaottine, Etcheridiegottine, Etchesottine, Klodesscottine, and Desnedeyarelottine (Petitot, Autour du lac des Esclaves, 363, 1891). In his monograph on the Dènè-Dindjié, Petitot restricted the term to the Etcheridiegottine, whom he distinguished from the Slaves proper, making the latter a separate tribe with divisions at Hay r., Great Slave lake, Horn mts., the fork of the Mackenzie, and Ft. Norman.

A-cha'-o-tin-ne.—Morgan, Consang. and Affin., 289, 1871 (trans. 'people of the lowlands'). Acheo-tenne.—Morgan in N. Am. Rev., 58, 1870. A-che-to-e-ten-ni.—Ross, MS. notes on Tinne, B. A. E. Acheto-e-Tin-ne.—Kennicott, MS. vocab., B. A. E. Acheto-tenâ.—Dall, Alaska, 429, 1870. Achoto-e-tenni.—Pope, MS. Sicanny vocab., B. A. E., 1865. A-tsho-to-ti-na.—Dawson ia Rep. Geol. Surv. Can., 1887-88, 2008, 1889. Awokânak.—Petitot, La Mer Glaciale, 293, 1887 ('slaves': Cree name). Brushwood Indians.—Franklin, Journ. to Petar Sea, n., 87, 1824. Cheta-ut-tdinne.—Richardson, Arct. Exped., n., 7, 1851. Danè Esclaves—Petitot, Autour du lac des Esclaves, 289, 1891. Danites Esclaves.—Ibid., 305. Edchautawoot.—

Schoolcraft, Ind. Tribes, II, 27, 1852. Edchawtawhoot. dinneh.—Franklin, Journ. to Polar Sea, 262, 1824. Edchawtawhoot tinneh.—Tranner, Narr., 293, 1830. Edchawtawoot.—Gallatin in Trans. Am. Antiq. Soc., II, 19, 1836. Edshawtawoots.—Schoolcraft, Ind. Tribes, III, 542, 1853. Eaclaves.—Petitot, Autour du lac des Esclaves, 363, 1891. Etchapè-ottiné.—Petitot, Diet. Dènè-Dindjié, xx, 1876. Etsh-tawát-dinni.—Latham in Trans. Philol. Soc. Lond., 69, 1856 (trans. 'thickwood-men'). Slave Indians.—Hooper, Teuts of Tuski, 303, 1853. Slaves.—Petitot, Autour du lac des Esclaves, 363, 1891 (English form). Slavey.—Ross, MS. notes on Tinne, B. A. E. (so called by fur-traders).

Etcheridiegottine ('people of the rapids'). An Etchareottine division which hunt along Liard r. and neighbouring regions to the border of the Etchaottine country near old Ft. Halkett, N. British Columbia. They have intermarried with the Etchaottine and with the Tsattine in the s., and have absorbed their manners and customs and adopted their dialectal forms to such a degree that they have been frequently confounded with the one tribe or the other.

Bastard Beaver Indians .- Ross in Smithson, Rep. 1866, 308, 1872. Beaver .- Franklin, Journ. to Polar Sea, 262, 1824. Erèttchi-ottinè.-Dawson in Rep. Geol. Surv. Can., 1887-88, 200B, 1889 ('people of the rapids': Kawchodinneh name). Ettchéri-dié-Gottlnè.-Petitot, Autour du lac des Esclaves, 363, 1891. Llards Indians.-Ross quoted by Gibbs, MS., B. A. E. Liard Slaves.-Pope, MS. Sicanny vocab., B. A. E., 1865. Ndu-tchô-ottinnè.-Dawson, op. cit. Scethtessesay-tinneh.-Ross quoted by Gibbs, MS., B. A. E. ('people of the mountain river'). Slave Indians of Ft. Liard.-Ross, MS. notes on Tinne, B. A. E. Strong bow.-Mackenzie in Mass. Hist. Coll., 2d s., 11, 43, 1814. Tsilia-ta-ut' tiné.-Richardson quoted by Petitot, Dict. Dênê-Dindjié, xx, 1876. Tsilla-ta-ut'-tlnné.-Richardson, Arct. Exped., II, 6, 1851. Tsillawadoot.-Schoolcraft, Ind. Tribes, 11, 28, 1852. Tslilawawdoot. -Gallatin in Trans. Am. Antiq. Soc., 11, 19, 1836. Tsiliaw-awdút-dinni.--Latham in Trans. Philol. Soc. Lond., 69, 1856 (trans.: 'bush-woodmen'). Tsillawdawhoot-dinneh .- Franklin, Journ. to Polar Sea, 11, 87, 1824. Tsillawdawhoot Tinneh.-Bancroft, Nat. Races, 1, 145, 1882.

Etechesottine ('horn mountain people'). A division of the Etchareottine occupying the country between Great Slave and La Martre lakes, Mackenzie dist., N.W.T. Franklin erroenously considered them Thlingchadinneh.

Deerhorn mountaineers.—Franklin, Narr., 11, 181, 1824. Étè-ches-ottinè.—Petitot in Bull. Soc. de Geog. Paris, chart, 1875. Gens de la montagne la Corne.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Horn Mountain Indians.—Franklin, Narr., 260, 1824.

Etheneldell ('caribou-eaters'). An Athapasean tribe living E. of lake Caribou and lake Athabaska, in the barren grounds which extend to Hudson bay (Petitot, Dict. Dènè-Dindjié, xx, 1876). Franklin (Journ. Polar Sea

II. 241, 1824) placed them between Athabaska and Great Slave lakes and Churchill r., whence they resorted to Ft. Chipewyan. Ross (MS. B. A. E.) makes them a part of the eastern Tinne, their habitat being to the N. and E. of the head of lake Athabaska, extending to the end of Great Slave lake. Rocky r. separates them from the Tatsanottine. the E. are the barren grounds to which they resort every year to hunt the caribou, which supplies practically all their needs. They were a part of the migrating Chipewvan who descended from the Rocky mts. and advanced eastward from Peace r. to dispute the Hudson Bay region with the Maskegon and Cree. One of their women who was held in captivity by the Maskegon was astonished at the weapons, utensils, and clothing of European manufacture that she saw among her captors, who told her that they made these articles themselves. Finding at last that they got them in barter for furs at Ft. Prince of Wales, she made her escape to the English and told them of her own people on Peace r. who held the choicest furs cheap. The British traders, eager to extend their trade, sent her with a safe conduct to her people, whom she persuaded to migrate to the barren grounds near Hudson bay, where caribou were abundant. They settled around Reindeer, Big, and North Indian lakes, and were called the Northern Indians by the English and the Mangeurs des Cariboux by the Canadian French, while the neighbouring tribes called them by the same name that they had given to the English, Men of the Stone House. Hearne saw them in 1769, and Petitot found them there still a century later, numbering 900. About 300 traded at Ft. Fond du Lac at the head of lake Athabaska. There were 445 enumerated at Fond du Lac in 1911.

Cariboo eaters.—Ross in Smithson. Rep. 1866. 306, 1872. Eastern Folks.-Richardson, Arct. Exped., 11, 5, 1851. Ethen-eldell.-Petitot, Dict. Dene-Dindjie, xx, 1876. Éthen-eitèli.-Petitot, Autour du lac des Esclaves, 363, 1891. Ettine-tinney.—Ross quoted by Gibbs, MS. notes, B. A. E. ('caribou people'). Gens du Fort-de-pierre.-Petitot, Autour du Grand les des Esclaves, 363, 1891. Mangeurs de cariboux.—Petitot, Diet. Dènè-Dindjié, xx, 1876. Michinipicpoets.-Dobbs, Hudson Bay, 25, 1744 ('people of stone of the great lake': Cree name). Northern Indians .- Ibid., 17. Rising Sun Folks .- Richardson, Arct. Exped., II. 5, 1851. Rising Sun men.—Prichard, Phys. Hist., v, 376, 1847. Sa-essau-dinneh.-Schoolcraft, Ind. Tribes, II, 27, 1852 (trans. 'eastmen'). Sah-se-sah tinney.-Ross quoted by Gibbs, MS. notes, B. A. E. (trans. 'eastern people'). Sa-I-sa-'dtinnè.-Richardson, Arct. Exped., II, 5, 1851 ('people of the rising sun'). Sawassaw-tinney — Keane in Stanford, Compend., 534, 1878. Sawcesaw-dinneh.—Franklin quoted by Schoolcraft, Ind.
Tribes, III, 542, 1853. Saw-cessaw-dinnah.—Schoolcraft, ibid., v, 172, 1855. Saw-eessaw-dinneh.—
Franklin, Journ. Polar Sea, II, 241, 1824 (trans. 'Indians from the rising sun,' or 'eastern Indians).' Sawessaw tinney.—Keane in Stanford, Compend., 464, 1878.
See-Issaw-dinnl.—Latham in Trans. Philol. Soc. Lond., 69, 1856 (trans. 'rising-sun-men'). Thé-Ottiné.—Petitot, MS. vocab., B. A. E., 1865 ('stone people'). Thé-yé Ottiné.—Petitot in Jour. Roy. Geog. Soc., 651, 1883.
Thè-yé-Ottiné.—Petitot, Autour du lac des Esclaves, 363, 1891 ('people of the stone fort').

Ethics and Morals. It is difficult for a person knowing only one code of morals or manners to appreciate the customs of another who has been reared in the knowledge of a different code; hence it has been common for such a one to conclude that the other has no manners or no morals. Every community has rules adapted to its mode of life and surroundings, and such rules may be found more rigorously observed and demanding greater self-demal among savages than among civilized men. Notwithstanding the differences which necessarily exist between savage and civilized ethics, the two systems must evidently have much in common, for from the days of Columbus to the present, travellers have given testimony of customs and manners of Indians, who were still in the barbarous or the savage stage, which displayed a regard for the happiness and well-being of others.

It is often difficult to tell how much of Indian manners and morals may have been derived from white people; but there are still some tribes which have held aloof from the intrusive race and have been little contaminated by it, and we have the testimony of early writers to guide us. The latter may be narrow in their judgment of Indian conduct while they are accurate in describing it.

To discuss the rise of ethics among primitive peoples would lead too far afield; but it is clear from all that is known of the natives of this continent that there existed among them standards of right conduct and character. Both from folk-lore and other sources we learn of conscience among the Indians and of their dread of its pangs. The Navaho designate conscience by a term which signifies "that standing within me which speaks to me." Abundant evidence might be adduced to show that Indians are often actuated by motives of pure benevolence and do good merely from a generous delight in the act.

Social ethics obtained among all the tribes, and public opinion was the power that com-

pelled the most refractory to obedience. A system of ethics having once taken shape, the desire for the approval of one's associates and the wish to live at peace furnished sufficient incentive for compliance with the less onerous rules. But these motives were not sufficient in matters of graver import. Some tribes had executive bands, which had limited power to punish offenders in certain cases, such as violation of the orders of the tribal council; but among other tribes there was no established power to punish, nor were there even the rudiments of a court of justice. The pagan Indian is destitute of the faith in heaven and hell, which affords a strong incentive to moral life among many of our own people; but he has faith in good and bad luck, and frequently attaches different imaginary punishments to different offences. Some regard various inanimate objects as the agents of these punishments. "May the cold freeze you!" "May the fire burn you!" "May the waters drown you!" are their imprecations.

When during the tribal hunt runners were sent out to seek a herd of buffalo, they had to give, on their return to camp, their report in the presence of sacred emblems in attestation of the truth of their statement. Scouts must report accurately or meet disgrace. The successful warrior must not claim more than his due; otherwise he would not be permitted to receive the badge of honours rightfully won. The common punishment for lying in many of the tribes was the burning of the liar's tent and property by tribal sanction. Not to keep a promise deliberately given was equivalent to lying. There are many instances of Indians keeping their word even at the risk of death.

Honesty was inculcated in the young and exacted in the tribe. In some communities the rule was limited in its operation to those within the tribe itself, but it was not uncommon to find its obligations extended to allies and to all friendly tribes. As war removed all ethical barriers, pillage was legitimate. The stealing of horses was a common object of war parties, but only from a hostile tribe. When a theft was committed the tribal authorities demanded restitution; the loss of the property taken, flogging, and a degree of social ostracism constituted the punishment of the thief. Instances could be multiplied to show the security of personal effects in a tribe. The Zuñi, for example, on leaving home, close and seal the door with clay, and it remains inviolate. The Nez Percés and many other tribes lean a pole across the door to indicate the absence of the family, and no one molests the dwelling.

Murder within the tribe was always punished, either by exile, by inexorable ostracism and the making of gifts to the kindred of the slain, or by suffering the murderer to become the lawful victim of their vengeance.

Truth, honesty and the safeguarding of human life were everywhere recognized as essential to the peace and prosperity of a tribe, and social customs enforced their observance; the community could not otherwise keep together, much less hold its own against enemies, for except where tribes were allies, or bound by some friendly tie, they were mutual enemies. An unaccredited stranger was always presumably an enemy.

Adultery was punished. The manner of punishment varied among the tribes, the choice being frequently left to the aggrieved party. Among the Apache it was the common custom to disfigure an erring woman by cutting off her nose.

The care of one's family was regarded as a social duty and was generally observed. This duty sometimes extended to one's relations.

While the young were everywhere taught to show respect to their elders, and while years and experience were supposed to bring wisdom, yet there were tribes among which it was the custom to abandon or to put to death the very old. Where this custom prevailed the conditions of life were generally hard, and the young and active found it difficult to seeme food for themselves and their children. As the aged could not take care of themselves, and they were an encumbrance to travel, they acquiesced in their fate as a measure of prudence and economy, dying in order that the young might live and the tribe maintain its existence.

The cruel punishment of witchcraft everywhere among the tribes had its ethical side. The witch or wizard was believed to bring sickness or death to members of the community; hence for their security the sorcerer must be put to death. The custom was due to a lack of knowledge of the causes of disease and to mistaken ethics.

(A. C. F. W. M.)

Etiquette. The interior of most native dwellings was without complete partitions, yet each member of the family had a distinct space, which was as inviolable as a separate

apartment enclosed by walls. In this space the personal articles of the occupant were stored in packs and baskets, and here his bed was spread at night. Children played together in their own spaces and ran in and out of that belonging to the mother, but they were forbidden to intrude elsewhere and were never allowed to meddle with anyone's posses-When more than one family occupied a dwelling, as the earth lodge, the long bark house, or the large wooden structure of the N. W., every family had its well-known limits, within which each member had a place. A space was generally set apart for guests, to which, on entering, a visitor made his way. Among the Plains tribes this place was at the back part of the dwelling, facing the entrance, and the visitor when entering a lodge and going to this place must not pass between his host and the fire. Among many tribes the place of honour was at the w., facing the entrance. If he was a familiar friend, greetings were at once exchanged, but if he had come on a formal mission, he entered in silence, which was unbroken for some little time after he was seated. On such occasions conversation was opened by reference to trivial matters, the serious purpose of the visit not being mentioned until considerable time had elapsed. When a delegation was received, only the older men of the party or of the tribe spoke; the younger members kept silent unless called on to say something. Among all the tribes haste was a mark of ill breeding, particularly during official or eeremonial proceedings. No visitor could leave the dwelling of his host without some parting words to show that his visit was at an end.

Among many tribes etiquette required that when speaking to a person a term of relationship rather than the personal name should be used. An elderly man or woman was usually addressed as grandfather or grandmother, and a similar title was also applied to a man of distinction. Uncle or aunt might be used for persons of about the same age as the speaker, but to a younger man or woman the term of address would signify younger brother or sister. A friendly visitor from outside the tribe was addressed by a term meaning "friend," A member of the tribe, although of a different clan or gens, was spoken to by a term of relationship; among the Iroquois, for example, one of the opposite phratry was greeted as "my father's clansman," or "my cousin."

When the bearer of an invitation entered a lodge, the person invited did not respond if a relative or friend was present, who would accept for bim, saying "Your uncle (or aunt) has heard." * * * * *

Among a number of tribes etiquette required that there should be no direct speech between a woman and her son-in-law, and in some instances a similar restriction was placed on a woman addressing her father-in-law. In many tribes also the names of the dead were not likely to be mentioned, and with some Indians, for a space of time, a word was substituted for the name of a deceased person. especially if the latter were prominent. In some tribes men and women used different forms of speech, and the distinction was carefully observed. A conventional tone was observed by men and women on formal occasions which differed from that employed in everyday life.

Etiquette between the sexes demanded that the man should precede the woman while walking or in entering a lodge "to make the way safe for her." Familiar conversation could take place only between relatives; reserve characterized the general behaviour of men and women toward each other.

Respect must be shown to elders in both speech and behaviour. No one could be interrupted when speaking or forced to speak when inclined to be silent, nor could personal questions be asked or private matters mentioned. During certain ceremonies no one may speak above a whisper. If it was necessary to pass between a person and the fire permission must be asked, and if one brushed against another, or trod upon his foot, an apology must be made. At meal time, if one could not eat all that had been put upon his dish, he must excuse himself to show that it was through no dislike of the food, and when he had finished he must not push away his dish but return it to the woman, speaking a term of relationship, as mother, aunt, wife, which was equivalent to thanks. Among some tribes, if a cooking vessel had been borrowed, it must be returned with a portion of what had been cooked in it to show the owner the use that had been made of the utensil, and also, in courtesy, to share the food.

There was an etiquette in standing and sitting that was carefully observed by the women. They stood with the feet straight and close together, and if the hands were free, the arms hung down, a little toward the front.

the fingers extended and the palms lightly pressed against the dress. Women sat with both feet under them, turned to one side. Men usually sat cross-legged.

The training of children in tribal etiquette and grammatical speech began at an early age, and the strict observance of etiquette and the correct use of language indicated the rank and standing of a man's family. Class distinctions were everywhere more or less observed. On the N. Pacific coast the difference between high caste and low caste was strongly marked. Certain lines of conduct such as being a too frequent guest, were denounced as of low caste. So, too, among the Haida, it was of low caste to lean backward; one must sit on the forward part of the seat in an alert attitude to observe good form. Lolling in company was considered a mark of bad manners among the tribes; and among the Hopi one would not sit with legs extended during a ceremony. Smoking, whether social or ceremonial, had its etiquette; much form was used in exchanging smoking materials and in passing the pipe in smoking and in returning it. In certain societies, when a feast was served, particular parts of the animal belonged by etiquette to the noted warriors present, and these were presented by the server with ceremonial speech and movements. Among some tribes when a feast was given a pinch of each kind of food was sacrificed in the fire before eating. Ceremonial visitors usually made their approach known according to the local custom. Among some of the Plains tribes the visitors dispatched a runner bearing a little bunch of tobacco to apprise their host of their intended visit; should their coming prove to be ill-timed, the tobacco could be returned with an accompanying gift, and the visit would be postponed without any hard feeling. There was much and varied detail in the etiquette of family life, social gatherings, and the ceremonies of the various tribes living N. of Mexico.

(A. C. F.)

Etleuk. A Squawmish village community on the right bank of Skwamish r., Howe sd., B. C.

Ela-a-who.—Brit. Adm. Chart., No. 1917 Etlē'uq.— Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Etsekin. A winter village of the Kwakiutl proper on Havannah channel, w. coast of British Columbia. Et-se-kin.—Boas in Bull. Am. Geog. Soc., 229, 1887 Etsi-kin.—Dawson in Trans. Roy. Soc. Can., sec. 11, 65, 1887.

Etskainah (Éts-kai'nah, 'horns'). A society of the Ikunuhkahtsi, or All Comrades, among the Siksika; it is obsolete among the southern Piegan, but still exists with the northern Piegan and the Kainah. It is regarded as having originated with the latter and extended to the other divisions. The Sinopah (Kit-fox) society among the Southern Piegan is practically identical with it. The present Etskainah society is said to have taken on some of the functions of the Stumiks (Bulls), now extinct. The members carry a crooked staff and are supposed to have magical powers (Wissler, inf'n, 1906). See Grinnell, Blackfoot Lodge Tales, 221, 1892.

Ettchaottine ('people who act contrarily'). A Nahane tribe of which one division lives on Français lake, British Columbia, another in the neighbourhood of old Ft. Halkett, Liard r., B.C. (Hardisty in Smithson. Rep. 1866, 311, 1872). Their name came from their warlike habits. Ross (MS., B.A.E.) gave their pop. in 1858 as 435.

Bad-people.—Morice, Notes on W. Dénés, 16, 1893. 'Dtcha-ta-'ut(Innnè.—Richardson, Arct. Exped., 11, 6, 1851. Ettcha-ottlné.—Petitot, Dict. Dènè-Dindjié, xx, 1876 ('people who act contrarily'). Mauvals Monde.—Latham in Trans. Philol. Soc. Lond., 66, 1856. Netsilley.—Richardson, Arct. Exped., 1, 401, 1851. Slávě Indlans.—Dall, Alaska, 429, 1870. Wild Nation.—Richardson, op. cit.

Eulachon. One of the names of the candle-fish (Thaleichthys pacificus), of the family Salmonidæ, closely related to the smelt: from the name of this fish in one of the Chinookan dialects. It is found in the waters of the N. Pacific coast of America and is much used by the Indians of that region for food and the production of grease and oil. Other forms (Christian Union, Mar. 22, 1871) are hoolikan and oolichan, and Irving (Astoria, 11) cites the form uthlecan. (A. F. C.)

Ewawoos. A Cowichan tribe whose town was Skeltem, 2 m. above Hope, Fraser r., Brit. Col.; pop. 15 in 1911.

Ewahoos.—Can. Ind. Aff., 309, 1879. Ewa-woos.— Ibid., 1901, pt. 2, 158. Ewā'wus.—Boas, MS., B. A. E. 1891.

Exchange, media of. Before the arrival of Europeans intertribal trade had resulted almost everywhere in America in the adoption of certain standards of value of which the most

important were shell beads and skins. The shell currency of the Atlantic coast consisted of small white and black or purplish beads cut from the valves of quahaug and other shells and familiarly known as wampum, (q.v.) These were very convenient, as they could be strung together in quantities and carried any distance for purposes of trade, in this respect having a decided advantage over skins. In exchange two white beads were equivalent to one black one. During the early colonial period wampum was almost the only currency among white people as well; but inferior, poorly finished kinds, made not only out of shell, but of stone, bone, glass, horn, and even wood, were soon introduced, and in spite of all attempted regulation the value of wampum dropped continually until in 1661 it was declared to be legal tender no longer in Massachusetts, and a year or two later the same fate overtook it in the other New England colonies. In New York it appears to have held on longer, its latest recorded use as currency being in 1693. Holm says, speaking of the Delawares of New Jersey: "In trade they measure those strings [of wampum] by their length," each fathom of them being worth 5 Dutch guilders, reckoning 4 beads for every stiver. 'The brown beads are more valued than the others and fetch a higher price; a white bead is of the value of a piece of copper money, but a brown one is worth a piece of silver." Holm quotes another authority, however, to the effect that a white bead was worth one stiver and a black bead two. The latter says also that "their manner of measuring the strings is by the length of their thumbs; from the end of the nail to the first joint makes 6 beads."

On the Pacific coast between s. E. Alaska and N. California shell currency of another kind was employed. This was made from the Dentalium preticsum (money tooth-shell), a slender univalve found on the w. coasts of Vancouver and Queen Charlotte ids. In the Chinook jargon it was called hiaqua. The principal place where it was obtained is said to have been the territory of a Nootka tribe, the Ehatisaht, in Esperanza inlet, w. coast of Vancouver id., but it was collected as far N. as Quatsino inlet. The method of procuring it is described in one of the earliest accounts of this region, the Narrative of John Jewitt. According to Boas, a block of cedar was split up at one end so that it formed a kind of brush which opened when pushed down into the water and closed when pulled up, thus entangling the

shells. These shells were valued in proportion to their individual lengths. In w. Washington the standard of value was 40 to the fathom, and the value fell off rapidly above that number, while very long single shells were worth more than a dollar. A fathom of 40 was formerly equivalent to a slave, according to Gibbs, and in his time would bring \$5. In California and on the plateaus farther N. the shells had incised designs. Among the Hupa of California they are decorated by being wrapped spirally with fish skin or snake skin, and in addition usually bear a tuft of red feathers, probably from the woodpecker's crest. The following further description of these is given by Goddard:

"The individual shells are measured and their value determined by the creases on the left hand. The longest known shells were about 2½ in. long. One of them would reach from the crease of the last joint of the little finger to the crease on the palm opposite the knuckle joint of the same finger. The value of such a piece in early days was about \$5. Shells of this length were called dinket. The next smaller shells were called kiketűkűtxoi, and measured about $2\frac{3}{5}$ in. They were worth about \$1.50 each. A shell about 11 in. long was called tewolahit. Their value was from 25 to 50 cents. Shells smaller than these were not rated as money and had no denomination. The length of the shells smaller than the first mentioned was determined by applying them to the creases of the middle and other fingers of the left hand.

"This money was strung on strings which reached from the thumb nail to the point of the shoulder. Eleven of the largest size filled such a string and was therefore called $m\bar{o}anala$. Twelve shells of the next smaller size composed a string and were called $m\bar{o}ananax$. Thirteen shells are called $m\bar{o}anatak$, and 14 of the smallest shells, called $m\bar{o}anatak$, was the largest number placed on a string. These strings are approximately 25 in. long. This, as it appears, was the least common multiple of the individual standard lengths.

"Since all hands and arms are not of the same length, it was necessary for the man, when he reached his maturity, to establish the values of the creases on his hand by comparison with money of known length as measured by someone else. Itc also had a set of lines tattooed on the inside of the left forearm. These lines indicated the length of 5 shells of the several standards. The measures were sub-

divided, there being lines of $m\bar{o}anala$ long and $m\bar{o}anala$ short, and so on. This was the principal method of estimating the money. The first 5 on the string were measured by holding the tip of the first shell at the thumb nail and drawing the string along the arm and noting the tattooed mark reached by the butt of the fifth shell. In like manner the last and intermediate sets of 5 were measured." This shell money was carried in special elk-horn boxes.

Among the coast tribes N. of Vancouver id., dentalia were not so much in vogue, but were used for ornamental purposes and in trade with the interior Indians. The standard of value among the Kutchakutchin and neighbouring tribes consisted of lines of beads 7 ft. long joined together at the distance of a foot, and called naki cik ('bead clothing'). The whole naki cik, according to Jones, "is equal to 24 made beaver, and one of the lines is one or more beaver skins, according to the value of the beads."

A more usual standard of value among interior people, however, was the pelt, especially the skin of the beaver. Even on the Atlantic coast it was used from the very earliest times side by side with wampum, and in 1613 the statement is made that it was the basis of all trade between the French of Canada and the Indians. In 1670 (Margry, Déc., 1, 164, 1878) it is learned that a beaver skin was worth a fathom of tobacco, a fourth of a pound of powder, 6 knives, or a portion of little blue beads. According to Hunter it was also the standard of value among the Osage, Kansa, Oto, Omaha, and their neighbours. He adds that 2 good otter skins, from 10 to 12 raecoon, or 4 or 5 wildcat (lvnx?) skins were valued at one beaver skin. Here this standard passed out very rapidly with the coming of white men; but in the great fur regions of Canada it remained the basis of value first between French and Indians, and afterward between English and Indians. Up to the present time everything is valued in "skins," meaning beaver skins, but the term has come to have a fixed value of 50 cents in Canadian money.

In former days, before the arrival of the Russians, the unit of value among the Eskimo of the lower Yukon was a full grown land-otter skin, to which was equivalent the skin of the large hair seal. This has now given place to the beaver; and all other skins, furs, and articles of trade are sold as "a skin" and multiples and fractions of a "skin." "In addition to this," says Nelson, "certain small, untanned

skins, used for making fur coats or blouses, are tied in lots sufficient to make a coat, and are sold in this way. It requires 4 skins of reindeer fawns, or 40 skins of Parry's marmot or of the muskrat for a coat, and these sets are known by terms designating these bunches." The pelt of a wolf or wolverene is worth several "skins" in trade, while a number of pelts of muskrats or Parry's marmot are required to make the value of "a skin."

Among the northern tribes in the N. Pacific coast area, where dentalia were not so much valued, elk and moose skins seem formerly to have constituted one of the standards of value, although the skins of other animals were no doubt used to some extent as well. In later times all these were replaced by blankets introduced by the Hudson's Bay Company, which were distinguished by points or marks on the edge, woven into their texture, the best being 4-point, the smallest and poorest I-point. The acknowledged unit of value, at least among the Haida, was a single 2½-point blanket, worth in 1880 a little more than \$1.50, but on the coast farther s, it is now rated at about 50 cents. Everything was referred to this unit, according to Dawson, even a large 4-point blanket being said to be worth so many "blankets."

Another standard universal in this region was slaves, and perhaps the remarkable copper plates should also be mentioned, though strictly speaking they were legal tender of varying value which had to be fixed by means of some other standard, such as blankets or slaves. Pieces of cedar bark prepared for roofing sometimes appear as units of value also.

By the interior Salish of British Columbia Indian hemp bark was put up in bundles about 2 ft. long and 2 in. in diameter, and tied at both ends, and 6 of these bundles constituted a "package," while dried salmon was generally sold by the "stick," each stick numbering 100 fish (Teit).

Although including the more prominent standards, the foregoing list by no means exhausts their number, for where articles of various kinds were continually bartered, numerous standards of a more or less evanescent nature arose. For a list of comparative valuations in one tribe see Teit, cited below, p. 260.

Family. There are important material differences in the organization and in the functions of the family as found respectively in savagery, barbarism, and civilization, and even within each of these planes of culture several marked types of the family, differing radically one from another in many characteristic features, exist.

To determine definitely even the main organic features of the family systems in a majority, not to say all, of the Indian tribes N. of Mexico, is not yet possible, owing to lack of material. In communities like those of the Muskhogean and the Iroquoian tribes, in which the clan system has been so highly developed, two radically different organic groups of persons exist to which the term family may properly be applied; and within each of these groups a more or less complex system of relationships definitely fixes the status of every person, a status, that, acquired by birth or adoption, determines the civil or other rights, immunities, and obligations of the person. Among the Iroquois the ohwachira (the common Iroquoian name for the maternal blood family) was becoming merged into the clan, so that in specific cases the two are virtually identical, although in other cases several ohwachira are comprised under one clan. The term ohwachira is common to all the known dialects of the Iroquoian stock. On the other hand there are found in these dialects several different names designating the group called a clan, seemingly indicating the probability that the family as an institution existed long before the development of the clan organization, when the several tribes still had a common history and tradition. But it is not strictly accurate to call an ohwachira a family, or a clan a family. The first and larger group includes the entire body of kindred of some one person, who is usually denominated the propositus.

In view of the rights and obligations of the father's clan to a person, in addition to those inherited from the clan of the mother, it appears that the family group among the Iroquois and Muskhogean tribes is composed of the maternal and paternal clans. The clan owes the child of its son certain civil and religious rights, and is bound to the child by obligations which vitally concern the latter's life and welfare, present and future. The youth's equipment for life would not be regarded as complete were the performance of these clan duties neglected. The tutelar of every person is named and made by the members of the paternal clan. The duties just mentioned do not end with the death of the person; if occasioned by war or by murder the loss must be made good by the paternal clan supplying a prisoner or the scalp of an enemy.

Some of the duties and obligations of the clan or clans whose sons have taken wives from a clan stricken by death are to condole with it, prepare the death feasts, provide suitable singers to chant the dirges at the wake lasting one or more nights, guard and care for the body lying in state and prepare it for burial, make the bark burial case or wooden coffin, construct the scaffold or dig the grave, and to perform all the other needful duties due from clans bound together by marriage. It was regarded as unseemly for the stricken clan to do anything but monrn until the body of the dead had been placed in its final resting place and until after the feast of "re-associating with the public," held ten days subsequent to the death of the deceased, at which his property was divided among his heirs and friends. In case of the death of a chief or other noted person the clan mourned for an entire year, scrupulously refraining from taking part in public affairs until the expiration of this period and until after the installation of a successor to the dead officer. During the interim the bereaved clan was represented by the clan or clans bound to it by the ties of marriage and offspring.

These two clans are exogamic groups, entirely distinct before the child's birth, and form two subdivisions of a larger group of kindred—the family—of which any given person, the propositus, is the local point or point of juncture. Strictly speaking, both clans form incest groups in relation to him. Every member of the community is therefore the

point of contact and convergence of two exogamic groups of persons, for in these communities the clan is exogamic; that is to say, each is an incest group in so far as its own members are concerned. Within these clans or exogamic groups the m mbers are governed by rules of a more or less complex system of relationships, which fix absolutely the position and status of everyone in the group, and the clan is thus organized and limited. Those, then, who have common blood with one another, or with a third person, belong to the same family and are kindred. Both of these clans owe the offspring the rights and obligations of kindred. but in differing degrees. Thus a person may be said to have two clans, in some measurethat of his mother and that of his father. Both clans exercise rights and are bound by obligations to the household of which he is a member; both have, moreover, in different measure, the rights and obligations of kinship to him.

The second and smaller group, the fireside or household, includes only the husband, his wife or wives, and their children. Where there are several wives from several different families, this group in its family relations becomes very intricate, but is nevertheless under the rigid control of family law and usage.

It is thus apparent that these two groups of persons are in fact radically distinct, for the lesser group is not merely a portion of the larger. The relative status of the husband and his wife, or wives, and their children makes this evident.

Custom, tradition, and the common law do not regard the wife, or wives, of the household as belonging to the clan of the husband. By marriage the wife acquires no right of membership in her husband's clan, but remains a member of her own clan, and, equally important, she transmits to her children the right of membership in her clan; and she acquires no rights of inheritance of property either from her husband or from his clan. On the other hand, the husband acquires no rights from his wife or from her clan, and he, likewise, does not become a member of his wife's clan.

But the fireside, or household, is the product of the union by marriage of two persons of different clans, which does not establish between the husband and wife the mutual rights and obligations arising from blood feud and from inheritance. It is precisely these mutual rights and obligations that are peculiarly characteristic of the relations between clansmen, for they subsist only between persons of common blood, whether acquired by birth or by adoption. Therefore, husband and wife do not belong to the same clan or family.

As there is a law of the clan or exogamic kinship group governing acts and relations as between members of the same clan group, so there are rules and usages governing the household or fireside and defining the rights and obligations belonging to its jurisdiction. The relations of the various members of the fireside are affected by the fact that every member of it is directly subject to the general rule of the clan or higher kinship group—the husband to that of his clan, the wife or wives to those of their respective clans, and the children to those of both parents, but in different kind and degree.

The dominating importance of the family in the social organization of a primitive people is apparent: it is one of the most vital institutions founded by private law and usage. In such a community every member is directly obligated to the family, first of all, for the protection that safeguards his welfare. The members of the family to which he belongs are his advocates and his sureties. In the grim blood feud the family defends him and his canse, even with their lives, if need be, and this care ends not with his death, for if he be murdered the family avenges his mnrder or exacts payment therefor. In the savage and barbaric ages, even to the beginning of civilization, the community placed reliance largely on the family for the maintenance of order, the redress of wrongs, and the punishment of crime.

Concerned wholly with the intimate relations of private life, family custom and law are administered within the family and by its organs; such customs and laws constitute daily rules of action, which, with their underlying motives, embody the common sense of the community. In a measure they are not within the jurisdiction of public enactment, although in specific cases the violation of family rights and obligations incurs the legal penalties of tribal or public law, and so sometimes family government comes into conflict with public law and welfare. But by the increasing power of tribal or public law through centralization of power and political organization the independence of the family in private fends, regarded as dangerous to the good order of the community, is gradually limited. when the family becomes a unit or is absorbed in a higher organization the individual acquires

certain rights at the expense of the family the right of appeal to the higher tribunal is one of these.

The wealth and power of a clan or family depend primarily on the dearth or abundance of its numbers. Hence the loss of a single person is a great loss, and there is need that it be made good by replacing the departed with another or by many others, according to the relative standing and importance of the person to be restored. For example, Aharihon, an Onondaga chieftain of the 17th century, sacrificed 40 men to the shade of his brother to show the great esteem in which he held him. But among the Iroquois the duty of restoring the loss does not devolve directly on the stricken clan or exogamic kinship group, but upon all allied to it by the ties of what is termed hontonnishon'-i. e., upon those whose fathers are clansmen of the person to be replaced the birth or the adoption of many men in a clan or exogamic kinship group is a great advantage to it; for although these men become separated through the obligation of marrying into clans or such groups other than their own, the children of such unions are bound in a measure to the clan or exogamic kinship group of their fathers. This is a principle so well established that the chief matron of the paternal clan or exogamic kinship might oblige these offspring of diverse households (as many as might suffice) to go to war in fulfilment of their obligation, as seemed good to her; or she might stop them if they wished to undertake a war which was not, from its expediency, pleasing to her and her advisors. Therefore this chief matron, having decided that the time was at hand "to raise again the fallen tree" or "to put back on the vacant mat" one of the clan whom death removed, would inform one of the children whose fathers were her clansmen, their honthonni', that it was her desire that he form and lead a war party against their enemies for the purpose of securing a prisoner or a scalp for the purpose named. The person whom she selected was one judged most capable of executing her commission. This was soon accomplished. She enforced and confirmed this commission with a belt of wampum. So powerful was this chief matron of a clan that when the council chiefs did not favour the designs of certain ambitions war chiefs in raising levies for military purposes, fearing that they might injure the best interests of the tribe, one of the surest methods they might employ to frustrate these enterprises was to win the chief matrons of the clans whose clansmen were the fathers of the recruits from the other clans, for these chief matrons had only to interpose their influence and authority to bring to naught the best concerted designs and enterprises of these ambitious war chiefs. This is ample evidence that these women had an influence in some degree exceeding that of the council of the ancients and tribal chiefs.

In the blood feud the paternal kin did not not interfere except by counsel; but to avenge the death of a clansman of their father was an obligation. Outlaws were denied family and tribal rights. The renunciation of clan kinship entailed the loss of every right and immunity inhering in kinship. The fundamental concept in the organic structure of the family with its rights, immunities, and obligations is that of protection. To exercise the right of fend was lawful only to avenge the guilty murder of a clansman.

The clan or family was made useful by the tribe as a police organization, through which control was exercised over lawless men who otherwise were beyond restraint. Every clan had jurisdiction over the lives and property of its members, even to the taking of life for cause.

The mutual obligations of kindred subsist between persons who can act for themselves; but there are duties of protection by these toward those who cannot act for themselves for any reason whatever, for it is a principle of humanity that they who are legally independent should protect those who are legally dependent. The modern law of guardianship of minors and imbeciles is evidently but a survival and extension of this obligation of protection in the primitive family and clan.

Speaking generally of the tribes of the N.W. coast, Swanton (Am. Anthrop., n.s., vii, no. 4, 1905) says that in addition to the "husband, wife, and children, a household was often increased by a number of relations who lived with the house owner on almost equal terms, several poor relations or protégés who acted as servants, and on the N. Pacific coast as many slaves as the house owner could afford or was able to capture."

In tribes where a clan or gentile organization similar to that of the Iroquoian and the Muskhogean tribes does not exist, it is known that the incest groups on the maternal and the paternal sides are largely determined by the system of relationships, which fixes the position and status of every person within an indefinite

2 GEORGE V., A. 1912

group, and the incest group is reckoned from each propositus. That is to say, marriage and cohabitation may not subsist between persons related to each other within prescribed limits on both the maternal and paternal sides, although kinship may be recognized as extending beyond the prescribed limit. Among the Klamath these relationships are defined by reciprocal terms defining the relation rather than the persons, just as the term "cousin" is employed between consins.

In speaking of the fierce, turbulent, and eruel Athapasean tribes of the valley of the Yukon, Kirkby (Smithson, Rep. 1864, 1865), says: "There is, however, another division among them, of a more interesting and important character than that of the tribes just mentioned. Irrespective of tribe they are divided into three classes, termed, respectively, Chitsa, Nate-sa, and Tanges-at-sa, faintly representing the aristocraey, the middle classes, and the poorer orders of civilized nations, the former being the most wealthy and the latter the poorest. In one respect, however, they greatly differ, it being the rule for a man not to marry in his own, but to take a wife from either of the other classes. A Chit-sa gentleman will marry a Tanges-at-sa peasant without the least feeling infra dig. The offspring in every case belong to the class of the mother. This arrangement has had a most beneficial effect in allaying the deadly feuds formerly so frequent among them." As no further data are given, it is impossible to say what, if any ,was the internal structure and organization of these three exogamic classes, with female descent, mentioned above. Apparently a similar social organization existed among the Natchez, but no detailed information on the subject is available. (J. N. B. H.)

Fasting. A rite widely observed among the Indians and practised both in private and in connection with public ceremonies. The first fast took place at puberty, when the youth was sometimes sent to a sequestered place and remained alone, fasting and praying from 1 to 4 days, or even longer. At this time or during similar fasts which followed, he was supposed to see in a dream the object which was to be his special medium of communication with the supernatural. Simple garments or none were worn when fasting. Among some tribes clay was put upon the head, and tears were shed as the appeals were made to the unseen powers. At the conclusion

of a long fast the quantity of food taken was regulated for several days. It was not uncommon for an adult to fast, as a prayer for success, when about to enter upon an important enterprise, as war or hunting. Fasting was also a means by which occult power was believed to be acquired; a shaman had to fast frequently in order to be able to fulfill the duties of his office.

Initiation into religious societies was accompanied by fasting, and in some of the great ceremonies all the principal actors were obliged to fast prior to taking part. The length of these fasts varied with the ceremony and the tribe, and ranged from midnight to sunset, or continued 4 days and nights. Fasting generally included abstinence from water as well as food. The reason for fasting has been explained by a Cherokee priest as "a means to spiritualize the human nature and quicken the spiritual vision by abstinence from earthly food." Other tribes have regarded it as a method by which to remove "the smell" of the common world. Occasionally chiefs or leaders have appointed a tribal fast in order to avert threatening disaster.

(A. C. F.)

Feasts. Among all tribes there were feasts, ranging in importance from that of the little child to its playmate up to those which were a part of the great sacred ecremonies. These so-called feasts were never elaborate and were simply served, each portion being ladled from the kettle by the hostess, or by one appointed for the task.

Feasts were held at stated times. On the N. Pacific coast the coming of the salmon was celebrated in a feast of thanksgiving by all the tribes able to secure the fish from inlets or rivers. Farther s, the ripening of acorns and other fruits was similarly observed. The maturing of the maize was the occasion for tribal festivities; at that time the Creeks held their 8-days' ceremony known as the Busk when the new corn was eaten, the new fire kindled, new garments worn, and all past enmittee forgiven. In November, when the Eskimo had gathered their winter store, thye held a feast, at which time gifts were exchanged;

by this a temporary relationship was formed between the giver and taker, which tended to good feeling and fellowship. During the full moon of December the Eskimo held a feast to which the bladders of animals killed during the year were brought. These were "supposed to contain the inuits, or shades of the animals.' On the sixth and last day the bladders were taken out to a hole made in the ice, and thrust into the water under the ice. They "were supposed to swim far out to sea and then enter the bodies of unborn animals of their kind. thus becoming reincarnated and rendering game more plentiful" (Nelson). Among the Iroquois a feast was held to keep the medicine alive. Religious ceremonies to insure fruitfulness took place at the planting of the maize, at which time a feast was held.

Feasts were given on the completion of a house, at a marriage, and when a child was named. Feasts in honor of the dead were widely observed. The time which must clapse after a death before the feast could be given varied among the tribes. Among some of the Plains Indians it occurred after 4 days, with the Iroquois after 10 days, and with other tribes after nearly a year. The Eskimo held their memorial feast late in November. The near relatives were the hosts, and the dead were supposed to be present beneath the floor of the dwelling where they enjoyed the festivities in their honour, partaking of the food and water east there for them, and receiving the clothing put as a gift upon their namesakes. At the feast for the dead held by the tribes on the N. Pacific coast, the spirits of the departed were also supposed to be present, but the portions of food intended for them were passed through the fire and reached them in this manner. The Huron held their ceremonial feast in the fall, when all who had died during the year were disinterred by their kindred, the flesh stripped from the bones, and these wrapped in new robes and laid in the clan burial pit. The feast was one of tribal importance and was accompanied with religious rites.

It was incumbent on an aspirant to tribal honour to give feasts to the chiefs, and one who desired initiation into a society must provide feasts for the society. Respect to chiefs and leading men was expressed by a feast. On such an occasion the host and his family did not eat with their guests; they provided the food and the dishes, but the head chief appointed one of the guests to act as server. At all feasts the host was careful not to include in the food or

the dishes used anything that would be tabu to any of his guests; a failure to observe this important point would be considered an insult.

The meetings of secular societies among the Plains tribes, whether the membership was of one or both sexes, were always accompanied with a feast. There was no public invitation, but the herald of the society went to each lodge and gave notice of the meeting. The food was provided by the family at whose lodge the society met, or by certain other duly appointed persons. The preparation for the feast varied in different societies within the same tribe. In some instances the food was brought ready cooked to the lodge, in others it was prepared in the presence of the assembly. The people brought their own eating vessels, for at these feasts one had to eat all that was served to him or take what was left to his home.

In most tribal ceremonies sacred feasts occurred, for which certain prescribed food was prepared and partaken of with special ceremony. Feasts of this kind often took place at the close of a ceremony, rarely at the beginning, although sometimes they marked a particular stage in the proceedings. Among the Iroquois, and perhaps other tribes, the owner feasted his fetish, and the ceremony of the calumet, according to early writers, was always concluded with a feast, and was usually accompanied by an exchange of presents.

At every feast of any kind, on any occasion, where food was to be eaten, a bit or small portion was first lifted to the zenith, sometimes presented to the four cardinal points, and then dropped upon the earth at the edge of the fire or into the fire. During this act, which was an offering of thanks for the gift of food, every one present remained silent and motionless.

Consult Dorsey and Voth in Field Columbian Mus. Publ. Anthrop. ser., 111, 1900-03; Fewkes in 15th, 16th, and 19th Rep. B.A.E., 1897-1900; Fletcher in Publ. Peabody Museum; Gatschet. Creek Migr. Leg., 1, 177, 1884; Hoffman in 7th and 14th Reps. B.A.E., 1891, 1896; Jenks in 19th Rep. B. A. E., 1900; Jesuit Relations, Thwaites ed., 1-LXXIII, 1896-1901; Matthews in Mem. Am. Mus. Nat. Hist., vi. 1902; Mindeleff in 17th Rep. B. A. E., 1898; Nelson in 18th Rep. B. A. E., 357, 1899.

(A. C. F.)

Featherwork. The feathers of birds entered largely into the industries, decorations war and worship of the Indians. All common species lent their plumage on occasion, but there were some that were especially sought in the Arctic regions, water birds during their annual migrations; the eagle everywhere; wild turkeys in their habitat; ravens and flickers on the N. Pacific coast; woodpeckers, meadow larks, crested quail, mailard ducks, jays, blackbirds, and orioles in California; and in the Pueblo region, eagles, hawks, turkeys, and parrots especially. The prominent species in every area were used.

Fans and other accessories of dress were made of wings or feathers by the froquois and other tribes. The uses of feathers in decoration were numberless. The Western Eskimo sewed little sprays of down into the seams of garments and bags made of intestinal membranes, and the California Indians decorated their exquisite basketry in the same manner. The quills of small birds, split and dved, were used for beautiful embroidery and. basketry in the same way as porcupine quills, For giving directness to the flight of arrows feathers were usually split so that the halves eould be tied or glued to the shaftment in twos or threes. Among the Eskimo and some of the southwestern Indians the feathers were laid on flat. Among California tribes bird scalps were used as money, being both a standard of value and a medium of exchange. The most striking uses of feathers were in connection with social customs and symbolism. The masks and the bodies of performers in ceremonies of the N. Pacific coast were copiously adorned with down. Feathers worn by the Plains tribes in the hair indicated rank by their kind and number, or by the manner of mounting or notching. The decoration of the stem of the calumet (q. v.) was of feathers, the colours of which depended on the purpose for which the calumet was offered. Whole feathers of eagles were made into war-bonnets, plumes and long trails for dances and solemnities. In the Pueblo region feathers played an important rôle in symbolism and worship -prayer-sticks, wands, altar decorations, and aspergills were made of them. The downy feather was to the mind of the Indian a kind of bridge between the spirit world and ours. Creation and other myths spring out of feathers.

Feather technic in its highest development belongs to South America, Central America, and Polynesia, but there is continuity in the processes from the N. part of America south-ward.

(O. T. M.)

ʻa eharm,' Fetish (Portuguese: feitiço, 'sorcery', 'enchantment'-whence the English fetish-; adjective, 'made by art', 'artificial', 'skilfully contrived'; Latin factitious, 'made by art', 'artful by magic'). Among the American Indians an object, large or small, natural or artificial, regarded as possessing consciousness, volition and immortal life, and especially orenda or magic power, the essential characteristie, which enables the object to accomplish, in addition to those that are usual, abnormal results in a mysterious manner. Apparently in any specific case the distinctive function and sphere of action of the fetish depends largely on the nature of the object which is supposed to contain it. It is the imagined possession of this potent mysterious power that causes an object to be regarded as indispensable to the welfare of its possessor.

In the belief of the Indians, all things are animate and incarnate-men, beasts, lands, waters, rocks, plants, trees, stars, winds, clouds, and night-and all possess volition and immortal life; yet many of these are held in perpetual bondage by weird spells of some mighty enchantment. So, although lakes and seas may writhe in billows, they cannot traverse the earth, while brooks and rivers may run and bound over the land, yet even they may be held by the potent magic power of the god of winter. Mountains and hills may throb and quake with pain and grief, but they cannot travel over the earth because they are hold in thraldom by the powerful spell of some potent enchanter. Thus it is that rocks, trees, roots, 'stocks and stones'. bones, the limbs and parts of the body, and the various bodies of nature are verily the living tombs of diverse beings and spirits.

Of such is the kingdom of the fetish, for even the least of these may be chosen. Moreover, a fetish is an object which may also represent a vision, a dream, a thought, or an action.

A fetish is acquired by a person, a family. or a people for the purpose of promoting welfare. In return, the fetish requires from its owner worship in the form of prayer, sacrifice, feasts, and protection, and from its votaries it receives ill or good treatment in accordance with the character of its behaviour toward them. Some fetishes are regarded as more efficacious than others. The fetish which loses its repute as a promoter of welfare gradually becomes useless and may degenerate into a sacred object-a charm, an amulet, or a talisman—and finally into a mere ornament. Then other fetishes are acquired, to be subjected to the same severe test of efficiency in promoting the well-being of their possessors.

The fetish is clearly segregated from the group of beings called tutelars, or guardian spirits, since it may be bought or sold, loaned or inherited, while, so far as known, the tutelar is never sold, loaned, or, with the Iroquois, inherited. Among the Santee and the Muskhogean and Iroquoian tribes the personal tutelar, having a different origin, is scrupulously discriminated from all those objects and beings which may be called fetishes. The tutelar has a particular name as a class of beings. Rev. John Eastman says that this is true of the Santee, and it is probably true of many other tribes. Some fetishes are inherited from kindred, while others are bought from neighbouring tribes at a great price, thus constituting a valuable article of intertribal commerce. It is also acquired by choice for multifarious reasons.

A person may have one or many fetishes. The name fetish is also applied to most of the articles found in the medicine sack of the shaman, the *pindikoson* of the Chippewa. These are commonly ofter, snake, owl, bird, and other skins; roots, bark, and berries of many kinds; potent powders, and a heterogeneous collection of other things employed by the shaman.

A fetish is not a product of a definite phase of religious activity, much less is it the particular prerogative of any plane of human culture; for along with the adoration of the fetish goes the worship of the sun, moon. earth, life, trees, rivers, water, mountains, and

storms as the embodiment of as many personalities. It is therefore erroneous to assign the fetish to the artificial stage of religion, sometimes called hecastotheism. The fetish must be carefully distinguished from the tutelar of every person. Among the Iroquois these are known by distinct names, indicative of their functions: ochina'kĕn'da' for fetish, and oiāron' for the tutelar.

Mooney says, in describing the fetish, that it may be "a bone, a feather, a carved or painted stick, a stone arrowhead, a curious fossil or concretion, a tuft of hair, a necklace of red berries, the stuffed skin of a lizard, the dried hand of an enemy, a small bag of pounded charcoal mixed with human blood—anything. in fact, which the owner's medicine dream or imagination might suggest, no matter how uncouth or unaccountable, provided it be easily portable and attachable. The fetish might be the inspiration of a dream or the gift of a medicine-man, or even a trophy taken from a slain enemy, or a bird, animal, or reptile: but, however insignificant in itself, it had always, in the owner's mind at least, some symbolic connection with occult power. It might be fastened to the scalp-lock as a pendant, attached to some part of the dress, hung from the bridle bit, concealed between the covers of a shield, or gnarded in a special repository in the dwelling. Mothers sometimes tied the fetish to the child's cradle."

Fire-making. Two methods of making fire were in use among the American aborigines at the time of the discovery. The first method, by flint-and-pyrites (the progenitor of flint-and-steel), was practised by the Eskimo and by the Athapascan and Algonquian tribes ranging across the continent from Stiking r. in British Columbia to Newfoundland and around the entire Arctic coast, and also throughout New England; as well as by the tribes of the N. Pacific coast. The inference is that this method of fire-making at

one time was general in this area, but the observations on which its distribution is based are from widely separated localities in which it is invariably used in connection with fire-making by wood friction. It appears probable that flint-and-pyrites, in view of its distribution in northen Europe, was introduced into America through Scandinavian contact, or is accultural either from Europe or Asia. The flint-and-steel is clearly an introduction of recent times.

The second method, by reciprocating motion of wood on wood and igniting the groundoff particles through heat generated by friction, was widespread in America, where it was the most valued as well as the most effectual process known to the aborigines. The apparatus, in its simplest form, consists of a slender rod or drill and a lower piece or hearth, near the border of which the drill is worked by twisting between the palms, cutting a socket. From the socket a narrow canal is cut in the edge of the hearth, the function of which is to collect the powdered wood ground off by the friction of the drill, as within this wood meal the heat rises to the ignition point. This is the simplest and most widely diffused type of fire-generating apparatus known to uncivilized man. Among the Eskimo and some other tribes the simple two-piece fire drill became a machine by the use of a hand or mouth rest containing a stone, bone, or wood socket for the upper end of the drill, and a cord with two handles or string on a bow for revolving the drill. By these inventions uniform and rapid motions and great pressure were effected, rendering it possible to make fire with inferior wood. The four-part drill consisted of two kinds: (a. The cord drill, which requires the co-operation of two persons in its working, and (b) the bow drill, which enables one person to make fire or to drill bone and ivory. The distribution of these varieties, which are confined to the Eskimo and their neighbours, follows no regular order; they may be used together in the same tribe, or one or other may be used alone, although the presumption is that the cord drill is the older. The hearth alone embodies two interesting modifications which reflect the environment. In one the canal leads down to a step or projection from the side of the hearth, and in the other the drilling is done on a longitudinal slot in the middle of the hearth, the object in both cases being to prevent the fire from falling into the snow.

These features also seem to have an indiscriminate distribution in the area mentioned.

The pump drill has been employed for firemaking only among the Onondaga of Canada, who used it in making sacred fire for the White-dog feast; but the pump drill is of little practical use in fire-making. From the Onondaga also there is an example of the fire plough like that of the Polynesians, in which a stick is held at an angle between the hands and rubbed back and forth along a plane surface. cutting a groove in which the wood meal produced by friction ignites. The appearance of these diverse methods in one tribe, in an area where the simple drill was common, leads to the assumption that they are of recent introduction. There is no other evidence that the fire plough ever existed in the western hemisphere.

The wood selected for the fire drill varied in different localities, the proper kinds and qualities being a matter of acquired acknowledge. Thus the weathered roots of the cottonwood were used by the Pueblos; the stems of the yucca by the Apache; the root of the willow by the Hupa and Klamath; cedar by the N. W. Coast tribes; elm, maple, and buttonwood by the eastern Indians. In some instances sand was placed in the fire cavity to increase friction; often two men twirled the drill alternately for the purpose of saving labour or when the wood was intractable.

A similar discrimination is observed in the selection of tinder. The Eskimo prized willow catkins; the Indians of the N.W. coast used fraved cedar bark; other tribes used fungi, softened bark, grass, or other ignitible material. Touchwood or punk for preserving fire was obtained from decayed trees, or some form of slow match was prepared from bark. From the striking of a spark to the well-started camp-fire considerable skill and forethought were required. The glowing coal from the fire drill was usually made to fall into a small heap of easily ignitible material, where it was encouraged by fanning or blowing until actual flame was produced; or the spark with the small kindling was gathered in a bunch of grass or a strip of bark and swung in the

Fire-making formed an important feature of a number of ceremonies. New fire was made in the Green-eorn ceremony of the Creeks, the White-dog feast of the Iroquois, the New-fire and Yaya ceremonies of the Hopi,

and among many other tribes in widely separated localities. There are also many legends and myths grouped about the primitive method of obtaining fire at will. The Cherokee and other southern tribes believed that a perpetual fire burned beneath some of the mounds in their country, and the Natchez built their mounds with a view, it is said, of maintaining a perpetual fire. On the introduction of flint-and-steel and matches the art of fire-making by the old methods speedily fell into disuse among most tribes and was perpetuated only for procuring the new fire demanded by religious rites.

Consult Dixon in Bull. Am. Mus. Nat. Hist., xvii, pt. 3, 1905; Hough in Rep. Nat. Mus., 1888 and 1890. (W. H.)

Fishhooks. Starting from the simple device of attatching the bait to the end of a line, the progressive order of fishhooks used by the Indians seems to be as follows: (a) The gorge hook, a spike of bone or wood, sharpened at both ends and fastened at its middle to a line, a device used also for catching birds; (b) a spike set obliquely in the end of a pliant shaft; $\langle c \rangle$ the plain book; $\langle d \rangle$ the barbed hook: (e) the barbed hook combined with sinker and lure. This series does not exactly represent stages in invention; the evolution may have been effected by the habits of the different species of fish and their increasing wariness. The material used for hooks by the Indians was wood, bone, shell, stone, and copper. The Mohave employed the recurved spines of certain species of eactus, which are natural hooks.

Data on the archæology of the fi-bhook have been gathered from the Ohio mounds and the shell-heaps of Santa Barbara, Cal., unbarbed hooks of bone having been found on a number of Ohio sites and gorge hooks at Santa Barbara. The fishhook of recent times may be best studied among the N. Pacific tribes and the Eskimo of Alaska. The Makah of Washington have a modified form of the gorge hook, consisting of a sharpened spine of hone attached with a pine-root lash to a whalebone. British Columbian and s. Alaskan tribes used either a simple hook of bent wood having a barb lashed to a point, or a compound hook consisting of a shank of wood, a splint of pine-root lashed at an angle of 45° to its lower end, and a simple or barbed spike of bone, wood, iron, or copper lashed or set on the outer end of the splint. Eskimo hooks consisted frequently of a shank of bone with a curved, sharpened spike of metal set in the lower end, or several spikes were set in, forming a gig. Usually, however, the Eskimo hook had the upper half of its shank made of stone and the lower half of ivory, in which the unbarbed curved spike of metal was set, the parts being fastened together by lashings of split quill. A leader of quill was attached to the hook and a bait of crab carapace was hung above the spike. This is the most complete hook known in aboriginal America.

Lines and poles varied like the hook with the customs of the fisherman, the habits of the fish, and the environment. The Eskimo used lines of knotted lengths of whalebone. quill, hair, or sinew; the x. Pacific tribes, lines of twisted bark, pine root, and kelp; and other tribes lines of twisted fibre. Short poles or none were used by the Eskimo and N. Pacific tribes. In other regions it is probable that long poles of cane or saplings were used. In some regions, as on the N. W. coast, a trawl, consisting of a series of hooks attached by leaders to a line, was usel for taking certain species of fish. The Haida, according to Swanton, made a snap hook, consisting of a hoop of wood, the ends of which were held apart by a wooden peg. This peg was displaced by the fish on taking the bait, and the ends of the hoop snapped together, holding the fish by the jaw.

W. H.

Fishing. At the first coming of the Europeans the waters of this continent were found teeming with food fish, the great abundance of which quickly attracted fleets of fishermen from all civilized parts of the Old World. The list of species living in American waters

utilized by the Indians would fill a volume. The abundance or scarcity of this food on the Atlantic coast varied with the season. In spring the fish made their appearance in vast shoals in the spawning beds of the coast and in the bays and rivers. Capt. John Smith relates, in his history of Vi gin a, early in the 17th century, that on one occasion fish were encountered in such numbers in the Potomac as to impede landing from his boat. The annual spring run of herring above Washington is still almost great enough to warrant the assertion. Fish I'fe varied with locality and season. On the northern and eastern coasts the fish disappeared to a great extent when the waters became cold at the approach of winter, and many northern fishes went to more southerly waters. Among the better known food products furnished by the waters of the country may be mentioned the whale, sea lion, scal, otter, swordfish, sturgeon, porpoise, cod, haddock, halibut, pollock, salmon, trout, herring, shad, perch, bass, mackerel, flounder, eel, plaice, turbot, whitefish, catfish, smelt, pike, dogfish, and all varieties of shellfish. By some tribes, as the Apache, Navaho, and Zuñi, fish were tabu as food; but where fish was used at all by the Indians, practically everything edible that came from the water was consumed. The salmon of the Pacific coast are still found in enormous schools, and in the eanning industry hundreds of persons are employed. Lobsters and crabs furnished no inconsiderable food supply, while the vast deposits of shells along all tidewater regions, as well as many of the interior rivers, testify to the use made of shellfish by the aborigines; they not only supplied a large part of the daily food of the people, but were dried for time of need. Shellfish were dug or taken by hand in wading and by diving. Salmon and herring eggs formed one of the staple articles of diet of the tribes of the N. Pacific coast. To collect herring eggs these tribes laid down under water at low tide a row of hemlock branches, which were held in position with weights; then branches were fastened together and a float was fixed at one end, bearing the owner's mark. When these boughs were found to be covered with eggs they were taken into a canoe, carried ashore, and elevated on branches of a tree stripped of its smaller limbs, where they were left to dry. When first placed in position the eggs adhered firmly to the boughs, but on taking them down great care had to be exercised, because they were

very brittle and were easily knocked off. Those not immediately consumed were put up in the intestines of animals and laid aside for winter use. It is recorded in the Jesuit Relations that many eels eame to the mouth of the St. Lawrence r. and were trapped by the Indians, who made long journeys to get the season's supply.

On the middle and s. Atlantic coast, fish are found during the greater portion of, if not throughout, the year, while farther N. fishing is confined more to the spawning seasons and to the months when the waters are free of ice. Experience taught the natives when to expect the coming of the fish and the time when they would depart. In methods of capturing sea food the native had little to learn from the white man, even in killing the whale (which was treated as royal game on the coast of Vancouver id.), the sea lion, or the seal, or in taking shellfish in the waters of the ocean and in the smallest streams.

Large fish and marine mammals were captured by means of the harpoon, while the smaller ones were taken by the aid of bow and arrow, gigs, net, dull, trap, or weir. Fires or torehes were used along the shore or on boats, the gleam of which attracted the game or fish to the surface, when they were easily taken by hand or with a net. Among the Cherokee, Iroquois, and other tribes, fish were drugged with poisonous bark or other parts of plants; in parts of California extensive use was made of soap root and other plants for this purpose. Carved fishhooks (q.v.) of shell and bone have been found in shell-heaps and graves in the interior. In shape these resemble the hooks of metal from Europe, though the natives of the Pacific coast used fishhooks of wood and bone combined, made in so primitive a manner as to indicate aboriginal origin. Another ingenious device employed along the N. Pacific coast for eatching fish consisted of a straight pin, sharp at both ends and fastened to a line by the middle; this pin was run through a dead minnow, and, being gorged by another fish, a jerk of the string caused the points to pierce the mouth of the fish, which was then easily taken from the water. Artificial bait, made of stone and bone combined, was used as a lure, and was quite as attractive to fish as is the artificial bait of the civilized fisherman.

Still another ingenious way of eatching fish was by "pinching," by means of a split stick, which, like the gig, held the fish fast.

In shallow rivers low walls were built from one side of the stream to the other, having a central opening through which fish were forced into a trap. Brushwood mats were also made, which were moved along like seines, so as to drive the fish into shallow or narrow places, where they were readily taken by the hand or with dipnets. Along the shores of rapid streams men stationed themselves on rocks or staging and speared fish as they passed up or down stream. During winter, when the northern waters were frozen, holes were cut in the ice, and through these, fish were shot, speared or netted. Probably the most primitive of all methods of fishing, however, by which many salmon were and, doubtless are still, captured, was that of knocking them on the head with a club. After a great run of fish had subsided, single ones were caught in shallow water by any of the above methods. There are still indications that from an early period a trade existed between the fishing Indians and those of the interior who gained their livelihood by other means. Great supplies of fish were cured by drying in the sun or over fires, and sometimes the product was finely ground and packed in skins or baskets for future use.

(J. D. M.)

Flathead. A name applied to several different tribes usually owing to the fact that they were accustomed to flatten the heads of their children artificially. In s. E. United States the Catawba and Choctaw were sometimes designated by the term Flatheads and the custom extended to nearly all Muskhogean tribes as well as to the Natchez and the Tonika. In the N. W. the Chinook of Columbia r., many of the Vancouver Id. Indians,

and most of the Salish of Puget sd. and British Columbia were addicted to the practice, and the term has been applied to all as a body and to some of the separate divisions. Curiously enough, the people now known in official reports as Flatheads—the Salish proper (q.v.—never flattened the head. Dawson implies (Trans. Roy. Soc. Can. for 1891, sec. II, 6 that they were so named (Tetes Plates by the first Canadian voyageurs because slaves from the coast with deformed heads were among them. For the names of the tribes to which the term has been applied, see Flatheads in the index.

Flowpahhoultin. A small body of Salish of Fraser superintendency, Brit. Col., in 1878.—Can. Ind. Aff., 79, 1878.

Food. The areas occupied by the Indians may be classed as supplying, predominantly, animal food, vegetal food, and mixed diet. No strict lines separate these classes, so that in regions where it is commonly said that the tribes are meat eaters exclusively, vegetal food is also of importance, and vice versa. Vegetal food stuffs are (1 pre-agricultural, or the gathering of self-sown fruits, nuts, seeds, and roots; and (2) agricultural, or (a) the raising of root crops, originating in the harvesting of roots of wild plants, and (b) of cereal products, consisting chiefly of maize, grown by the majority of the tribes, and wild rice in the area of the upper lakes, where a sort of semi-agriculture was practised to some extent. See Agriculture.

Animal food was obtained from the game of the environment, and the settlement and movements of some tribes depended largely on the location or range of animals, such as the buffalo, capable of furnishing an adequate food supply; while on the other hand, the limit of habitat of water animals, as the salmon, tended to restrict the range of other tribes to the places where the supply could be gathered. No pure hunter stage can be found, if it ever existed, for while the capture of animals devolved on the man and the preparation of food on the woman, the latter added to the diet substances derived from the vegetal kingdom. Similarly no purely agricultural stage with exclusively vegetal diet existed, and no aboriginal domestication (q. v.) of animals x, of Mexico is found except in the case of the turkey and the dog.

In general, in the N. portion of the continent the diet was three-fourths animal food; in the s. part it was three-fourths vegetal; while

with the tribes of the coast, mountains, lakes, and plains, it varied according to the food supply. The absence of milk food, other than the maternal lactation, to a considerable extent limited the natural increase of the population. The food supply also changed with the seasons, causing the diet at different periods of the year to vary in its ratio of animal to vegetal constituents, and another feature depended on religious customs and habits which modified or regulated the food used.

Vegetal food comprised a vast array of the products of plant life, of which roots and seeds were the most valuable. The most important food plant possessed by the Indians was maize which formed and still forms their principal subsistence. Following maize in order of importance came beans, peas, potatoes, squashes, pumpkins, melons and chile, which were grown in variety. Uncultivated plants also entered into the dietary, as seeds, roots, and flowers of grasses and other plants, or parts of plants used as greens, for flavouring, etc. In numberless cases wild plants have preserved tribes from starvation when cultivated crops failed. In the S. W., eactus and yucca fruits, mesquite beans, and the agave were most important elements of the food supply. As in Mexico, the roasted fleshy leaves and leaf matrix of the agave were prized as sweet, nourishing food. Tuckaho and other fungi were used for food by the eastern Indians; "tuckaho bread" was well known in the S. The x. Pacific tribes made much use of the sweet inner bark of the hemlock and spruce. Savours, flavours, and condiments, as well as sweets, were valued by the Indian, who was also fond of chewing gum. While salt was tabued by the Onondaga and lve substituted by some of the southern Indians, the former was in general use. In some cases salt was made by the evaporation of the water of salt springs; in other localities it was obtained in crystal form from salt lakes and springs, and commerce in this product was widespread. Chile, which is of Mexican origin, became known throughout the S. W., and saffron, an introduced plant, is still in use there to flavour and colour food, as are also the yellow flowers of the squash vine. Throughout New England and s. E. Canada sugar was produced by the evaporation of maple sap (see Maple sugar); in the S. W. it was derived from the willow and the

agav . In some localities clay was eaten, either alone or mixed with food or taken in connection with wild potatocs to mitigate the griping effect of this acrid tuber. In general, buffalo, the deer family, and fish were the animals most useful for food. Some woodland tribes depended on deer, while the coast and river tribes usually made special use of fish and other products of the waters. Amphibious mammals sustained the Eskimo, while the porcupine is said to have been the chief food animal of the Montagnais. The range of game animals influenced the range of man in America quite as much as the distribution of food plants predetermined his natural diffusion.

Contrary to popular belief, the Indians, as a rule, preferred cooked food. The Eskimo, whose name signifies 'eaters of raw flesh', ate uncooked meat only when absence of fuel prohibited cooking, or as a side dish. Vegetal food especially requires the agency of fire to render it fit for human digestion, whereas animal food may be consumed in a raw state, eertain parts, as the liver, often being eaten in this way. All the edible portions of the animal were put to use, and in many cases both animal and vegetal substances advanced toward putrefaction were preferred, as salmon eggs which were stored in sand, by the Alaskans, and immature corn in the ear, which the Hurons are said to have soaked in water until it became putrid, when soup was made of it.

Among the Pueblo Indians cooking is carried to a remarkable degree of proficiency, approaching in variety and methods the art among civilized peoples. Most tribes knew how to prepare savoury and nourishing dishes, some of which have been adopted by civilized peoples. The methods of cooking among the meat-eating tribes were, in order of importance, broiling, roasting, and boiling, the last-named process often being that known as "stone boiling." The tribes whose diet was approximately vegetarian practised all the methods.

The preparation of maize as food involved almost numberless processes, varying with the tribes. In general, when maize reached the edible stage the ears were roasted in pit ovens, and after the feasting the surplus of roasted ears was dried for future use. The mature grain was milled raw or parched, the meal entering into various mushes, eakes, pones, wafers and other bread. The grain was soaked in lye obtained from wood ashes to

remove the horny envelope and was then boiled, forming hominy; this in turn was often dried, parched and ground, reparched and reground, making a concentrated food of great nourishing power in small bulk, which was consumed dry or in water as gruel. Pinole, consisting of ground parched corn, forms the favorite food of S. W. desert tribes. The fermentation of corn to make beer was not generally practised, and it is doubtful if the process was known in America before the discovery. A yeast formed by chewing corn has long been known to the Zuñi and Hopi, at least, and the former know how to preserve it through the agency of salt.

The Iroquois and other eastern tribes cooked maize with beans, meat, or vegetables. The Pueblos add wood-ash lye to their "paper bread," and prepare their bread and mushes with meat, greens, or oily seeds and nuts, besides using condiments, especially chile.

Vegetal food stuffs were preserved by drying, and among the less sedentary tribes were strung or tied in bundles for facility of transportation or storage. The preservation of maize, mesquite beans, acorns, etc., gave rise to granaries and other storage devices. Animal food, from its perishable character, was often dried or frozen, but at times was preserved by smoking. Dried meat was sometimes pulverized and mixed with berries, grease, etc., forming penimican (q. v.), valued for use on journeys on account of its keeping properties. Fruits were pulped and dried or preservation. Nuts were often ground before being stored, as were also maize, grass seeds, and the legumes. Tubers were frequently stored in the ground or near the fireplace; the Virginian tribes preserved tubers for winter use in this way.

Infusions of leaves, roots, etc., of various herbs were drunk by the Indians as medicine, but no stimulating beverage of the character of tea or coffee has been observed. Drinks made from fruit, as eider from manzanita berries, used by the tribes of California, and a beverage made from cretus fruit by the Pima and neighbouring tribes of Arizona, are the fermented beverages best known.

(W. H.)

Fortification and Defence. The simplest defences were furnished to the Indians by nature. In the forest regions battles were fought in the shelter of trees, and in stony sections from sheltering rocks. That war was waged and defensive measures were necessary in prehistoric times is shown by the remains of fortifications in the mound area of the United States. These are of different types, the most common being the so-called hill forts, where defensive walls of earth or stone surround a peak or hilltop or skirt a bluff headland, as at Fort Ancient, Ohio are also circular, square, octagonal, and other inclosures on the lowlands which are generally supposed to have been built for defensive purposes, but they could hardly have been effectual unless stockaded. There are, or were until recently, earthen embankments and inclosures in New York which, as Squier has shown, mark the sites of palisaded forts similar to those of the Iroqueis observed by Champlain and Cartier. These were often polygonal, of double or triple stockades, as that at Hochelaga which Cartier says was of "three courses of rampires, one within another." Some were strengthened by braces and had beams running round them near the top, where stones and other missiles were placed ready to be hurled upon besiegers.

The walls of some of these fortifications were 20 ft. high. One of the polygonal forts in w. New York, however, was overlooked by a hill from which arrows could easily be shot into the inclosure. Most of the early figures of these forts represent them as having a single entrance between overlapping ends of the stockade; there is one, however (Underhill, News from America, 1638), which shows two overlappings. When first seen by the whites most of the villages from Florida to the Potomae were protected with surrounding stockades, which are represented in De Bry as single with one opening where the ends overlap. The construction of these surrounding palisades was practically the same, whether they inclosed a single house or 50 houses. In some sections a ditch was usually dug, both within and outside of the palisade. of the forts in s. New England were square, but the circular form generally prevailed (Willoughby in Am. Anthrop., viii, No. 1, 1906). The fortress built by King Philip in the swamp at South Kensington, R.I., consisted of a double row of palisades, flanked by a great abatis, outside of which was a deep ditch. At one corner a gap of the length of one log was left as an entrance, the breastwork here being only 4 or 5 ft. high; and this passage was defended by a well-constructed blockhouse, whilst the ditch was crossed by a single log which served as a bridge. Stockaded villages were also common as far w. as Wisconsin. Stone walls which C. C. Jones considered defensive, have been observed on Stone mt., mt. Yona, and other peaks of N. Georgia. De Soto found strongly fortified villages in his passage through the Gulf states and Arkansas.

Vancouver (Voy., 111, 289, 1798) mentions villages on Kupreanof id., sitnated on the summits of steep, almost inaccessible rocks and fortified with strong platforms of wood haid upon the most elevated part of the rock, which projected at the sides so as to overhang the declivity. At the edge of the platform there was usually a sort of parapet of logs placed one upon another. This type, according to Swanton, was quite common on the N. W. coast. The Skagit tribe, according to Wilkes, combined dwellings and forts, and a similar custom was followed by some of the Haida clans. Wilkes mentions also inclosures 400 ft. long, which were constructed of pickets about 30 ft. long thrust deep into the ground, the interior being divided into roofed lodges. The Ciallam also had a fort of pickets, 150 ft. square, roofed over, and divided into compartments for families. No stockades seem to have been used by the Ntlakvapamuk, but fortresses or fortified houses were at one time in use in a few places. These defences, according to Boas, consisted of logs placed lengthwise on the ground one above another and covered with brush and earth, loopholes being left at places between the logs. According to the same authority, some of the stockades of British Columbia were provided with underground passages as a means of escape. It has been a general custom of the Indians of the Plains, when in danger of being attacked by a superior force, to dig a pit or pits in the loose, generally sandy soil, throwing the earth around the margin to increase the height of the defence, the bank of a creek or a gully being selected when within reach, as defense of one side only was necessary. Native drawings of some of these defences are given by Mooney (17th Rep. B.A.E., * 271-274, 1898.) * *

Fountain. A band of Upper Lillooet, inhabiting, with the Shuswap, the village of Huhilp, on the E. bank of Fraser r., above Lillooet, Brit. Col.; pop. 244 in 1911.—Can. Ind. Aff. 1910, pt. 11, 18, 1911.

French Indians. A term used by early English writers to designate the tribes in the French interest, especially the Abnaki and their congeners on the New England frontier.

French influence. The influence of the French colonists on the Indians began very early. The use of glass beads in barter gave an impetus to the fur trade, and the speedy introduction of other commodities of trade led to long-continued associations with the Iroquoian tribes in particular. The influence of the French missionaries on many of the Indian tribes was marked; for example, the Montagnais and the Huron in the early days. The supply of peltries was increased by furnishing the Indians with firearms, which en-

abled them to travel with impunity and gave them a superiority over the neighbouring tribes which they were not slow to take advantage of; hence almost from the beginning the French settlers and the government of New France came into more or less sympathetic contact with several tribes of the country. This state of affairs arose both from the peaceful efforts of the missionaries and from the desire of the authorities to use the aborigines as a bulwark against the power of the English in North America. To her alliances with the Algonomian tribes of the Great lakes and the region s. and E. of them, including New France and Acadia, France owed in great part her strength on this continent, while on the other hand the confederacy of the Iroquois, the natural enemies of the Algonquian peoples contributed largely to her overthrow. The French character impelled the colonists to see in the Indian a fellow human being, and it is no wonder that the greatest intermixture between the Indian and the European N. of the Mexican boundary, is represented by the mixed-bloods of Canada and the N. W. and their descendants, who form no small element in the population of these regions of civilized America. The French recognized the Indian's pride and prejudices, and won his confidence by respecting his institutions and often sharing in his ceremonies. They ruled while seeming to yield. Least of all did they despise the languages o' the aborigines, as the rich records of the missionaries abundantly prove. The existence of a large number of mixed-bloods able to speak both their own tongue and French was a distinct advantage to the colonists. The relations between the French and the Acadian Indians, as pictured by Lescarbot, were, to use the word of Friederici, "idyllic," though there is doubtl ss some exaggeration in these old accounts.

Several words of French origin crept very early into the Eastern Algonquian tongues, such as Montagnais, Naskapi, and Miemae, and later a corresponding French element is to be found in the Algonquian languages of the region beyond Montreal (Chamberl in in Canad, Indian, Feb., 1891). The Chippewa vocabulary (Carver, Trav., 421, 1778) contains the word kapotewian, 'coat,' which is the French capote, with the Chippewa radical suffix -waian, 'skin.' In a Missisauga vocabulary of 1801 appears napané, 'flour.' The French bon jour.' in the form boju! is now the salutation in several Algonquian dialects. From les aughais

is supposed to be derived the word for 'English' in a number of these languages: Miemac aglaseãoo, Montagnais agaleshu, Nipissing aganesha, formerly angalesha, Chippewa shaganash, Cree akayâsiw, etc. Another example of French influence is the contribution of Canadian French to the Chinook jargon q. v. . There is also a French element in the modern tales and legends of the Indians of the Canadian Northwest and British Columbia, partly due to missionary teaching, partly to the campfires of the trappers, voyageurs, coursurs de bois, etc. In tales of the N. Pacific coast appears 'Shishé Thé (i. e., Jésus Christ, and in some of those of Indians on the E. side of the Rocky mts., 'Mani' i. e., the Virgin Mary . The French are also the subject of many Indian stories from the Atlantic to the Pacific. Among the Abnaki intermixture began very early. With them the term for mixed-blood is malouidit, 'of St.) Malo,' indicative of the source of the fathers in most of these marriages. The wheat introduced from France was termed maloumenal, 'grains of St.) Malo.' In the 17th century the Abnaki called peas wenutsiminar, 'French seeds.' The Micmac term for apple is wenjousoon, 'French cranberry' In the Iroquoian languages an example of French influence is seen in Onontio ('Big Mountain', the term applied by the Mohawk to the kings of France, which seems to translate Montmagny, the name of Champlain's successor as governor of Canada. Another example, noted by Hewitt, is that the Mohawk of Caughnawaga and other settlements on St. Lawrence r. speak far more rapidly than do their brethren on Six Nation res.. Ontario, and they also have a more copious lexicon of modern terms.

Under the leadership of Mgr. de Laval the clergy of New France made strenuous opposition to the sale of liquor to the Indians, and succeeded in getting Colbert to prohibit the traffic; but the necessities of the political schemes of Frontenac and the fact that the Indians turned to the English and Dutch, from whom they could easily procure rum and brandy, caused the reversal of this policy, against the protests of missionaries and the church. To salve their feelings the matter was referred to the Sorbonne and the University of Toulouse, the former pronouncing against the sale of liquor to the Indians, the latter declaring it permissible. Finally a sort of theoretical prohibition but actual toleration of liquor selling resulted.

Consult Parkman (1) Jesuits in North America, (2) Conspiracy of Pontiac, (3) Pioneers of France in the New World, and other works; Jesuit Relations, Thwaites ed., i-lxxiii, 1896-1901.

Friendly Village. The name given by Mackenzie (Voy., 351, 1802) to an Athapascan village, probably of the Takulli, on upper Salmou r., Brit. Col., on account of his kind treatment there.

Furniture. There was little regular furniture among the Indians, as home life was simple and wants were few. The furniture of the tipi differed from that used in the communal dwelling, or the character of the habitation controlled its furnishing. In all classes of habitations seats were generally arranged along the walls. Mats of plaited bark or of woven rushes and skins dressed only on one side were spread as seats, and pillows, formerly having skin eases, were stuffed with feathers, the hair of the deer or elk, in some cases scrapings from the hide, or, as in the S., the long, gray Spanish moss, and used as cushions to sit on. Among some tribes a bearskin was the seat of honour. In the pueblos seats were of stone, or were rectangular stools made from a single block of wood, in addition to a masonry bench extending round o' partly round the room. In N. California stools were circular in form. In the houses of the N. W. coast long settees were placed facing the fire, against the partitions that marked a family's space in the communal dwelling.

In the earth lodge and similar habitations stationary couches, which served as seats by day and as beds by night, were arranged against the walls. These were made by planting in the floor four tall posts on which were supported two shelves, or bunks, of wattled twigs, on which the bedding was placed. Sometimes both shelves were used as beds, but generally the upper one was used for storing the property of the person to whom the compartment belonged. In the lodges of some tribes, hung on a rod fastened across the two front poles, was a reed curtain, which could be rolled up or dropped to give seclusion to the occupant of the berth. Another form of bed consisted of a mat of willows stretched upon a low platform its tapering ends raised and fastened to tripods which formed head and foot boards. The skin of an animal, as the buffalo bull, killed in winter, was trimmed to fit the bed and served as the mattress, on which robes or blankets

were spread as bedding. Pillows such as are described above were used, but in N. California were of wood and were used only in the men's sleeping lodge. Little children occupied cradles which varied in form and ornamentation, but were all constructed on the general plan of a portable box and adapted to the age of the child. Among some tribes a hammock, made by folding a skin about two ropes, was hung between pests and used to swing children to sleep. A crotched stick was thrust slanting into the edge of the fireplace, and from the crotch hung one or more smaller crotched sticks directly over the fire, serving as hooks for kettles in cooking. The household meal was often served on a mat. In the dwellings of the corn-growing Plains Indians the wooden mortar t sed for pounding naize was set at the right of the entrance and held firmly in place by sinking its pointed base well into the earthen floor. In every habitation a suspended pole or rack was placed near the fire for the drying of moccasins or other clothing. In the Pueblo house the mealing trough occupied a corner of the room, and was set at a sufficient distance from the wall to permit the women to kneel comfortably at their work and face the apartment. The trough was of stone and generally contained three metates, varying in coarseness. for hulling, cracking, and mealing the grain. Niches in the walls served as shelves or closets. Utensils varied with the methods of cooking in the different parts of the country; they were baskets, wooden and pottery vessels, and later, metal kettles. Household utensils, for cooking, eating, and drinking, were usually kept in or near the space belonging to the housewife, and consisted of baskets, boxes, platters, and bowls of wood or pottery, spoons of horn, wood, gourd, or pottery, and ladles. Some of the household utensils were ornamented with carving or painting, and not infrequently were treasured as heirlooms. Brooms of coarse grass or twigs were used to sweep the floor, and the wing of a bird served as a brush to keep the central fireplace tidy. The Pueblos tied a bunch of coarse grass near the middle, using the butt end for brushing the hair and the other for sweeping the floor. Some of the Plains and Rocky Mt. tribes used a wooden spadelike imp'ement to remove the snow from the ground about the entrance of the lodge, and the Pueblos employed a similar implement for passing bread in and out of the ovens. The Plains tribes stored their food and other articles in packs made of parffeche and ornamented

with painted designs; for preserving feathers until needed, the Pueblos used wooden receptacles cut from a single stick, usually of cottonwood, and provided with a countersunk lid; on the N. W. coast elaborately carved boxes and rays were made for this purpose.

In the lodges of the Plains tribes the ornamented shields, weapons, saddles, bridles, and various accoutrements were always hung on the posts within the lodge, and gave colour and decorative effect to the otherwise plain interior of the native dwelling. In winter painted or embroidered skins were suspended between the inner circle of posts of the earth lodge and, like an arras, inclosed the space about the fire, adding much to the attractiveness of this picturesque habitation. Among the Eskimo the stone lamp was the essential article of the household. It furnished light and heat and served as a stove for cooking. Such lamps, cut from steatite or basalt, cost much labour, and were handed down from one generation to another.

(A. C. F.)

Fur trade. The fur trade was an important factor in the conquest and settlement of North America by the French and the English. Canada and the great W. and N. W. were long little more to the world than the 'Fur Country." Lahontan (New Voy., 1, 53, 1703) said: "Canada subsists only upon the trade of skins or furs, three-fourths of which come from the people that live around the great lakes." Long before his time the profit to be gained in the fur traffic with distant tribes encouraged adventurers to make their way to the Mississippi and beyond, while the expenses of not a few ambitious attempts to reach Cathay or Cipangu through a N. W. passage to the South sea were met, not out of royal treasuries, but from presents and articles of barter received from the Indians. The various fur and trading companies established for traffic in the regions w. of the Great lakes and in the Hudson Bay country exercised a great influence upon the aborigines by bringing into their habitat a class of men. French, English, and Scotch, who would intermarry with them, thus introducing a mixed-blood element into the population. Manitoba, Minnesota, and Wisconsin in particular owe much of their early development to the trader and the mixed-blood. The proximity of hunting grounds to the settlements beyond the Alleghanies favoured the free hunter and the single trapper, while the remote regions of the N. W. could best be exploited by the fur companies The activity of the free trapper and solitary hunter meant the extermination of the Indian where possible. The method of the great fur companies, which had no dreams of empire over a solid white population, rather favoured amalgamation with the Indians as the best means of exploiting the country in a material way. The French fur companies of early days, the Hudson's Bay Company (for two centuries ruler of the major portion of what is now Canada, the Northwest Company, the American Fur Company, the Missouri Fur Company, the Russian-American Company, the Alaska Commercial Company, and others have influenced the development of civilization in North America. The forts and fur-trading stations of these companies long represented to the Indian tribes the white man and his civilization. That the Hudson's Bay Company abi ndoned its line of forts on the seacoast and went to the Indian hunting grounds, ult mately ta ng pos-ession f the vast inte for of Canada was due largely to the competition of rival full traders, such as the Northwest Company. Intimate contact with Indian tribes was thus forced on, rather than initiated by, the Hudson's Ba Company. The ploneers of the fur trade were the solitary trappers and buyers, whose successors are the free traders on the upper Mackenzie today. They blazed the way for canoe trips, fur brigades, trading posts, and, finally, so thements. It was often at a portage, where there were falls or rapids in a river that the early white trader established himself. At such places afterward sprang up towns whose m nufactures were developed by means of the water power. The Indian village also often became a trading post and is now transformed into a modern city. Portages and paths that were first used by the Indian and afterward by the furit adec are now changed to canals and highways, but other routes used by fur traders are still, in regions of the ar N., only primitive paths. Some, like the grande route from Montreal to the country w. of lake Superior, are followed by white men for summer travel and pleasure. In the N. W. the fur trade followed he course of all large st cams, and in some parts the leading clans derived much of their power from the control of the waterways

The appearance and disappearance of furbearing animals, their retreat from one part of the country to another, influenced the movements o Indian tribes. This is particularly true of the movements of the buffa'o (q. v.), though the decrease of other large game was often the compelling motive of tribal in gration. The hunt of the buffalo led to certain alliances and unions for the season of the chase among tribes of different stocks, a few of which may have become permanent. Thus the Kutenai, Sarsi, Siksika, and Atsina have all hunted together on the plains of the Saskatchewan and the upper Missouri. The occasional and finally complete disappearance of the buffalo from these regions has weighed heavily upon the Ind an tr.bes, the buffalo having been to some of them what the bamboo is to the Malay and the palm to the West African, their chief source of food, fuel, clothing, and shelter. The extermination of the wild buffalo caused the discontinuance of the Kiowa sun dance (Mooney In 17th Rep. B. A. E., 346, 349, 1898) and affected likewise the ceremonies of other tribes. In several tribes the buffalo dane: was an important ceremony and buffalo chiefs seem to have been elected for duty during the hunting season. The importance of the northern hare, whose skin was used to make coats and tipis by certain Indians of the Canadian Northwest, is shown in the designation "Hareskins" for one of the Athapascan tribes (Kawchogottine). The Tsattine, another Athapascan tribe, received their name for a like reason. The Iroquois war against the Neutral Nation was partly due to the growing scarcity of beavers in the Iroquois country. The recent inroads of the whites upon the musk-ox of arctic Canada are having their effect upon the Indian tribes of that region. Bell (Jour. Am. Folk-lore, xvi, 74, 1903) has noted the advance of the free trader on Athabaska r. and ake, giving rise to a barbarous border civilization, like that of the whaler on the shores of Hudson bay and the rancher and miner on the Peace and other mountain streams, which is having its due effect on the natives: "The influx of fur traders into the Mackenzie River region, and even to Great Bear lake, within the last two years, has, I believe, very much altered the character of the northern Indians." The effect upon the Indians of the s. Atlantic region of the coming of the white trader was early noted by Adair and others. Here, too, the trader not infrequently married into the tribe and became an agent in modifying aboriginal culture by the introduction of European ideas and institutions.

Before the advent of the Europeans the fur trade had assumed considerable proportions in various parts of the continent (Mason, Rep. Nat. Mus., 586-589, 1894). In the 16th century the Pecos obtained buffalo skins from the Apache and bartered them again with the Zuñi. The people of Acoma obtained deerskins from the Navaho. The trade between Ottawa r. and Hudson bay was well known to the Jesuit missionavies in the beginning of the 17th century. In the time of Lewis and Clark the Arikara obtained furs from other tribes and bartered them with the whites for various articles, and the Skilloot used to get buffalo skins from tribes on the upper Missouri to barter off with other Indian tribes. The Chilkat proper and the Chilkoot even now act as middlemen in the fur trade between the whites and other Indian tribes. The tribes about the mouth of the Columbia were also middlemen. and their commerce influenced the conditions of their social institutions, making possible, perhaps, slavery, the existence of a class of nobles, certain changes in the status of women, etc. The trade in furs between the Eskimo of Alaska and the peoples of extreme N. E. Asia existed long before the advent of Europeans. At Kotzebue sd. there is still held a summer fair (Nelson in 18th Rep. B. A. E., 229, IS99). Fur-trading voyages are common in this region.

The development of intertribal commerce among the Plains Indians was much stimulated by the hunt of the buffalo and its material rewards. By inducing the natives to trap and hunt the wild animals of the northern portion of the continent on a large scale for the sake of their valuable skins the fur companies stimulated the aboriginal talent in the production and use of snares and other devices, even if they did not improve the morals of the Indians. The introduction of the horse (q. v.) and the gun led to the extermination of the buffalo by Plains Indians and whites. In certain parts of the continent skins were a basis of valueprimitive money. A Kutenai, when he draws a beaver, produces a picture, not of the animal,

but of its cured skin. With the Eskimo of the Yukon, even before the advent of the Russians. the unit of value was "one skin"; that is, the skin of the full-grown land otter, and of late years this has been replaced by the skin of the beaver (Nelson, op. cit., 232). Skins of sea otters, beavers, and other animals were the basis of the wealth, also, of many tribes of the x. Paeific coast, until the practical extermination of some of these species made necessary a new currency, provided in the blankets of the Hudson's Bay Company, which were preferred to most other substitutes that were offered by white men. Toward the interior the beaver skin was the ruling unit, and to-day in some parts such unit is the skin of the muskrat. Among the Kutenai of s. E. British Columbia the word for a quarter of a dollar s khanko muskrat'. English traders reckoned prices in skins and French traders in "plus" (pelus, peaux). Indian: counted their wealth in skins, and in the potlatch of some tribes the skin preceded the blanket as a unit of value in the d'stribution. During the colonial period furs were legal tender in some parts of the country; also at variou times and places during the pioneer occupancy of the W. and N. Altoge her the fur trade may be co-sid-red one of he most impo ant and interesting phases of the intercourse between the Europeans and the North Ameri an Indians.

(A F. C.)

Gachigundae (Gateligu'nda-i 'village always moving to and fro' A Haida town on the N. E. shore o' Alliford bay, Moresby id., Queen Charlotte ids., Brit. Col., occupied by a socially low branch of the Djahni-skwahladagai.—Swanton, Cont. Haida, 279, 1905.

Gado (Gadō'). A Haida town said to have stood on the s. side of De la Beche inlet, Moresby id., Queen Charlotte ids., Brit. Col. Another town of the same name is said to have stood on the E. side of Lyell id., near the town of Hlkia.—Swanton, Cont. Haida, 278, 1905.

Gaedi (Gā-idî, the name of a fish. A Haida town on the N. E. shore of a small inlet just N. E. of Houston inlet, Queen Charlotte ids..

Brit. Col. It belonged to the Tadji-lanas, a band of Ninstints.—Swanton, Cont. Haida, 277, 1905.

Gaesigusket (Ga-isiga's-qleit, 'strait town where no waves come ashore'). A Haida town on Murchison id., at a point opposite Hot Springs id., Queen Charlotte ids., Brit. Col. So named because it fronted on smooth water. It belonged to the Hagilanas of the Ninstints.—Swanton, Cont. Haida, 277, 1905.

Gagihetnas-hadai (G Egihē't-nas:had'ā'i, 'land-otter house people'). Given by Boas (5th Rep. N. W. Tribes Can., 27, 1889) as the name of a subdivision of the Yaku-lanas, a division of the Raven clan of the Haida in Alaska. It is in reality only a house name belonging to that band. The Gagihet (Gagixi't) is a human being who, in native mythology, has been made in ane by land otters.

Gahlinskun (Gāli'nskun, 'high up on a point'). A Haida town x, of cape Ball, on the E. coast of Graham id., Brit. Col., occupied by the Naikun-kegawai. Wark assigned to it 120 people in 9 houses in 1836-41. A se-guang, the name given by him, is said to have been applied to some high land back of the town.— Swanton, Cont. Haida, 280, 1905.

A se guang.—Schoolcraft, Ind. Tribes, v. 489, 1855 after Wark, 1830-41). A-se-quang.—Kane, Wand in N. A., app., 1859 (misprint from Wark). Gāli'nskun.—Swanton, Cont. Haida, 280, 1905.

Gaiagunkun (Gaiega'n, kuw). A Haida town said to have stood near Hot Spring id. Brit. Col.—Swanton, Cont. Haida, 278, 1905.

Galiano Island. A band of the Penelakut (q. v.) who speak a Cowichan dialect, residing in s. E. Vancouver id.; pop. 31 in 1911.—Can. Ind. Aff. 1904. pt. 11, 10, 1911.

Gamgamtelatl. A gens of the Tenaktok, a Kwakiutl tribe.

D'a'mō'amtelat.—Boas in Rep. Nat. Mus., 331, 1895.

Ganadoga. A former Iroquois village on the Canadian shore of lake Ontario, near the site of Toronto.

Ganadoke.—Homann Heirs' map, 1756 Gä-nä'-doque.—Morgan, League Iroq., 473, 1851. Kanada-gerea.—Doc. of 1876 in Doc. Col. Hist. N. Y., xm, 502, 1881.

Ganahadi ('people of Ganak,' an island somewhere near the s. end of Alaska'). A Tlingit division which is said to have moved from below the present town of Por Simpson,

2 GEORGE V., A. 1912

Brit. Col., and to have separated into several branches, of which one settled at Tongas, another at Taku, a third at Chilkat, a fourth at Yakutat, and, according to one informant, a fifth at Klawak.

(J. R. S.)

Gānaxà'di.—Swanton, inf'n, 1904 Gānaxte'di.— Ibid Kanách-ādi.—Krause, Tlinkit Ind., 120, 1885 Kanach-tēdi.—Ibid., 116.

Gandaseteiagon. A Cayuga village existing about 1670 near Port Hope, Ontario, on the shore of lake Ontario.

Ganadatsiagon.—Vaugondy, map (1753), cited in N Y. Doc. Col. Hist., 18, 112, 1855. Ganatschekiagon.
—Frontenac (1673) in Margry, Déc. 1, 233, 1875.
Ganatoheskiagon.—Frontenac (1673) in N. Y. Doc. Col. Hist., 18, 112, 1855 (misprint). Gandaschekiagon.—Frontenac (1674), ibid., 117. Gandaschekiagon.—Shea, note in Charlevoix, New France, 11, 110, 1868.
Gandatsiagon.—Bellin, map, 1755. Gandatskiagon.—Homann Heirs' map, 1756.

Ganeraske. An Iroquois village that stood about 1670 at the mouth of Trent r., Ontario, near the N. E. end of lake Ontario.

Ganaraské.—Bellin, map, 1756. Ganeraské.—Frontenac (1673) in Margry, Déc., 1, 233, 1875. Ganeroske.—Alcedo, Dic. Geog, 11, 183, 1787, Gannaraské.—Denonville (1687) in N. Y. Doc Col. Hist., 1x, 369, 1855. Gonaraske.—Homann Heirs' map, 1756. Puandarosque.—Crepy, map, ca. 1755.

Ganneious. A former Iroquois vi lage on the N. shore of lake Ontario, on the present site of Napanee, Ontario.

Ganciou.—Lotter, map, ac 1770. Gancydoes.—Esnauts and Rapilly, map, 1777. Gancidos.—Alcedo, Dic. Geog. n. 183, 1787. Gancious.—Frontenac (1673) in Margry, Déc., n. 233, 1875. Gancious.—Homann Heirs' map, 1756. Gancousse.—Lahontan (1773), New Yoy, n. 32, 1735. Gancyont.—Parkman, Frontenac, 140, 1883. Ganneious.—Denonville (1687) in N. Y. Doc. Col. Hist., nx, 362, 1855. Gannejouts.—Bellin, map, 1755. Ganneous.—Hennepin, New Discov., 101, 1698. Ganneouse.—Lahontan (1703) quoted by Macauley, N. Y., n, 191, 1829. Gancjou.—

Gaodjaos (Gaodja'os, 'drum village'). A Haida town on the s. shore of Lina id., Bearskin bay, Queen Charlotte ids., Brit. Col., occupied by the Illgaiu-lanas family. It is often referred to in the native stories.—Swanton, Cont. Haida, 279, 1905.

Gao-haidagai ('inlet people'). The name by which the Haida of Masset inlet and of the N. coast of Queen Charlotte ids, generally were known to those farther s. (J. R. S.)

Gasins (Gasi'us, perhaps 'gambling sticks'). A Haida town on the N. w. shore of Lina id., Bearskin bay, Queen Charlotte ids., Brit. Col.; occupied by the family Hlgain-lanas.—Swanton, Cont. Haida, 279, 1905.

Gaspesien (Gaspe is from gachepe, or kéchpi, 'the end.'—Vetromile). A name given by early French writers to a part of the Micmae living about Gaspe bay on the gulf of St. Lawrence, Quebec. Their dialect differs somewhat from that of the other Micmae. They frequently crossed the gulf and made war on the Eskimo and Papinachois. In 1884 the "Micmaes of Gaspe" in Maria tp. numbered 71 persons; pop. 110 in 1911.

(J. M.)

Gaspesians.—Lahontan, New Voy., 1, 230, 1703 (common English form). Gaspesies.—Hennepin, New Discov., map, 1698

Gatga-inans (Gū'tgoīna'ns). A Haida town on Hippa id., Queen Charlotte ids., Brit. Col. It is in possession of the family Do-gitinai.—Swanton, Cont. Haida, 280, 1905.

Crepy, map, ca. 1755.

Gauntlet. See Captives, Ordeals.

Gens. See Clan and Gens.

Gens de la Sapinière (French: 'people of the fir tree'). A numerous tribe formerly living N.N. w. of lake Superior and trading with the English on Hudson bay. Du Lhut, in 1684, endeavoured to draw their trade to the French. They were distinct from the Cree, Chippewa, and Assiniboin, and may have been a part of the Maskegon.—La Chesnaye (1697) in Margry, Déc., vi. 7, 1886.

Gens de Pied (French: 'foot people'). A former band of Assiniboin in 33 lodges w. of Eagle hills, Saskatchewan.—Henry (1808) in Coues, New Light, 11, 494, 1897.

Foot Assinibnines.-Ibid., 523.

Ghost dance. A ceremonial religious dance connected with the messiah doctrine, which originated among the Paviotso in Nevada about 1888, and spread rapidly among other tribes until it numbered among its adherents nearly all the Indians of the Interior basin, from Missouri r. to or beyond the Rockies. The prophet of the religion was a young Paiute Indian, at that time not yet 35 years of age, known among his own people as Wovoka ('Cutter'), and commonly called by the whites Jack Wilson, from having worked in the family of a ranchman named Wilson. Wovoka seems already to have established his reputation as a medicine-man when, about the close of 1888, he was attacked by a dangerous fever. While he was ill an eclipse spread excitement among the Indians, with the re-

sult that Wovoka became delirious and imagined that he had been taken into the spirit world and there received a direct revelation from the Go I of the Indians. Briefly stated. the revelation was to the effect that a new dispensation was close at hand by which the Indians would be restored to their inheritance and reunited with their departed friends, and that they must prepare for the event by practising the songs and dance ceremonies which the prophet gave them. Within a very short time the dance spread to the tribes E. of the mountains, where it became known commouly as the Spirit or Ghost dance. The dancers, men an l women together, held hands and moved slowly around in a circle, facing toward the centre, keeping time to songs that were sung without any instrumental accompaniment. Hypnotic trances were a common feature of the dance. Among the Sioux in Dakota the excitement, aggravated by local grievances, led to an outbreak in the winter of 1890-91. The principal events in this connection were the killing of Sitting Bull, Dec. 15, 1890, and the massacre at Wounded Knee, Dec. 29. The doctrine has now faded out, and the dance exists only as an occasional social function. In the Crow dance of the Chevenne and Arapaho, a later development from the Ghost dance proper, the drum is used, and many of the ordinary tribal dances have incorporated Ghost-dance features, including even the hyprotic trances.

The belief in the coming of a messiah, or deliverer, who shall restore his people to a condition of primitive simplicity a d happiness, is probably as universal as the lauman race, and take on special emphasis among peoples that have been long subjected to alien domination. In some cases the idea seems to have originated from a myth, but a general it may safely be assumed that it springs from a natural human longing. Both the Quichua of Peru and the Aztec of Mexico as well as more cultured races, had elaborate messiali traditions, of which the first Spanish invaders were quick to take advantage, representing themselves as the long-expected restorers of ancient happiness. Within the United States nearly every great tribal movement originated in the teaching of some messianic prophet. This is notably true of the Pontiae conspiracy in 1763-64, and of the combination organized by Tecumseh (q. v.) and his brother, the prophet Tenskwatawa (q. v.), shortly before the War of 1812. Of similar nature in more

recent times is the doctrine formulated on Columbia r. by Smohalla. See Mooney, Ghost Dance Religion, 14th Rep. B. A. E., pt. II 1896. See Dance, Mythology.

(J. M.)

Gitin-gidjats (Gitin-gi' djats, 'servants of the Gitins'). A family of the Eagle clan of the Haida. This family, who are of low social rank and are distributed among the houses of the Gitins of Skidegate, once had a town in connection with the Lana-chandus, on Shingle bay Queen Charlotte ids., Brit. Col., but people of Kloo enslayed so many of them that they gave up their town and independent family organization, entering the different houses of the Gitins as servants.—Swanton, Cont. Haida, 273, 1905.

Gyitingits'ats.—Boas, Twelfth Rep. N.W. Tribes Can., 24, 25, 1898. Gyit'ingyits'ats.—Boas, Fitth Rep., abid., 26, 1889.

Gitinka-lana (Gi'tinq!a-lā'na). A town of the Yagunstlan-langai of the Haida, on the shore of Masset inlet, Brit. Col., where it expands into the inner bay.—Swanton, Cont. Haida, 281, 1905.

Gitins (Gitivus). An important subdivision of the Eagle clan of the Haida. Gitins is a synonym for Eagle clan, and the name of the subdivision would naturally have been Illgaingitinai, but the family was so prominent that, as in a similar case at Masset, it came to be called simply Gitins. This was the subdivision or family that owned the town of Skidegate, Queen Charlotte ids, Brit. Col. It was divided into two principal branches—Naynunshaidagai and Nasagas-haidagai. Subordinate branches were the Lagalaiguahl-lanas and the Gitin-gidjats.—Swanton, Cont. Haida, 273, 1905.

Gyit'i'ns.—Boas, Twelfth Rep. N. W. Tribes Can, 24,

Gituns (Gitans, dialectic variant of Gitins) An important family group of the Haida, living at Masset, Queen Charlotte ids., Brit. Col. Its prominence at Masset, like that of the Gitins at Skidegate, was such that no further designation was used. Two principal subdivisions recognized were the Mamungitunai and the Undlskadjins-gitunai; inferior divisions were the Tees-gitunai and the Sadjugahl-lanas.

(J. R. S.)

Gyit'i'ns.—Boas, 12th Rep. N. W. Tribes Can, 1898 - Kitāns.—Harrison in Proc. and Trans. Roy Soc Can, sec. 11, 125, 1895. Glen-Vowell Band. A band of Kitksan living on the right bank of upper Skeena r., 4 m. above Hazelton, Brit. Col.,; pop. 100 in 1911.—Can. Ind. Aff., 209, 1902; 212, 1904; pt. n, 8, 1911.

Goasila ('north people'). A Wakashan tribe of Smith inlet, Brit, Col., speaking the Kwakiutl subdialect. The gentes are Gyigyilkam, Sisintkae, and Komkyutis. One of their towns is Waitlas. Pop. 48 in 1901; 28 in 1911.

Gua-shil-la,—Kane, Wand, in N. Am., app., 1859.
Guasi'la.—Boas, 6th Rep. N. W. Tribes Can., 53, 1890.
Kwashilla.—Tolmie and Dawson, Vocabs. Brit. Col., 1178, 1881.
Kwasila.—Boas in Bull. Am. Geog. Sor., 226, 1887.
Kwawshela.—Can. Ind. Aff., 1904, pt. 2, 70, 1905.
Kwaw-she-lah.—Can. Ind. Aff., 145, 1879.
Qoasi'la.—Boas in Petermanns Mitt., pt. 5, 131, 1887.
Quatsinas.—Sout in Ind. Aff. Rep., 316, 1868.
Quawshe-lah.—Boas in Bull. Am. Geog. Soc., 226, 1887.
Quoisillas.—Brit. Col. map. 1872.
Quisiillas.—Can. Ind. Aff., 113, 1879.

Goch ('wolf'). The name given by the southern Tlingit to one of the two sides or phratries into which the Tlingit are divided The northern Tlingit call this phratry Chak.

Götc.—Swanton, field notes, 1904, B. A. E. Khanukh.—Dall, Alaska, 414, 1870 (the word for petrel as here used erroneously).

Godbout. A trading station of the Montagnais and Naskapi at the mouth of Godbout r., on the St. Lawrence, Quebec. In 1904 the Indians there numbered 40, the poplation having been stationary for 20 years.

Goggles. Inventions relating to the visor and eyeshade, to reduce the amount of sunlight penetrating the eye. After the long Ar ti winter comes the trying season of the low sim which, glancing over he sn w, and A ctic waters nearly blands the hunter and fisher. At northern peop's wear visors of some kind, but it is not enough that the Eskimo should have his eyes shaded; he must have a device through which the eyes look out of narrow slits or small elliptical holes. Indeed, in many localities the shade and goggles are united. From E. to the farthest W. the Eskimo have succeeded in perfecting such apparatus. The Eskimo and Aleut spend much pains and skill in the manufacture of their goggles. They differ in materials, form. workmanship, method of attachment and amous of foreign acculturation according to locality and exposure. Goggles or eye shades were rarely worn by the Indians. In the Report of the National Museum for 1894 (pp. 281-306, figs. 15-35) this device is well

illustrated. Consult also Boas, Murdoch, Nelson and Turner in the Reports of the Bureau of American Ethnology. In the writings of Arctic explorers also goggles are mentioned (o. t. m.)

Golden Lake. A band of Algonkin occupying a reservation on Golden lake, Bonnechere r., Renfrew co., Ontario; pop. 86 in 1900, 139 in 1911.

Got (Gōt, 'eagle'). One of the two great exogamic phratries or clars of the Haida. A synonym for the term was Gitins, the mean ng of which is uncertain. The Masset dialect made these gōt and Gituns, respectively.

(J. R. S.)

Göt.—Swanton, Cont. Haida, passim, 1905. Koot.— Dawson, Queen Charlotte Ids, 134s, 1880

Government. Government is the basis of the welfare and prosperity of human society. A government is an organic institution formed to secure the establishment of justice by safeguarding rights and enforcing the performance of duties in accordance with the experience and the established customs and rules of conduct of the governed. The superlative measure of justice obtainable by government is found in the care and protection of the young and the aged, the eady assistance rendered to comrades and the unfortunate, the maintenance of peace, the preservation of the equivalency of rights, the recognition of the equality of persons, the liberty of judgment and personal activity, and the substitution of mercy for vengeance in the punishment of erime. Among primitive folk rules of conduct, formulated by common consent or by customs derived from high ancestral usage, are observed, and these are enforced ultimately by corrective punitive measures. But justice is not secured thereby, and so some other method whereby causes in contention may be more promptly adjudicated is devised, and governments are organized.

Among the Indians of North America there are found many planes of culture, every one of which is characterized by widely differing forms of government—from the simplest family group and village community to the most complex confederation of highly organized tribes. In this area there are scores of distinct political governments, all differing widely in degrees of structural complexity. These differences in organization are determined largely by the extent to which the functions of government

are discriminated and by the correlative specialization of organs thus made necessary. For most of the tribes of North America a close study and analysis of the social and political organization are wanting, hence the generalizations possible may as yet be applied safely only to those peoples that have been most carefully studied. However, it may be said in general that kinship, real or fictitious, is the basis of government among the Indians of North America, for the fundamental unit of the social structure are groups of consangu ne kindred, tracing descent of blood through the male or the female line.

The known units of the social and political organization of the North American Indians are the family, the clan or gens, the phrat v. the tribe, and the confederation. Of these the tribe and the confederation are the only units completely organized. The struc'ures of only two or three confederations are known, and that of the Iroquois is the type example. The confederation of tribes was not usual, because the union of several tribes brought together many conflicting interests which could not be adjusted without sacrifices that appeared to overbalance the benefits of permanent confederation, and because statesmanship of the needed breadth and astuteness was usually wanting. Hence tribal government remains as the prevailing type of social organization in this area. In most tribes the military were carefully discriminated from the civil functions. The civil government was lodged in a chosen body of men usually called chiefs, of whom there were commonly several grades. Usually the chiefs were organized in a council exercising legislative, judicial, and executive functions in matters pertaining to the welfare of the tribe. The civil chief was not by virtue of his office a military leader. Among the Iroquois the civil chief in order to go to war had to resign his civil function during his absence on the warpath.

In tribal society every structural unit has, so far as known, the right to hold a council. The obvædira can hold a council, the family can hold a council, and the united ohwachira councils with their officers form the council of the clan or gens. The clan or gens has the right to hold a council. The chiefs of the clans and gentes are the tribal chiefs, who form the tribal council; but on occasions of great emergencies a grand council is held, composed of the chiefs and subchiefs, the matrons and head warriors of the ohwachira, and the

leading men of the tribe. Besides, there is the council of the confederation. So there are family councils, clan councils, gentile councils, tribal councils, and confederation councils, respectively exercising sway in separate and independent jurisdictions.

In some regions nature is so niggard of her bounties to man that sayagery and barbarism had not devised means to enable their sons to dwell there in organized political communities; hence here may be found some of the lowest forms of social organization, if such it may be named. Kroeber says: "In general rudeness of culture the California Indians are scarcely above the Eskimo; and whereas the lack of development of the Eskimo on many sides of their nature is reasonably attributable in part to their difficult and limiting environment, the Indians of California inhabit a country naturally as favourable, it would seem, as might be. If the degree of civilization attained by people depends in any large measure on their habitat, as does not seem likely, it might be concluded from the case of the California Indians that natural advantages were an impediment rather than an incentive to progress" (Univ. Cal. Publ., Am. Archaeol, and Ethnol., II, no. 3, 81, 1904. This question of the effect of environment on the activities and development of peoples is one still requiring much scientific study.

Some of the tribes, like the Five Civilized Tribes, the eastern Cherokee, and the Seneca of New York, have written constitutions patterned largely after European ideas. That of the Seneca is confirmed by the legislature of New York.

J. N. B. H.

Governmental policy. The policy of the several governments* toward the Indians and

The policy and method of administration inaugurated by Sir Wilham Johnson will be found referred to in the article on the Indian Affairs, Dept of The policy as to territorial rights, which recognized that the Indian title was subject to special surrender or treaty, and that the title of the Crown was not unencamb red until the Indian rights had been properly ceded, constantly governed Canadian action. The greater portion of the territory now comprising the Domanion has been ceded by the Indians to the Crown. The important exceptions being Quebec, where a certain state of Indian affairs existed at the time of the conquest and British Columbia which, before Confederation, had followed certain policies with reference to Indians which did not recognize their right to the soil. The tie of sentiment which has led the Indian to consider the King...s his "great father" has also led the Government to adopt a paternal position toward the Indians. They are considered minors in the eye of the law, and their property is administered for them as such. About the year 1830, we notice the first indication of all Government policy of civil-zation and, since then, the hyd ann of all Government administration to Canada has been to render the Indian self-supporting and to excludily win him to complete citizenship. Dut a thorough comprehensin of the Indian nature has led the Canadan Government to Indian nature has led the Canadan Government to

2 GEORGE V., A. 1912

their methods of pursuing it were often at variance, and therefore should not be confused. The policy itself may have been just, equitable, and humane, while the method of carrying it into effect by those to whom this duty was entrusted was sometimes unjust, oppressive, and dishonest. The governments, other than those of the United States and the colonies, which have had control of portions of the territory N. of Mexico are Great Britain, France, Spain, Russia, Denmark, Sweden, and The Netherlands. Although the policy adopted by them in their dealings with the Indians differed in some important respects, all agreed in assuming the right of dominion, based on discovery, without regard to the natives. In all the contests between the European nations regarding their claims to territory in the New World the rights of the Indians nowhere were allowed to intervene. The earliest charters, as those to Raleigh and Gilbert, make no allusion to the natives, while most of those of the 17th century call briefly for their Christianization, and efforts to this end were made to some extent in most of the colonies. The questions of most importance in the relations of the whites with the Indians were those relating to the title to the soil. Although each government insisted on the right of dominion in its acquired territory and that of granting the soil, the rights of the original inhabitants were in but few instances entirely disregarded, though they were necessarily to a considerable extent curtailed (Johnson and Graham's lessee v. McIntosh, S Wheaton, 583 et seq.). The Indians were admitted to be the rightful occupants of the lands, with right of possession over so much as was necessary for their use; yet the policy of the various governments differed in the extent to which the exercise of this right was conceded. While Spain limited it to the lands actually occupied or in use (Recop. de Leyes de los Reynos de las Indias, 1, lib. ii, 1774), the United States usually allowed it to the $lan \frac{d}{e}$ claimed, whenever the boundaries between the different tribes were duly recognized.

It was the usual policy of the United States and other governments, as well as of the colonies, in dealing with the Indians to treat them as tribes. The plan of forming Indian reservations was adopted from the necessity of bringing tribes under the more complete control of the Government and of confining them to definite limits for the better preservation of order, and aimed especially to restrict them to less territory in order that the whites might obtain the use of the residue. This was a most important step in the process of leading the natives to abandon the hunter stage and to depend for their subsistence on agriculture and home industries (see Reservations). The same policy was followed in Canada under both French and English rule, and to some extent by the colonies, and it was inaugurated by the United States in 1786. An incident indicative of one phase of the policy of the colonies in their dealings with and management of the Indians is that Indian captives were held as slaves in some of the colonies, while, under various pretexts, during a period in the history of South Carolina, Indians were forced to submit to the same fate.

Though the brief rule of the Dutch in New York was marked chiefly by an irregular and vacillating policy in their dealings with their Algonquian neighbours, they established a trading post at Albany in 1615 and entered into treaties with the Iroquois that were never broken. In 1664 New Netherlands passed under English control, and the ill-advised English policy relative to the Indians of the northern districts prevailed until 1765, when, through the efforts of Sir William Johnson, a more satisfactory and practical method of dealing with the Indians, especially as to their territorial rights, was adopted.

(A. C. F.)

Grand River Indians. The Iroquois living on Grand r., Ontario. They numbered 3,230 in 1884, 4,050 in 1902, 4,466 in 1911.

Sweke-áka.—Gatschet, Tuscarora MS., B. A. E., 1885 (Tuscarora name)

Grangula (from French grande guarde, 'big mouth'). An Onondaga chief, whose right name was Haaskouan ('His mouth is large'), but who was also known as Otreouati. The governor of Canada equipped an army in 1684

make haste slowly in the matter of wholesale or even individual enfranchisement. It has been deemed not inconsistent with the best interests of the Indians to mannem reservations in which they have special protection. It has thus followed that, up to the present time, the Canadian Government has made no serious mistake by admitting Indians into full citizenship although many of them may be already quite prepared for that condition. The sacredness of obligation entered into between the Indians and the Government has been so fully recognized that there have never been hostilities between the two parties in Canada In the Riel Rebellion of 1885 certain Indians of North Saskatchewan and Alberta, influenced by the Half-breds, went upon the war-pith and committed serious depte butons, but these acts did not arise from any hostility occasioned by the disregard of treaty stipulations. After the country was pacified, these Indians, for a time, did not enoy their full rights under the treaties, but they were gradually readmitted and received no permanent punishment for their overfaces.

to crush the Five Nations because they interfered with French trade. Sickness among the troops having prevented the expedition, Governor de la Barre crossed lake Ontario to offer peace, which he sought to make conditional on the restoration to French merchants of the trade that the Iroquois had diverted to the English. Grangula, representing the Five Nations, replied defiantly that the Iroquois would trade with English or French as they chose, and would continue to treat as enemies French traders who supplied the Miami, Illinois, Shawnce, and other tribes with arms and ammunition to fight them.

Graphic art. With the tribes N. of Mexico the arts that may be comprehended under the term graphic are practically identical with the pictorial arts; that is to say, such as represent persons and things in a manner so realistic that the semblance of the original is not entirely lost. Graphic delineations may be (1) simply pictorial; that is, made to gratify the pictorial or æsthetic impulse or fancy; (2) trivial, intended to excite mirth, as in caricature and the grotesque; (3) simply decorative, serving to embellish the person or object to which they are applied; (4) simply ideographic, standing for ideas to be expressed, recorded, or conveyed; (5) denotive, including personal names and marks of ownership, distinction, direction, enumeration, etc.; and (6) symbolic, representing some religious, totemic, heraldic, or other occult concept. It is manifest, however, that in very many cases there must be uncertainty as to the motives prompting these graphic representations; and the significance attached to them, even where the tribes using them come directly under observation, is often difficult to determine.

The methods of expression in graphic art are extremely varied, but may be classified as follows: (1) Application of colour by means of brushes and hard or soft points or edges, and by developing the form in pulverized pigments; (2) engraving, which is accomplished by scratching and pecking with hard points; (3) indenting and stamping where the surfaces are plastie; (4) tattooing, the introduction of colouring matter into designs pricked or cut in the skin; 50 textile methods, as in weaving, basketry, beadwork, featherwork, and embroidery; and (6) inlaying, as in mosaic, where small bits of coloured material are so set as to form the figures. The figures are drawn in outline simply, or are filled in with

colour or other distinctive surfacing. The elaboration or embellishment of sculptured or modelled figures or images of men and beasts by adding details of anatomy, markings, etc., in colour or by engraving, thus increasing the realism of the representation, comes also within the realm of the graphic as here defined. In recent times, as the result of contact with the whites, much progress has been made by some of the native tribes in the pictorial art; but the purely aboriginal work, although displaying much rude vigour, shows little advance toward the higher phases of the art. Aboriginally, there was little attempt at effective grouping of the subject save as required in decoration, and light and shade and perspective were entirely unknown. Portraiture and landscape belong apparently to much more advanced stages of culture than have been reached by any of the northern tribes. When the delineations are devoted to the presentation of nonsymbolic ideas merely, as in pictography and denotive devices, there is a tendency in frequently recurring use to progressive simplification; the picture as such has no reason to be perpetuated, and this simplification in time reaches a stage where a part takes the place of the whole, or where semblance to the original is entirely lost, the figure becoming the formal sign of an idea. The grap! ie art of the northern tribes, however, shows no very significant progress in this kind of sp cialization, unless modern alphabets, like those of the Micmac, or certain inscriptions of somewhat problematical origin, as the Grave Creek Mound tablet and the Davenport tablet (Farguharson), are considered.

Graphic delineations are most extensively employed by the tribes in pictography examples of which, engraved or painted on rock surfaces, are found in nearly every section of the country. Similar work was executed by many of the tribes on dressed skins, on bireh-bark, and on objects of wood, ivory, bone, horn, and shell. The delineation of life forms in decorative and symbolic art is hardly less universal than in simple pictography, and is especially exemplified in the work of the more advanced peoples, as the pottery of the mound builders and Pueblos, the utensils and the carvings of the tribes of the N. Pacific coast, and ceremonial costumes, and walls and floors of sacred chambers among various tribes. The graphic work of the Eskimo has a peculiar interest, since it seems to have been somewhat recently superposed upon an earlier system in

2 GEORGE V., A. 1912

which simple geometrical figures predominated, and is much more prevalent where these people have been for a long time in contact with the whites, and more especially with the Athapascan and other Indian tribes skilled in graphic work (Hoffman). A special feature of the art of the Eskimo is the engraving of hunting scenes and exploits of various kinds on objects of ivory and bone—works paralleled among the Indian tribes in the S. by such examples as the Thruston tablet (Thruston, Holmes), the Davenport tablet (Farquharson), and the battle and hunting scenes of the Plains tribes (Mallery, Mooney).

Skill in graphic work was highly regarded among many of the tribes, and the artist took particular pride in his work, and when especially successful became in a sense professional. Usually decorative designs were executed without pattern or copy, and with much directness. The most intricate patterns, applied to earthenware vessels and other objects, were not sketched out but were drawn at once, and often with remarkable skill. Among the N. W. Coast tribes, however, patterns were often cut out of cedar bark and the conventional life forms worked in their handsome blankets and capes were drawn out full size on a pattern board. The native artist did not draw directly from nature, but kept in view rather the presentation of the idea, delineating it in the conventional form common to his tribe. He might have been able to produce a portrait, for example, but the desirability of portraiture does not seem to have occurred to him. He might have delineated a species of animal with accuracy, but was apparently content to suggest the particular subject of his thought in a striking and forcible though conventional manner.

Among the numerous authorities to be consulted on this topic are Boas, Cushing, Fewkes, Holmes, Mallery, Mooney, Murdoch, Nelson, J. and M. C. Stevenson, and Turner in Reps. B. A. E.; Boas, Hoffman, Mason, and Niblack in Reps. Nat. Mus.; Dixon, Kroeber, Matthews, Swanton, Wissler, and others in Memoirs and Bulletins Am. Mus. Nat. Hist.; Farquharson in Proc. Davenport Acad. Sci., II, 1877-1880; Grosse, Beginnings of Art, 1897; Haddon, Evolution in Art, 1895; Kroeber in Am. Anthrop., n. s., m, 1901; Moore various memoirs in Jour. Acad. Nat. Sci. Phila., 1894-1905; Schooleraft, Ind. Tribes, I-vi, 1851-57; Thruston, Antiq., 1897; various authors in the ethnological and archæological journals.

(W. H. H.)

Guauaenok. A Kwakiutl tribe living on Drury inlet, Brit. Col. The gentes are Gyigyilkam, Kwakowenok, and Kwikoaenok. Summer villages are Hohopa and Kunstamish. Pop. 46 in 1885.

Guau'aēnoq.—Boas in 6th Rep. N. W. Tribes Can., 55, 1890. Guau'aēnox.—Boas in Rep. Nat. Mus., 331, 1895. Kwauaenoq.—Boas in Bull. Am. Geog. Soc., 228, 1887. Kwā-wa-ai-nuk.—Dawson in Trans. Roy. Soc. Can., sec. 11, 73, 1887. Kwā-wa-a-nuk.—Ibid. Qual-iunough.—Brit. Col. map, 1872. Qual-nu.—Kane, Wand. in N. Am., app., 1859. Quāuaēnoq.—Boas in Petermanns Mitt., pt. 5, 130, 1887.

Guetela ('northern people'). A sept of the true Kwakiutl which formerly formed one tribe with the Komoyue, but separated on account of some quarrel. The clans are Maamtagyila, Kukwakum, Gyeksem, Laalaksentaio, and Sisintlae. They now live a Ft. Rupert, Vancouver id., B.C.

Guë'tela.—Boas in Nat. Mns. Rep., 330, 1895. Kuë'-xâmut.—Ibid. (='fellows of the Kneha').

Guetela. A clan of the Wikeno, a Kwakiutl tribe.—Boas in Nat. Mus. Rep., 330, 1895.

Gueyniotiteshesgue ('four tribes'). A phratry of the Caughnawaga Iroquois.

Guhlga $(G\bar{u}'lga)$. A legendary Haida town on the N. shore of Skidegate inlet, just above the present town of Skidegate, Queen Charlotte ids., Brit. Col., where there are now works for refining dog-fish oil. No native pretends to say what family occupied this town. (J.R.S.

Gü'lga.—Swanton, Cont. Haida, 279, 1905. Quilh-cah.—Deans, Tales from Hidery, 67, 1899.

Gulhlgildjing (Gallgi'ldjiñ, probably 'mussel-chewing town'). A Haida town on the s. shore of Alliford bay, Moresby id., Queen Charlotte ids., Brit. Col. Another name for this place (or for one near it) was Skama. It was occupied by a low social division of the Djahuiskwahladagai.—Swanton, Cont. Haida, 279, 1905.

Sqā'ma.—Ibid. (probably identical with above: 'wo-man's needle case').

Gunakhe. The principal village of the Lakweip, situated on a branch of upper Stikine r., Brit. Col.

Gunaqä'.—Boas, 10th Rep. N. W. Tribes Can, 34

Gunasquamekook ('long gravel ba oining the island'). A former Passamaquoddy village on the site of St. Andrew New Brunswick, on Passamaquoddy bay. The Indians

were dispossessed by the whites and were finally settled at Pleasant Point, Me.—Vetromile, Abnakis, 55, 1866.

Gunghet-haidagai ('Ninstints people'). A part of the Haida living about the s. end of Queen Charlotte ids., Brit. Col. In the Masset dialect their name is Anghethade. The whites formerly called them Ninstints people, from the name by which their chief town was generally known. Their language differs somewhat from that spoken by the Haida farther N. The remnant lives principally at Skidegate.

J. R. S.)

Ängit Häadē.—Harrison in Proc. Royal Soc. Can, sectus, 125, 1895. Cape St. James tribe.—Poole, Queen Charlotte Ids., 195, 1872. Ga'ñxet Xã'-idaga-i.—Swanton, Cont. Haide, 272, 1905. Kunqit.—Swanton, field notes, 1900—1901. Kunxit.—Dawson, Queen Charlotte Ids., 169, 1880 (proper name of the village, Ninstance being the name of the chief).

Gunghet - kegawai (GA'ñxel-që'qawa-i, those born in the Ninstints country'). A subdivision of the Stasaos-kegawai, a division of the Raven clan of the Haida, probably descended from women who had married in the Ninstints country. It is to be distinguished from another and more important division of the same name at Ninstints which belonged to the Eagle clan.—Swanton, Cont. Haida, 270, 1905.

Gunghet-kegawai. A subdivision of the Eagle clan of the Haida, belonging, as the name implies, to one of the Ninstints or Gunghet group. They were sometimes called also Gunghet-gitinai.—Swanton, Cont. Haida, 270, 1905.

Gutgunest-nas-hadai [Gutgunet'st nas:-had'ā'i, 'owl-house people'). Given by Boas (Fifth Rep. N. W. Tribes Can., 26, 1889, as the name of a subdivision of the Yaku-lanas, a division of the Raven clan of the Haida. It is really only a house name belonging to that family.

Gwaeskun (Gwā-iskiin, 'end of island'). Formerly the northernmost Haida town on Queen Charlotte ids., Brit. Col.—It was named from the cape near by and is said to have been owned by the Stustas, but it has long been abandoned.—Swanton, Cont. Haida, 281, 1905.

Gwaidalgaegins (Gwei-dalgu'-igi s. sland that floats along). A former Haida fort belonging to the Kadusgo-kegawai of Kloo. It was near the mountain called Kinggi, famous in native legend, on Queen Charlotte ids., Brit. Col. (J. R. S.)

Gweundus ($Gw\bar{e}A'ndAs$). A subdivision of low social rank of the Hlgahetgitinai, a family of the Eagle clan of the Haida.—Swanton, Cont. Ilaida, 274, 1905.

Gwinwah. A former Niska village on Nass r., Brit. Col.

Gu'nwa.—Swanton, field notes, 1900-01 name obtained from the Haida) Gwinwah.—Dorsey in Am. Antiq, xxx, 281, 1897

Gyagyilakya (G'āg'q dak'a always wanting to ki i people'). A gens of the Tsawatenok, a Kwak'ntl tribe.— Boas in Rep. Nat. Mus., 331—1895

Gyaushk ('gull'). A gens of the Chippewa (q. v.).

Gi-oshk.—Tanner, Narr., 315, 1830. Gyaushk.—Warren in Minn. Hist. Soc Coll., v. 44, 1885.

Gyegyote G''ēg''ō'tē, 'descendants of Gyote'. A subdivision of the Lalauithela, a gens of the Tlatlasikoala.—Boas in Rep. Nat. Mus., 332, 1895.

Gyekolekoa *G'îg'ō'lqEort*. A gens of the Koskimo, a Kwakiutl tribe.—Boas in Rep. Nat. Mus., 329, 1895.

Gyeksem 'chiefs'). The principal gens in the following Kwakiutl tribes and septs: Koskimo. Nakomgyilisala Tlatlasikoala, Nakoaktok, Guetela, Walaskwakiutl, Matilpe, Tenaktak, Hahuamis, and Wiwekae.

G'ē'xsem.—Boas in Rep. Nat. Mus, 329-331, 1895. Gyē'qsem.—Boas in 6th Rep. N. W. Tribes Can, 53-55, 1980.

Gyeksemsanatl G'ë'xsems'anat, 'highest chiefs'). A gens of the Koskimo, a Kwakiutl tribe.—Boas in Rep. Nat. Mus., 329, 1895.

Gyigyekemae G'ī'g' EqEmaē, 'chiefs'). A gens of the Tsawatenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus., 331, 1895.

Gyigyilkam ('those who receive first'). A gens or gentes, having the same name, in the following Kwakiutl tribes and septs: Wikeno, Tlatlasikoala, Goasila, Komoyue sept of the true Kwakiutl, Koeksotenok, Tlauitsis, Nimkish, Awaitlala, Guauaenok, Hahuamis, Wiwekae sept of the Lekwiltok.

G'i'g ilgam.—Beas in Rep. Nat. Mus., 328-331, 1895. Gyi'gyilk am.—Beas in 6th Rep. N. W. Tribes Can., 55, 1890. Gyi'gyilk am.—Bid. Hamalakyauæ.— Beas in Petermanns Mitt., pt. 3, 130, 1887. name of ancester. Gyilaktsaoks (Gyilaxtså'oks, 'people of the canoe planks'). A Tsimshian family living at Kitsalas, on the N. side of Skeena r., Brit. Col.—Boas in Ztschr. f. Ethnol., 232, 1888.

Gyisgahast (Gyisgʻahā'st, 'grass people'). A Nishka division of the Gyispawaduweda clan, living in the town of Kitwinshilk, on Nass r., and a Kitksan division living in the town of Kitzegukla, on Skeena r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49-50, 1895.

Gyiskabenak (Gyisk'ab'Euā'q). A Niska division of the Lakskiyek clan, living in the town of Lakkulzap, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Gyispawaduweda (Gyispawaduw E'da, 'bear'). One of the four Tsimshian clans.—Boas in 10th Rep. N. W. Tribes Can., 49, 50, 1895.

Gyîspētuwe'da. - Boas in 5th Rep., ibid., 9, 1889

Gyitgyigyenik (Gyitqyigyë'nin). A Niska division of the Lakyebo clan, now in the town of Andeguale, on Nass r., Brit, Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Gyitkadok (Gyithk' adó'k'). A Niska division of the Kanhada clan, now living in the town of Lakkulzap, at the mouth of Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Gyitktsaktl (*Gyit\sta\sa'\sill*, 'people of the lake shore'). A subdivision of the Kitzilas living in a village on the s. side of Skeena r., Brit. Col.—Boas in Ztschr. f. Ethnol., 232,

Gyitsaek (Gyits'a'cκ). A Niska division of the Lakskiyek clan living in the town of Kitwinshilk, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Gyitwułnakyel (Gyitwułnaky ē'l). A Niska division of the Lakyebo clan living in the town of Kitlakdamix, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Haaialikyauae (Haai'alik'auaē, 'the shamans'). A gens of the Hahuamis, a Kwakiutl tribe.—Boas in Rep. Nat. Mus., 331, 1895.

Haailakyemae ('the shamans'). A gens of the Kwakiutl proper, found among the Komoyue and Matilpe subdivisions.

Haai'lak'ımaë.—Boas in Rep. Nat. Mus., 330, 1895. Haailakyemaë.—Boas, 6th. Rep. N. W. Tribes Can., 54, 1890.—Haialikyā'ūaë.—Boas in Petermanns Mitt., pt 5, 131, 1887. Lâqsē,—Boas in 6th Rep. N. W. Tribes Can, 54, 1890. Lâ'xsē,—Boas in Rep. Nat. Mus., 330, 1895 (sig. 'going through')

Haanatlenok. ('the archers'). A gens of the Komoyue, a subdivision of the Kwakiutl. Hā'anatēnôx.—Boas in Nat. Mus. Rep., 330, 1895. Hā'anatlēnoq.—Boas, 6th Rep. N. W. Tribes Can., 54, 1890. Hā'natlinō.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Habitations. The habitations of the Indians of Northern America may be classed as community houses (using the term "community" in the sense of comprising more than one family) and single, or family, dwellings, "The house architecture of the northern tribes is of little importance in itself considered; but as an outcome of their social condition and for comparison with that of the southern village Indians, is highly important." (Morgan). The typical community houses, as those of the Iroquois tribes, were 50 to 100 ft. long by 16 to 18 ft. wide, with frame of poles and with sides and triangular roof covered with bark, usually of the elm; the interior was divided into compartments and a smoke hole was left in the roof.

Other forms, some community and others not, are the following: Among the Eskimo. the karmak, or winter residence, for which a pit of the required diameter is dug 5 or 6 ft. deep, with a frame of wood or whalebone, constructed within 2 or 3 ft. above the surface of the ground and covered with a domeshaped roof of poles or whale ribs, turfed and earthed over. Entrance is gained by an underground passageway. The temporary hunting lodge of the Labrador Eskimo was sometimes constructed entirely of the ribs and vertebræ of the whale. Another form of Eskimo dwelling is the hemispherical snow house, or iglu, built of blocks of snow laid in spiral courses. The Kaniagmiut build large permanent houses, called barabara by the Russians, which accommodate 3 or 4 families; these are constructed by digging a square pit 2 ft. deep, the sides of which are lined with planks that are carried to the required height above the surface and roofed with boards, poles or whale ribs, thickly covered with grass; in the roof is a smoke hole, and on the eastern side a door. The Tlingit, Haida, and some other tribes build substantial rectangular houses with sides and ends formed of planks and with the fronts elaborately carved and painted with symbolic figures. Directly in front of the house a totem pole is placed, and

nearby a memorial pole is erected. These houses are sometimes 40 by 100 ft, in the Nootka and Salish region, and are occupied by a number of families. Formerly some of the Haida houses are said to have been built on platforms supported by posts; some of these seen by such early navigators as Vancouver were 25 or 30 ft, above ground, access being had by notched logs serving as ladders.

Consult Boas in Proc. Nat. Mus., xt, 1889; Hrdlicka in Am. Anthrop., v, 385, 1903; vi. 51, 1904; vii, 480, 1905; viii, 39, 1906; De Bry, Brevis Narratio, 1591; Hariot, Virginia, repr. 1874. E.: Boas, Murdoch, Nelson, and Turner for the Eskimo; Dorsey for the Omaha; C. and V. Mindeleff for the Navaho and Pueblos: Fewkes for the Pueblos: Hoffman for the Menominee and Chippewa, (C. T.) etc.

Hachaath. An extinct Nootka tribe which formerly lived on or N. of Barkley sd., Vancouver id.

A-y-charts.—Jewitt, Narr., 120, 1849. Aytch-arts.— Ibid., 37. Hacā'ath.—Boas, 6th Rep. N. W. Tribes Can., 32, 1890. Hatcā'ath.—Ibid., 31.

Haena. A former Haida town on the E. end of Maude id., Skidegate inlet, Queen Charlotte ids., Brit. Col. It is said to have been occupied in very early times by the Djahui--skwahladagai, and in recent years it was reoccupied by the west coast Haida, who desired to be nearer the traders, but, after a comparatively short occupancy, the people moved to Skidegate about 1880. There are said to have been 13 houses, which would indicate a population of about 150.

Khīna Hāadē.—Harrison in Proc and Trans. Roy. Soc. Can., sec. 11, 125, 1895 (Khina = Haena). New Gold Harbour Village.—Dawson, Queen Charlotte 1ds., 1688, 1880. Xa'ina.—Swanton, Cont. Haida, 279, 1995.

Hagi (Xā'yì, said to mean 'striped'). A Haida town on or near the largest of the Bolkus ids., Queen Charlotte ids., Brit. Col. It

derived its name from a reef which, in local mythology, was the first land to appear above the waters of the flood, bearing the ancestress of all the Rayen people upon it. The town was occupied by a Ninstints division of the same name.—Swanton, Cont. Haida, 277, 1905.

Hagi-lanas (Xigi-lā'nas, 'people of striped (?) town'). A subdivision of the Haida, belonging to the Raven chan and occupying the town of Hagi, on Hagi id., Queen Charlotte ids., Brit. Col. From the circumstance attending their supposed origin (see Hagi) the family claimed to be the oldest on the islands, but it is now represented by only two or three individuals. There were two subdivisions, the Huldanggats and the Keda-lanas.—Swanton, Cont. Haida, 268, 1905.

Hagonchenda. A former Iroquois town, probably belonging to the people of Tequenondahi, and situated in 1535 no far from the junction of Jacques Cartier r. with the St. Lawrence. The chief of this town gave a small girl to Cartier on his second voyage, and placed Cartier on his guard against the machinations of the chiefs of the peoples dwelling around Stadacona and elsewhere on the St. Lawrence. For this reason Cartier, in his third voyage, in 1540, gave this chief 2 small boys to learn the language, and also a "cloake of Paris red, which cloake was set with yealow and white buttons of Tinne, and small belles." S e Cartier, Bref. Récit, 67, 1863.(J. N. B. H.)

Hagwilget (Tsimshian: 'well dressed'). The chief village of the Hwotsotenne, on Bulkley r., 3 m. s. E. of Hazelton, Brit. Col.; pop. 500 in 1870, 165 in 1911.

Achwlget.—Horetzky, Canada on Pac., 103, 1874. Ahwilgate.—Dawson in Rep. Geol. Surv. Can., 1879-80, 208, 1881. Hagulget.—Scott in U.S. Ind. Aff. Rep. 1869, 563, 1870. Hagwilget.—Can. Ind. Aff. 1904, pt. 2, 73, 1905. Ha-gwil'-kět.—Henshaw, MS. note, B. A. E., 1887. Tschah.—Morice in Trans. Roy. Soc. Can., map, 1892. Tsitsk.—Can. Ind. Aff., 212, 1902 (Kitksun form).

Hahamatses ('old mats'). A subdivision or sept of the Lekwiltok, a Kwakintl tribe. They received their name because they were the slaves of the Wiwekae sept. Recently they have taken the name of Walitsum, 'the great ones.' Pop. 53 in 1901, 43 in 1904.

Chāchamātses.—Boas in Peternamas Mitt, pt. 5, 131, 1887. H'ah'amatses.—Boas in Bull. Am. Geog. Soc., 230, 1887. Kahk-ah-mah-tsis.—Can. Ind. Aff., 119, 1880. Kakamatsis.—Brit. Col. map., 1872. Qā'-qamātses.—Boas, 6th. Rep. N. W. Tribes Can., 55, 1890. Wā'-lit-sum.—Dawson in Trans. Roy. Soc.

Can., v, sec. II, 65, 1887. Wau-lit-sah-mosk.—Sproat in Can. Ind. Aff., 149, 1879. Waw-lit-sum.—Can. Ind. Aff., 189, 1884. Xā'xamatses.—Boas in Rep. Nat. Mus., 331, 1895.

Hahekolati (Hå'hėqolaL, descendants of Hakolati'). A subdivision of the Lalauitlela, a gens of the Tlatlasikoala (q. v.), a Kwakiutl tribe.—Boas in Rep. Nat. Mus., 332, 1895.

Hahuamis. A Kwakiutl tribe living on Wakeman sd., Brit. Col.; pop. 63 in 1901, the last time they were officially reported. They are divided into three gentes: Gyeksem, Gyigyilkam, and Haaialikyauae.—Boas in Rep. Nat. Mus., 331, 1895.

Ah-knaw-ah-mish.—Can. Ind. Aft., 180, 1884. Ah-knaw-ah-mish.—Ibid., 314, 1892. Ah-wha-mish.—Ibid., 364, 1897. A-kwā-'amish.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65. A-qua-mish.—Kane, Wand. in N. Am., app., 1859. Chachuā'mis.—Boas in Petermanns Mitt., pt. 5, 130, 1887. Ecquamish.—Brit. Col. map, 1872. II'ah'uámis.—Boas in Bull. Am. Geog. Soc., 228, 1887. Haquā'mis.—Boas, 6th Rep. N. W. Tribes Can., 55, 1890. Haxuā'mis.—Boas in Rep. Nat. Mus. 331, 1895.

Haida (Xa'ida, 'people'). The native and popular name for the Indians of the Queen Charlotte ids., Brit. Col., and the s. end of Prince of Wales id., Alaska, comprising the Skittagetan family (q. v.). By the natives themselves the term may be applied generally to any human being or specifically to one speaking the Haida language. Some authors have improperly restricted the application of the term to the Queen Charlotte islanders. calling the Alaskan Haida, Kaigani (q. v.). Several English variants of this word owe their origin to the fact that a suffix usually accompanies it in the native language, making it Hā'dē in one dialect and Haidaga'i in the other.

On the ground of physical characteristics the Haida, Tlingit, and Tsimshian peoples should be grouped together. Language and social organization indicate still closer affinities between the Haida and Tlingit.

According to their own traditions the oldest Haida towns stood on the E. shore, at Naikun and on the broken coast of Moresby id. Later a portion of the people moved to the w. coast, and between 150 and 200 years ago a still larger section, the Kaigani, drove the Tlingit from part of Prince of Wales id. and settled there. Although it is not impossible* that the Queen Charlotte ids. were visited by Spaniards during the 17th century, the first

certain account of their discovery is that by Ensign Juan Perez, in the corvette Santiago, in 1774. He named the N. point of the islands Cabo de Santa Margarita. Bodega and Maurelle visited them the year after. In 1786 La Perouse coasted the shores of the islands, and the following year Capt. Dixon spent more than a month around them, and the islands are named from his vessel, the Queen Charlotte. After that time scores of vessels from England and New England resorted to the coast, principally to trade for furs, in which business the earlier vo agers reaped golden harvests. The most important expeditions, as those of which there is some record, were by Capt. Douglas. Capt. Jos. Ingraham, of Boston, Capt. Etienne Marchand in the French ship Solide, and Capt. Geo. Vancouver, R.N., (Dawson, Queen Charlotte ids., 1880).

The advent of whites was, as usual, disastrous to the natives. They were soon stripped of their valuable furs, and, through smallbox and general immorality, they have been rebeen reduced in the last 60 years to one-tenth of their former strength. A station of the Hudson's Bay Company was long established at Masset, but is now no longer remunerative. At Skidegate there are works for the extraction of dog-fish oil, which furnish employment to the people during much of the year; but in summer all the Indians from this place and Masset go to the mainland to work in salmon canneries. The Masset people also make many canoes of immense cedars to sell to other coast tribes. The Kaigani still occupy 3 towns, but the population of 2 of them, Kasaan and Klinkwan, is inconsiderable. Neighbouring salmon canneries give them work all summer.

Mission stations are maintained by the Metholists at Skidegate, by the Church of England at Masset, and by the Presbyterians at Howkan, Alaska. Nearly all the people are nominally Christians.

The Haida, Tlingit, and Tsiashian were to show greater adaptability to civilization and to display less religious conservatism than many of the tribes farther s. They are generally regarded as superior to them by the white settlers, and they certainly showed themselves such in war and in the arts. Of all peoples of the N. W. coast the Haida were the best carvers, painters, and canoe and house builders, and they still carn considerable money by selling carved objects of wood and slate to traders and tourists. Standing in the tribe depended more on the possession of

[&]quot;No Spaniards reached it before 1774.

property than on ability in war, so that considerable interchange of goods took place and the people became sharp traders. The morals of the people were, however, very loose.

Canoes were to the people of this coast what the horse became to the Plains Indians. They were hollowed out of single logs of cedar, and were sometimes very large. Houses were built of huge cedar beams and planks which were worked out with adzes and wedges made anciently of stone, and put together at great feasts called by the whites by the jargon word "potlatch" (q. v.). Each hous ordinarily had a single carved pole in the middle of the gable end presented to the beach. Often the end posts in front were also carved and the whole house front painted. The dead were placed in mortuary houses, in boxes on carved poles, or sometimes in caves. Shanians were placed after death in small houses built on prominent points along the shore. Among the beliefs of the Ha'da reincarnation held a prominent place.

An estimate of the Haida population made, according to Dawson, by John Wark, between 1836 and 1841 gives a total of 8,328, embracing 1,735 Kaigani and 6,593 Queen Charlotte Islanders. Dawson estimated the number of people on the Queen Charlotte ids in ISSO as between 1,700 and 2,000. An estimate made for the Canadian Department of Indian Affairs in 1888 (Ann. Rep., 317) give 2,500, but the figures were evidently exaggerated, for when a census of Masset, Skidegate, "and Gold Harbour was taken the year after Ann. Rep., 272 it gave only 637. This, however, left out of consideration the people of New Kloo. In 1894 (Ann. Rep., 280), when these were first added to the list, the entire Haida population was found to be 639. The figures for the year following were 593, but from that time showed an increase and stood at 734 in 1902. In 1904, however, they had suffered a sharp decline to 587. Petroff in ISSO-SI reported 788 Kaigani, but this figure may be somewhat too high, since Dall about the same time estimated their number at 300. According to the census of 1890 there were 391, and they are now (1905) estimated at 300. The entire Haida population would thus seem to be about 900.

The Alaskan Haida are called Kaigani. By the Queen Charlotte Islanders they are designated Kets-hade (Q!ēts xā'dē', which probably means 'people of the strait.' The people of Masset inlet and the N. end of Queen Charlotte ids. generally are called by their southern kinsmen Gao-haidagai (Gao xa'-ida-ga-i), 'inlet people,' and those living around the southern point of the group are called Gunghet-haidagai (GA'ñxi-xā'-idAga-i), from the name of one of the most southerly capes in their territory. All of these latter finally settled in the town afterward known to whites as Ninstints, and hence came to be called Ninstints people.

The entire stock is divided into two "sides" or clans—Raven (Hoya" and Eagle (Got)—each of which is subdivided and resubdivided into numerous smaller local groups, as given below. The braces indicate that the families grouped thereunder were related. Theoretically each clan was descended from one woman.

The principal towns known to have been occupied by large bodies of people in comparatively recent times, although not always contemporaneously, are the following, the Kaigani towns being marked with an asterisk: Chaal (on Moresby id.), Cumshewa, Dadens, Gahlinskun, Haena, Illiehung, Howkan,* Kaisun, Kasaan,* Kayung, Kiusta, Klinkwan,* Kloo, Kung, Kweundlas,* Masset, Naikun, Ninstints, Skedans, Skidegate, Sukkwan,* Tigun, Yaku, and Yan. Of these only Howkan, Kasaan, Kayung, Klinkwan, Masset, and Skidegate are now inhabited.

In addition there was formerly an immense number of small towns hardly distinguishable from camps, places that had been occupied as towns at some former time, and mythic or semi-mythic towns. The following

is a partial list of these: Aiodjus, Atana, Atanus, Chaal (on North id.), Chatchini, Chets, Chuga, Chukeu, Dadjingits, Dahua, Daiyu, Djigogiga, Djigua, Djihuagits, Edjao, Gachigundae, Gado, (2 towns), Gaedi, Gaesigusket, Gaiagunkun, Gaodjaos, Gasins, Gatgainans, Gitinkalana, Guhlga, Gulhlgildjing, Gwaeskun, Hagi, Heudao Hlagi, Hlakeguns. Hlgadun, Hlgaedlin, Hlgahet, Hlgai, Hlgaiha, IIlgain, IIligihla-ala, Hlgadun, IIlkia, Illuln, Hotao, Hotdi hoas, Hova-gundla, Huados, Kadadjans, Kadusgo, Kae, Kaidju, Kaidjudal, Kaigani,* Kasta, Katana, Kesa, Ket, Kil-Koagaogit, Koga, Kogalskun, Kostunhana, Kundji, (2 towns), Kungga, Kungielung, Kunhalas, Kunkia, Knulana, Lanadagunga, Lanagahlkehoda, Lanahawa (2 towns), Lanahilduns, Lanas-Inagai (3 towns), Lanaungsuls, Nagus, Sahldungkun, Sakaedigialas, Sgilgi, Sindaskun, Sindatahla, Singa, Skae, Skaito, Skaos, Skena, Skudus, Stlindagwai, Stunhlai, Sulustins Ta, Te, Tlgunghung, Tlhingus, Tohlka, Widja, Yagun, Yaogus, Yastling, Yatza, Youahnoe(?)

Hair dressing. Many tribes had a distinctive mode of cutting and dressing the hair, and the style occasionally suggested the nickname by which the people were called by other tribes, as, for instance, in the case of the Pawnee, who cut the hair close to the head, except a ridge from the forehead to the erown, where the scalp-lock was parted off in a circle, stiffened with fat and paint, made to stand erect, and curved like a horn, hence the name Pawnee, derived from pariki, 'horn.' The same style of shaving the head and roaching the hair was common among eastern and western tribes, who braided and generally hung the scalp-lock with ornaments. The Dakota and other western tribes parted the hair in the middle from the forehead to the nape of the neck, the line, usually painted red, being broken by the circle that separated the scalp-lock, which was always finely plaited, the long hair on each side, braided and wrapped in strips of beaver or otter skin, hanging down in front over the chest. The Nez Percés of Idaho and neighbouring tribes formerly wore the hair long and unconfined, falling loosely over the back and shoulders. In the S. W. among most of the Pueblo men the hair was cut short across the forehead, like a "bang," and knotted behind. The Eskimo wore the hair loose

* * * * * * * * *

The first cutting of the hair was usually attended with religious rites. Among the Kiowa and other southern Plains tribes a lock from the first elipping of the child's hair was tied to the forelock (Mooney). Among many tribes the hair was believed to be closely connected with a person's life. This was true in a religious sense of the scalp-lock. In some of the rituals used when the hair was first gathered up and cut from the crown of a boy's head the teaching was set forth that this lock represents the life of the child, now placed wholly in the control of the mysterious and supernatural power that alone could will his death. The braided lock worn thereafter was a sign of this dedication and belief, and represented the man's life. On it he wore the ornaments that marked his achievements and honours, and for anyone to touch lightly this lock was regarded as a grave insult. As a war trophy the scalp-lock had a double meaning. It indicated the act of the supernatural power that had decreed the death of the man, and it served as tangible proof of the warrior's prowess in wresting it from the enemy. The scalper, however, was not always the killer or the first striker. The latter had the chief credit, and frequently left others to do the killing and scalping. With the Eastern or timber tribes, the scalper was usually the killer, but this was not so often the case among the Plains Indians. The scalp was frequently left on the battle ground as a sacrifice. Among the Dakota a bit of the captured scalp-lock was preserved for a year, during which period the spirit was supposed to linger near; then, when the great death feast was held, the lock was destroyed and the spirit was freed thereby from its earthly ties. There are many beliefs connected with the hair, all of which are interwoven with the idea that it is mysteriously connected with a person's life and fortune. One can be bewi-c'hed and mæle subservient

2 GEORGE V., A. 1912

to the will of a person who becomes possessed of a bit of his hair; consequently combings are usua"y carefully burned. According to Hrdlicka the Pima, after killing an Apache, purified themselves with smoke from the burnt hair of the victim.

Personal joy or grief was manifested by the style of dressing the hair. Young men often spend much time over their locks, friends assisting friends in the toilet. The Pueblo and Plains tribes commonly used a stiff brush of spear grass for combing and dressing the hair, while the Eskimo and the N. W. Coast tribes used combs. A pointed stick served for parting it and painting the line. sticks were often carefully wrought, ornamented with embroidery on the handle, and kept in an embroidered case. Perfumes, as well as oils, were used, and wisps of sweetgrass were concealed in the hair of young men to add to their attractions. * * * (A. C. F.)

Haisla (Xa-islii). One of the three Kwakiutl dialectic divisions, embracing the Kitimat (Haisla proper) and the Kitlope.—Boas in Rep. Nat. Mus., 328, 1895.

Hakouchirmiou (probably misprint for Hakouchiriniou). Mentioned by Dobbs (Hudson Bay, 23, 1744), as a tribe, on or near Bourbon (Nelson) r., Manitoba, at war with the Maskegon. Possibly a division of the Cree or of the Assimiboin.

Halkaiktenok (Ha'lx'aix'tēnôx, 'killer whale'). A division of the Bellabella.—Boas in Rep. Nat. Mus., 328, 1895.

Hamalakyauae. An ancestor of a Nimkish gens, after whom it was sometimes called.

—Boas in Petermanns Mitt., pt. 5, 130, 1887.

Hamanao (Xâmanâô). A gens of the Quatsino tribe of the Kwakiutl, q. v.—Boas in Rep. Nat. Mus., 329, 1895.

Hameyisath (Ha'mēyisath). A sept of the Seshat, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Hamilton Creek. The local name for a body of Salish of Kamloops-Okanagan agency,

Brit. Col.; pop. 38 in 1901 (Can. Ind. Aff. for 1901, pt. 11, 166), after which date the name does not occur.

Hammers. Few implements are of so much importance to primitive men as the stone hammer and the several closely allied formsthe sledge, the maul, and the stone-head club, which may be described here rather than under the caption Clubs. All of these implements are employed, like the ordinary club, in striking blows that stun, break, crush, or drive, the only distinction to be drawn between the hafted hammer and the club being that the one carries the weight chiefly in the extremity or head, which is usually of heavier or harder material than the handle, while the other has the weight distributed along the shaft. Although the several implements comprised in this group have many features in common, they are somewhat clearly differentiated in shape and use. All are made of hard, heavy, tough materials, including stone, bone, ivory, antler, shell, and metal. Some are never hafted, while perhaps nearly all on occasion are used unhafted, one or both hands being employed according to the weight of the implement. Haftings vary with the form and use of the object as well as with the region and the people.

Hammers employed in shaping stone, especially in the more advanced stages of the work, are usually unhafted and are held tightly in the hand for delivering heavy blows, or lightly between the thumb and finger-tips for flaking or peeking. They may be natural pebbles, boulders, or fragments, but by prolonged use they assume definite shapes or are intentionally modified to better fit them for their purpose. Globular and discoidal forms prevail, and the variety employed in pecking and for other light uses often has shallow depressions centrally placed at opposite sides to render the finger hold more secure. The pecking and flaking work is accomplished by strokes with the periphery, which is round or slightly angular in profile to suit the requirements of the particular work.

Hammers intended for breaking, driving, and killing are generally hafted to increase their effectiveness. Sledge hammers, used in mining and quarrying, were usually heavy, often rudely shaped, and the haft was a pliable stick or withe bent around the body of the implement, which was sometimes grooved for the purpose. The fastening was made secure by the application of thougs or rawhide coverings. In the

flint quarries and copper mines great numbers of hammers or sledges were required; indeed, it may be said that in and about the ancient copper mines of McCargol cove, Isle Royale, Mich., there are to be seen tens of thousands of wornout and abandoned sledge heads. In an ancient paint mine in Missouri, recently exposed by the opening of an iron mine, upward of 1,200 rude stone sledges were thrown out by the workmen. Heavy grooved and hafted hammers, resembling somewhat the mining sledges, though much more highly specialized, were in general use among the tribes of the great plains and served an important purpose in breaking up the bones of large game animals, in pounding pemmican, flint, and seeds, in driving tipi pegs, etc. A lighter hammer, usually referred to as a war-club, was, and is, in common use among the western tribes. It is a globular or doubly conical stone, carefully finished and often grooved, the haft being strengthened by binding with rawhide. Closely allied to this weapon is a kind of slung hammer, the roundish stone being held in place at the end of the handle by a covering of rawhide that extends the full length of the haft. These are very effectual implements, and decked with streamers of horsehair and other ornaments have been devoted, at least, in recent years to ceremony and show.

Heavy hammers, often tastefully carved, were and are used by the tribes of the N. W. for driving wedges in splitting wood, for driving piles, and for other heavy work; they are usually called mauls, or pile-drivers. Many of the larger specimens have handles or finger holes carved in the stone, while others are provided with handles of wood. The Eskimo also have hammers for various purposes, made of stone, bone, and ivory, with haftings ingeniously atta hed.

The literature of this topic is voluminous, but much scattered, references to the various kinds of hammers occurring in nearly all works dealing with the archæology and ethnology of N. America. For an extended article on the stone hammer, see McGuire in Am. Anthropologist, IV, no. 4, 1891. (W. H. H.)

Hamtsit (Hámtsīt, 'having food', named from an ancestor). A Bellacoola division at Talio, Brit. Col.—Boas n 7th Rep. N. W. Tribes Can., 3, 1891.

Hanehewedl (Xanexewêr', 'stone by or near the trail'). A village of the Nicola band of the Ntlakyapamuk, near Nicola r., 27 m. above Spence Bridge, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900.

Harpoons. Piercing and retrieving weapons with a moveable head—probably the most ingenious and complicated device invented by the North American aborigines. Before the natives came into contact with the whites, they made harpoons of wood, bone, walrus ivory, shell, stone, sinew, and hide. The several structural parts consisted of the shaft, foreshaft, loose shaft, ice pick, head, hinge, connecting line, assembling line, main line, hand rest, evelet, float, and detachers. Besides these there were a multitude of accessories, such as stools, decoys, ice scoops, and canoes. The technic of every part represented the Indian's best skill in a number of handicraftswood working, bone and ivory earving, chipping and grinding stone; shredding, twisting, and braiding sinew; and dressing hides or floats, canoes, and the toughest possible thongs or lines, and other parts.

There are two quite different varieties of harpoons, based on the shape of the head—the barbed harpoon and the toggle harpoon. The head of the barbed harpoon is attached to the shaft by means of a connecting line tied to the butt or tang of the head. The toggle head is attached to the line or sling by means of a hole bored through the body; the head is driven entirely into the animal, and, toggling under the skin, gives firm hold. These two types merge into each other, and some harpoons possess the characteristics of both.

The parts of a barbed harpoon are:

Head.—Of various materials, the specific characters being the same as those of barbed arrows; they differ in that the tang fits loosely into a socket and is roughened, notched, or pierced for the hingeing or connecting line.

Foreshaft.—That of the harpoon, as compared with the arrow, is heavier, and has a socket in front for the wedge-shaped, conical, or spindle-shaped tang of the head.

Shaft.—Length, from a few inches to many feet; thickness, from one-fourth of an inch to an inch or more; outer end spliced or socketed to the foreshaft; center of gravity furnished with hand rest; inner end pointed, pitted for hook of throwing stick, notched for a bowstring, with or without feathers, or furnished with ice pick.

Connecting line.—Of string or thong rudely tied to head and shaft or, in the finest speci-

mens, attached at one end through a hole in the tang, the other end being bifureated and fastened like a martingale to the ends of the shaft. When the animal is struck by the hurled harpoon the head is withdrawn, the foreshaft sinks by its gravity, and the shaft acts as a drag to impede the progress of the game (see Nat. Mus. Rep. 1900, pl. 11).

The parts of a toggle harpoon are:

Toggle head,—Consisting of body; blade of state, chipped tone, ivory, or metal, usually fitted into a slit in front; line hole or opening through the body for the sling or leader of hide on which the toggle head hinges; line grooves channeled backward from the line hole to protect the leader; barbs projecting backward at the butt of the toggle head to eatch into the flesh and make the head revolve 90 degrees. forming a T with the line; shaft socket, a conoid pit in the butt of the toggle head to receive front end of loose shaft; and leader or sling, not always separate, but when so, either spliced to the main line or joined by an ingenious detacher, which is sometimes prettily carved.

Loose shaft.—A spindle-shaped piece of ivory socketed to toggle head and foreshaft and attached as a hinge to the leader or the foreshaft. Its object is to eatch the strain caused by convulsive movements in the game and to render certain the speedy detachment of the toggle head.

One of the most interesting studies in connection with harpoons is environment in relation to culture—the play between the needy and ingenious man and the resources of game, materials, and tools. In E. Greenland is found the hinged toggle by the side of old forms; in w. Greenland a great variety of types from the very primitive and coarse to those having feathers of ivery and the hooks on the shaft. In the latter area are also throwing sticks of two kinds. On the w. side of Davis strait harpoons are heavy and coarse, showing contact of the natives with whalers, especially the Ungaya Eskimo examples. There also are flat types suggestive of N. Asia. From the Mackenzie River country the harpoons are small and under the influence of the white trader. The harpoons of the Pt. Barrow Eskimo are exhaustively discussed by Murdoch and those from point Barrow southward by Nelson.

From mount St. Elias southward, within the timber belt—where wood is easily obtainable, har oon shafts are longer, but all the parts are educed to their simplest form.—For example,

the Ntlakyapamuk of British C lumbia make the toggle heads of their two-pronged harpoons by neatly lashing the parts toge her and to the sennit leaders. The Makah of Washington formerly made the blade of the head from shell, but now use metal; the leader is tied to a large, painted float of sealskin, the shaft being free. The Quinaielt of Washington have the bifurcated shaft, but no float, The Naltunne of Oregon have a barbed harpoon, with prongs on the blade as well as on the shank, while their cousins, the Hupa of N. California make the toggle, as do the Vancouver tribes, by attaching the parts of the head to a strip of rawhide.

Hata. A Tsawatenok village at the head of Bond sd., Brit. Col.

Hā-tā.—Dawson in Can. Geol. Surv., map, 1888.

Hatchets. These implements, made of iron or steel, and hafted with wood, were an important factor in the colonization of northern America, and the value of the hatchet, as well as that of the axe, was soon recognized by the natives, who obtained these tools through trade. Large numbers of hatchets and axes of both French and English manufacture are obtained from aboriginal dwelling sites. It is not known with certainty ust what aboriginal mplements and weapons were supplanted by the European hatchet, but it probably super-

seded, in large part, the grooved axe, the celt, and probably the tomahawk or war club among tribes that used these implements. So far as can be judged by the forms, the term "hatchet" may be applied with equal propriety to both the hafted axe and the hafted celt, as both were wielded usually with one hand and were equally effectual in war and in the arts of peace. So far as colonial literature refers to the uses of these implements, it would appear that the tomahawk or club, among the eastern tribes, was the weapon of war par excellence, while the axe and the celt were employed more especially in domestic work and for other ordinary industrial purposes (McCulloch). Both the hatchet and the war club doubtless rose on occasion to the dignity of ceremonial objects.

It is clear, not only from the practice of the living tribes and of primitive peoples generally, but from traces of handles remaining on both stone and copper specimens obtained from the mounds, that the celt was hafted after the manner of the hatchet. An interesting group of implements showing that this was the archaic method of hafting celt-like objects, are the monolithic hatchets in which the blade and the handle are carved of a single piece of stone. Several specimens of this type are on record; one, found by Joseph Jones, in Tennessee, is made of greenstone, and is 13½ in. in length; another, from a mound in York district, S. C., now in the U. S. National Museum, is also of greenstone; the third is from Mississippi co., Ark., and is owned by Mr. Morris of that county (Thruston); the fourth, from a mound in Alabama, and now in possession of Mr. C. B. Moore, of Philadelphia, is 11¹2 in. long, of greenstone, and a superb example of native lapidarian work. Specimens of this class are much more numerous in the Bahamas and the West Indies. As all are carefully finished, some bein provided with a perforated knob or projection at the end of the handle for the insertion of a thong, it is probable that they served as mace; or for some other ceremonial use. On the Pacific coast, the stone war club sometimes took the form of a monolithie hatchet (Niblack.)

The combination of the iron hatchet with the tobacco pipe as a single implement, often called the tomahawk pipe, became very general in c-1 nial and later times, and as no counterpart of the device is found in aboriginal art, it was probably devised by the whites as a useful and profitable combination of the symbol of peace and war. To "take up the hatchet" was to declare war, and "to bury the hatchet" was to conclude peace. According to some authors the hatchet pipe was a formidable weapon in war, but in the forms known to-day it is too light and fragile to have taken the place of the stone axe or the iron hatchet. It has passed entirely out of the realm of weapons.

Hawmanao (Xâmanâô). A gens of the Quatsino, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. for 1895, 329.

Health and Disease. There is little evidence to show what diseases prevailed among the Indians N. of Mexico prior to the advent of white people. The traditions of the Indians, the existence among them of elaborate healing rites of undoubtedly ancient origin, their plantlore, in which curative properties are attributed to many vegetal substances, and the presence among them of a numerous class of professed healers, honoured, feared, and usually well paid, would seem to indicate that diseases were not rare, but actual knowledge and even tradition as to their nature are wanting. The condition of the skeletal remains, the testimony of early observers, and the present state of some of the tribes in this regard, warrant the conclusion that on the whole the Indian race wa a comparatively healthy one. It was probably spared at least some of the epidemics and diseases of the Old World, such as smallpox and rachitis, while other scourges, such as tuberculosis, yphilis (pre-Columbian, typhus, cholera, scarlet fever, cancer, etc., were rare, if occurring at all. Taking into consideration the warlike nature of many of the tribes and the evidence presented by their bones (especially the kulls), injuries, etc., particularly those received by offensive weapons, must have been common, although fractures are less frequent than among white people.

At the time of the discovery the Indians on the whole were probably slowly increasing in numbers. Frequent wars, however, had a marked effect in limiting this increase. Since their con act with whites most of the tribes have gradually diminished in strength, while some of the smaller tribes have disappeared entirely. Very few tribes have shown an increase or even maintained their former numbers. The most remarkable example of steady gain is the Navaho tribe. The causes of decrease were the introduction of diseases (particularly smallpox), the spread of alcoholism, syphilis, and especially tuberculosis, destructive wars with the whites, and increased mortality due to changes in the habits of the people through the encroachment of civilization. During recent years a slow augmentation in population has been noticed among a. number of tribes, and as more attention is paid to the hygienic conditions of the Indians, an increase comparable to that in whites may be expe ted in many sections. The least hopeful conditions in this respect prevail among the Dakota and other tribes of the colder northern regions, where pulmonary tuberculosis and serofula are very common.

While preserving much of their robust constitution, the Indians—particularly those of mixed blood—are at present subject to many disorders and diseases known to the whites, although the pure bloods are still free from most of the serious morbid conditions and tendencies due to defective inheritance. They suffer little from insanity, idiocy, and rachitis. Cretinism is exceedingly rare, and general paresis, with a large number of serious nervous affections, has not yet been recorded among them. Diseases of the heart, arteries, and veins, serious affection of the liver and kidneys, as well as typhoid and searlet fever are infrequent. Congenital malformations are very rare, although it is commonly heard among the Indians themselves that they do sometimes occur, but that the afflicted infants are not allowed to live. Fractures, and diseases of the bones in general, as well as dental caries, are less frequent than among the whites. There is considerable doubt whether cancer occurs in any form. Venereal diseases, while predominant among the more degraded Indians, are more or less effectually guarded against by others.

The most common disorders of health now experienced among Indians generally are those of the gastro-intestinal tract, which in infancy are due to improper feeding and particularly to the universal consumption of raw, unripe fruit and vegetables, and in later life to the lack of, or over indulgence in, food, irregular meals, the preference for fat, crudely prepared food, and, recently, the misuse of inferior baking powders and excessive use of coffee. While most of the disorders thus introduced are of a minor character, others, particularly in infants, are frequently fatal. Other more common diseases are various forms o' malaria, bronchitis, pneumonia, pleurisy, and measles in the young Whooping cough is also met with. Inflammation of the conjunctive is common and often leads to ulceration, opacity, and defect in or even total loss of vision. Defective hearing is occasionally found in the aged, and there are rare instances of deaf mutes. Eczema, favus, and acme are among the more ordinary affections of the skin. Tuberculosis of the lungs, and glandular tuberculosis, or scrofula, are frequent in many localities and are especially common among the reservation Indians in the colder parts of the United States, particularly in North Dakota, South Dakota, and Montana, due to their present mode of life. They live in small, insanitary hovels, which in eold weather are ill ventilated, and often overheated and crowded, while their dress is heavier than formerly, their daily life less active, their food changed, and, what is most important, there is complete ignorance of the contagious nature of consumption. Some of these conditions, however, are being gradually bettered.

Goitre is widely distributed, though soldom prevalent; it is found particularly among some bands of the Sioux, and t occurs also with some frequency among the Menominee, Oneida, Crows, and White Mountain Apache. Albinism occurs among a number of the tribes; the eases, however, are quite isolated, except among the Hopi and, to a lesser degree, the Zuñi. In 1903 there were 12 cases of albinism in the former and 4 in the latter tribe, all of the complete variety. Vitiligo is much more scattered but the cases are few. Diseases and functional disturbances peculiar to women, neluding those of the puerperium, are much less common among Indians than among the white women of this country. Of diseases peculiar

to old age, senile arthritis, which affects particularly the spine, and occasional dementia, are found. Senility proceeds slowly in the pureblood Indian, and the number of 'ndividuals above 80 years of age, according to census returns (which, however, should be regarded with caution), is relatively greater than among the whites.

E., 1906; Jesuit Relations, Thwaites ed., I-LNNIC, 1896-1901; Josselyn, New-England's Rarities (1672), repr. 1865; Reports of the Commissioner of Indian Affairs; Report on Indians, Eleventh U. S. Census (1890), 1894; Schooleraft, Indian Tribes, I-v1, 1851-57.

(A. H.)

Hebron. A Moravian E-kimo mission, founded in 1830, on the E. Lab ador coast, lat. 58°.—Hind., Lab Penin.. II, 199, 1863.

Heda-haidagai (Xē'daxā'-idaga-i, 'people living on he low ground'. A subdivision of the Stawas-haidagai, a Haida fam'ly of the Eagle clan; named rom the character of the ground on which their houses—tood in the town of Cumshewa. The town chief belonged to this ubdivision.—Swan on, Cont. Haida, 273, 1905.

Hehametawe $H\bar{e}'ha'm\bar{e}'taw^{\dagger}$, 'descendants of Hametawe). A subdivision of the Laalaksentaio, a Kwakiut' gens.—Boas in Rep. Nat. Mus. for 1895, 332.

Heiltsuk (He'-ilt suq). A dialect of Kwakiutl embracing the Bellabella after whose native name it is called), the China Hat, Somehulitk, Nohunitk, and Wikeno. The number of Indians speaking the dialect was about 500 in 1904

(J. R. S.)

Hekhalanois ($H\bar{\epsilon}_X al\bar{a}' nois$). The ancestor of a Koskimo gens, after whom i was sometimes called.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Helikilika. An ancestor of a g ns of the Nakomgilisala tribe of Kwakiutl.—Boas in Petermanns Mitt., pt. 7, 131, 1887.

Hellelt. A Salish tribe on Chemainus r., s w. Vancouver d., speaking the Cowichan dialect—pop. 28 in 1911.

Hal-alt.—Can. Ind. Aff., 308, 1879. Haltalt.—Ibid., 79, 1878. Hel-alt.—Ibid., 1883, pt. r, 190 Hellal.—

Ibid., 1892, 313. Hel-lalt.—Ibid., 1889, 269. Hel-lelt.—Ibid., 1901, pt. 11, 164. Qalā'Itq.—Boas, MS., B.A.E., 1887.

Helshen ('sandy beach'; lit., 'soft to the foot'). A Squawmish village community on Burrard inlet, Brit. Col.

Helcen. Hill-Tout in Rep. Brit A. A. S., 475, 1900.

Henakyalaso (Hē'nakyalasō). An ancestor of a gens of the Kwakiutl tribe Tlatlasikoala, after whom it was sometimes called.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Heraldry. Among the tribes of the Great plains, and perhaps o other sections, there existed a well-defined system of military and family designation comparable with the heraldic system of Europe. It found its chief expression in the painting and other decoration of the shield and tipi, with the body paint and adornment of the warrior himself, and was guarded by means of religious tabu and other ceremonial regulations. The hera dic tipis, which might number one-tenth of the whole body, usually belonged to prominent families by hereditary descent. The shield belonged to the individual warrior, but several warriors might carry shields of the same origin and pattern at the s me time, while so far as known the heraldic tipi had no con emporary duplicate. Both tipi and shield were claimed as the inspiration of a vision, and the design and decoration were held to be in accordance with the instructions imparted to the first maker by the protecting spirit of his dream. The tipi is commonly named from the most notable feature of the painting, as the 'buffalo tipi,' 'star tipi,' etc. The shield was more often known by the name of the originator and maker of the series, but certain more noted series were known as the 'buffalo shield,' 'bird shield,' 'sun shield,' etc., the 'medicine' or protecting power being believed to come from the buffalo, bird, or sun spirits respectively. Shields of the same origin were usually but not necessarily retained in the possession of members of the family of the original maker, and handed down in time to younger members of the family, unless buried with the owner. A certain price must be paid and certain tabus constantly observed by the owner of either shield or tipi. Thus the heir to a certain heral-'ic tipi in the Kiowa tribe must pay for it a captive taken in war, while those who carried the bird shield were forbidden to approach a dead bird, and were under obligation on killing their first enemy in battle to eat a portion of his heart.

2 GEORGE V., A. 1912

Those of the same shield generally used a similar body paint and head-dress, pony decorations, and war cry, all having direct reference to the spirit of the original vision, but no such regulation appears to have existed in connection with any tipi. The flag carried on the upper Columbia by the followers of the prophet Smohalla is an instance of the adaptation of Indian symbolism to the white man's usage (Mooney in 14th Rep. B. A. E., 1896).

Am ng the Haida and some other tribes of the N. W. coast, according to Swanton and other authorities, is found the germ of a similar system. Here, in many cases, the clan totem, or perhaps the personal manito of the individual, has evolved into a crest which persons of the highest rank, i. e. of greatest wealth, are privileged to figure by carving or painting upon their totem poles, houses, or other belongings. tattooing upon their bodies, or painting upon their bodies in the dance, on payment of a sufficient number of "potlatch" gifts to secure recognition as chiefs or leading members of the The privilege is no hereditary, the successor of the owner, usually his sister's son, being obliged to make the same ceremonial payment to secure the continuance of the privilege. (J. M.)

Heshque. The principal village of the Hesquiat (q. v.), on Hesquiat harbour, Vancouver id.—Can. Ind. Aff., 264, 1902.

Hesquiat. A Nootka tribe on Hesquiat harbour and the coast to the westward, Vancouver id.; pop. 162 in 1901, 139 in 1911. Their principal village is Heshque.

Esquiates.—Jewitt, Narr, 37, 1849. He'ckwiath.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. Heshque-aht.—Can. Ind. Aff., 188, 1883. Hesquiaht.—Ibid, 131, 1879. Hesquiat.—Ibid., pt. 2, 158, 1901. Hishquayaht.—Sproat, Sav. Life, 308, 1868. Hoshque-aht.—Can. Ind. Aff., 186, 1884.

Heudao (*Xe-uda'o*, 'the village that fishes toward the south'). A Haida town of the Kaidju-kegawai on the E. side of Gull pt., Prevost id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 277, 1905.

Hiluys. An unidentified twibe, said to have lived on Laredo channel, Brit. Col., about lat. 52° 30′ (Scott in U. S. Ind. Aff. Rep., 316, 1868). This is in the country of the Kittizoo.

Hlagi $L\bar{a}'gi$). A town of the Kaidjukegawai family of the Haida, on an island near the E. end of Houston Stewart channel, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 277, 1905.

Hlakeguns (Laqë' gAns). A town of the Kuna-lanas on Yagun r., at the head of Masset inlet, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Higadun (Lyada'n, 'suffering from overwork'). A town of the Skidai-lanas on Moresby id., opposite and facing Anthony id., Queen Charlotte group, Brit. Col.—It is prominent in Haida mythology.—Swanton, Cont. Haida, 277, 1905.

Higaedlin (*Lyā'-iĻn*, probably 'where they wash the frames upon which salal berries are dried'). A Haida town occupied by a branch of the Kona-kegawai called Sus-haidagai; situated on the s. side of Tanu id., s. E. Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 278, 1905.

Hlgagilda-kegawai (*Lgayi'lda qē'-gawa-i*, 'those born at Illgagilda, 'i. e., Skidegate). A subdivision of the Hlgaiulanas family of the Haida.—Swanton, Cont. Haida, 269, 1905.

Higahet (Lqū'xet, 'pebble town'.) A former Haida town near Skidegate, Queen Charlotte ids., Brit. Col. It was purchased from its earlier owners, the Kogangas, by a branch of the Yaku-lanas who were afterward known as the Higahetgu-lanas, from the name of their town.

(J. R. S.)

Kil-káit-hādē.—Krause, Tlinkit Indianer, 304, 1885 ('people of Hlgahet'). Tigʻā'it.—Boas, 12th Rep. N. W. Tribes Can, 24, 1898 (misapplied to Old Gold Harbour).

Hlgahet-gitinai (Lgā'xet gitinā'-i, 'Gitins of Pebble-town'). A division of the Eagle clan of the Haida, for which Gitins was a second name. They moved from Illgahet, the old town near Skidegate, to Chaahl on the w. coast, along with other families (see Hlgahetgu-lanas). Originally they and the Gitins of Skidegate constituted one family. The Djahui-hlgahetkegawai, Yaku-gitinai, Hlgahet-kegawai, and Gweundus were subdivisions. (J. R. s.)

Lgā'xet gitinā'-i.—Swanton, Cont. Haida, 274, 1905: Tlg'ā'it gyit'inai'.—Boas, 12th Rep. N. W. Tribes Can., 24, 1898.

Higahetgu-lanas (Loā' xcl-gu-lā'nas, 'people of Pebble-town'). The most important division of the Raven elan of the Haida, on the w. coast of Queen Charlotte ids., Brit. Col. It received its name from an old town near Skidegate, where the people formerly lived. Before this they were part of the Yaku-lanas and lived at Lawn hill, but trouble arising, they were driven away and purchased the

town of Higahet from the Kogangas. Later, another war forced them to move to the w. coast. (J. R. S.)

Lgā'xet-gu-lā'nas.—Swanton, Cont. Haida, 270, 1905. Lth'ait Lennas.—Harrison, in Proc. and Trans. Roy. Soc. Can., sec. II, 125, 1895. Tlg'ā'itgu lā'nas.— Boas, 12th Rep. N. W. Tribes Can., 24, 1898.

Hlgahet-kegawai | Lgā'xet-qā'gawa-i, 'those born at Pebble-town'). A subdivision of the Hlgahet-gitinai, a family of the Eagle clan of the Haida, or only another name for that family.—Swanton, Cont. Haida, 274, 1905.

Higai (Lgā'i). Said to have been the name of a town at the head of Skedans bay, w. coast of the Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 278, 1905.

Hlgaiha (Lga'-ixa, from tgai 'to dig', xa 'to put in'). A semi-legendary Haida town N. of Dead-tree pt., at the entrance of Skidegate inlet, Queen Charlotte ids., Brit. Col. From this place the great Git'ns family of Skidegate is said to have sprung.—Swanton, Cont. Haida, 99, 1905.

Higaiu (Lgāi-n', probably 'place of stones'). A town and eamping place of the Djahuiskwahladagai of the Haida, s. of Dead-tree pt., at the entrance to Skidegate inlet, Queen Charlotte ids., Brit. Col.—One of the names of the town of Skidegate is said to have been derived from this.

(J. R. S.)

Kit-hai-uáss hādē.—Krause, Tlinkit Indianer, 304, 1885 (possibly identical). Lgāi-u'.—Swanton, Cont Haida, 279, 1905.

Higaiu-lanas (Lgai- \bar{u}' $l\bar{u}'$ nas, 'Skidegate town people'). A division of the Raven clan of the Haida who originally owned the town of Skidegate, Brit. Col., and hence came to be called by the Haida name of the town. Later they gave the town to the Gitins in payment for an injury inflicted on one of the latter, and moved to Gaodjaos, farther up the inlet. A subdivision was called Hlgagilda-kegawai.

(J. R. S.)

Łgai-ū' lā'nas.—Swanton, Cont. Haida, 269, 1905-Tlaiyū Hāadē.—Harrison in Proc. and Trans. Roy. Soc. Can., sec. 11, 125, 1895 (erroneously assigned to Old Gold Harbour). Tlgaio lā'nas.—Boas, 12th Rep. N. W. Tribes Can., 24, 1898. Tlqaiu lā'nas.—Boas, 5th Rep. of same, 26, 1889.

Hlgan (LqAn, 'killer-whale's dorsal fin'). A Haida town s. of Tigun, on the w. coast of Graham id., Queen Charlotte group, Brit. Col., occupied by the Dostlan-lnagai. The Koetas are said to have lived at this place before they moved to Alaska, and the town is said to have

been so named on account of a rock which stands up in front of it like the dorsal fin of a killer-whale.

(J. R. S.)

Lgan.—Swanton, Cont. Haida, 280, 1905 Lgan.—Swanton, inf'n, 1905 (another form).

Higihla-ala Lgī'tA ála, probably 'town of the ditches'). A former Haida town N. of cape Ball, E. shore of Graham id., Queen Charlotte group, Brit. Col. It was occupied by the Naikun-kegawai.—Swanton, Cont. Haida, 280, 1905.

Hilelung (Li'elañ). A former Haida town of the Kuna-lanas family on the right bank of a river of the same name (Hi-ellen on Dawson's chart), which flows into Dixon entrance at the foot of Tow hill, N. coast of Queen Charlotte ids., Brit. Col. The town was erroneously thought by Dawson (Queen Charlotte Ids., 165B, 1880) to be the Ne-coon of John Wark.

(J. R. S.)

Hieller.—Deans, Tales from Hidery, 92, 1899 — Ia'gen, —Boas, 12th Rep. N. W. Tribes Can., 23, 1898.—Li'elañ.—Swanton, Cont. Haida, 280, 1905.

Hlielung-keawai (Li'elaŭ që'owa-i, 'those born at the town of Hlielung'—A subdivision of the Stustas, a family of the Eagle clan of the Haida, occupying a town at the mouth of Hiellen (Hlielung) r., Graham id., Queen Charlotte group, Brit. Col.

J. R. S.

Dl'iā'len kēowai'.—Boas, 12th Rep. N. W. Tribes Can., 23, 1898. Li'elañ qē'awa-i.—Swanton, Cont. Haida, 276, 1905. Lthyhellun Kiiwē.—Harrison in Proc. and Trans. Roy. Soc. Can., sec. 11, 125, 1895.

Hlielungkun-Inagai 'Li'clañ kun lungā'-i, 'Li'clañ river point town-people'). A town of the Kuna-lanas, belonging to the Raven clan of the Huida, situated on a river of the same name (called Hiellen on Dawson's map).

(J. R. S.)

Dl'iā'Ien kunilnagai.'—Boas, 12th Rep. N. W. Tribes Can., 23, 1898. Li'elañ kun lnagâ'-1.—Swanton, Cont. Haida, 270, 1905.

Hlielung-stustae (Li'elañ stasta'-i, 'Stustas of Hlielung'). A subdivision of the Stustas, an important family of the Eagle clan of the Haida, occupying the town at the mouth of Hlielung or Hiellen r., Qu en Charlotte ids., Brit. Col. Possibly a synonym of Hileliung-keawai.—Swanton, Cont. Haida, 276, 1905.

Hlimulnaas-hadai (LimA'l na'as xā'-da-i, 'hlimul-skin-house people'). A subdivision of the Salendas, a Haida family of the Eagle clan. They were so called from one of their houses;

hlimu was a name applied to the skins of certain mainland animals.—Swanton, Cont. Haida, 276, 1905

Hingwainaas-hadai (Lingwā'-i na'as xa' dā-i, 'world-house people'). A subdivision of the Aokeawai, a family of the Raven elan of the Haida; probably named from a house.—Swanton, Cont. Haida, 272, 1905.

Hikaonedis (Tlingit: Lqa'onedis, 'people of Lqao river'). A subdivision of the Koetas, a family of the Raven clan of the Haida, living principally in Alaska. They may have received their name from a camping place.—Swanton, Cont. Haida, 272, 1905.

Hikia (Lk!iā', 'chieken-hawk town' or 'sawbill town'). A former Haida town on the outer side of Lyell id., Queen Charlotte ids., Brit. Col. It was occupied by the Kona-kegawai.—Swanton, Cont. Haida, 278, 1905.

Hluln (L²uln). A former Haida town in Naden harbour, Graham id., Queen Charlotte group, Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Hochelaga (dialectic form of Hochelayi, 'at the place of the [beaver] dam'). A former Iroquoian town, strongly palisaded, situated in 1535 on Montreal id., Quebec, about a mile from the mountain first called "Mont Royal" by Cartier. At that time it contained about 50 typical Iroquoian lodges, each 50 or more paces in length and 12 or 15 in breadth, built of wood and covered with very broad strips of bark, neatly and deftly joined. Estimating 12 fires and 24 firesides, each of three persons, to every lodge, the total population would have been about 3,600. The upper portion of the lodges was used for storing eorn, beans, and dried fruits. The inhabitants pounded corn in wooden mortars with pestles and made a paste of the meal, which was moulded into eakes that were cooked on large hot rocks and covered with hot pebbles. They also made many soups of corn, beans, and peas, of which they had a sufficiency. In the lodges were large vessels in which smoked fish was stored for winter use. They were not travellers like those of "Canada" and "Saguenay," although, according to Cartier, "the said Canadians are subject to them with 8 or 9 other peoples along the river? (J. N. B. H.)

Hochelaga.—Cartier (1545), Bref Récit, 9, 1863. Hochelagenses.—De Laet (1633) quoted by Barton, New Views, xlii, 1798 (Latin name of the inhabitants). Ochelaga.—Map (ca. 1543) in Maine Hist Soc. Coll, 1, 354, 1869; Jes. Rel. 1642, 36, 1858. Hochelayi that the place of the [beaver] dam'). A former Iroquoian town, situated in 1535 in a flat country not far from the junction of Jacques Cartier r. with the St. Lawrence, and probably near the present Pt. Platon, Quebec (J. N. n. n.)

Achelaci.—Cartier (1535), Bref Récit, 56a, 1863. Achelacy.—Ibid Achelaty.—Ibid. Achelacy.—Ibid. Hochelal.—Cartier (1535) quoted by Hakluyt, Voy., II, 115, 1889. Hochelay.—Ibid., 129. Ochelay.— Cartier, Bref Récit, op. cit.

Hohopa (Ho-ho-pa). A Koeksotenek village on the w. coast of Baker id., Brit. Col.—Dawson in Trans. Roy. Soc. Can., sec. 2, 73, 1887

Hoindarhonon ('island people').—Hewitt. The Huron name of a tribe subordinate to the Ottawa—Sagard (1632). Canada, iv, cap. 'Nations,' 1866.

Homalko. A Salish tribe on the E. side of Bute inlet, Brit. Col., speaking the Comox dialect; pop. 97 in 1911.

Em-alcom. Can. Ind. Aff. for 1884, 187. Homalco. —Ibid., 1891, map. Homalko.—Ibid., 1901, pt. 11, 158. Qoë'qomadxo.—Boas, MS., B. A. E., 1887.

Homulchison. A Squawmish village community at Capilano er., Burrard inlet, Brit. Col.; the former headquarters of the supremechief of the tribe. Pop. 39 in 1911.

Capalino.—Can. Ind. Aff., 276, 1894. Capitano Creek.—Can. Ind. Aff., 308, 1879. Hōmu'ltcison.— Hill-Tout in Rep. Brit. A. A. S., 475, 1900. Kapilano. —Can. Ind. Aff., 337, 1897.

Hopedale. A Moravian Eskimo mission village on the E. coast of Labrador, established in 1782 (Hind, Lab. Penin., π, 199, 1863). Pop. about 155.

Horses. The first horses seen by the mainland Indians were those of the Spanish invaders of Mexico. A few years later De Soto brought the horse into Florida and westward to the Mississippi, while Coronado, on his march to Quivira in 1541, introduced it to the Indians of the great plains. When the Aztec saw the mounted men of Cortés they supposed horse and man to be one and were greatly alarmed at the strange animal. The classical Centaur owed its origin to a like misconception. A tradition existed among the Pawnee that their ancestors mistook a mule ridden by a man for a single animal and shot at it from concealment, capturing the mule when the man fell.

The horse was a marvel to the Indians and came to be regarled as sacred. For a long

time it was worshipped by the Aztec, and by most of the tribes was considered to have a mysterious or sacred character. Its origin was explained by a number of myths representing horses to have come out of the earth through lakes and springs or from the sun. When Antonio de Espejo visited the Hopi of Arizona in 1583, the Indians spread cotton scarfs or kilts on the ground for the horses to walk on, believing the latter to be sacred. This sacred character is sometimes shown in the names given to the horse, as the Dakota súnka wakan, 'mysterious dog.' Its use in transportation accounts for the term 'dog' of en applied to it, as the Siksika ponokámita. 'elk dog'; Cree mistatim, 'big dog'; Shawnee mishāwā, 'elk.' (See Chamberlain in Am. Ur-Quell, 1894.)

The southern plains proved very favourable and horses greatly multiplied. Stray and escaped horses formed wild herds, and, as they had few carnivorous enemies, their increase and spread were astonishingly rapid. The movement of the horse was from s. to N., at about an equal rate on both sides of the mountains. It moved northward in three ways: (1) The increase of the wild horses and their dispersal into new regions was rapid. (2) For 150 years before the first exploration of the W. by residents of the United States, Spaniards from the Mexican provinces had been making long journeys northward and eastward to trade with the Indians, even, it is said, as far N. as the camps of the Kiowa, when these were living on Tongue r. (3) As soon as the Indians nearest to the Spanish settlements appreciated the uses of the horse, they began to make raiding expeditions to capture horses, and as knowledge of the animal extended, the tribes still farther to the N. began to procure horses from those next s, of them. So it was that tribes in the s. had the first horses and always had the greatest number, while the tribes farthest N. obtained them last and always had fewer of them. Some tribes declare that they possessed horses for some time before they learned the uses to which they could be put.

On the N. Atlantic coast horses were imported early in the 17th century, and the Iroquois possessed them toward the end of that century and were regularly breeding them prior to 1736. For the northern plains they seem to have been first obtained from the region w. o' the Rocky mts., the Siksika having obtained their first horses from the Kutenai,

Shoshoni, and other tribes across the mountains, about the year 1800. W. T. Hamilton. who met the Nez Percés, Cayuse, and other tribes of the Columbia region between 1840 and 1850, tells of the tradition among them of the time when they had no horses; but having learned of their existence in the s., of the purposes for which they were used, and of their abundance, they made up a strong war party, went s. and captured horses. It is impossible offix he dates at which any tribes procured their horses, and, since many of the Plains tribes wandered in small bodies which seldom met, it is likely that some bands acquired the horse a long time before other sections of the same tribe. The Cheyenne relate variously that they procured their first horses from the Arapaho, from the Kiowa, and from the Shoshoni, and all these statements may be true for different bodies. A very definite statement is made that they received their first horses from the Kiowa at the time when the Kiowa lived on Tongue r. The Chevenne did not cross the Missouri until toward the end of the 17th century. For some time they resided on that stream, and their progress in working westward and southwestward to he Black-hills, Powder r., and Tongue r. was slow. They probably did not encounter the Kiowa on Tongue r. long before the middle of the 18th century, and it is possible that the Kiowa did not than possess horses. Black Mocrasin, reputed trustworthy in his knowledge and his dates, declared that the Chevenne obtained horses about 1780. The Pawnee are known to have had horses and to have used them in hunting early in the 18th century. Carver makes no mention of seeing horses among the Sioux that he met in 1767 in w. Minnesota; but in 1776 the elder Alexander Henry saw them among the Assiniboin, while Umfreville a few years later spoke of horses as common, some being branded, showing that they had been taken from Spanish settlements

The possession of the horse had an important influence on the culture of the Indians and speedily changed the mode of life of many tribes. The dog had previously been the Indian's only domestic animal, his companion in the hunt, and to some extent his assistant as a burden bearer, yet not to a very great degree, since the power of the dog to carry or to haul loads was not great. Before they had horses the Indians were footmen, making short journeys and transporting their possessions

mostly on their backs. The hunting Indians possessed an insignificant amount of property, since the quantity that they could carry was small. Now all this was changed. An animal had been found which could carry burdens and drag loads. The Indians soon realised that the possession of such an animal would increase their freedom of movement and enable them to increase their property, since one horse could carry the load of several men. Besides this, it insured a food supply and made the moving of camp easy and swift and long journeys possible. In addition to the use of the horse as a burden bearer and as a means of moving rapidly from place to place, it was used as a medium of exchange.

The introduction of the horse led to new intertribal relations; systematic war parties were sent forth, the purpose of which was the capture of horses. This at once became a recognized industry, followed by the bravest and most energetic young men. Many of the tribes, before they secured horses, obtained guns, which gave them new boldness, and horse and gun soon transformed those who, a generation before, had been timid foot wanderers, to daring and ferocious raiders.

On the plains and in the S. W. horses were frequently used as food, but not ordinarily when other flesh could be obtained, although it is said that the Chiricahua Apache preferred mule meat to any other. It frequently happened that war parties on horse-stealing expeditions killed and ate horses. When this was done the leader of the party was always careful to warn his men to wash themselves thoroughly with sand or mud and water before they went near the enemy's camp. Horses greatly dread the smell of horseflesh or horse fat and will not suffer the approach of anyone smelling of it.

The horse had no uniform value, for obviously no two horses were alike. A war pony or a buffalo horse had a high, an old pack pony a low, value. A rich old man might send fifteen or twenty horses to the tipi of the girl he wished to marry, while a poor young man might send but one. A doctor might charge a fee of one horse or five, according to the patient's means. People paid as they could. Among the Sioux and the Cheyenne the plumage of two eagles used to be regarded as worth a good horse. Forty horses have been given for a medicine pipe.

Indian saddles varied greatly. The old saddle of Moorish type, having the high

peaked pointnel and cantle made of wood or horn covered with raw buffalo hide, was common, and was the kind almost always used by women; but there was another type, low in front and behind, often having a horn, the prong of a deer's antler, for a rope. The Indians rode with a short stirrup—the bareback seat. Today the young Indians ride the cowboy saddle, with the cowboy seat—the long leg. Cowskin pads stuffed with the hair of deer, elk, antelope, buffalo, or mountain sheep were commonly used instead of saddles by some of the tribes in running buffalo or in war, but among a number of tribes the horse was stripped for chasing buffalo and for battle. Some tribes on their horse-stealing expeditions carried with them small empty pads, to be stuffed with grass and used as saddles after the horses had been secured. The Indians of other tribes scorned such luxury and rode the horse naked. reaching home chafed and scarred.

Horse racing, like foot racing, is a favourite amusement, and much property is wagered on these races. The Indians were great jockeys and trained and handled their horses with skill. When visiting another tribe they sometimes took race horses with them and won or lost large sums. The Plains tribes were extremely good horsemen, in war hiding themselves behind the bodies of their monnts so that only a foot and an arm showed, and on occasion giving exhibitions of wonderful daring and skill. During the campaign of 1865 on Powder r., after Gen. Conner's drawn battle with a large force of Arapaho and Cheyenne, an Arapaho rode up and down in front of the command within a few hundred yards, and while his horse was galloping was seen to swing himself down under his horse's neck, come up on the other side, and resume his seat, repeating the feat many times.

The horse was usually killed at the grave of its owner, just as his arms were buried with him, in order that he might be equipped for the journey he was about to take. A number of Plains tribes practised a horse dance. There were songs about horses, and prayers were made in their behalf. On the whole, however, the horse's place in ceremony was only incidental. On the occasion of great gatherings horses were led into the circle of the dancers and there given away, the donor counting a coup as he passed over the gift to the recipient. In modern times the marriage gift sent by a suitor to a girl's family consisted in part of horses. Among some takes of ather gave away

a horse when his son killed his first big game or on other important family occasions. the dances of the soldier-band societies of most tribes 2, 4, or 6 chosen men ride horses during the dance. Their horses are painted, the tails are tied up as for war, hawk or owl feathers are tied to the forelock or tail, and frequently a scalp or something representing it, hangs from the lower jaw. The painting represents wounds received by the rider's horse, or often there is painted the print of a hand on either side of the neck to show that an enemy on foot has been ridden down. In preparing to to go into a formal battle the horse as well as his rider received protective treatment. It was ceremonially painted and adorned, as described above, and certain herbs and medicines were rubbed or blown over it to give it endurance and strength.

Among some of the Plains tribes there was a guild of horse doctors who devoted themselves especially to protecting and healing horses. They doctored horses before going into battle or to the buffalo hunt, so that they should not fall, and doctored those wounded in battle or on the hunt, as well as the men hurt in the hunt. In intertribal horse races they "doctored" in healif of the horses of their 'wn tribe and against those of their rivals.

G. B. G.

Hospitality. Hospitality, distinguished from charity, was a cardinal principle in every Indian tribe. The narratives of many pioneer explorers and settlers, from De Soto and Coronado, Amidas and Barlow, John Smith and the Pilgrims, down to the most recent period, are full of instances of wholesale hospitality toward the white strangers, sometimes at considerable cost to the hosts. Gift dances were a feature in every tribe, and it was no uncommon occurrence on the plains during the summer season for large dancing parties to make the round of the tribes, returning in the course of a month or two with hundreds of ponies given in return for their entertainment. Every ceremonial gathering was made the occasion of the most lavish hospitality, both in feasting and the giving of presents. In some languages there was but one word for both generosity and bravery, and either was a sure avenue to distinction. A notable exemplification of this was the institution of the potlatch (q. v.) among the tribes of the N.W. eoast, by which a man saved for half a lifetime in order to give away

his accumulated wealth in one grand distribution, which would entitle him and his descendants to rank thereafter among the chiefs. In tribes where the clan system prevailed the duty of hospitality and mutual assistance within the clan was inculcated and sacredly observed, anyone feeling at liberty to eall on a fellow-clansman for help in an emergency without thought of refusal. The same obligation existed in the case of formal comradeship between two men. Among the Aleut, according to Venianinoff, the stranger received no invitation on arriving, but decided for himself at which house he chose to be a guest, and was sure to receive there every attention as long as he might stay, with food for the journey on his departure.

On the other hand it cannot be said that the Indian was strictly charitable, in the sense of extending help to those unable to reciprocate either for themselves or for their tribes. The life of the savage was precarious at best, and those who had outlived their usefulness were very apt to be neglected, even by their own nearest relatives. Hospitality as between equals was a tribal rule; charity to the help-less depended on the disposition and ability of the individual. (J. M.)

Hotao ($X\delta'(ao)$). A legendary Haida town that is said to have stood on the s. w. coast of Maude id., Queen Charlotte group, Brit. Col. From this place, according to one account, came the ancestress of the Hlgain-lanas.—Swanton, Cont. Haida, 279, 1905.

Hotdjihoas $(X\bar{o}'tdjixoo's)$, 'hair seals at low tide'). A former Haida town on Lyell id., near the N. end of Darwin sd., Queen Charlotte ids., Brit. Col. It was occupied by the Hagi-lanas.—Swanton, Cont. Haida, 277, 1905.

Hotnas-hadai (**ot nas xada'-i, 'box-house people'). Given by Boas (Fifth Rep. N. W. Tribes Can., 27, 1889) as the name of a subdivision of the Yaku-lanas, a family of the Raven clan of the Haida in Alaska. It is in reality only a house name belonging to that family.

(J. R. S.)

Hoya $(X\bar{o}'yo, \text{'raven'})$ in the Skidegate dialect.) One of the two great phratries or clans into which the Haida are divided.

(J. R. S.)

K''oā'ta.—Boas, Fifth and Twelfth Reps. N. W. Tribes Canada, passim (improperly applied; K'oā'la or K'oa'las means simply 'people of another clan'). Yêhl.—Swanton, inf'n, 1900 (name in Masset dialect).

Hoyagundla ($X\bar{o}'ya~qa'nla$, 'raven ereek'). A Haida town on a stream of the same name which flows into Hecate str. a short distance s. of cape Fife, Queen Charlotte ids., Brit. Col. It was occupied by the Djahui-gitinai.—Swanton, Cont. Haida, 280, 1905.

Hoyalas ('the troubled ones'). A Kwakiuth tribe formerly occupying the upper shores of Quatsino sd.; they were exterminated by the Koskimo.

Ho-ya.—Dawson in Trans. Roy. Soc. Can. for 1897, sec. II, 70. Xō'yalas.—Boas in Mem. Am. Mus. Nat. Hist., v. pt. 2, 401, 1902. Xoyā'les.—Boas in Rep. Nat. Mus. for 1895, 332

Huadjinaas-hadai (Xū'Adji na'as xā'da-i, 'people of grizzly-bear house'). A subdivision of the Koetas family of the Kaigani Haida of British Columbia.—Swanton, Cont. Haida, 272 1905.

Huados (Nuadō's, 'standing-water people,' in allusion to the swampy nature of the land around their towns). A division of the Raven clan of the Haida, formerly occupying the E. shore of Graham id., Queen Charlotte group, Brit. Col. Originally they were settled at Naikun, but on account of wars they moved to cape Ball, thence to Skidegate. The Naikunkegawai seem to have been a sort of aristocratic branch of this family. (J. R. S.)

Qua'dōs.—Boas, 12th Rep. N. W. Tribes Canada, 24, 1898. Xuadō's.—Swanton, Cont. Haida, 270, 1905.

Huados. A small Haida town, inhabited by a family bearing the same name, near the town of Hlgihla-ala, N. of cape Ball, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, Haida, 280, 1905.

Huhlip (Huh-ilp, 'on the edge'). A village of the Fountain band of Upper Lillooet, on Fountain er., an E. affluent of upper Fraser r., Brit. Col.—Dawson in Trans. Roy. Soc. Can. for 1891, sec. II, 44.

Huikuayaken. Given as a gens of the Squawmish on Howe sd., Brit. Col.

Xuikuā'yaxēn.—Boas, MS., B.A.E., 1887.

Huldanggats (Naldā'ñgats. 'slaves'). A division of the Hagi-lanas, an important part of the Raven clan among the Ninstints Haida of Queen Charlotte ids., Brit. Col. The native story told to account for their name relates that a chief's wife was once giving these people food, and since they never seemed to have enough, she finally said, "Are you slaves?" The name clung to them ever after. (J. R. S.)

Qaldā'ngasal.—Boas, 12th Rep. N. W. Tribes Canada, 25, 1898. Xaldā'ngats.—Swanton, Cont. Haida, 268, 1905.

Humelsom (Humelsom). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Hunting. The pursuit of game may be divided into two sets of activities, which correspond to military strategy and tactics, the one including the whole series of traps, the other hunting weapons and processes. Beginning with the latter, the following 9 classes embrace all the hunting activities of the American Indians:

- (1) Taking animals with the hand without the aid of apparatus. Examples of this are picking up marine animals on the beach to eat on the spot, robbing birds' nests, and seizing birds on their roosts on dark nights. Such unskilled taking developed the utmost cunning, agility, and strength for pursuing, seizing, climbing, diving, stealing upon, and deceiving, and the same qualities were useful also in the pursuit with weapons. The climax of this first class was the communal game drive, in which a whole band or tribe would surround a herd of animals and coax or force them into a gorge, a corral, or natural cul-de-sac.
- (2) Gathering with devices. To this class of activities belong substitutes for the fingers or palms, such as rakes for drawing or piling up sea food; a sharp stick for getting worms by forcing them out of the ground; nets and scoops for taking animals from the water; also dulls, reatas, and bolas for reaching out and grasping. This class reached its climax in the partnership or communal net used by the Eskimo and other tribes for taking scalandalso small fish.
- (3) The employment of apparatus for striking, bruising, or breaking bones, including stones held in the hands, clubs with grips, and hard objects at the end of a line or handle, like a slung shot. The N. Pacific tribes took great pains with their clubs, carving on them their symbolism.
- (4) Slashing or stabbing with edged weapons. The Indians had little to do with metals and were given almost altogether to the use of stone, bone, reeds, and wood for stabbing and slashing. Both chipped and ground weapons were used, either without a handle, with a grip, or at the end of a shaft. Every Eskimo had a quiver of daggers for use at close quarters, and so had the Indian his side arms. Edged wea-

pons, however, were not so common as the weapons of the next class.

- (5) Hunting with piercing weapons, the most common of all Indian methods of taking animals. The implements include the pointed stick or stone, the lance, the spear, the harpoon, and the arrow (q. v.). Weapons of this class were held in the hand, hurled from the hand, shot from a bow or a blowgun, or slung from the throwing stick. Each of the varieties went through a multitude of transformations, depending on game, materials at hand, the skill of the maker, etc.
- (6) The use of traps, pits, and snares. The Tenankutchin of Alaska capture deer moose, and caribou by means of a brush fence, extended many miles, in which at intervals snares are set; and the same custom was practised by many other tribes in hunting the larger game. The Plains tribes and the ancient Pueblos captured deer, antelope, and wolves by means of pitfalls.
- (7) Capturing game by means of dogs or other hunting animals. Indian tribes, with few exceptions, had no hunting dogs regularly trained to pursue game, but the common dog was very efficient. Fowls of the air, marine animals, and especially carnivorous animals, such as the coyote, by their noises and movements gave the cue which aided the cunning and observant hunter to identify, locate, and follow his game.
- (8) Hunting by means of fire and smoke. In America, as throughout the world, as soon as men came into possession of fire the conquest of the animal kingdom was practically assured. The Indians used smoke to drive the animals out of hiding, torches to dazzle the eyes of deer and to attract fish and birds to their canoes, and firebrands and prairie fires for game drives.
- (9) Taking animals by means of drugs. The bark of walnut root served to asphyxiate fish in fresh-water pools in the Southern states; in other sections soap root and buckeyes were used.

In connection with hunting processes there were accessory activities in which the Indian had to be versed. There were foods to eat and foods tabued, clothing and masks to wear, shelters and hiding places to provide, and not only must the hunter be familiar with ealls, imitations, decoys, whistles, and the like, but acquainted with the appropriate hunting songs, ceremonies, and fetishes, and with formulas for every act in the process, the time for the chase of the various animals, the laws for the

division of game, and the clan names connected with hunting. Besides, there were numberless employments and conveniences associated therewith. In order to use the harpoon it was necessary to have a canoe, and with every method of hunting were connected other employments which taxed the ingenuity of the savage mind. There were also certain activitics which were the result of hunting. Ouestions presented themselves regarding transportation, receptacles, the discrimination of useful species, and the construction of fences. A slight knowledge of anatomy was necessary in order to know where to strike and how to cut up game. All these gave excellent training in perception, skill, and cooperative effort.

Huron (lexically from French huré, 'bristly,' 'bristled,' from hure, 'rough hair' (of the head), head of man or beast, wild boar's head; old French, 'muzzle of the wolf, lion,' etc., 'the scalp,' 'a wig'; Norman French, huré, 'rugged'; Roumanian, hurée, 'rough earth,' and the suffix -on, expressive of depreciation and employed to form nouns referring to persons). The name Huron, frequently with an added epithet, like vilain, 'base,' was in use in France as early as 1358 (La Curne de Sainte-Palaye in Dict. Hist. de l'Ancien Langage Françoise, 1880) as a name expressive of contumely, contempt, and insult, signifying approximately an unkempt person, knave, ruffian, lout, wretch. The peasants who rebelled against the nobility during the captivity of King John in England in 1358 were called both Hurons and Jacques or Jacques bons hommes, the latter signifying approximately 'simpleton Jacks,' and so the term Jacquerie was applied to this revolt of the peasants. But Father Lalemant (Jes. Rel. for 1639, 51, 1858), in attempting to give the origin of the name Huron, says that about 40 years previous to his time, i. e., about 1600, when these people first reached the French trading posts on the St. Lawrence, a French soldier or

sailor, seeing some of these barbarians wearing their hair cropped and roached, gave them the name Hurons, their heads suggesting those of wild boars. Lalemant declares that while what he had advanced concerning the origin of the name was the most authentic, "others attribute it to some other though similar origin." But it certainly does not appear that the rebellious French peasants in 1358, mentioned above, were called Hurons because they had a similar or an identical manner of wearing the hair: for, as has been stated, the name had, long previous to the arrival of the French in America, a well-known derogatory signification in France. So it is quite probable that the name was applied to the Indians in the sense of 'an unkempt person,' 'a bristly savage,' 'a wretch or lout,' 'a ruffian.'

A confederation of 4 highly organized Iroquoian tribes with several small dependent communities, which, when first known in 1615, occupied a limited territory, sometimes called Huronia, around lake Simcoe and s. and E. of Georgian bay, Ontario, According to the Jesuit Relation for 1639 the names of these tribes, which were independent in local affairs only, were the Attignaouantan (Bear people), the Attigneenongnahac (Cord people), the Arendahronon (Rock people), and the Tohonta-'enrat (Atahonta'enrat or Tohonta'enrat, White-eared or Deer people). Two of the dependent peoples were the Bowl people and the Ataronchronon. Later, to escape destruction by the Iroquois, the Wenrohronon, an Iroquoian tribe, in 1639, and the Atontrataronnon, an Algonquian people, in 1644, sought asylum with the Huron confederation. In the Huron tongue the common and general name of this confederation of tribes and dependent peoples was Wendat (Sendat), a designation of doubtful analysis and signification, the most obvious meaning being 'the islanders' or 'dwellers on a peninsula,' According to a definite tradition recorded in the Jesuit Relation for 1639, the era of the formation of this confederation was at that period comparatively recent, at least in so far as the date of membership of the last two tribes mentioned therein is concerned. According to the same authority the Rock people were adopted about 50 years and the Deer people about 30 years (traditional time) previous to 1639, thus carrying back to about 1590 the date of the immigration of the Rock people into the Huron country. The first two principal tribes in 1639, regarding themselves as the original inhabitants of the

land, claimed that they knew with certainty the dwelling places and village sites of their ancestors in the country for a period exceeding 200 years. Having received and adopted the other two into their country and state, they were the more important. Officially and in their councils they addressed each other by the formal political terms 'brother' and 'sister'; they were also the more populous, having incorporated many persons, families, clans, and peoples, who, preserving the name and memory of their own founders, lived among the tribes which adopted them as small dependent communities, maintaining the general name and having the community of certain local rights, and enjoyed the powerful protection and shared with it the community of certain other rights, interests, and obligations of the great Wendat commonwealth.

The provenience and the course of migration of the Rock and Deer tribes to the Huron country appear to furnish a reason for the prevalent but erroneous belief that all the Iroquoian tribes came into this continent from the valley of the lower St. Lawrence. There is presumptive evidence that the Rock and the Deer tribes came into Huronia from the middle and upper St. Lawrence valley, and they appear to have been expelled therefrom by the Iroquois, hence the expulsion of the Rock and the Deer people from lower St. Lawrence valley has been mistaken for the migration of the entire stock from that region.

In his voyages to the St. Lawrence in 1534-43, Jacques Cartier found on the present sites of Quebec and Montreal, and along both banks of this river above the Saguenay on the N. and above Gaspe peninsula on the s. bank, tribes speaking Iroquoian tongues, for there were at least two dialects, a fact well established by the vocabularies which Cartier recorded. Lexical comparison with known Iroquoian dialects indicates that those spoken on the St. Lawrence at that early date were Huron or Wendat. Cartier further learned that these St. Lawrence tribes were in fierce combat with peoples dwelling southward from them, and his hosts complained bitterly of the cruel attacks made on them by their southern foes, whom they called Toudamani (Trudamans or Trudamani) and Agouionda (Oñkhiion'thă' is an Onondaga form), the latter signifying 'those who attack us.' Although he may have recorded the native names as nearly phonetically as he was able, vet the former is not a distant approach to the well-known Tsonnontowanen of the early

French writers, a name which Champlain printed Chouontouarouon (probably written Chonontouaroñon), the name of the Seneca, which was sometimes extended to include the Cavuga and Onondaga as a geographical group. Lescarbot, failing to find in Canada in his time the tongues recorded by Cartier, concluded that "the change of language in Canada" was due "to a destruction of people," and in 1603 he declared (Nova Francia, 170, 1609): "For it is some 8 years since the Iroquois did assemble themselves to the number of 8,000 men, and discomfited all their enemies, whom they surprised in their enclosures:" and (p. 290) "by such surprises the Iroquois, being in number 8,000 men, have heretofore exterminated the Algoumequins, them of Hochelaga, and others bordering upon the great river." So it is probable that the southern foes of the tribes along the St. Lawrence in Cartier's time were the Iroquois tribes anterior to the formation of their historical league, for he was also informed that these Agouionda "doe continually warre one against another"—a condition of affairs which ceased with the formation of the league. Between the time of the last voyage of Cartier to the St. Lawrence, in 1543, and the arrival of Champlain on this river in 1603, nothing definite is known of these tribes and their wars. Champlain found the dwelling places of the tribes discovered by Cartier on the St. Lawrence deserted and the region traversed only rarely by war parties from extra-limital Algonquian tribes which dwelt on the borders of the former territory of the expelled Iroquoian tribes. Against the aforesaid Iroquoian tribes the Iroquois were still waging relentless warfare, which Champlain learned in 1622 had then lasted more than 50 years.

Such was the origin of the confederation of tribes strictly called Hurons by the French and Wendat (Sendat) in their own tongue. But the name Hurons was applied in a general way to the Tionontati, or Tobacco tribe, under the form "Huron du Pétun," and also, although rarely, to the Attiwendaronk in the form "Huron de la Nation Neutre." After the destruction of the Huron or Wendat confederation and the more or less thorough dispersal of the several tribes composing it, the people who, as political units, were originally called Huron and Wendat, ceased to exist. The Tionontati. or Tobacco Tribe, with the few Huron fugitives, received the name "Huron du Pétun" from the French, but they became known to the English as Wendat, corrupted to Yendat,

Guyandotte, and finally to Wyandot. The Jesuit Relation for 1667 says: "The Tionnontatelieronnons of to-day are the same people who heretofore were called the Hurons de la nation du pétun." These were the so-called Tobacco nation, and not the Wendat tribes of the Huron confederation. So the name Huron was employed only after these Laurentian tribes became settled in the region around lake Simeoe and Georgian bay. Champlain and his French contemporaries, after becoming acquainted with the Iroquois tribes of New York, called the Hurons les bons Iroquois, 'the good Iroquois,' to distinguish them from the hostile Iroquois tribes. The Algonquian allies of the French called the Hurons and the Iroquois tribes Nadowek, 'adders,' and Irinkhowek, 'real serpents,' hence 'bitter enemies.' The singular Irinkowi, with the French suffix -ois. has become the familiar "Iroquois." The term Nadowe in various forms (e.g., Nottaway) was applied by the Algonquian tribes generally to all alien and hostile peoples. Champlain also called the Hurons Ochateguin and Charioquois, from the names of prominent chiefs. The Delawares called them Talamatan, while the peoples of the "Neutral Nation" and of the Huron tribes applied to each other the term' Attiwendaronk, literally, 'their speech is awry, but freely, 'they are stammerers,' referring facetiously to the dialectic difference between the tongues of the two peoples.

In 1615 Champlain found all the tribes which he later called Hurons, with the exception of the Wenrohronon and the Atontrataronon, dwelling in Huronia and waging war against the Iroquois tribes in New York. When Cartier explored the St. Lawrence valley, in 1534-43, Iroquoian tribes occupied the N. bank of the river indefinitely northward and from Saguenay r. westward to Georgian bay, with no intrusive alien bands (despite the subsequent but doubtful claim of the Onontchataronon to a former possession of the island of Montreal), and also the s. watershed from Gaspe basin w, to the contiguous territory of the Iroquois confederation on the line of the B. watershed of lake Champlain.

The known names of towns of these Laurentian Iroquois are Araste, Hagonchenda, Hochelaga, Hochelay, Satadin, Stadaeona, Starnatan, Tailla, Teguenondahi, and Tutonaguy. But Cartier, in speaking of the people of Hochelaga, remarks: "Notwithstanding, the said Canadians are subject to them with eight or nine other peoples who are on the said river." All

these towns and villages were abandoned previous to the arrival of Champlain on the St. Lawrence in 1603. Of the towns of the Hurons, Sagard says: "There are about 20 or 25 towns and villages, of which some are not at all shut, nor closed [palisaded], and others are fortified with long pieces of timber in triple ranks, interlaced one with another to the height of a long pike [16 ft.], and re-enforced on the inside with broad, coarse strips of bark, 8 or 9 ft. in height; below there are large trees, with their branches lopped off, laid lengthwise on very short trunks of trees, forked at one end, to keep them in place; then above these stakes and bulwarks there are galleries or platforms, ealled ondagua ('box'), which are furnished with stones to be hurled against an enemy in time of war, and with water to extinguish any fire which might be kindled against them. Persons ascend to these by means of ladders quite poorly made and difficult, which are made of long pieces of timber wrought by many hatchet strokes to hold the foot firm in ascending." Champlain says that these palisades were 35 ft. in height. In accord with the latter authority. Sagard says that these towns were in a measure permanent, and were removed to new sites only when they became too distant from fuel and when their fields, for lack of manuring, became worn out, which occurred every 10, 20, 30, or 40 years, more or less, according to the situation of the country, the richness of the soil, and the distance of the forest, in the middle of which they always built their towns and villages. Champlain says the Hurons planted large quantities of several kinds of corn, which grew finely, squashes, tobacco, many varieties of beans, and sunflowers, and that from the seeds of the last they extracted an oil with which they anointed their heads and employed for various other purposes.

The government of these tribes was vested by law in a definite number of executive officers, called "chiefs" (q. v.) in English, who were chosen by the suffrage of the child-bearing women and organized by law or council decree into councils for legislative and judicial purposes. There were five units in the social and political organization of these tribes, namely, the family, clan, phratry, tribe, and confederation, which severally expressed their will through councils co-ordinate with their several jurisdictions and which made necessary various grades of chiefs in civil affairs. In these communities the civil affairs of government were entirely differentiated from the military, the

former being exercised by civil officers, the latter by military officers. It sometimes happened that the same person performed the one or the other kind of function, but to do so he must temporarily resign his civil authority should it be incumbent on him to engage in military affairs, and when this emergency was past he would resume his civil function or authority.

In almost every family one or more chiefship titles, known by particular names, were hereditary, and there might even be two or three different grades of chiefs therein. But the candidate for the incumbency of any of these dignities was chosen only by the suffrage of the mothers among the women of his family. The selection of the candidate thus made was then submitted for confirmation to the clan council, then to the tribal council, and lastly to the great federal council composed of the accredited delegates from the various allied tribes.

The tribes composing the Hurons recognized and enforced, among others, the rights of ownership and inheritance of property and dignities, of liberty and security of person, in names, of marriage, in personal adornment, of hunting and fishing in specified territory, of precedence in migration and encampment and in the council room, and rights of religion and of the blood feud. They regarded theft, adultery, maining, sorcery with evil intent, treason, and the murder of a kinsman or a cotribesman as crimes which consisted solely in the violation of the rights of a kinsman by blood or adoption, for the alien had no rights which Indian justice and equity recognized, unless by treaty or solemn compact. If an assassination were committed or a solemnly sworn peace with another people violated by the caprice of an individual, it was not the rule to punish directly the guilty person, for this would have been to assume over him a jurisdiction which no one would think of claiming; on the contrary, presents designed to "cover the death" or to restore peace were offered to the aggrieved party by the offender and his kindred. The greatest punishment that could be inflicted on a guilty person by his kindred was to refuse to defend him, thus placing him outside the rights of the blood feud and allowing those whom he had offended the liberty to take vengeance on him, but at their own risk and peril.

The religion of these tribes consisted in the worship of all material objects, the elements

and bodies of nature, and many creatures of a teeming fancy, which in their view directly or remotely affected or controlled their well-being. These objects of their faith and worship were regarded as man-beings or anthropic persons possessed of life, volition, and orenda or magic power of different kind and degree peculiar to each. In this religion, ethics or morals as such received only a secondary, if any, consideration. The status and inter-relations of the persons of their pantheon one to another were fixed and governed by rules and customs assumed to be similar to those of the social and the political organization of the people, and so there was, therefore, at least among the principal gods, a kinship system patterned after that of the people themselves. They expressed their public religious worship in elaborate ceremonies performed at stated annual festivals, lasting from a day to fifteen days, and governed by the change of seasons, Besides the stated gatherings there were many minor meetings, in all of which there were dancing and thanksgiving for the blessings of life. They believed in a life hereafter, which was but a reflex of the present life, but their ideas regarding it were not very definite. The bodies of the dead were wrapped in furs, neatly covered with flexible bark, and then placed on a platform resting on four pillars, which was then entirely covered with bark; or the body, after being prepared for burial, was placed in a grave and over it were laid small pieces of timber, covered with strong pieces of bark and then with earth. Over the grave a cabin was usually erected. At the great feast of the dead, which occurred at intervals of 8 or 10 years, the bodies of those who had died in the interim, from all the villages participating in the feast, were brought together and buried in a common grave with elaborate and solemn public ceremonies.

In 1615, when the Hurons were first visited by the French under Champlain, he estimated from the statements of the Indians themselves that they numbered 30,000, distributed in 18 towns and villages, of which 8 were palisaded; but in a subsequent edition of his work Champlain reduces this estimate to 20,000. A little later Sagard estimated their population at 30,000, while Brebœuf gave their number as 35,000. But these figures are evidently only guesses and perhaps much above rather than below the actual population, which, in 1648, was probably not far from 20,000.

When the French established trading posts on the St. Lawrence at Three Rivers and elsewhere, the Hurons and neighbouring tribes made annual trips down the Ottawa r. or down the Trent to these posts for the purpose of trading both with the Europeans and with the Montagnais of the lower St. Lawrence who came up to meet them. The chief place of trade at this time was, according to Sagard (Histoire, 1, 170, 1866), in the harbour of cape Victory, in lake St. Peter of St. Lawrence r., about 50 miles below Montreal, just above the outlet of the lake, where, on Sagard's arrival, there were "already lodged a great number of savages of various nations for the trade of beavers with the French. The Indians who were not sectarians in religion invited the missionaries into their country. In 1615 the Récollet fathers accepted the invitation, and Father Le Caron spent the year 1615-16 in Huronia, and was again there in 1623-24. Father Poulain was among the Hurons in 1622, Father Viel from 1623 to 1625, and Father De la Roche Daillion in 1626-28. The labours of the Jesuits began with the advent of Father Brebœuf in Huronia in 1626, but their missions ended in 1650 with the destruction of the Huron commonwealth by the Iroquois. In all, 4 Récollet and 25 Jesuit fathers had laboured in the Huron mission during its existence, which at its prime was the most important in the French dominions in North America. As the first historian of the mission, Fr. Sagard, though not a priest, deserves honourable mention.

From the Jesuit Relation for 1640 it is learned that the Hurons had had cruel wars with the Tionontati, but at the date given they had recently made peace, renewed their former friendship, and entered into an alliance against their common enemies. Sagard is authority for the statement that the Hurons were in the habit of sending large war parties to ravage the country of the Iroquois. The well-known hostility and intermittent warfare between the Iroquois and the Huron tribes date from prehistoric times, so that the invasion and destruction of the Huron country and confederation in 1648–50 by the Iroquois were not a sudden, unprovoked attack, but the final blow in a struggle which was already in progress in 1535, when the French under Cartier first explored the St. Lawrence. The acquirement of firearms by the Iroquois from the Dutch was an important factor in their subsequent successes. By 1643 they had obtained about 400

2 GEORGE V., A. 1912

guns, while, on the other hand, as late as the final invasion of their country the Hurons had but very few guns, a lack that was the direct cause of their feeble resistance and the final conquest by the Iroquois confederation of half of the country E. of the Mississippi and N. of the Ohio. In July, 1648, having perfected their plans for the final struggle for supremacy with the Hurons, the Iroquois began open hostility by sacking two or three frontier towns and Teanaustavaé (St. Joseph), the major portion of the invading warriors wintering in the Huron country unknown to the Hurons; and in March, 1649, these Iroquois warriors destroyed Taenhatentaron (St. Ignace) and St. Louis, and carried into captivity hundreds of Hurons. These disasters completely demoralized and disorganized the Huron tribes, for the greater portion of their people were killed or led into captivity among the several Iroquoian tribes, or perished from hunger and exposure in their precipitate flight in all directions, while of the remainder some escaped to the Neutral Nation, or "Hurons de la Nation Neutre," some to the Tobacco or Tionontati tribe, some to the Erie, and others to the French settlements on the island of Orleans, near Quebec. The Tohontaenrat, forming the populous town of Scanonaenrat, and a portion of the Arendahronon of the town of St.-Jean-Baptiste surrendered to the Seneca and were adopted by them with the privilege of occupying a village by themselves, which was named Gandougarae (St. Michel). As soon as the Iroquois learned of the Huron colony on Orleans id., they at once sought to persuade these Hurons to migrate to their country. Of these the Bear people, together with the Bowl band and the Rock people, having in an evil day promised to remove thither, were finally, in 1656, compelled to choose between fighting and migrating to the Iroquois country. They chose the latter course, the Bear people going to the Mohawk and the Rock people to the Onondaga. The Cord people alone had the courage to remain with the French.

The adopted inhabitants of the new town of St. Michel (Gandougarae) were mostly Christian Hurons who preserved their faith under adverse conditions, as did a large number of other Huron captives who were adopted into other Iroquois tribes. In 1653 Father Le Moine found more than 1,000 Christian Hurons among the Onondaga. The number of Hurons then among the Mohawk, Oneida, and Cayuga is not known.

Among the most unfortunate of the Huron fugitives were those who sought asylum among the Eric, where their presence excited the jealousy and perhaps the fear of their neighbours, the Iroquois, with whom the Eric did not fraternize. It is also claimed that the Huron fugitives strove to foment war between their protectors and the Iroquois, with the result that, notwithstanding the reputed 4,000 warriors of the Eric and their skill in the use of the bow and arrow (permitting them dextrously to shoot 8 or 9 arrows while the enemy could fire an arquebus but once), the Eric and the unfortunate fluron fugitives were entirely defeated in 1653-56 and dispersed or carried away into captivity. But most pathetic and eruel was the fate of those unfortunate Hurons who, trusting in the long-standing neutrality of the Neutral Nation which the Iroquois had not theretofore violated, fled to that tribe, only to be, with the other portion of the Huron people still remaining in their country, held in harsh captivity (Jes. Rel. 1659-60).

A portion of the defeated Hurons escaped to the Tionontati or "Huron du Pétun," then dwelling directly westward from them. But in 1649, when the Iroquois had sacked one of the Tionontati palisaded towns, the remainder of the tribe, in company with the refugee Hurons, sought an asylum on the island of St. Joseph, the present Charity or Christian id., in Georgian bay. It is this group of refugees who became the Wyandots of later history. Finding that this place did not secure them from the Iroquois, the majority fled to Michilimakinac, Mich., near which place they found fertile lands, good hunting, and abundant fishing. But even here the Iroquois would not permit them to rest, so they retreated eastward to Manitoulin island called Ekaentoton by the Hurons. Thence they were driven to ile Huronne (Potawatomi id., because formerly occupied by that tribe), at the entrance to Green bay, Wis., where the Ottawa and their allies from Saginaw bay and Thunder bay, Manitoulin, and Michilimakinac, sought shelter with them. From this point the fugitive Hurons, with some of the Ottawa and their allies, moved farther westward 7 or 8 leagues to the Potawatomi, while most of the Ottawa went into what is now Wisconsin and N. W. Michigan among the Winnebago and the Menominee. Here, in 1657, in the Potawatomi country, the Hurons, numbering about 500 persons, erected a stout palisade. The Potawatomi received the fugitives the more readily

since they themselves spoke a language cognate with that of the Ottawa and also were animated by a bitter hatred of the Iroquois who had in former times driven them from their native country, the N. peninsula of Michigan. This first flight of the Potawatomi must have taken place anterior to the visit by Nicollet in 1634.

Having murdered a party of Iroquois scouts through a plot devised by their chief Anahotaha, and fearing the vengeance of the Iroquois, the Hurons remained here only a few mouths longer. Some migrated to their compatriots on Orleans id., near Quebec, and the others, in 1659-60, fled farther w. to the Hlinois country. on the Mississippi, where they were well received. Anahotaha was killed in 1659 in a fight at the Long Sault of Ottawa r., above Montreal, in which a party of 17 French militia under Sieur Dollard, 6 Algonkin under Mitameg, and 40 Huron warriors under Anahotaha (the last being the flower of the Huron colony then remaining on Orleans id.) were surrounded by 700 Iroquois and all killed with the exception of 5 Frenchmen and 4 Hurons, who were eaptured. It was not long before the Hurons found new enemies in the Illinois country. The Sioux brooked no rivals, much less meddlesome, weak neighbours; and as the Hurons numbered fewer than 500, whose native spirit and energy had been shaken by their many misfortunes, they could not maintain their position against these new foes, and therefore withdrew to the source of Black r., Wis., where they were found in 1660. At last they decided to join the Ottawa, their companions in their first removals, who were then settled at Chequamigon bay, on the s. shore of lake Superior, and chose a site opposite the Ottawa village. In 1665 Father Allouez, the founder of the principal western missions, met them here and established the mission of La Pointe du Saint Esprit between the Huron and the Ottawa villages. He laboured among them 3 years, but his success was not marked, for these Tionontati Hurons, never fully converted, had relapsed into paganism. The Ottawa and the Hurons fraternized the more readily here since the two peoples dwelt in contiguous areas s, of Georgian bay before the Iroquois invasion in 1648-49. Father Marquette succeeded Father Allouez in 1669 and founded the missions of the Sault Ste. Marie and St. François-Xavier-de-la Baie-des-Puants. The Sioux, however, sought every possible pretext to assail the settlements of the Hurons and the Ottawa, and their numbers and known cruelty caused them to be

so feared that the latter tribes during Marquette's régime withdrew to the French settlements, since the treaty of peace between the French and the Iroquois in 1666 had delivered them from their chief enemies. The Ottawa. however, returned to Manitonlin id., where the mission of St. Simon was founded, while the Hurons, who had not forgotten the advantageous situation which Michilimakinae had previously afforded them, removed about 1670 to a point opposite the island, where they built a palisaded village and where Marquette established the mission of St. Ignace. Later, some of the Hurons here settled moved to Sandusky. Ohio, others to Detroit, and still others to Sandwich, Ontario. The last probably became what was latterly known as the Anderdon band of Wyandots, but which is now entirely dissipated, with the possible exception of a very few persons.

In 1745 a considerable party of Hurons under the leadership of the war chief Orontony, or Nicholas, removed from Detroit r, to the marsh lands of Sandusky bay. Orontony was a wily savage whose enmity was greatly to be feared, and he commanded men who formed an alert, unscrupulous, and powerful body. The French having provoked the bitter latted of Nicholas, which was fomented by English agents, he conspired to destroy the French, not only at Detroit but at the upper posts, and by $\Lambda ug.$, 1747, the "Iroquois of the West," the Hurons, Ottawa, Abnaki, Potawatomi, "Ouabash." Sauteurs, Missisauga, Foxes, Sioux, Sauk, "Sarastau," Loups, Shawnee, and Miami, indeed all the tribes of the middle W., with the exception of those of the Illinois country, had entered into the conspiracy; but through the treachery of a Huron woman the plot was revealed to a Jesuit priest, who communicated the information to Longueuil, the French commandant at Detroit, who in turn notified all the other French posts, and although a desultory warfare broke out, resulting in a number of murders, there was no concerted action. Orontony, finding that he had been deserted by his allies, and seeing the activity and determination of the French not to suffer English encroachments on what they called French territory, finally, in Apr., 1748, destroyed his villages and palisade at Sandusky, and removed, with 119 warriors and their families. to White r., Ind. Not long after he withdrew to the Illinois country on Ohio r., near the Indiana line, where he died in the autumn of 1748. The inflexible and determined conduct

of Longueuil toward most of the conspiring tribes brought the coalition to an end by May, 1748

After this trouble the Hurons seem to have returned to Detroit and Sandusky, where they became known as Wyandots and gradually acquired a paramount influence in the Olio valley and the lake region. They laid claim to the greater part of Ohio, and the settlement of the Shawnee and Delawares within that area was with their consent; they exercised the right to light the council fire at all intertribal councils, and although few in number they joined all the Indian movements in the Ohio valley and the lake region and supported the British against the Americans. After the peace of 1815 a large tract in Ohio and Michigan was confirmed to them, but they sold a large part of it in 1819, under treaty provisions, reserving a small portion near Upper Sandusky. Ohio, and a smaller area on Huron r., near Detroit, until 1842, when these tracts also were sold and the tribe removed to Wyandotte co., Kans. By the terms of the treaty of 1855 they were declared to be citizens, but by the treaty of 1867 their tribal organization was restored and they were placed on a small tract, still occupied by them, in the N. E. corner of Oklahoma.

That portion of the Hurons who withdrew in 1650 and later to the French colony, were accompanied by their missionaries. The mission of La Conception, which was founded by them, although often changed in name and situation, has survived to the present time. The Hurons who wintered in Quebec in 1649 did not return to their country after learning of its desolation by the Iroquois, but were placed on land belonging to the Jesuits at Beauport, and when the Huron fugitives came down to Quebec to seek protection, the others followed these in May, 1651, to Orleans id., settling on the lands of Mademoiselle de Grandmaison that had been bought for them. Here a mission house was erected near their stockaded bark lodges. In 1654 they numbered between 500 and 600 persons. But again the Iroquois followed them, seeking through every misrepresentation to draw the Hurons into their own country to take the place of those who had fallen in their various wars. By this means a large number of the Hurons, remnants of the Bear, Rock, and Bowl tribes, were persuaded in 1656 to migrate to the Iroquois country, a movement that met with such success that the Iroquois even ventured to show themselves under the guns of Quebec. In the same year they mortally wounded Father Garreau, near Montreal, and captured and put to death 71 Hurons on Orleans id. These misfortunes caused the Hurons to draw nearer to Quebec, wherein they were given asylum until peace was concluded between the French and the Iroquois in 1666. The Hurons then withdrew from the town about 5 m., where in the following year the mission of Notre-Dame-de-Ste. Fove was founded. In 1693 the Hurons moved 5 in, farther away on account of the lack of wood and the need of richer lands; here the missionaries arranged the lodges around a square and built in the middle of it a church, to which Father Chaumonot added a chapel, patterned after the Casa Sancta of Lorette in Italy, and now known as Ancienne Lorette. Some years later the mission was transferred a short distance away, where a new village, Younger Lorette, or Jenne Lorette, was built. About the remains of this mission still dwell the so-called Hurons of Lorette.

The old estimates of Huron population have been previously given. After the dispersal of the Huron tribes in 1649–50, the Hurons who fled w. never seem to have exceeded 500 persons in one body. Later estimates are 1,000, with 300 more at Lorette (1736), 500 (1748), 850 (1748), 1,250 (1765), 1,500 (1794–95), 1,000 (1812), 1,250 (1812). Only the first of these estimates is inclusive of the "Hurons of Lorette," Quebec, who were estimated at 300 in 1736, but at 487, officially, in 1911. In 1885 those in Indian Ter. (Oklahoma) numbered 251, and in 1905, 378, making a total of 865 in Canada and the United States.

Nothing definite was known of the clans of the Hurons until the appearance of Morgan's Ancient Society in 1877, Powell's Wyandot Government (1st Rep. B.A.E., 1881). and Connolley's The Wyandots (Archæol, Rep. Ontario, 92, 1899). From the last writer, who corrects the work of the former authorities, the following list of Huron clans is taken: Great Turtle, Little Water Turtle, Mud Turtle, Wolf, Bear, Beaver, Deer, Porcupine, Striped Turtle, Highland Turtle, Snake, and Hawk. These, according to Powell, were organized into four phratries or clan brotherhoods, but Connolley denies that four phratries ever existed. The evidence appears to indicate, however, that the four-phratry organization was merged into one of three, of which the Wolf clan constituted one and acted as executive and presiding officer.

The Huron villages were Andiata, Angoutene, Anonatea, Arendaonatia, Arente, Arontaen, Brownstown, Cahiague, Carhagouha, Carmaron, Cranetown (2 villages), Ekhiondatsaan, Endarahy, Iaenhouton, Ihonatiria (St. Joseph 11), Jeune Lorette, Junquisindundeh (?). Junundat, Khioetoa, Karenhassa, Khinonascarant (3 small villages so called), Lorette, Onentisati, Ossossané, Ouenrio, Sandusky, Ste. Agnes, Ste. Anne, St. Antoine, Ste. Barbe, Ste. Catherine, Ste. Cècile, St. Charles (2 villages), St. Denvs, St. Etienne, St. François-Xavier, St. Geneviève, St. Joachim, St. Louis, St. Martin, Ste. Marie (2 villages), Ste. Térèse, Scanonaenrat, Taenhatentaron (St. Ignace I. II), Teanaustayaé (St. Joseph I), Teandewiata, Toanche, Touaguainchain (Ste. Madeleine), and Tondakhra.

Husam. A former winter village of the Hahamatses at the mouth of Salmon r., Brit. Col.; now the seat of a salmon fishery.

HPusam.—Boas in Bull. Am. Geog Soc., 230, 1887. Koo-sām.—Dawson in Trans Roy Soc Can. for 1887, sec. ii, 65

Husky. According to Julian Ralph (Sun. N. Y., July 14, 1895), "the common and only name of the wolf-like dogs of both the white and red men of our northern frontier and of western Canada." Husky was originally one

2 GEORGE V., A. 1912

of the names by which the English settlers in Labrador have long known the Eskimo (q. v.). The word, which seems to be a corruption of one of the names of this people, identical with our 'Fskimo' in the northern Algonquian dialects, has been transferred from man to the dog. (A. F. C.)

Huthutkawedl (X'û'tx'ûtkawê'I, 'holes by or near the trail'). A village of the Nicola band of the Ntlakyapannık, near Nicola r., 23 m. above Spence Bridge, Brit. Col.

N'hothotkō'as.—Hill-Tout in Rep. Fthnol. Surv. Can., 4, 1899. X û'tx û tkawê'!.—Teit in Mem. Am. Mus. Nat. Hist., ii, 174, 1900.

Hwades $(Xud\bar{\epsilon}'s, \text{ 'cut beach'})$. The principal village of the Koskimo and Koprino at Quatsino narrows, Vancouver id.

Hwat-ës'.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65, 1888. Hwot-es.—Dawson in Can. Gool Surv., map, 1887. Xudë's.—Boas, inf'n, 1806

Hwahwati (Qwa'qwall). A Salish tribe on Englishman r., Vancouver id., speaking the Puntlatsh dialect.—Boas, MS. B. A. E., 1887.

Hwotat. A Hwotsotenne village on the E. side of Babine lake, near its outlet, in N. British Columbia.

Hwo'-tat.—Morice in Trans Roy. Soc. Can., x, 109, 1893. Whalatt.—Downie in Mayne, Brit. Col., 453, 1861 (misprint). Whatatt.—Downie in Jour. Roy. Geog. Soc., xxxi, 253, 1861. Wut-at.—Dawson in Geol Surv. Can., 268, 1881

Hwotsotenne ('people of Spider river'). A Takulli tribe, belonging to the Babine branch, living on Bulkley r. and hunting as far as Francais lake, Brit. Col. They are somewhat mixed with their immediate neighbours, the Kitksan (Morice in Trans. Can. Inst., 27, 1893). Their villages are Hagwilget, Hwotat. Keyerhwotket, Lachalsap, Tsechah, and Tselkazkwo. Akwilgét.—Morice, Notes on W. Dénés, 27, 1893 ('well dressed'; Kitksan name). Hwotso'tenne.—Morice in Trans Roy Soc. Can, map, 1892. Ontsotin.—British Columbia map, 1872.

Iahenhouton ('at the eaves, —Hewitt). A Huron village in Ontario in 1637.—Jes. Rel. for 1637, 159, 1858.

lalmuk (*la'lmuq*). A Squawnish village community at Jericho, Burrard inlet, Brit. Col.—Hill-Tout in Rep. B. A. A. S., 475, 1900.

lalostimot (Ialo'stimōt, 'making good fire'). A Talio division among the Bellacoola of British Columbia; named from a reputed ancestor.

Ialo'stimōt.—Boas in 7th Rep. N. W. Tribes Canada, 3, 1891. T'ā't'intsāit.—Ibid. t'a cave protecting from rain': secret society name).

Idiuteling. An Eskimo settlement on the N. shore of Home bay, Baffin island, where the Akudnirmiut Eskimo gather to hunt bear in the spring.

Ipiutelling.—Boas in 6th Rep. B. A. E., 441, ISSS (misprint). Ipnitelling.—Ibid, map (misprint).

Idjorituaktuin ('with grass'). A village of the Talirpingmint division of the Okomiut Eskimo on the w. shore of Cumberland sd., Baffin island; pop. 11 in 1883.

Ejujuajuin.—Kumlien in Bull Nat Mus, no. 15, 15, 1879. Idjorituaktuin.—Boas in Deutsche Geog. Blatt, vur. 33, 1885. Idjorituaqtuin.—Boas in 6th Rep. B. A. E., 426, 1888. Idjorituagtuin.—Boas in Petermanns Mitt, no. 80, 70, 1885.

Idjuniving. A spring settlement of Padlimiut Eskimo near the s. end of Home bay, Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Iglu. A snow house of the Eskime: from igdlu, its name in the E. Eskimo dialects.

(A. F. C.)

Iglulik. A winter settlement of the Aivilirmiut Eskimo at the head of Lyon inlet, Hudson bay.

Igdlulik.—Rink in Jour Anthrop Inst., xv, 240, 1886. Igdlumint.—Boas in 6th Rep. B. A. E., map, 1888 (the inhabitants). Igloolik.—Parry, Sec. Voy., 404, 1824. Igloolip.—Gilder, Schwatka's Search, 253, 1881.

Iglulik. A town of the Iglulirmiut Eskimo, on an island of the same name, near the E. end of Fury and Hecla strait, Franklin.—Boas in Zeitschr. Ges. f. Erdk., 226, 1883.

Iglulirmiut ('people of the place with houses'). A tribe of central Eskimo living on both sides of Fury and Hecla strait. They kill walrus in winter on Iglulik and other islands, harpoon seal in the fiords in early spring, and throughout the summer hunt deer in Baffin island or Melville peninsula. Their settlements are Akuli, Arlagnuk, Iglulik, Kangertluk, Krimerksumalek, Pilig, Pingitkalik, and Uglirn.—Boas in 6th Rep. B. A. E., 444, 1888.

Iglulingmiut.—Boas in Trans. Anthrop. Soc. Wash, m., 96, 1885

Igpirto. A fall settlement of Talirpingmiut Eskimo of the Okomiut tribe at the head of Nettilling fiord, Cumberland sd., Baffin island, —Boas in 6th Rep. B. A. E., map, 1888.

Honatiria. A former Huron village in Simcoe co., Ontario, built about 1634 and depopulated by pestilence in 1636. The Jesuits established there the mission of Immaculate Conception.

Ihonatiria.—Jes. Rel. for 1635, 30, 1858. Ihonattiria.—Jes. Rel. for 1637, 153, 1858. Immaculate Conception.—Shea, Cath. Miss., 173, 1855.

Ijelirtung. The northernmost summer settlement of the Akudnirmiut Eskimo of Baffin island.—Boas in 6th Rep. B. A. E., 441, 1888.

Ijirang. A fabulous people of central Eskimo mythology.—Boas in 6th Rep. B.A.E., 640, 1888.

Ikwopsum. A Squawmish village community on the left bank of Skwamish r., Brit, Col. Eukwhatsum.—Survey map, U.S. Hydrog Office Ikwo'psum.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900. Yik'oā'psan.—Boas, MS, R. A. E., 1887.

Ildjunai-hadai (Î'ldjuna-) xā'da-i, 'valuable-house people'). A subdivision of the Yadus, a family of the Eagle clan of the Haida in w. British Columbia. The name is derived from that of a house.—Swanton, Cont. Haida, 276, 1905.

He Percée. A French mission, probably among the Micmae, on the gulf of St. Lawrence in the 17th century.—Shea, Miss. Val., 85, 1852.

His ('spread-legs beach'). A Nimkish Kwakiutl village on Cormorant id., Alert bay, Brit. Col., opposite Vancouver id. Some Kwakiutl proper come here during the salmon season.—Boas in Bull. Am. Geog. Soc., 227, 1887.

1-lis.—Dawson in Trans. Roy. Soc. Can., sec. 11, 65, 1887.

Hkatsho ('the big fattening'). A village of the Ntshaautin on the lake at the head of Blackwater r., Brit. Col. The population is a mixed one of Takulli and Bellacoola descent. 3Fkatco.—Morice in Trans. Roy. Soc. Can., 109, 1892. Tka-tco.—Morice, Notes on W. Dénés, 25, 1893. Uhlchako.—Can. Ind. Aff., 285, 1902

Illumination. The employment of artificial light among the Indians was limited by their simple habits and needs to the camp-fire and the torch, in which respect they are found in the same culture grade as the Malay, the Negro, and the majority of uncivilized peoples. The camp-fire, built for the purpose of cooking food or furnishing heat, supplied most of the needed light. On special occasions large bonfires were made when ceremonies were held and nocturnal illumination was required. As a makeshift for the torch, a brand was taken from the camp-fire. When a continuous light was desired the fire was fed with slivers of wood set up in a circle and fed from one end

where a gap was left in the circle, as among the Cherokee; or when a temporary light was wanted among the Indians of British Columbia a little oil was thrown on the coals. The torches were of pine knots, rolls of bark, cane, or other inflammable material, but bundles of resinous wood, or masses of resin were almost never made, the form of the Indian torch being of the most primitive character. They were used by night for hunting and fishing; for instance, deer were "weequashed," or "jacked," by means of torches, and fish were speared and birds captured by light from pine knots, especially among the eastern Indians. Lamps, however, have been possessed from time immemorial by the Eskimo, and they are the only aborigines of the hemisphere who had such utensils. In s. Alaska the lamp has a narrow wick-edge and is in the shape of a flat-iron; along the tundra N. of St. Michael it is a saucer of clay or stone; northward to point Barrow it is gibbous with wide wickedge and made of soapstone. The length of the wick-edge of the Eskimo lamp has been observed to vary with the latitude, that is, the higher the latitude the longer the night, hence the greater need for light, which is met by lengthening the margin of the lamp on which the moss wick is placed, so that while in s. Alaska the wick edge is 2 or 3 in, long, in Smith sd. it is 36 in, in length, and between these geographical extremes there is an inincrease in the size of the lamp from lower to higher latitudes. In at least two localities in the United States the bodies of fish were burned for light—the candle-fish of the N.W. coast and a fresh-water fish of Penobscot r. in Maine.

Torches and fires were used for signalling at night; the Apache set fire to the resinous spines of the saguaro, or giant cactus, for this purpose. The picturesque and remarkable Fire-dance of the Navaho described by Matthews is a good example of the use of illumination in ceremonies. Among many tribes fire forms an essential part of a ceremony; in some cases, where Indians have been induced to rehearse a night ceremony by day, they do not omit the fire, though artificial light is not required. A law of the Iroquois League required that a messenger approaching a camp fire or village at night should carry a torch in order to show the absence of hostile intent. See Fire-making

Range of the Eskimo Lamp, Am. Anthrop., Apr. 1898, (3) The Lamp of the Eskimo, Rep. Nat. Mus. 1896, 1898; Matthews, Mountain Chant, 5th Rep. B.A E., 1887.

 $(\mathbf{w}, \mathbf{n},$

Hrak (Trok). A former village of the Ntshaautin sept of the Takulli of British Columbia.—Morice in Trans. Can. Inst., 1v, 25, 1893.

Imigen ('fresh water'). One of the two winter villages of the Kinguamiut, a branch of the Okomiut Eskimo, on an island at the head of Cumberland sd., Baffin island; pop. 17 in 1883.—Boas in 6th Rep. B. A. E., map, 1888.

Implements, Tools, Utensils. While a tool is that with which something is made, an implement that with which work is done, and a utensil that in or on which something is prepared or used up, they cannot always be distinguished among primitive peoples, who utilize one thing for many purposes. Many forms are discussed under Arts and Industries and in articles devoted to special activities. It must be borne in mind that all such devices were helpers of the skilful hand and a vast deal of excellent work was done with it alone.

The Indians of North America were in the stone age, and therefore every device with which the arts of life were carried on, whether implement, tool, or utensil, was in harmony with this grade of culture. The archæologist finds of such objects in ancient remains and sites, either their substantial portions, or the perishable parts that have been accidentally preserved, or impressions of them left on pottery. By comparing these relies with implements, tools, and utensils found in actual use among the Indians one is able to partially reconstruct ancient industry and read far backward into history. The moment that the savages saw implements, tools, and utensils of metal in the hands of Europeans, they recognized the superiority of these and adopted them. It is interesting to note the modifications that were made in hafting and using, in order to adapt the new devices to old habits and customs. As of old, manual parts were still carved, painted, and hung with symbols, without which they were thought to be ineffectual.

The instruments of handicraft were of two classes—general, for common purposes, and pecial, for particular industries. The general implements, tools, and utensils may be dedescribed in detail (Holmes in Rep. Nat. Mus. 1901, 501, 1903);

Hammers.—These were made of stone or other hard substance, with or without handles. There were sledges, mails, and pile-drivers for two or more men.

Knives.→These were made commonly of chipped or ground stone. Teeth, bone, shell, and wood were also used for the purpose (McGuire in Am. Anthrop., 1v, 1891).

Saws.—These were of serrated stones, shells, or other materials, and were worked by rubbing with the edge, often with the aid of sand with or without water.

Borers.—Many natural objects were used for making holes in hard and soft objects, either by pressure, striking, vibrating, or revolving. They were held directly in the hand or were hafted; were grasped by one hand or by both hands; held between the palms or were worked by means of a strap, bow or pump (McGuire in Rep. Nat. Mus. 1894, 623, 1896).

Axes.—The stone axe, rudely flaked or highly polished, plain or grooved, ranging in weight from a few ounces to many pounds in the ceremonial axe, was universal. It was held in the hand or attached in various ways to a handle by means of rawhide, but was never furnished with an eye for a helve. Other substances were occasionally used, as shell, iron ore, and copper, but the stone axe was the main reliance. The blade could be easily turned at right angles, and then the implement became an adze.

Scrapers.—The scraper was also a tool of wide dispersion. In shape it resembled a chisel blade with a bevelled edge. The rudest were sharp spalls of siliceous stone, held in the hand with or without padding; others were of smooth materials set into handles or grips that snugly fitted the workman's hand. One variety was made for scraping hides, another for scraping wood.

Nippers.—These include all devices for holding tightly an object or holding parts together while being worked. Hinged varieties were not known, but the Eskimo, especially, had several inventions to do the work of clamps, pincers, tweezers, or the vise with the aid of wedges.

The simple mechanical powers, the wedge, the lever, and the inclined plane, were universally understood. The screw was employed but sparingly, if at all. The N.W. Coast tribes

used rollers, skids, and parbuckles to move great house beams into place, and the Alaskan Eskimo, according Elliott, landed the walrus by means of a sliding tackle looped over pegs driven into cracks in the rocks and run through slits in the hide. The wheel and axle were entirely unknown, save in their most primitive form, the spindle. Power for doing work with the devices just described was derived from the muscle of the worker. The wind was utilized here and there, blowing upon a fixed mat erected for a sail, but nothing was known of shifting sails. The Indians made good use of fire in clearing ground for planting, in felling trees, excavating canoes, and making pitch and glue. Bellows were not used, but the blowtube existed. Water wheels were unknown, and in the matter of using nature's forces for work northern America was in a primitive state of culture. The special implements, tools, and utensils employed in the various aboriginal industries are enumerated below. They are also treated more fully in separate articles.

Agriculture.—Digging sticks, hardened in fire and sharpened, and often weighted; dibbles, hoes, scarcerows, harvesting devices, husking pegs, granaries, and caches were common. For harvesting both wild and cultivated produce various tribes had tongs for picking the cactus fruit, stone implements for opening hulls or shells, baskets for gathering, carrying and storing, poles for reaching fruit, harvesting apparatus for grass seed, wild rice, camas, wokas, coonti, maize, etc.

Bark work.—Peelers, shredders, twisters, sewing tools, pitching tools.

Boat building.—Axes, adzes, saws, borers, hammers, knives, pitch and paint brushes, and fire.

Carrying.—Packing baskets, hide cases, walking sticks, special costumes, and a provision of compact food, as pemmican, dried fish, and crisp bread. The making up of burdens into neat loads for handling and for the back was understood and further completed by means of headbands, breast straps, and shoulder straps. The dog was here and there a pack beast, and harness was devised.

Cooking.—Besides open roasting, grilling frames of wood, and pits for baking and steaming, there were stone slabs for parching seeds and for baking bread; pottery and baskets for boiling (the latter by the help of heated stones, and soapstone utensils for preparing meat and other food.

Curing food.—Drying frames, smoking devices.

Fishing — Besides fishing implements proper, the fisher's outfit included canoes, paddles, weirs, dams, anchor stones, etc.

Plastic Art.—In the technic of this industry belong all tools and implements used in quarrying clays and preparing them for the potter, all devices employed in building up, smoothing, polishing and decorating ware, and the apparatus for burning.

Quarrying, mining and stone working.—Digging sticks, mauls, hammers, edge tools for making lamps, and dishes and other receptacles of soapstones, chipping and other shaping tools and implements, carrying apparatus, flakers, chippers, polishers.

Textile Industries.—All implements and tools needed in gathering roots, stems, and leaves as materials, and those used in preparing these for matting, bagging, basketry, blankets, robes, lacework, network, thread, string, and rope; finally, all inventions empployed in manufacturing these products.

Whaling.—Suit of watertight clothing; kaiak and paddle; harpoon, with line; skin floats; lance.

Woodcraft.—Axe, kmfe, saw, adze, chisel, borers, rasps, polishers, paint brushes, rollers, moving and setting up devices.

For serving and consuming food, knives were necessary; spoons were fashioned of natural objects, especially of wood, horn, and gourd, but there were no forks or individual dishes or tables. Much food was consumed on the spot where it was found. The Indians had manifold apparatus for making, preserving, and using fire; for cooking, lighting, and heating. Shovels were used for baking bread. The outfit for harvesting and preparing acorns included gathering basket, for which the woman's hat was often used, carrying hamper, granary, hulling mill, mortar, hopper basket. meal mat, leaching pit, cooking basket, mush basket, and eating bowls. Milling implements in general included natural boulders and pebbles; mortars of wood, stone, bone, or hide; pestles of the same materials; metates of varying degrees of texture, with manos to correspond; baskets to serve as hoppers and to eatch meal, and brooms. Hunters' implements included a vast number of accessory apparatus for making weapons effectual.

Devices for binding or permanently holding two parts together, pegs, lashings, and cement were used. In the absence of metal and rattan, rawhide, sinew, roots of evergreen trees, splits of tough wood, pitch, and animal glue performed the necessary function. In the aboriginal economy no great stones were moved, but large logs were sometimes transported many miles.

Metric devices of the North Americans were very crude compared with modern standards but were exactly adapted to their needs. A man fitted his boat and all its appurtenances to his body, just as he did his clothing. The hunter, basket-maker, potter, tent-maker, weighed and measured by means of the same standard. For securing uniform thickness the N. W. Coast tribes bored holes through hulls of dugouts, and ran slender plugs into them, which were used as gauges. Usually the parts of the body were the only gauges.

Straighteners were made of wood, stone, horn, or ivory for bending wood and other substances to shape. Digging sticks, dibbles, and the whole class of implements for making holes in the ground were used also for working in quarries, for getting worms and the like from the beach or the earth, and for digging roots for food or for textile and other industrial purposes. Tongs were employed in moving hot stones, in gathering cactus fruit, and in capturing snakes.

Dwellings were of such varying types and forms that their construction in different areas required the services of different kinds of work—that of the tentmaker, the joiner, the mason, or the snow worker, with their different implements, including shovels, axes, trowels, adzes, levers, parbuckles, etc. (see Architecture, Habitations). The joiner's outfit included many devices, from those for hafting to those for honse building, tent framing, boat fitting, and the use of roots and thongs. Puncheons were hewn out, but there was no mortising. Hafting, the joining of the working part of a tool to the manual part, was accomplished variously by driving in, groove, splice, socket, tongueand-groove, or mortising, and the fastening was done with pegs or lashing.

For the shaping arts, the working of stone, wood, and other hard substances, the apparatus varied with the material, and consisted of knives, hammers, wedges, saws, files, polishers, borers, adzes, and chisels, made out of materials best suited always to their uses.

The propelling of all sorts of water craft was done by paddling, by poling, by dragging over mud, and by towing. No oars or rudders were used. Vessels were made watertight with pitch or by the swelling of the wood. The rope or rawhide line for dragging a canoe along shore is known as a cordelle, the French-Canadian term. Portage, the moving of a bark canoe from one body of water to another, was accomplished by carrying load and canoe separately, sliding the empty canoe over mud, or shooting rapids in it.

The making of snowshoes was an important occupation in the N., requiring great skill and manifold tools and devices. Ice and snow implements and utensils used in the higher latitudes include pieks with ivory or stone blades, shovels with wooden blade and ivory edge, creepers for the boots, boat hooks for warding off and drawing canoes, sleds, and the indispensable snowshoes. The Eskimo were ingenious in devising such implements. They had shovels with edges of walrus ivory. walking sticks for going over the snow, snow goggles, snowshoes, and snow trowels and knives for housebuilding; also ice picks and erowbars and hooks and scoops for cutting and moving ice.

See Arts and Industries, and the subjects cited thereunder: also the articles describing special types of implements, tools, and utensils, and the materials from which they are made.

(O. T. M.)

Incomappleux. See Incomenceanetooky note.

Incomecanetook (Income-can-étook). Given by Ross (Advent., 290, 1847) as an Okinagan tribe.*

Indian. The common designation of the aborigines of America. The name first occurs in a letter of Columbus dated Feb., 1493, wherein the discoverer speaks of the Indios he had with him (F. F. Hilder in Am. Anthrop., n. s., 1, 545, 1899). It was the general belief of the day, shared by Columbus, that in his voyage across the Atlantic he had reached This term, in spite of its misleading India. connotation, has passed into the languages of the civilized world: Indio in Spanish, Portuguese, and Italian; Indien in French; Indianer in German, etc. The term American Indian, for which it has been proposed to substitute Amerind (q, \mathbf{v}_i) , is, however, in common use: less so the objectionable term redskins, to which correspond the French Peaux-rouges, the German Rothhäute. Brinton titled his

^{*}Probably same as Incomappleux, name of a river falling into Upper Arrow lake, B.C.

book on the aborigines of the New World, "The American Race," but this return to an early use of the word American can hardly be successful. In geographical nomenclature the Indian is well remembered. There are Indian Territory, Indiana, Indianapolis, Indianola, Indio. Besides these, the maps and gazetteers record Indian arm, bay, bayou, beach, bottom, branch, brook, camp, custle, cove, creek, crossing, diggings, draft, fall, field, fields, ford, gap, grove, gulch, harbour, head, hill, hills, island, lake, mills, mound, mountain, neck, orchard, pass, point, pond, ridge, river, rock, run, spring, springs, swamp, town, trace, trail, valley, village, and wells, in various portions of Canada and the United States. The term Red Indian, applied to the Beothuk, has given Newfoundland a number of place names.

Many wild plants have been called "Indian" in order to mark them off from familiar sorts. Use by Indians has been the origin of another class of such terms.

The following plants have been called after the Indian.

Indian apple.—The May apple, or wild mandrake (Podophyllum peltatum).

Indian arrow.—The burning bush, or wahoo (Euonymus atropurpureus).

Indian arrow-wood.—The flowering dogwood or cornelian tree (Cornus florida).

Indian balm.—The erect trillium, or ill-seented wake-robin (Trillium erectum).

Indian bark.—The laurel magnolia, or sweet bay (Magnolia virginiana).

Indian beau.—(1) The catalpa, or bean-tree (Catalpa catalpa). (2) A New Jersey name of the groundnut (Apios apios).

Indian beard-grass.—The bushy beard-grass (Andropogon glomeratus).

Indian bitters.—A North Carolina name of the Fraser umbrella or cucumber tree ($Mognolia\ fraseri$).

Indian black drink.—The eassena, yaupon, black drink or Carolina tea (Ib.x cassine).

Indian boys and girls.—A western name of the Dutchman's breeches (Bikukulla cucullaria).

Indian bread.—The tuckshoe (Scelerotium giganteum).

Indian bread-root.—The prairie turnip, or pomme blanche (Psoraba esculenta).

Indian ccdar.—The hop-hornbeam, or iron-wood (Ostrya virginiana).

Indian charry.—(1) The service-berry, or june-berry (Amelanchier canadensis). (2) The Carolina buckthorn (Rhamnus caroliniana).

Indian chickweed.—The carpet-weed (Mollingo verticillata).

Indian chief.—A western name of the American cowslip or shooting-star (Dodecatheon meadia).

Indian vigar tree.—The common catalpa (Catalpa catalpa), a name in use in Pennsylvania, Maryland, and the District of Columbia. See Indian bean, above.

Indian corn.—Maize (Zea mays), for which an early name was Indian wheat.

Indian cucumber.— Medeola virginiana, also known as Indian cucumber-root.

Indian cup.—(1) The common pitcher-plant (Sarraccnia purpurea). (2) The cup-plant (Silphium perfoliatum).

Indian current.—The coral-herry (Symphoricarpos vulgaris),

Indian dye.—The yellow puccoon, or orangeroot (Hydrastis canadensis); also known as yellow-root.

Indian clm.—The slippery elm (Ulmus fulva), Indian fig. (1) The eastern prickly pear (Opuntia opuntia). (2) Cereus giganteus, or saguaro, the giant cereus of Arizona, California, Mexico, and New Mexico.

Indian fog.—The crooked yellow stone-crop or dwarf house-leek (Sedum reflexum).

Indian gravel-root.—The tall boneset or joe-pye-weed (Eupatorium purpurcum).

Indian hamp,—(1) The army-root (Apocynum cannahinum), called also black Indian hemp. (2) The swamp milkweed (Asclepias incarnata) and the hairy milk-weed (Asclepias incarnata) white Indian hemp. (3) A West Virginia name for the yellow toad-flax (Linaria linaria), (4) The velvet-leaf (Abutilon abutilon), called also Indian mallow.

Indian hippo.—The bowman's root (Parter-authus trifoliatus), called also Indian physic.

Indian lemonade.—A California name, according to Bergen, for the fragrant sumue (Rhus trilbata).

Indian lettuce.—The round-leaved wintergreen (Pyrola rotandifolia).

Indian mollow.—(1) The velvet-leaf (Abntilon), also known as Indian hemp.—(2) The prickly sida (Sida spinosa).

 $Indian\ melon. - \hbox{A Colorado name of a species} \\ \text{of } Echinocactus.$

Indian millet.—The silky oryzopsis (Oryzopsis cuspidata).

Indian moccasia. - The stemless lady's-slipper or moccasia flower (Cypripedium acaule)

Indian maximize, or moose misse.—The American mountain-ash or dogberry (Sorbus americana).

Indian paint.—(1) The strawberry-blite (Blitum capitalium).—(2) The hoary puccoon (Lithospermum canescens).—(3) A Wisconsin name, according to Bergen, for a species of Tradescantia.—(4) Bloodroot (Sanguinaria canadensis), called red Indian paint.—(5) The yellow puccoon (Hydrastis canadensis), called yellow Indian paint.

Indiau paint-brush.—The scarlet painted eup (Castilleja coccinea).

Indian peach.—Ungrafted peach trees, according to Bartlett, which are considered to be more thrifty and said to bear larger fruit. In the South a specific variety of clingstone peach.

Indian panr.—The service-berry (Amelanchier canadensis), called also wild Indian pear.

Indian physic,—(1) The bowman's-root (Porteranthus trifoliatus), called also Indian hippo. (2) American ipecae (Porteranthus stipulatus). (3) Fraser's magnolia, the long-leaved umbrella-tree (Magnolia fraseri).

Indian pine.—The lobbolly, or old-field pine (Pinus lacda).

Indian pink.—(1) The Carolina pink, or worm-grass (Spigelia marylandica). (2) The cypress-vine (Quamoclit quamoclit). (3) The fire pink (Silene virginica). (4) The cuckooflower, or ragged robin (Lychnis flos-cuculi). (5) The fringed milkwort, or polygala (Polygala pancifolia). (6) The scarlet-painted cup (Castilleja coccinea). (7) The wild pink (Silena pennsylvanica). (8) Silene californica.

Indian pipe.—The corpse-plant or ghost-flower (Monotropa uniflora).

Indian pitcher.—The pitcher-plant or side-saddle flower (Sacracenia purpurea).

Indian plaintain.—(1) The great Indian plaintain or wild collard (Mesadenia reniformis.) (2) The pale Indian plaintain (M. atriplicifolia). (3) The tuberous Indian plaintain (M. tuberosa). (4) The sweet-scented Indian plaintain (Synosma suaveolens).

Indian poke.—(1) American white hellebore $(Veratrum\ vivide)$. —(2) False hellebore $(Veratrum\ vivide)$.

Indian posey.—(1) Sweet life-everlasting (Gnaphalium obtusifolium). (2) Large-flowered everlasting (Anaphalis argaritacca). (3) The butterfly weed (Asclepias tuberosa).

Indian potato. (4 The groundmit (Apios apios). (2) A western name for the squirrel-corn (Biknkulla canadensis). (3) A California name, according to Bergen, for Brodiwa capitata but according to Barrett (inf'ii, 1906) the term is indiscriminately given to many different species of bulbs and corms, which formed a considerable item in the food supply of the Californian Indians.

Indian puccoon.—The hoary puccoon (Lithospermum cam seens).

Indian red-root.—The red-root (Gyrotheca capitata.

Indian rhubarb.—A Californian name, according to Bergen, for Saxifraga peltata.

Indian rice.—Wild rice (Zizania aquatica).
Indian root.—The American spikenard (Aralia racemosa).

Indian sage.—The common thoroughwort or boneset (Eupatorium perfoliatum).

Indian shamrock.—The ill-scented wakerobin, or creet trillium (Trillium creetum).

Indian shoe.—The large yellow lady's-slipper (Cypripedium hirsutum).

Indian slipper.—The pink lady's-slipper, or moccasin-flower (Cypripedium acaule).

Indian soap-plant.—The soap-berry, or wild China-tree (Sapindus marginatus).

 $\begin{array}{ll} Indian & strawberry. + \mbox{The} & strawberry-blite} \\ + Blitum & capitatum) \, . \end{array}$

Indian tea.— Plants, the leaves, etc., of which have been infused by the Indians, and after them by whites; also the decoction made therefrom, for example, Labrador tea (Ledum gralandicum), which in Labrador is called Indian tea.

Indian tobacco.—(1) The wild tobacco (Lobelia inflata). (2) Wild tobacco (Nicotiana rustica). (3) The plaintain leaf everlasting (Antennaria plantaginifolia). (4) A New Jersey name, according to Bartlett, of the common mullein (Verbascum thapsus).

Indian turmeric.—The yellow puccoon, or orange-root (Hydrastis canadensis).

Indian turnip.—(1) The jack-in-the-pulpit (Arisaema triphyllum), also called three-leaved Indian turnip. (2) The prairie potato, or pomme blanche (Psovalea esculenta).

Indian vervain.—'A Newfoundland name, according to Bergen, for the shining club-moss (Lycopodium lucidulum).

Indian warrior.—A California name for Pedicularis densiflora.

Indian weed.—An early term for tobacco.

Indian wheat.—An early term for maize, or Indian corn.

Indian whart.—A Labrador and Newfoundland name for red bearberry or kinnikinnik (Arctostaphylos wa-ursi).

Indian wickup.—The great willow-herb or fireweed (Epilobium angustifolium), although Algonquian Indians called the basswood (Tilia americana) wickup.

There are, besides, the *Indian's dream*, the purple-stemmed cliff-brake (*Pellaea atropurpurea*), and the *Indian's plume*, Oswego tea (*Monarda didyma*).

Another series of terms in which the Indian is remembered is the following:

Indian bed.—A simple method of roasting clams, by placing them, hinges uppermost, on the ground, and building over them a fire of brushwood.

Indian bread.—Bread made of maize meal or of maize and rye meal.

Indian-corn hills.—(1) In Essex Co., Mass., according to Bartlett, hummocky land resembling hills of Indian corn. (2) Hillocks covering broad fields near the ancient mounds and earthworks of Ohio, Wisconsin, etc. (Lapham, Antiquities of Wisconsin).

Indian dab.—A Pennsylvania name for a sort of battercake.

Indian file.—Single file; the order in which Indians march.

Indian fort.—A name given to aboriginal earthworks in w. New York, in Ohio, and elsewhere.

Indian gift.—Something reclaimed after having been given, in reference to the alleged custom among Indians of expecting an equivalent for a gift or otherwise its return.

Indian giver.— A repentant giver.

Indian ladder.—A ladder made by trimming a small tree, the part of the branches near the stem being left as steps.

Indian liquor.—A Western term for whisky or rum adulterated for sale to the Indians.

Indian meal.— Maize or corn meal. A mixture of wheat and maize flour was called in earlier days "wheat and indian"; one of maize and rye flour, "rye and indian.

Indian orchard.—'According to Bartlett, a term used in New York and Massachusetts to designate an old orchard of ungrafted apple trees, the time of planting being unknown.

Indian pipestone.—A name for cathinite, the stone of which tribes in the region of the upper Mississippi made their tobaccopipes.

Indian pudding.—A pudding made of cornmeal, molasses, etc. Indian reservation or reserve.—A tract o land reserved by Government for the Indians-Indian sign.—A Western colloquialism of the earlier settlement days for a trace of the recent presence of Indians.

Indian sugar.—One of the earlier names for maple sugar.

Indian summer.—The short season of pleasant weather usually occurring about the middle of November, corresponding to the European St. Martha's summer, or summer of All Saints (Matthews in Mon. Weather Rev., Jan., 1902.)

The name Indian appears sometimes in children's games (Chamberlain in Jour. Am. Folk-lore, xv, 107-116, 1902).

In Canadian-French the usual term applied to the Indian was "sauvage" (savage); and hence are met such terms as "botte sauvage," "traîne sauvage," "tabagane," "thé sauvage." The "Siwash" of the Pacific coast and in the Chinook jargon is only a corruption of the "sauvage" of French-Canadian voyageurs.

(A. F. C.)

Indian Affairs, Department of.* The development of the Department of Indian Affairs of Canada can be traced from the earliest Colonial times.

Late in the 17th century the British Government recognized the necessity of appointing a staff of Officers who could deal directly with the Indians and become specialists in diplomatic relations with them. We find the first special Commissioner to have been Arnout Cornelius Veile who was appointed a Commissioner to the Five Nations in 1689. The Government of the Colony of New York in 1696 appointed four Commissioners to superintend Indian Affairs, but the number had reached 30 in 1739. Such abuses had crept into the Commission that it was found necessary to place the power in the hands of a single individual. William Johnson, a man even then distinguished for his ability to control the aborigines was appointed by Governor Clinton in 1726. His methods of dealing with Indians moulded the whole policy and practice of the Department for 100 years, and it may be said that his influence has not yet ceased. At the Treaty of Paris there existed a strong Indian administration upon which the vast conquered territory could be grafted. Sir William Johnson extended the northern district and appointed a Deputy to carry on his well considered policy. At this time there were prob-

^{*}Memorandum received from Mr. Frank Pedley, Detury Mariet, Lept. of Iroian Affairs

ably 40,000 Indians under his control. When Sir William Johnson died he was succeeded by Colonel Guy Johnson, his son-in-law, who was appointed temporarily by General Gage, and who was confirmed in the position on the 8th September, 1774. During the important period of the Revolution he was in charge of the Indian Department, and held the position until February, 1782, when he was suspended. It was certain that the Department required reorganization as irregularities had led to Sir Guy's suspension. He was succeeded by Sir John Johnson, son of Sir William, who, by Royal Commission, was appointed Superintendent General and Inspector General on the 14th March, 1782. He continued at the head of the Department although he was frequently an absentee from duty, until the 25th June, 1828, when the office was abolished. The head of the Department was then designated as Chief Superintendent and Major Darling was the first to occupy the new position. He reeeived a salary of £600, and his headquarters were at Montreal. Subordinates throughout the country were responsible for the local administration but there was frequent friction between the civil and military authorities as to the responsibility for the conduct of Indian Affairs. The jurisdiction was clearly defined by a general order of the 13th August, 1816, in which the superintendence of the Indian Department and Indian Affairs was transferred to the Military Command. This Military administration lasted until the year 1830, when the then Secretary of State for the Colonies, Sir George Murray, placed Indian Affairs in the hands of the Civil authorities dividing the country into two Departments, one for Upper and one for Lower Canada. At the head of the Department for Upper Canada was Sir John Colborne, his immediate subordinate being Colonel James Givins, Chief Superintendent. The Department for Lower Canada was administered by the Military Secretary of the Governor General at Quebec. When the change took place Lieutenant-Colonel Cooper occupied this position. Lieutenant-Colonel D. C. Napier was the Sceretary for Indian Affairs for Lower Canada and drew the pay of a Chief Superintendent. This organization continued until after the union of the Provinces. Following a report of the Royal Commission appointed by General Sir Charles Bagot in 1842, Indian Affairs were placed under the orders of the Civil Secretary of the Governor General, the two Provincial Departments were joined and the business was thereafter-conducted from the seat of Government. The report recommended a special clerk as assistant to the Civil Secretary. Mr. George Varden, was the first occupant of this office. Shortly after, on the 1st July, 1845, the office of Chief Superintendent was abolished, the then occupant being Mr. Samuel P. Jarvis who had succeeded Colonel Givins. The administration by the Civil Secretary continued until the 1st July, 1860.

For over 200 years control of Indian Affairs had been maintained by the Imperial Government. The Indians were considered as adjuncts of the Military arm and until the third decade of the 19th century very little had been done by Government for their education. Missionaries and private individuals were the pioneers in evangelization and education. The chief duty of the Military Indian Department was to distribute the presents which the Indians had enjoyed from the earliest times and which were rewards for allegiance and inducements to loyalty. These presents were a heavy burden on the Imperial exchequer and caused friction between the Home Government and the provincial authorities. Careful investigation showed that they could not be continued in the best interests of the Indians and they were gradually diminished and finally done away with. The cessation of this responsibility on the part of the Imperial Government was synchronous with the assumption by the Provincial authorities of the responsibilities for Indian management. The administration of Indian Affairs was assigned to the Department of Crown lands by Act 23 Vic. Cap. 151, and all Indian funds at that time otherwise invested were capitalized and taken over by the Provincial Government. The Commissioner of Crown Lands, under the title of Chief Superintendent of Indian Affairs, administered the Department. The Hon. P. N. Vankonghnet, Hon. Geo. Sherwood, Hon. William McDougall, Hon. Alexander Campbell, successively occupied this position. The latter's term of office ceased with the old Province of Canada on the 30th June, 1867. After Confederation, Indian Affairs were attached to the Department of the Secretary of State by Act 31 Vic. Cap. 42, and the title of Superintendent of Indian Affairs was revived. Hon. H. L. Langevin, Hon. Joseph Howe, Hon, T. N. Gibbs, who were Secretaries of State, were also Superintendents General of Indian Affairs. When the Department of

Interior was created by 36 Vic. Cap. 24, Indian Affairs were attached to that Department and were conducted by the Minister of the Interior except between the 17th October, 1878, and the 4th August, 1885, when the Rt. Hon. Sir John A. McDonald, President of the Privy Council, was Superintendent General. By Act 43 Vic., Cap. 28, which was assented to on the 7th May, 1880, Indian Affairs were constituted and organized as a separate Department. The Minister of the Interior or the head of any other Department appointed for that purpose by the Governor General in Council shall be the Superintendent General of Indian Affairs. The office of Deputy Superintendent was created by Order-in-Council. 17th March, 1862, and Mr. William Spragge occupied that position until his death 16th April, 1874, when he was succeeded by Mr. Lawrence Vankonghnet who administered until his superannuation, 10th October, 1893. His successors in office have been Mr. Hayter Reed. Mr. James A. Smart, and Mr. Frank Pedley.

Intietook (*Inti-ctook*). Given by Ross (Advent., 290, 1847) as an Okinagan tribe.

Inugsulik. A summer settlement of the Aivilirmiut Eskimo on the N. coast of Repulse bay, N. Hudson bay.

Enook-sha-lig.—Ross, Second Voy, 430, 1835 Inugsulik.—Boas in 6th Rep. B. A. E., map, 1888

Inuhksoyistamiks. (In-uhk'-so-yi-stam-iks, 'long tail lodge poles'). A band of the Kainah division of the Siksika.—Grinnell, Blackfoot Lodge Tales, 209, 1892.

Inuissuitmiut. An Eskimo tribe that occupied Depot id, and the adjacent coast of Hudson bay before 1800. The last descendant died some years ago.—Boas in Bull. Am. Mus. Nat. Hist., xv, 6, 1901.

Inuksikahkopwaiks (I-nuk-si'-kah-kopwatks, 'small brittle fat'). A division of the Piegan Siksika.—Grinnell, Blackfoot Lodge Tales, 209, 225, 1892.

Inuksiks ('small robes'). A former division of the Piegan Siksika.

A-miks'-eks.—Hayden, Ethnog, and Philol. Mo. Val., 264, 1862. I-nuks'-iks.—Grinnell, Blackfoot I odge Tales, 209, 1892. Little Robes.—Culbertson in Smithson. Rep. 1850, 144, 1851. Small Robes.—Grinnell, op. cit., 225.

Invention. In the language of the Patent Office, "an invention is something new and useful." The word applies to the apparatus of human activities and to the processes in-

volved. The life of culture from the lowest savagery to the highest civilization is an increase in the artificialities of life. There were no tribes in America without culture, and the lowest of them had inventions. For instance, the Fuegians had learned to convert the fishspear into a barbed harpoon by fastening the detachable head, which was set loosely in the socket, to the end of a shaft by means of a short piece of rawhide. They had also invented a canoe of bark made in three pieces. When they wished to move to a new bay or inlet between which and the last there was a dangerous headland, they could take the canoe apart, carry it over the intervening mountain, and unite the parts by lashing, covering the joints with pitch. The most ingenious savages on the continent, however, were the Eskimo, all of whose apparatus used in their various activities show innumerable additions and changes, which are inventions. They lived surrounded by the largest animals in the world, which they were able to capture by their ingenuity. Their snow domes, waterproof clothing, skin canoes, sinew-backed bows, snowshoes, traps and snares in myriad varieties, some of which they shared with neighbouring Indian tribes, amaze these who study them. Among other ingenious devices which would pass under the name of inventions are: the use of skids by the N. W. Coast natives for rolling logs into place in building their immense communal dwellings; the employment of the parbuckle to assist in the work of moving logs; the use of a separate fly of rawhide at the top of the tipi, which could be moved by means of a pole with one end resting on the ground, so that the wind would not drive the smoke back into the tipi; driving a peg of known length into the side of a canoc as a gauge for the adzenian in chipping out the inside; the boiling of food in baskets or utensils of wood, gourd, or rawhide, by means of hot stones; the attachment of inflated sealskins to the end of a harpoon line to impede the progress of game through the water after it was struck; the sinew-backed bow, which enabled the Eskimo hunter to emilov brittle wood for the rigid portion and sinew string for propulsion; The continuous motion spindle; the reciprocating drill; the sand saw for hard stone, and all sorts of signalling and sign language.

Ipoksimaiks (I'-pok-si-maiks, 'fat roasters') A division of the Piegan.

E-pōh'-si-mīks.—Hayden, Ethnog and Philol Mo Val., 264., 1862 (='the band that fries fat'). Fat Roasters. Grunell, Blackfoot Lodge Tales, 225, 1892 Ih-po'-se-ma.—Morgan, Anc. Soc., 171, 1877 (='web-fat'). I'-pok-si-maiks.—Grunell, op. cit., 209

Iroquoian Family. A linguistic stock consisting of the following tribes and tribal groups: the Hurons composed of the Attignaouantan (Bear people), the Attigneenongnahae (Cord people), the Arendahronon (Rock people), the Tohontaenrat (Atahontaenrat or Tohontaenrat, White-eared or Deer people), the Wenrohronon, the Ataronchronon, and the Atonthrataronon (Otter people, an Algonquian tribe); the Tionontati or Tobacco people or nation; the confederation of the Attiwendaronk or Neutrals, composed of the Neutrals proper, the Aondironon, the Ongniarahronon, and the Atiragenratka (Atiraguenrek); the Conkhandeenhronon; the Iroquois confederation composed of the Mohawk, the Oneida, Onondaga, the Cayuga, and the Seneca, with the Tuscarora after 1726; and, in later times, the incorporated remnants of a number of alien tribes, such as the Tutelo, the Saponi, the Nantieoke, the Conov, and the Muskwaki or Foxes; the Conestoga or Susquehanna of at least three tribes, of which one was the Akhrakouaehronon or Atrakonachronon; the Eric or Cat nation of at least two allied peoples; the Tuscarora confederation composed of several leagued tribes, the names of which are now unknown; the Nottaway; the Meherrin; and the Cherokee composed of at least three divisions, the Elati, the Middle Cherokee, and the Atali; and the Onnontioga consisting of the Iroquois-Catholic secceders on the St. Lawrence.

Each tribe was an independent political unit, except those which formed leagues in which the constituent tribes, while enjoying local self-government, acted jointly in common affairs. For this reason there was no general name for themselves common to all the tribes.

Jacques Cartier, in 1534, met on the shore of Gaspe basin people of the Iroquoian stock, whom, in the following year, he again encoun-

tered in their home on the site of the city of He found both banks of the Quebec. St. Lawrence above Quebec, as far as the site of Montreal, occupied by people of this family. He visited the villages Hagonchenda. Hochelaga, Hochelavi, Stadacona, and Tutonaguy. This was the first known habitat of an Iroquoian people. Champlain found these territories entirely deserted 70 years later, and Lescarbot found people roving over this area speaking an entirely different language from that recorded by Cartier. believed that this change of languages was due to "a destruction of people," because, he writes, "some years ago the Iroquois assembled themselves to the number of 8,000 men and destroyed all their enemies, whom they surprised in their enclosures." The new language which he recorded was Algonquian, spoken by bands that passed over this region on warlike forays.

The early occupants of the St. Lawrence were probably the Arcadahronon and Tohontaenrat, tribes of the Hurons. Their lands bordered on those of the Iroquois, whose territory extended westward to that of the Neutrals, neighbours of the Tionontati and western Huron tribes to the N. and the Erie to the s, and w. The Conestoga occupied the middle and lower basin of the Susquehanna s. of the Iroquois. The N. Iroquoian area, which Algonquian tribes surrounded on nearly every side, therefore embraced nearly the entire valley of the St. Lawrence, the basins of lake Ontario and lake Eric, the s. E. shores of lake Huron and Georgian bay, all of the present New York state except the lower Hudson valley, all of central Pennsylvania, and the shores of Chesapeake bay in Maryland as far as Choptank and Patuxent rs. In the S. the Cherokee area, surrounded by Algonquian tribes on the N., Siouan on the E., and Muskhogean and Uchean tribes on the s. and w., embraced the valleys of the Tennessee and upper Sayannah rs. and the mountainous part of Virginia, the Carolinas, and Alabama. Separated from the Cherokee by the territory of the eastern Siouan tribes was the area occupied by the Tuscarora in E. North Carolina and by the Meherrin and Nottaway N. of them in s. E. Virginia.

The northern Iroquoian tribes, especially the Five Nations so called, were second to no other Indian people N. of Mexico in political organization, statecraft, and military prowess. Their leaders were astute diplomats, as the

wilv French and English statesmen with whom they treated soon discovered. In war they practised ferocious cruelty toward their prisoners, burning even their unadopted women and infant prisoners; but, far from being a race of rude and savage warriors, they were a kindly and affectionate people, full of keen sympathy for kin aud friends in distress, kind and deferential to their women, exceedingly fond of their children, anxiously striving for peace and good will among men, and profoundly imbued with a just reverence for the constitution of their commonwealth and for its founders. Their wars were waged primarily to secure and perpetuate their political life and independence. The fundamental principles of their confederation, persistently maintained for centuries by force of arms and by compacts with other peoples, were based primarily on blood relationship, and they shaped and directed their foreign and internal polity in consonance with these principles. The underlying motive for the institution of the Iroquois league was to seeure universal peace and welfare $(ne^{ij} sk\tilde{e}\tilde{n}^i no^{ni})$ among men by the recognition and enforcement of the forms of civil government (ne'' gā'i'hwiio) through the direction and regulation of personal and public conduct and thought in accordance with beneficent customs and council degrees; by the stopping of bloodshed in the blood-feud through the tender of the prescribed price for the killing of a co-tribesman; by abstaining from eating human flesh; and, lastly, through the maintenance and necessary exercise of power (ne" gă' shăsdon"sä'), not only military but also magic power believed to be embodied in the forms of their ceremonial activities. The tender by the homicide and his family for the murder or killing by accident of a co-tribesman was twenty strings of wampum-ten for the dead person, and ten for the forfeited life of the homicide.

The religious activities of these tribes expressed themselves in the worship of all environing elements and bodies and many creatures of a teeming fancy, which, directly or remotely affecting their welfare, were regarded as man-beings or anthropic personages endowed with life, volition, and peculiar individual orenda, or magic power. In the practice of this religion, ethics or morals, as such, far from having a primary had only a secondary, if any, consideration. The status and personal relations of the personages of their pantheon were fixed and regulated by

rules and customs similar to those in vogue in the social and political organization of the people, and there was, therefore, among at least the principal gods, a kinship system patterned on that of the people themselves.

The mental superiority of the Hurons (q.v.) over their Algonquian neighbours is frequently mentioned by the early French missionaries. A remainder of the Tionontati, with a few refugee Hurons among them, having fled to the region of the upper lakes, along with certain Ottawa tribes, to escape the Iroquois invasion in 1649, maintained among their fellow refugees, a predominating influence. This was largely because, like other Iroquoian tribes, they had been highly organized socially and politically, and were therefore trained in definite parliamentary customs and procedure. The fact that, although but a small tribe, the Hurons claimed and exercised the right of lighting the council fire at all general gatherings, shows the esteem in which they were held by their neighbours. The Cherokee were the first tribe to adopt a constitutional form of government, embodied in a code of laws written in their own language in an alphabet based on the Roman characters adapted by one of them, though, in weighing these facts, their large infusion of white blood must be

The social organization of the Iroquoian tribes was in some respects similar to that of some other Indians, but it was much more complex and cohesive, and there was a notable difference in regard to the important position accorded the women. Among the Cherokee, the Iroquois, the Hurons, and probably among the other tribes, the women performed important and esssential functions in their government. Every chief was chosen and retained his position, and every important measure was enacted by the consent and co-operation of the child-bearing women, and the candidate for a chiefship was nominated by the suffrages of the matrons of this group. His selection by them from among their sons had to be confirmed by the tribal and the federal councils respectively, and finally he was installed into office by federal officers. Lands and houses belonged solely to the women.

All the Iroquoian tribes were sedentary and agricultural, depending on the chase for only a small part of their subsistence. The northern tribes were especially noted for their skill in fortification and house-building. Their so-called eastles were solid log structures, with

platforms running around the top on the inside, from which stones and other missiles could be hurled down upon besiegers.

For the population of the tribes composing the Iroquoian family see *Iroquois* and the descriptions of the various Iroquoian tribes.

Iroquois (Algonkin: Irinakhoiw, 'real adders,' with the French suffix -ois). The confederation of Iroquoian tribes known in history among other names, by that of the Five Nations, comprising the Cayuga, Mehawk, Oneida, Onondaga, and Seneca. Their name for themselves as a political body was Oñgwanonsionni', 'we are of the extended lodge.' Among the Iroquoian tribes kinship is traced through the blood of the woman only; kinship means membership in a family, and this in turn constitutes citizenship in the tribe, conferring certain social, political, and religious privileges, duties and rights which are denied to persons of alien blood; but, by a legal fiction embodied in the right of adoption, the blood of the alien may be figuratively changed into one of the strains of the Iroquoian blood, and thus citizenship may be conferred on a person of alien lineage. In an Iroquoian tribe the legislative, judicial and executive functions are usually exercised by one and the same class of persons, commonly called chiefs in English, who are organized into councils. There are three grades of chiefs. The chiefship is hereditary in certain of the simplest political units in the government of the tribe; a chief is nominated by the suffrages of the matrons of this unit, and the nomination is confirmed by the tribal and the federal councils. The functions of the three grades of chiefs are defined in the rules of procedure. When the five Iroquoian tribes were organized into a confederation, its government was only a development of that of the separate tribes, just as the government of each of the constituent tribes was a development of that of the several clans of which it was composed. The government of the clan was a development of that of the several broad families of which it was composed, and the broad family, strictly speaking, was composed of the progeny of a woman and her female descendants, counting through the female line only; hence the clan may be described as a permanent body of kindred, socially and politically organized, who trace actual and theoretical descent through the female line only. The simpler units surrendered part of their autonomy to the next higher units in such wise that the whole was closely interdependent and cohesive. The establishment of the higher unit created new rights, privileges, and duties. This was the principle of organization of the confederation of the five Iroquoian tribes. The date of the formation of this confederation (probably not the first, but the last of a series of attempts to unite the several tribes in a federal union) was not earlier than about the year 1570, which is some 30 years anterior to that of the Huron tribes.

The Delawares gave them the name Mingwe. The northern and western Algonquians called them Nadowa, 'adders.' The Powhatan called them Massawomekes. The English knew them as the Confederation of the Five Nations, and, after the admission of the Tuscarora in 1722, as the Six Nations. Moreover, the names Maqua, Mohawk, Seneca, and Tsonnontowan, by which their leading tribes were called, were also applied to them collectively. The League of the Iroquois, when first known to Europeans, was composed of the five tribes, and occupied the territory extending from the E, watershed of take Champlain to the w. watershed of Genesee r., and from the Adirondacks southward to the ter-

^ritory of the Conestoga. The date of the formation of the league is not certain, but there is evidence that it took place about 1570, occasioned by wars with Algonquian and Huron tribes. The confederated Iroquois immediately began to make their united power felt. After the coming of the Dutch, from whom they procured firearms, they were able to extend their conquests over all the neighbouring tribes until their dominion was acknowledged from the Ottawa r. to the Tennessee and from the Kennebee to Illinois r. and lake Michigan. Their westward advance was checked by the Chippewa; the Cherokee and the Catawba proved an effectual barrier in the S., while in the N. they were hampered by the operations of the French in Canada. Champlain on one of his early expeditions joined a party of Canadian Indians against the Iroquois. This made them bitter enemies of the French, whom they afterwards opposed at every step to the close of the French régime in Canada in 1763, while they were firm allies of the English. The French made several attempts through their missionaries to win over the Iroquois, and were so far successful that a considerable number of individuals from the different tribes, most of them Mohawk and Onondaga, withdrew from the several tribes and formed Catholic settlements at Caughnawaga and St. Regis, on the St. Lawrence, and Oka, on the Ottawa. tribes of the league repeatedly tried, but without success, to induce them to return, and finally, in 1684, declared them to be traitors. In later wars the Catholic Iroquois took part with the French against their former brethren. On the breaking out of the American Revolution the League of the Iroquois decided not to take part in the conflict, but to allow each tribe to decide itself what action to take. tribes, with the exception of the Oneida and about half of the Tuscarora, remained loval to the British Crown. revolution the Mohawk and Cayuga, with other loyalist Iroquoian tribes, after several temporary assignments, were finally settled by the Canadian government on a reservation on Grand r., Ontario, where they still reside, although a few individuals emigrated to Gibson, Bay of Quinte and Delaware, Ont., and to Caughnawaga, Que. All the Iroquois in the United States are on reservations in New York, with the

exception of the Oneida, who are settled near Green Bay, Wis. The so-called Seneca of Oklahoma are composed of the remnants of many tribes, among which may be mentioned the Conestoga and Hurons, and of emigrants from all the tribes of the Iroquoian confederation. It is very probable that the nucleus of these Seneca was the remnant of the ancient Erie. The Catholic Iroquois of Canghnawaga, St. Regis, and Oka, although having no connection with the confederation, supplied many recruits to the fur trade, and a large number of them have become permanently resident among the northwestern tribes of the United States and Canada.

The number of the Iroquois villages varied greatly at different periods and from decade to decade. In 1657 there were about 24, but after the conquest of the Erie the entire country from the Genesee to the w. watershed of lake Erie came into possession of the Iroquoian tribes, which afterwards settled colonies on the upper waters of the Allegheny and Susquehanna and on the N. shore of lake Ontario, so that by 1750 their villages may have numbered about 50. The population of the Iroquois also varied much at different periods. Their constant wars greatly weakened them. In 1689 it it was estimated that they had 2,250 warriors, who were reduced by war, disease and defections to Canada, to 1,230 in 1698. losses were largely made up by their system of wholesale adoption, which was carried on to such an extent that at one time their adopted aliens were reported to equal or exceed the number of the native Iroquois. Disregarding the extraordinary estimates of some early writers, it is evident that the modern Iroquois, instead of decreasing in population, have increased, and number more at present than at any former period. On account of the defection of the Catholic Iroquois and the omission of the Tuscarora from the estimates it was impossible to get a statement of the full strength of the Iroquois until within recent times. About the middle of the 17th century the Tive Nations were supposed to have reached their highest point, and in 1677 and 1685 they were estimated at about 16,000. In 1689 they were estimated at about 12,850, but in the next 9 years they lost more than half by war and by desertions to Canada. The most accurate estimates for the 18th century gave to the Six Nations and their colonies about 10,000 or 12,000 souls. In 1774

they were estimated at 10,000 to 12,500. In 1911 they numbered about 16,000, including more than 3,000 mixed-bloods, as follows:

In Ontario; Iroquois and Algonkin at Watha Gibson), 130 (about one-half Iroquois); Mohawk of the Bay of Quinte, 1,343; Oneida of the Thames, 777; Six Nations on Grand r., 4,299 (Mohawk, 1,867; Oneida, 362; Onondaga, 367; Tuscarora, 421; Cayuga, 1,063; Seneca, 219). In Quebec: Iroquois of Caughnawaga, 2,240; of St. Regis, 1,515; of Lake of Two Mountains, 434. There are also Iroquois in the Michel reserve, w. of Edmonton, Alta. It is interesting to note that they are the descendants of the voyageurs of the North West and Hudson's Bay companies. Total in Canada, about 10,738.

The Iroquois of New York in 1904 were distributed as follows: Onondaga and Seneca on Allegany res., 1,041; Cayuga, Onondaga, and Seneca on Cattaraugus res., 1,456; Oneida on Oneida res., 150; Oneida and Onondaga on Onondaga res., 513; St. Regis res., 1,208; Cayuga and Seneca on Tonawanda res., 512; Onondaga and Tuscarora on Tuscarora res., 410. Total, 5,290.

In 1905 there were also 366 Indians classed as Seneca under the Seneca School, Okla.

The Algonquian and other Indians included with the Iroquois are probably outnumbered by the Caughnawaga and others in Alberta who are not separately enumerated.

The following villages were Iroquois, but the particular tribes to which they belonged are either unknown or are collective: Adjouquay, Allaquippa, Anpuaqun, Aquatsagana, Aratumquat, Awegen, Blackleg's Village, Buckaloon, Cahunghage, Canowdowsa, Caughnawaga, Chartierstown, Chemegaide, Chenango, Chinklacamoose, Chugnut, Churamuk, Codocoraren, Cokanuck, Conaquanosshan, Conejoholo, Conemaugh, Conihunta, Connosomothdian, Conoytown (mixed Conoy and Iroquois), Coreorgonel (mixed), Cowawago, Cussewago, Ganadoga, Ganagarahhare, Ganasarage, Ganeraske, Ganneious, Gannentaha, Glasswanoge, Goshgoshunk (mixed), Grand River Indians, Hickorytown (mixed), Janundat, Jedakne, Johnstown, Jonondes, Juniata. Juraken (2), Kahendohon, Kanaghsaws, Kannawalohalla, Kanesadageh, Karaken, Karha-Karhawenradon, Kayehkwarageh, tionni, Kavgen, Kenté, Kickenapawling, Kiskiminetas Kittaning, Kuskuski (mixed), Lawunkhannek, Logstown, Loyalhannon (?), Mahusquechikoken, Mahican, Mahoping, Manckatawan-

Matchasaung, Middletown, Mingo gum, Town, Mohanet, Nescopeck, Newtown (4 settlements), Newtychaning, Octageron, Ohrekionni, Onaweron, Onkwe Iyede, Opolopong, Oquaga, Osewingo, Oskawaserenhon, Oswegatchie, Ostonwackin, Otiahanague. Otskwirakeron, Ousagwentera, Owego, Paille Coupée, Pluggy's Town, Punxatawney, Runonyea, Saint Regis, Saweunk, Schoharie, Schohorage, Sconassi, Scoutash's Town, Sevegé, Sewickly's Old Town, Shamokin, Shannopin, Shenango, Sheshequin, Sheoquage, Sittawingo, Skannavutenate, Skehandowa, Solocka, Swahadowri, Taiaiagon, Tewanondadon, Tioga, Tohoguses Cabins, Tonikata, Tullihas, Tusearora, Tuskokogie, Tutelo, Unadilla, Venango, Wakitomica, Wakerhon, Wauteghe, Yoghroonwago, Youcham. Catholie missions among the Iroquois were: Caughnawaga, Indian Point, La Montagne, La Prairie, Oka, Oswegatchie, St. Regis, and Sault-au-Recollet. For the other Iroquois settlements, see under the several tribal names.

Iroquoise Chippeways. The Catholic Iroquois and Nipissing settled at Oka, Quebec.—Schermerhorn 1812 in Mass. Hist. Soc. Coll., 2d s., II, 11, 1814.

Isalwakten. A body of Salish of Fraser superintendency, Brit. Col.

Isalwakten.—Can Inl. Aff., 79, 1878. Isalwalken.—Ibid., 138, 1879.

Isamis, A body of Salish of Fraser superintendency, Brit. Col.—Can. Incl. Aff., 78, 1878.

Isamuck. A body of Salish of Fraser superintendency, Brit. Col.

Isammuck.—Can Ind. Aff , 138, 1879. Isamuck.—Ibad , 78, 1878

Isisokasimiks 'I-sis'-o-kus-im-iks, 'hair shirts'. A division of the Kainah.

Hair Shirts.—Grinnell, Blackfoot Ledge Tales, 200, 1892. I-sis-'o-kas-im-iks.—Ibid. The Robes with Hair on the outside.—Culbertson in Smithson. Rep. 1850, 144, 1851.

Isle aux Tourtes (French: turtle-dove island . A French Sulpitian mission station.

probably on Ottawa r., Quebec, begun for the Algonkin and Nipissing about 1720, but shortly afterward removed to Oka, q.v.—Shea, Cath. Miss., 333, 1855.

I Isle of St. Johns. A village or resort of a band of Micmae, probably in Nova Scotia,* in 1760.—Frye (1760) in Mass. Hist. Soc. Coll. 1st s., x, 115, 1809.

Islets de Jeremie. An Indian mission, probably Montagnais, on the lower St. Lawrence, Quebec, in 4863.—Hind, Lab. Penin., n, 179, 1863.

Islyamen. A village w. of the Tlaamen and n. of Texada id., on the mainland of British Columbia.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Isquepah. A Sumas village on the N.
 bank of Fraser r., Brit. Col., opposite the lake.
 Brit. Col. map, Ind. Aff., Victoria, 1872.

Istsikainah (*Is-tsi'-kai-nah*, 'woods Bloods') A division of the Kainah.

Is-tsl'-kai-nah.—Grinnell, Blackfoot Lodge Tales, 209, 1892. Woods Bloods.—Ibid.

Itamamiou. A Montagnais mission in 1854, E. of Natashkwan, on the N. bank of the St. Lawrence, Quebec.

Itamameou.—Arnand (1854) in Hind, Lab. Penin., 11, 178, 1863. Itamamiou.—Hind, ibid., 180.

Itijarelling. A summer settlement of Padlimiut Eskimo on Exeter sd., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Itivimiut. ('people of the farther side,' so ealled by the Eskimo of Labrador proper). A tribe of Ungava Eskimo inhabiting the E. coast of Hudson bay, from lat. 53° to 58°; pop. estimated at 500. These people hunt in the interior half-way across the peninsula, continually scouring the coast for seal and the plains and hills for caribou to obtain necessary food and clothing.

Itivimiut.—Turner in Trans. Roy. Soc. Can, 11, 99, 1888. Thiviment.—Boas in Am. Antiq, 40, 1888 (misprint).

Itliok. A Squawmish village community on the left bank of Skwamish r., Brit. Col. Îtli'ōq.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900. Yillō'q.—Boas, MS., B. A. E., 1887.

Itscheabine. A division of the Assimboin, numbering 850, including 250 warriors, in 100 tipis, when seen by Lewis and Clark in 1804, at which time they roved on the headwaters

of the Souris, Qu'Appelle, and Assiniboine rs., in Canada and the United States. In 1808, according to Henry (Coues, New Light, 11, 522, 1897), they were at enmity with the Dakota, Shoshoni, and with some of the Arikara and other tribes, but were friendly with the Cree. They lived by hunting, conducting trade with the Hudson's Bay, Northwest, and X. Y. fur companies. They are said to have paid little attention to their engagements and were great drunkards. In 1853 they numbered 10 lodges under chief Les Yeux Gris. (F. W. H.)

Gens de Feuilles.-Lewis and Clark, Exped, 1, 217, 1893. Gens de la Feuille.-Badin (1830) in Ann. de la Prop. de la Foi, iv, 536, 1843 (same?). Gens des fees or Girls.-Orig. Jour. Lewis and Clark, vr. 104 1905 (given as traders' nickname). Gens des filles.-Maximilian, Trav., 194, 1843. Gens des Tee.-Orig. Jour. Lewis and Clark, op. cit. Girls' band.-Hayden quoted by Dorsey in 15th Rep. B. A. E., 222, 1897. ltscheabine.-Maximilian, op. cit. Little Girl Assiniboines.—Coues, Henry and Thompson Joar. (1808), ii, 522, 1897. Na-co'-tah O-see-gah.—Orig. Jour. Lewis and Clark, op. cit. Osgeegah.—Ibid. We-che-ap-pe-nah.-Denig (1853) quoted by Dorsey, op. cit. Wi-ic'-ap-i-nah.-Hayden, Ethnog. and Philol. Mo. Val., 387, 1862. Witcinyanpina.—Dorsey in 15th Rep. B. A. E., 223, 1897.

Ittatso. The principal village of the Ucluclet (q.v.) on Ucluclet arm of Barkley sd., w. coast of Vancouver id.—Can. Ind. Aff., 263, 1902.

Jack Indians. An unidentified tribe mentioned by Dobbs (Hudson Bay, 13, 1744), who states that in 1731, they came to trade at the mouth of Albany river, Ontario. Named as distinct from Moose River Indians (Monsoni), Sturgeon Indians (Nameuilini), and French Indians.

Jackquyome (Jack-quy-ome). A body of Salish of Kamloops agency, Brit. Col.; pop. 257 in 1884, when their name appears for the last time.—Can. Ind. Aff. for 1884, 188.

Jatonabine ('people of the rocks'). An Assiniboin band living in 1808 in N. W. Manitoba, and having 40 tipis.

E-an-to-ah.—Denig quoted by Dorsey in 15th Rep. B. A. E., 222, 1897 ('Stone Indians': "the original appellation for the whole nation"). Eascab.—Franklin, Narr, 104, 1823. Gens de Roche.—Hbid., 306. Gens des Roches.—Hayden, Ethnog, and Philol. Mo. Val., 387, 1862. Gens des rosches.—U.S. Ind. Aff. Rep., 289, 1854. I'-ay-to'-an.—Hayden, Ethnog, and Philol. Mo. Val., 387, 1862. fe-ska-pi.—Am. Natur., 829, 1882. I"ya"to"wa".—Dorsey in 15th Rep. B. A. E., 223, 1897 (= 'stone village'). Jatonabinè.—Maximilian, Trav., 194, 1843. Rocks.—Larpenteur (1829), Narr., 1, 109, 1898. Stone Indians.—Maximilian, Trav., 194, 843 (so called by the English).

^{*}The French called the present Prince Edward Island, He St Jean.

Jones, Peter (Kahkewaquonaby, Kahkewagwonnaby). A mixed-blood Missisauga chief, missionary, and author; born Jan. 1, 1802, died June 29, 1856. His father was a white man of Welsh descent named Augustus Jones, who maintained the closest friendship with Brant during the latter's life. Peter's mother was Tuhbenalineeguay, daughter of Wahbanosay, a chief of the Missisauga of Credit. Peter and his brother John were born at the extreme w. end of lake Ontario, on a tract of land known as Burlington heights. He remained with his tribe, following their customs and accompanying them on their excursions, until his 16th year, when his father, who was then a government surveyor, had him baptized by Rev. Ralph Leeming, an English Episcopal minister, at the Mohawk church on Grand r., near Brantford, Ont. Having professed religion at a camp meeting held near Aneaster, Ont., and taken an active part in the religious exercises of the Wesleyan Methodist Church, Peter was sent on a missionary tour, in 1827, to lake Simcoe, lake St. Clair. Muncey, and other points in w. Ontario, although not vet ordained. He had by this time entered upon his literary work, as in this year was published a hymn book translated by him into Chippewa. He was eonstituted a deacon of the Weslevan Methodist conference in 1830, and as minister by Rev. George Marsden at the Toronto conference in 1833. The remainder of his life was devoted chiefly to missionary work among the Missisauga and Chippewa, and to some extent among the Iroquois. His position as a Christian pastor and ruling chief of his tribe gave him great influence, not only among his own people, but among all the Chippewa tribes. He visited England and New York, and made repeated journeys to Toronto in the prosecution of his work and in behalf of his people. It was largely through his efforts that the titles of the Credit Indians to their lands were perfected. Although inured to out-door life and of a somewhat robust frame, his constitution began to yield to excessive exposures, resulting in his death near Brantford, in 1856. A monument was crected to his memory, in 1857, with the inscription: "Frected by the Ojibeway and other Indian tribes to their revered and beloved chief. Kahkewaquonaby (the Rev. Peter Jones ... A memorial tablet was placed by his family in the Indian church at the New Credit settlement.

Ryerson (Ojebway Indians, 18, 1861) describes Jones as "a man of athletic frame, as well as of masculine intellect; a man of clear perception, good judgment, great decision of character; a sound preacher, fervent and powerful in his appeals; very well informed on general subjects, extensively acquainted with men and things." His wife was an English woman, who with 4 sons survived him. His seventh son, Peter E. Jones, who bore his father's name (Kah-ke-wa-quo-na-by), was editor of a periodical, *The Indian*, published at Hagersville, Ont., in 1885-86.

In addition to the volume of hymns, first printed in 1829, republished in 1836, and in various enlarged editions in later years, Jones translated also into Chippewa a volume of Additional Hymns (1861), an Ojibway Spelling Book (1828), Part of the New Testament (1829). The First Book of Moses (1835), and Part of the Discipline of the Wesleyan Methodist Church in Canada (1835). He also wrote the Life and Journals of Kah-ke-wa-quo-na-by (Rev. Peter Jones), 1860, and a History of the Ojebway Indians, with Especial Reference to their Conversion to Christianity, 1861. Consult Pilling, Bibliog. Algonq. Lang., Bull. B. A. E., 1891.

Kaake (Qā'āqē). A Salish tribe which formerly occupied the s. e. coast of Valdez id., Brit. Col., and spoke the Comox dialect. It is now extinct.—Boas, MS., B. A. E., 1887.

Kaayahunik. A Squawmish village on the w. bank of Skwamish r., Brit. Col.—Brit. Adm. chart, No. 1917.

Kabahseh ('sturgeon'). A gens of the Abnaki.

Kä-bäh'-seh.—Morgan, Anc. Soc., 174, 1877. Ka-basa.—J. Dyneley Prince, ini'n, 1905 (modern St. Francis Abnaki form).

Kadadjans (Q'adadja'ns, said to be applied to a person who gets angry with another and talks of him behind his back; a backbiter). A town of the Hagilanas of the Haida, on the N. w. end of Anthony id., Queen Charlotte ids., Brit. Col., on which also stood the town of Ninstints.—Swanton, Cont. Haida, 277, 1905.

Kadusgo Q'ā'dasgo. A Haida town or camp on Louise id. Queen Charlotte group. Brit. Col., at the mouth of a creek bearing the same name, which flows into Cumshewa inlet from the s. The family which occupied it

came to be called Kadusgo-kegawai ('those born at Kadus-go').—Swanton, Cont. Haida, 278, 1905.

Kadusgo-kegawai (Q!ā'dasgo qē'gawa-i, 'those born at Kadusgo creek'). A family belonging to the Raven clan of the Haida, residing in the town of Kloo, Queen Charlotte ids., Brit. Col. The name was derived from that of an old camping place on the N. side of Louise id., and the people claimed descent from the Hlgahetgu-lanas of Old Gold Harbour; but until recent years they occupied a low position socially. At present they form one of the most numerons of the surviving family groups of the tribe. (J. R. S.) K"adas ke'ē'owai.-Boas, 12th Rep. N. W. Tribes Canada, 25, 1898. Q!ā'dasgo qē'gawa-l.—Swanton,

Kae (Qā-i, 'sea-lion town'). A former llaida town on Skotsgai bay, above Skidegate, Queen Charlotte ids., Brit. Col. It was occupied by the Kaiahl-lanas, who took their name from the place before they moved to Kaisun.

Cont. Haida, 269, 1905.

(J. R. S.)

Kagials-kegawai (Qā'gials qē'gawa-i, 'those born at Kagials'). An important family of the Raven clan of the Haida, which derives its name from a reef near Lawn hill, at the mouth of Skidegate inlet, Queen Charlotte ids., Brit. Col., where some of the people formerly lived. A second name was Lge'nolla'nas, 'people of [the town of] Cumshewa,' whence one portion of the Kagials-kegawai is said to have moved. Their own town was Skedans, and their chief was one of the most influential on the islands. Subdivisions of the family were the Kils-haidagai and Kogaahllanas, the latter being of low social rank. The Kagials-kegawai claim to have sprung from a woman who floated ashore at Hot Springs id. in a coekleshell. They were closely connected with the Tadji-lanas, who appear to have originated in the same locality.

(J. R. S.)

K'agyalsk'ë'owal.—Boas, 12th Rep. N. W. Tribes Can., 24, 1898. Lqe'nol lā'nas.—Swanton, Cont. Haida, 269, 1905. Qā'gials qē'gawa-i.—Ibid. Tik'inotl lā'nas.—Boas, op. cit.

Kahlguihlgahet - gitinai (Qalguī'-lgā'xet gitina'-i, 'the Pebble-town Giti'ns living on the side of the town up the inlet'). A small branch of a Haida family called Hlgahet-gitinai living on the w. coast of Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 284, 1905.

Kahligua - haidagai (Qā'liguarā'-idaqa-i, 'people living at the end of the town up the inlet'). A subdivision of the Stawas-haidagai, a family of the Eagle clan of the Haida in Brit. Col., so named from the position of their houses in the town.—Swanton, Cont. Haida, 273, 1905.

Kahmitaiks ('buffalo dung'). A division of the Piegan tribe of the Siksika.

Buffalo Dung.—Grinnell, Blackfoot Lodge Tales, 225, 1892. Kah'-mi-raiks.—Ibid, 209.

Kaiahl-lanas (Qā'-ial lā'nas, 'people of sea-lion town'). A family of the Eagle clan of the Haida, so called from the town which they formerly occupied on Skotsgai bay, near Skidegate, Queen Charlotte ids., Brit. Col. After difficulties with their neighbours they moved to the w. coast, where they built the town of Kaisun. The remnant is now at Skidegate. They claimed community of origin with the Kona-kegawai, Djiguaahl-lanas, and Stawas-haidagai.

(J. R. S.)

K'ai'atl lā'nas.—Boas in 12th Rep. N. W. Tribes Can., 24, 1898. Qā'-ial lā'nas.—Swanton, Cont. Haida, 274, 1905. Qā'-ita lā'nas.—Ibid.

Kaiak, kayak. The men's boat of the Eskimo of N. E. North America, from qajaq $(q = German \ ch)$, the name in the eastern dialects of the Eskimo language.

(A. F. C.)

Kaidju (Qai'dju, 'songs-of-victory town'). A Haida town on a point opposite Danger rocks, Moresby id., Queen Charlotte ids., Brit. Col., occupied by the Tadji-lanas. The Kaidju-kegawai, a subdivision of the Tadji-lanas, took its name from this town.—Swanton, Cont. Haida, 277, 1905.

Kaidju. A Haida town in Hewlett bay, on the E. coast of Moresby id., Queen Charlotte ids., Brit. Col. 1t was occupied by the Kas-lanas.—Swanton, Cont. Haida, 277, 1905.

Kaidjudal (Qai'djudal). A former Haida town on Moresby id., opposite Hot Spring id., Queen Charlotte group, Brit. Col. It was occupied by the Huldanggats.—Swanton, Cont. Ilaida, 278, 1905.

Kaidju-kegawai (Qai'dju që'qawa-i those born at Songs-of-victory town'). A subdivision of the Tadji-lanas, a family belonging to the Gunghet-haidagai (Ninstints people) of the Haida of British Columbia.—Swanton, Cont. Haida, 269, 1905.

Kaigani $(K/aig\bar{a}'ni)$. A division of the Haida, living in Alaska. Their name is derived from that of a camping place or summer settlement where they were accustomed to assemble to meet incoming vessels and to trade with the whites. The Kaigani emigrated from the N. w. end of Queen Charlotte ids. between 150 and 200 years ago, drove the Thingit (Koluschan) from the s. end of Prince of Wales id., and took possession of their towns. The most important of these settlements were Sukwan, Klinkwan, Howkan, and Kasaan, which bear their old Tlingit names. The last three are still inhabited. Like many Thingit tribes, but unlike other Haida, the Kaigani subdivisions often took their names from the name given to some individual house. About 1840 the population was estimated at 1,735. According to Petron's report (10th Census, Alaska) they numbered 788 in 1880; in 1890 the population was given as 391. Their present number probably does not exceed 300.

(J. R. S.)

Kaiaganies.—Halleck ·1869) in Morris, Resources of Alaska, 67, 1879. Kaigan.—Terry in Rep. Sec. War, 1, 40, 1868-69. Kaigani.—Dawson, Queen Charlotte Ids., 104r, 1880. Kegarnie.—Dunn, Hist. Oregon, 281, 1844. Kigarnie.—Duflot de Mofras, Oregon, 1, 335, 336, 1844. Kigarnee.—Ludewig, Aborig. Lang. America, 187, 1860. Kigenes.—Am. Pioneer, 11, 189, 1843. Kygani.—Dall in Proc. A. A. A. S., 269, 1869. Kyganies.—Scouler in Jour. Geog. Soc. Lond., 1, 219, 1841. Kygany.—Gibbs after Anderson in Hist. Mag., 74, 1863. Kygargey.—Schoolcraft, Ind. Tribes, v., 489, 1855. after Work, 1836—41). Kygarney.—Kane, Wand. N. A., app., 1859 (after Wark, 1836-41).

Kaiihl-lanas Qai-il lā'nas). A subdivision of the Dostlan-lnagai, a family group of the Haida, named from a camping place on the w. coast of Queen Charlotte ids., Brit. Col.

(J. R. S.

Kainah (Ah-kai-nah, 'many chiefs,' from a-kai-im 'many.' ni'-nah 'chiefs'). A division of the Siksika (q. v.), or Blackfeet, now living on a reservation under the Blood agency in southern Alberta, between Belly and St. Mary rs.; area 540 sq. m. The subtribes or bands are Ahkaiksuniks, Ahkaipokaks, Ahkotashiks, Ahkwonistsists, Anepo, Apikaiyiks, Aputosikainah, Inuhksoyistamiks, Isisokasimiks, Istsikainah, Mameoya, Nitikskiks, Saksinahmahyiks, Siksahpuniks, and Siksinokaks. According to the Report of the Commissioner of Indian Affairs for 1858, there were then 300 tipis and 2,400 persons. In 1911 there were 1,122 persons on the reservation.

Bloodies.—Hind, Red R. Exped., 157, 1860 (so called by half-breeds). Blood Indians.—Writer of 1786 in

Mass. Hist. Soc. Coll., 1st s , 111, 24, 1794. Blood People.-Morgan, Consang. and Affin., 289, 1871. Blut Indianer .- Walch, map, 1805 (German form). Ede-but-say.—Anon. Crow MS. vocab, B. A. E. Crow name). Gens du Sang.—Duflot de Mofras, Expl., 11, 342, 1844 Indiens du Sang.-Ibid., 339. Kaenna.-Maximilian, Travels, 245, 1843. Kahna.-Ibid. Kai'-e-na.-Hayden, Ethnog. and Philel. Mo. Val., 256, 1862. Kaimè.—Browne in Beach, Ind. Miscel., 81, 1877. Kai'-na.—Clark Wissler, ini'n, 1905 (Piegan dialectic form). Kai'nau.—Tims, Blackfoot Gram, and Dict , 113, 1889 (Siksika name). Kaine'koon.-Franklin, Journ. Polar Sea, t, 170, 1824 (own name). Kam'-ne.-Hayden, op. cit., 402 Crow name). Ke'na.—Hale, Ethnol. and Philol, 219, 1846 (sing., Keneku'n) Ki-nä.-Morgan, Consang. and Affin, 289, 1871 (trans.: 'high minded people'). Kinene-ai-koon.—Henry, MS, vocab, 1808. Ki'-no.—Morgan, Anc. Soc, 171, 1877. Meethco-thinyoowuc. -Franklin, Journ. Polar Sea, 1, 170, 1824. We'-wica-sa.-Cook, Yankton MS. vocab, B. A. E., 1882 (Yankton name).

Kaisun (Qai'sun . A former Haida town on the N. w. coast of Moresby id. Oucen Charlotte group, Brit. Col. It belonged to the Kaiahl-lanas, who settled there after moving from Skidegate inlet, but before that time the Kas-lanas are said to have occupied it. By the whites Kaisun was sometimes called Gold Harbour, or, to distinguish it from the town afterward built on Maude id. by the west-coast people, Old Gold Harbour; but this term is properly applicable to Skaito, a camp on Gold Harbour, itself occupied by Haida from all parts of the Queen Charlotte ids, during the time of the gold excitement. Kaisun is the Kish-a-win of John Wark's list, which was accredited by him with 18 houses and 329 people in 1836-41. Since the old people can still remember 17 houses, Wark's figures would appear to be trustworthy. The few survivors of Kaisun now live at Skidegate. (J. R. S.

Kaishun.—Dawson, Q. Charlotte Ids., 168, 1880. K'ai's'nn.—Boas, Twelfth Report N.W. Tribes Canada, 24, 1880. Kaiswun Hāadē.—Harrison in Proc. and Trans. Roy. Soc. Can., sec. 11, 125, 1895. Kish-a-win. —Schoolcraft, Ind. Tribes, v., 489, 1855. after Wark, 1836—415. Qai'sun.—Swanton, Cont. Haida, 287, 1905.

Kakake. Given as the Pigeon-hawk gens of the Chippewa, but really the Raven (Kagigingens of that tribe.

Kagagi.--Wm. Jones, inf'n, 1906. Ka-kaik.--Tanner, Narr., 314, 1830 ('hen hawk'). Ka-kake'.---Morgan, Anc. Soc., 166, 1877 ('pigeon hawk').

Kakapoya ('inside fat.'—Morgan). Given as a division of the Piegan tribe of the Siksika. Perhaps the same as Inuksikahkopwaiks, q.v. Inside Fat.—Morgan, Anc. Soc., 171, 1877. Ka-ka'-po-ya.—Hid.

2 GEORGE V., A. 1912

Kakawatilikya (Qā" qawatilik'a). A gens of the Tsawatenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Kakekt (Xāx'ēqt). An extinct Salish tribe which formerly lived at cape Lazo, E. coast of Vancouver id., and spoke the Comox dialect. Boas, MS., B. A. E., 1887.

Kakonchaki (from kakow, 'porcupine'). A small Montagnais tribe formerly living on lake 8t. John, Quebec. They frequently visited Tadoussae with other northern tribes and were occasionally visited in their country by the missionaries.

Kacouchakhi.—Can. Ind. Aff., 40, 1879. Kak8a-zakhi.—Jes. Rel. for 1641, 57, 1858. Kakouchac.—ibid., 1672, 44. Kakouchakhi.—Ibid., 1643, 38. Kakouchaki.—Champlain, Œnyres, 17, 21, note, 1870. Nation des Porc epics.—Jes. Rel. for 1638, 24, 1858. Nation of the Porcupine.—Winsor, Cartier to Frontenac, 171, 1894. Porcupine Tribe.—Charlevoix, Hist. N. France, 11, 1866.

Kaksine (Qāk'sinē). A Squawmish village community on Mamukum er., left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kalokwis (Qā'logwis 'crooked beach'). A village of the Tlauitsis on Turnour id., Brit. Col. It was the legendary home of the Kwakiutl tribe at which all the transformations of animals took place.

Kā-loo-kwis.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. 11, 72. Kar-luk-wees.—Boas in Bull. Am. Geog. Soc., 229, 1887. Qā'logwis.—Boas, inf'n, 1906. = 'crooked beach'). Qalukwis.—Boas in Bull. Am. Geog. Soc., op. cit.

Kalulaadlek (Kalulaā', LEX, 'small house of owl': A village of the Ntlakyapamuk on the E. side of Fraser r., about 24 m. above Yale, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900.

Kamloops ('point between the rivers'). A village at the junction of South Thompson and North Thompson rs., Brit. Col., occupied by Shuswap Salish; pop. 242 in 1911. It gave its name to Kamloops Indian agency.

Kam-a-loo'-pa.—Dawson in Trans. Roy. Soc. Can. for 1891, sec. 17, 7 mative name). Kameloups.—De Smet, Oregen, Miss. 100, 1847. Kamloops.—Cox, Columbia. Haver, 16, 87, 1831. Salst Kamlúps.—Gatschet, MS, F. A. E. Okimagan name, from Salst, 'people').

Kammuck. A former body of Salish of Fraser superintendency, Brit. Col.

Kammack,—Can. Ind. Aff. for 1879, 138. Kammuck,—Ibid., 1878, 79.

Kanatiochtiage 'place of wild rice'. A former Iroquois settlement or village on the

N. shore of lake Ontario, inhabited chiefly by "Dowaganhaes" and reputed to be "near the Sennekes [Seneca] country." It was situated near Tchojachiage, or approximately on the site of Darlington or Port Hope, in Durham county, Ontario. Three nations, composing 16 "castles," came to settle there by Iroquois permission. (J. N. B. H.)

Ganadatsiagon.—Frontenac (1673) in N. Y. Doc. Col. Hist, rx, 112, 1855. Ganatcheskiagon.—Ibid, note. Ganatoheskiagon.—Ibid. Kanatlochtlage.—Doc. of 1700, ibid., rx, 694, 1854.

Kandoucho. A former village of the Neutrals in Ontario, near the Huron country, Kandoucho.—Jes. Rel. for 1641, 75, 1858. Tous les Salnts.—Ibid. (mission name).

Kangertloaping ('remarkable fiord'). A summer settlement of Okomint Eskimo of Saumia, at the head of an inlet emptying into Cumberland sd., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Kangertluk ('fiord'). A spring and fall settlement of Iglulirmiut Eskimo on N. Melville penin, near the Fox channel coast, N. Hudson bay.—Boas in 6th Rep. B. A. E., map, 1888.

Kangertlukdjuaq ('great fiord'). A summer settlement of Okomiut Eskimo of Saumia, at the head of an inlet emptying into Cumberland sd., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Kangertlung ('fiord'). A summer settlement of Talirpia Okomiut Eskimo on the s.w. coast of Cumberland sd., Baffin id.—Boas in 6th Rep. Rep. B. A. E., map, 1888.

Kangguatl-lanas (Qā'nguat lā'nas). An extinct subdivision of the Stustas, a family of the Eagle clan of the Haida of British Columbia. (J. R. S.)

K'anguatl Iā'nai.—Boas, 12th Rep. N. W. Tribes Can. 22, 1898. Qā'nguat Iā'nas.—Swanton, Cont. Haida', 276, 1905.

Kanghishunpegnaka ('those who wear crow feathers in their hair'). A division of the Sihasapa or Blackfoot Sioux.

Kangi-sun-pegnaka.—Dorsey in 15th Rep. B. A. E., 219, 1897. Kahxi-cun-pegnaka.—Ibid.

Kangivamiut ("people at the head"). A subtribe of the Sunkinimiut Eskimo living in the region of George r., N. Ungava, Que.

Kangivamiut.—Boas in 6th Rep., B. A. E., map, 1888. Kan'gûk‡lua'luksoagmyut.—Threer in 11th Rep. B. A. E., 176, 1894 = 'people of the great bay'). Kañûktlualuksoagmyut.—Turner in Trans. Roy. Soc. Can., v., 99, 1888.

Kangmaligmiut ('distant ones'). An Arctic Eskimo tribe between Manning pt. and Herschel id. The name has been attached to different local groups all the way from pt. Hope to Mackenzie r.

Kadjakians.—Rink in Jour. Anthrop. Inst., xv, 240, 1886. Kakmalikg.—Zagoskin, Descr. Russ. Poss. Am., pt. 1, 74, 1847. Kangingdit.—Rink, op. cit., 240. Kangmali-enyuin.—Richardson, Polar Regions, 300, 1861. Kangmaligmeut.—Murdoch in Ninth Rep. B. A. E., 46, 1892. Kängmäli'gmūt.—Dall in Cont. N. A. Ethnol., 7, 10, 1877. Kangmaliinnuin.—Simpson quoted by Dall, ibid. Kangmalik.—Woolfein 11th Census, Alaska, 130, 1893. Kangnialis.—Keane-in Stanford, Compend., 517, 1878. Kanmalienyuin.—Murdoch in 9th Rep. B. A. E., 46, 1892. Kūnmu'd līn.—Ibid., 43, 46. Western Mackenzie Innuit.—Dall in Cont. N. A. Ethnol., 1, 12, 1877 (collective term including Kopagmiut and Kangmaligmiut

Kangormiut ('goose people'). A tribe of Central Eskimo living in Victoria island, Franklin, N.W.T.

Kang-orr-Mœoot.—Franklin, Journ. to Polar Sea, 11, 43, 1824 Kanq-or-mi-ut.—Richardson, Arct. Exped., 7, 362, 1851. Kañ-meut.—Petitot in Bib. Ling. et Ethnol. Am., 111, 1876 (Chiglit name). White-Goose Eskimos.—Franklin, op. cit., 42.

Kanhada (Ganhada, meaning obscure). One of the 4 clans or phratries into which all Indians of the Chimmesyan stock are divided. It is also applied specifically to various local subdivisions of the clan. One such is found in the Niska town of Lakkulzap and one in each of the Kitksan towns.—Kitwingach, Kitzegukla, and Kishpiyeoux.—Boas in 10th Rep. N. W. Tribes Can., 49-50, 1895,

Kanlax (Nxō'istEu, 'the point'). An Upper Lillooet town at the junction of Bridge and Fraser rs., interior of British Columbia; pop. 94 in 1911.

Bridge river.—Can. Ind. Aff. Rep. 1904, pt. 2, 72, 1905. Kan-lax'.—Dawson in Trans. Roy. Soc. Can. for 1891, sec. 11, 44. Nxō'isten.—Boas, inf'n, 1906.

Kapachichin ('sandy shore'). A Ntlakyapamuk town on the w. side of Fraser r., about 28 m. above Yale, Brit. Col.; pop. 52 in 1901.

Kapatci'tcin.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900. Kapatsitsan.—Can. Ind. Aff. for 1901, pt. 1, 164. Klapatci'tcin.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899. Kopachichin.—Brit. Col. map. Ind. Aff., Victoria, 1872. North Bend.—Teit, op. cit. (name given by whites).

Kaparoktolik. A summer settlement of Tununirusirmiut Eskimo near the entrance to Ponds inlet, Baffin island.—M'Clintock, Voy. of Γox, 162, 1859.

Kapaslok (K'apaslōq, 'sand roof'). A village of Ntlakyapamuk on Fraser r., above Suk, Brit. Col. It was formerly a large settlement.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Kapiminakouetiik. Mentioned in the Jesuit Relations (26, 1646) as a tribe living at some distance x. of Three Rivers, Que. Doubtless Montagnais, and possibly the Papinachois, q. v.

Kapkapetlp (Qapqapētlp, 'place of cedar' [?]). A Squawnish village community at Point Grey, Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Karhadage ('in the forest.'—Hewitt). An unidentified tribe, band, or village, probably in Canada, with which the Iroquois affirmed they had made peace in 1701. Mentioned with the Chippewa, Missisauga, Nipissing and others (Livingston in N.Y. Doc. Col. Hist., IV, 899, 1854). Cf. Karhagaghrooney, Karigouistes, Karrihaet. (J. M.)

Karhagaghrooney (Karhagaronon, 'people of the woods'). According to Sir Wm. Johnson a name applied by the Iroquois to wandering Indians N. of Quebec; but as he suggests Carillon on Ottawa r. as the best point for a post of trade with them, they were probably more to the westward. Dobbs placed them N. of lake Huron. The term is a collective one, referring to wandering bands of different tribes, possibly to the Têtes de Boule, and to those called O'pimittish Ininiwae by Henry.

Karhagaghrooneys.—Johnson (1764) in N. Y. Doc. Col. Hist., vii, 658, 1856. Kirhawguagh Roanu.— Dobbs, Hudson Bay, 28, 1744.

Kariak. A summer settlement of Aivilirmiut Eskimo on Lyon inlet, n. end of Hudson bay.—Boas in 6th Rep. B.A.E., 450, 1888.

Karigouistes. The name given by the Iroquois to the Catholic Indians of Canada, probably more especially to the Caughnawaga. The name seems to have reference to a long dress, possibly the gowns worn by the priests.

(J. N. B. H.)

Caraguists.—Colden (1727), Five Nations, 163, 1747. Karigouistes.—Bacqueville de la Potherie, 117, 200, 1753. Karig8stes.—Dellins (1694) in N. Y. Doc. Col. Hist., 1v, 95, 1854.

Karmakdjuin (Qarmaqdjuin, 'large huts'). A summer settlement of the Akudnirmiut Eskimo on Home bay, Baffin island.—Boas in 6th Rep. B. A. E., 441, 1888.

Karmakdjuin. A village of Padlimiut Eskimo on the coast just n. of Exeter sd., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Karmang (Qarmang, 'hut'). A summer settlement of Talirpingmiut Okomiut Eskimo at the N.w. end of Nettilling lake, w. of Cumberland sd., Baffin id.—Boas in 6th Rep. B. A. E.., map,1888.

Karrihaet. Given as the name of a tribe, probably in Canada, with whom the Iroquois made peace in 1701. Mentioned with the Chippewa, Missisauga, Nipissing, and others.—Livingston (1701) in N. Y. Doc. Col. Hist., IV, 899, 1854. Cf. Karigouistes, Karhadage.

Karsukan. A spring settlement of Okomiut Eskimo of Saumia, on the coast of Baffin island, N. of Cumberland sd.—Boas in 6th Rep. B. A. E., map, 1888.

Karusuit ('the caves'). A village of the Talirpingmiut Okomiut Eskimo on Nettilling fiord, w. shore of Cumberland sd.; pop. 29 in 1883.

Kaiossuit,—Boas in Deutsche Geog. Blatt, viii, 32, 1885. K'arussuit.—Boas in Petermanns Mitt, no. 80, 70, 1885. Kemasuit.—Kumlien in Bull. Nat. Mus, no. 15, 15, 1879. Kemesuit.—Ibid. Kimmocksowick.—Warcham in Jour. Roy. Geog. Soc., xii, 24, 1842. Qarussuit.—Boas in 6th Rep. B. A. E., 426, 1888.

Kaska. Given by Dawson Rep. Geol. Surv. Can., 199B, 1889) as a division of the Nahane, comprising the Achetotena (Etchareottine) and Dahotena (Etagottine) tribes. They are described as undersized and of poor physique, have the reputation of being timid, and are lazy and untrustworthy, but are comparatively prosperous, as their country yields good furs in abundance. According to Morice (Trans. Can. Inst., vii, 519, 1892-93), however "Kaska is the name of no tribe or subtribe, but McDame cr. is called by the Nahane Kasha . . . and this is the real word which, corrupted into Cossiar by the whites, has since a score of years or more served to designate the whole mining region from the Coast range to the Rocky nits., along and particularly to the N, of the Stikine r." The name Kaska is not recognized by the Indians themselves, who form the third division of Morice's classification of the Nahane. They number about 200. (A. F. C.)

Kas-lanas Q'ās lā'nas, 'pitch-town people') A family of the Rayen clan of the

Haida. They inhabited the w. coast of Moresby id., Queen Charlotte group, Brit. Col., had no crests like the other Haida divisions, and were regarded as barbarous by the latter. Their principal town was in Tasu harbour.—Swanton, Cont. Haida, 270, 1905.

Kassigiakdjuak (Qassigiaqdjuaq). A winter settlement of Nugumiut Eskimo on Frobisher bay, s.e. Baffin island.—Boas in 6th Rep. B.A. E., map, 1888.

Kasta (Q!ā'sta). A legendary Haida town on Copper bay, Moresby id., Queen Charlotte group, Brit. Col. It was named for the creek (Skidegate cr.), which ran near it, and was occupied by the Daiyuahl-lanas.—Swanton, Cont. Haida, 279, 1905.

Kastitchewanuk. A Cree band on Albany r., х. Ontario, in 1770.—Hutchins (1770) in Richardson, Arctic Exped., и, 37, 1851.

Katagemane (Kä-tu'-gemă-ne, 'starving'). Given by Morgan (Anc. Soc., 171, 1877) as a division of the Piegan tribe of the Siksika, q. v.

Katana (K/ā'(ama). A former Haida town on Louise id., Queen Charlotte group, Brit. Col., in possession of the Kagials-kegawai.—Swanton, Cont. Haida, 279, 1905.

Katernuna perhaps jargon 'Kater land'). A Talirpingmiut Eskimo village of the Okomiut tribe on Cumberland sd., Baffin island.—Howgate, Cruise of Florence, 84, 1879.

Kathlaram. A body of Salish formerly under Fraser superintendency, British Columbia; now no longer officially reported.

Kathlaram.—Canadian Ind. Aff., 79, 1878 Kathlarem.—Ibid., 138, 1879.

Kathachtna Plovers of glass beads'. A Knaiakhotana clan.—Richardson, Arct. Exped., 1, 407, 1851.

Katsey. A Cowichan tribe occupying the villages of Seltsas and Shuwalethet, on Pitt lake and river emptying into the lower Fraser Brit. Col.; pop. 78 in 1911.

Kaitze.—Brit. Adm. Chart, no. 1917. Katezie.— Can. Ind Aff fer 1878, 79. Katsey.—Can. Ind. Rep. 1901, pt. 2, 158. Katzie.—Ibid., 14, 11, 1911. K ĕ'ētsē.— Boas in Rep. 64th Meeting Brit. A. A. 8, 454, 1894. Ke'tsī.—Ibil-Tout in Ethnol Surv. Can., 54, 1902.

Katshikotin. A part of the Hankutchin living on Yukon r., a short distance below Fortymile r., near the Yukon-Alaska boundary.

Ka-tshik-otin.—Dawson in Rep. Geol. Surv. Can. for 1888, 2028, 1889. Klat-ol-klin.—Schwatka, Rep. on Alaska, 86, 1885 (name given by Russian half-breeds).

Katzik. Two Indian settlements on the s. bank of lower Fraser r., below Sumas lake, Brit. Col. (Brit. Col. map, Ind. Aff., Victoria, 1872). Perhaps the name refers to the Katsey tribe. *Hatzic* is a railway station on Can. Pac. ry.

Kaudjukdjuak (Qaudjuqdjuaq). A winter settlement of the Akudnirmiut Eskimo between Frobisher bay and Cumberland sd., Baffin island.—Boas in 6th Rep. B.A.E., map, 1888.

Kauldaw. The Kitksan division and town lying farthest inland toward the headwaters of Skeena r., under the Babine and Skeena River agency, Brit. Col.; pop. 37 in 1911.

Culdoah.—Horetzky, Canada on Pac., 212, 1874.
Gal-doe.—Can. Ind. Aff. Rep., 431, 1896. Gal Doe.—
Ibid., 252, 1891. Gol-doe.—Ibid., 280, 1894. Kal-doe.—Ibid, 415, 1898. Kaul-daw.—Dorsey in Am.
Antiq, xix, 278, 1897. Kuldo.—Brit. Col. map, 1872.
Kuldoe.—Can. Ind. Aff., pt. II, 160, 1901. Kuldōs.—
Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884.

Kaumauangmiut (from the lake of the same name, around which they chiefly dwell). An Eskimo tribe in s. E. Baffin island, probably closely related to the Nugumiut.

Karmowong.—Hall, Arctic Researches, 294, 1865. Kaumanang.—Boas in Deutsche Geog. Blatt., viii, 32, 1885 (misprint). K'aumauangmlut.—Boas in Petermanns Mitt., no. 80, 70, 1885. Quaumauangmiut.—Boas in 6th Rep. B. A. E., 421, 1888.

Kauten (Kau'ten). A Squawmish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Kawas (K/ā'was, 'fish eggs'). A subdivision of the Stustas, an important family of the Eagle clan of the Haida. One of their chiefs is said to have been blown across to the Stikine country, where he became a chief among the Stikine. (J. n. s.)

K'ā'was.—Boas, 12th Rep. N. W. Tribes Canada, 22, 1898. K!ā'was.—Swanton, Cont. Haida, 275, 1905. Kouas.—Harrison in Proc. and Trans. Roy. Soc. Can., sec. п, 125, 1895.

Kawchodinne (ka 'hare,' cho 'great,' dinne 'people': 'people of the great hares'). An Athapascan tribe dwelling N. of Great Bear lake, Mackenzie dist., N.W.T., on Mackenzie r., the lakes E. of it, and Anderson r. Mackenzie (Voy., 1, 206, 1802) said they were a small tribe residing on Peace r., who spoke the language of the Chipewyan and derived

their name from the Arctic hare, their chief means of support. At another time (Mass. Hist. Coll., 11, 43, 1814) he placed them on Porcupine r., Yukon and Alaska. Franklin (Journ. to Polar Sea, 261, 1824) placed them immediately N. of the Thlingchadinne on the N. side of the outlet of Bear lake. Back (Journal, 497, 1833-35) located them on Mackenzie r. as far N. as 68°. Richardson (Arct. Exped., n, 3, 1851) gave their habitat as the banks of Mackenzie r. from Great Slave lake downward. Hind (Lab. Penin., 11, 261, 1863) said they resorted to Ft. Norman and Ft. Good Hope on the Mackenzie, and also to Ft. Yukon, Alaska. Ross (MS., B.A.E.) said they resided in 1859 in the country surrounding Ft. Good Hope on Mackenzie r., extending beyond the Arctic circle, where they came in contact with the Kutchin, with whom by intermarriage they have formed the tribe of Bastard Loucheux (Nellagottine). Petitot (Dict. Dènè-Dindiié. xx, 1876) said the Kawehodinne lived on the lower Mackenzie from Ft. Norman to the Arctic ocean. They are described as a thickset people, who subsist partly on fish and reindeer, but obtain their clothing and most of their food from the hares that abound in their Their language differs little from country. that of the Etchareottine, while their style of dress and their customs are the same, although through long intercourse with the traders, for whom they have great respect, most of the old customs and beliefs of the tribe have become extinct. They are on friendly terms with the Eskimo. The Kawehodinne have a legend of the formation of the earth by the muskrat and the beaver. The dead are deposited in a rude cage built above ground, the body being wrapped in a blanket or a moose skin; the property of relatives is destroyed, and their hair is cut as a sign of mourning. When the supply of hares becomes exhausted, as it frequently does, they believe these mount to the sky by means of the trees and return in the same way when they reappear. Polygamy is now rare. They are a peaceable tribe, contrasting with their Kutchin neighbours. In personal combat they grasp each other by their hair, which they twist round and round until one of the contestants falls to the ground. They are not so numerous as formerly, a great many having died from starvation in 1841, at which time numerous acts of cannibalism are said to have occurred. In 1858 Ross (MS., B.A.E.) gave the population as 467; 291 males, 176

females. Of these 103 resorted to Ft. Norman and 364 to Ft. Good Hope. Petitot (Diet. Dene-Dindjié, xx. 1876; arranged them in five subdivisions: Nigottine, Katagottine, Katchogottine, Satchotugottine, and Nellagottine. In another list (Bull. Soc. Géog. Paris, 1875) instead of Nigottine he has Etatehogottine and Chintagottine. In a later grouping (Autour du lac des Esclaves, 362, 1891) Petitot identifies Katagottine with Chintagottine, suppresses Satchotugottine, and adds Kfwetragottine.

Dénè,-Petitot, Hare MS, vocab., B. A. E., 1869. Dênê Peaux-de-Lièvre.—Petitot, Autour du lac des Leclaves, 289, 1891. Harefoot Indians.-Chappell, Hudson Bay, 166, 1817. Hare Indians.-Mackenzic, Voy, 1, 206, 1802. Hareskins.-Petitot in Jour. Roy. Geog. Soc., 650, 1883. Kā-cho-'dtinnè.—Richardson, Arct. Exped., n. 3, 1851. Kah-cho tinne.-Ross quoted by Gibbs, MS, B. A. E. ('Arctic hare people'). Kancho.—Gallatin in Trans. Am. Antiq. Soc., 11, 19, 1836. Kat'a-got-tiné.-Petitot, MS. vocab., B. A. E., 1867. K'a-t'a-gottiné.-Petitot, Dict. Dênè-Dindjié, MA, 1876 ('people among the hares'). Kawchodinneh. -Franklin, Journ. to Polar Sea, 261, 1824. Kha-t'aottinė.—Petitot in Bull. Soc. Géog. Paris, chart, 1875. Khat a-Gottine.-Petitot, Autour du lac des Esclaves, 362, 1891 ('people among the rabbits'). Kkeayttchare ottiné.-Petitot, Hare MS. vocab., B. A. E., 1869 (Chipewyan name). Nouga.-Macfarlane (1857) in Hind. Lab. Penin., 11, 258, 1863 ('spittle': Eskimo name). Peau de Lièvre-Petitot in Bull. Soc. Géog. Paris, chart, 1875. Peaux-de-Lièvres.-Petitot, Autour du lac des Esclaves, 362, 1891. Rabbitskins .-McLean, Hudson Bay, 11, 243, 1849. Slave.-Richardson, Arct. Exped., 1, 242, 1851. Tä-nä-tin-ne.-Morgan, Consang. and Affin., 289, 1871.

Kawchogottine ('dwellers among the large hares'). A division of the Kawchodinne. Petitot, in 1867 (MS., B. A. E.), located them on the border of the wooded region N. E. of Ft. Good Hope, and in 1875 (Bull. Soc. de Géog. Paris, chart, 1875) on the headwaters of Anderson r., N. of Great Bear lake. The same authority (Autour du lac des Esclaves, 362, 1891) says their habitat is on the large lakes of the interior E. of Mackenzie r.

K'a-tchô-gottiné.—Petitot, Diet. Dènè-Dindjié, xx, 1876. Katchô-Ottiné.—Petitot in Can. Rec. Sci., r. 49, 1884. Kha-tchô-gottinè.—Petitot in Bull. Soc. de Géog. Paris, chart, 1875. Natlé-têa-Gottine.—Petitot, Autour du lac des Esclaves, 362, 1891 (= 'people among the little reindeer').

Kayung (Qlayā'n'). A Haida town on Masset inlet, Queen Charlotte ids, Brit. Col., just above Masset. It was occupied by the Kuna-lanas, who owned the place, and the Sagui-gitunai. John Wark does not give separate figures for the population of this town in 1836-41, but the old people estimate the number of houses at 14, which would

indicate about 175 people. The place was at one time entirely abandoned, but two or three families have recently returned to it.

(J. R. S.)

K''āya'ng.—Boas, 12th Rep. N. W. Tribes Can, 23, 1898. Kayung.—Dawson, Queen Charlotte Ids., 1638, 1880. Q'ayā'ñ inagā'-i.—Swanton, Cont. Haida, 281, 1905 (the people).

Kchegagonggo (K'chi-gā-gong'-go, 'pigeon-hawk'). A gens of the Abnaki (q.v.).—Morgan, Anc. Soc., 174, 1877.

Keda-Ianas (Q!ē'da lā'nas, 'strait people'). A subdivision of the Hagi-lanas, a family of Ninstints belonging to the Raven elan of the Haida. They received their name from a narrow strait in front of the town.—Swanton, Cont. Haida, 268, 1905.

Kedlamik (Qi''amix, 'broad patch of bushes'). An Okinagan village near Nicola lake, Brit, Col.

Łka⁷amix.—Teit in Mem. Am. Mus. Nat. Hist., 11 174, 1900. Qê''amix.—Ibid.

Keinouche (Kinōzhan, 'pickerel'). One of the divisions or chief bands of the Ottawa, q.v. The Jesuit Relation of 1640 locates them at that time, under the name Kinounchepirini, s. of the isle of the Algonquins (Allumettes id.) in Ottawa r. This would place them, if taken literally, some distance E. of lake Huron; but as the knowledge then possessed by the French was very imperfect, it is probable that the Relation of 1643, which places them on lake Huron, is more nearly correct. In 1658 they appear to have lived along the N. shore of the lake. Between 1660-70 they, with the Kiskakon and Sinago, were attached to the mission at Shaugawaumikong (now Bayfield), on the s. shore of lake Superior. It is probable however, that at the time of Father Menard's visit, in 1660, they were at Keweenaw bay. Mich. In 1670-71 they returned to Mackinaw, some passing on to Manitoulin id.; but it is probable that the latter, or a part of them, were included in the Sable band.

(J. M. C. T.)

Keinouché.—Jes. Rel. 1670, 87, 1858. Kinonchepiirinik.—Ibid., 1658, 22, 1858. Kinonchepirinik.—Ibid., 1643, 61, 1858. Klnouché.—Marquette (1670) quoted by Shea, Miss. Val., xlix, 1852. Kinouchebiirinionek.—Jes. Rel. 1646, 34, 1858. Kinounchepirini.—Ibid., 1640, 34, 1858. Quenongebin.—Champlain (1613), Œuvres, 111, 298, 1870.

Kekayeken (K'tk'ā'ytk'en). A Songish division residing between Esquimalt and Becher bay, s. end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Kekelun ($K^*\bar{e}'kelun$). A Squawmish village community on the w. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Kekertakdjuin (Qeqertaqdjuin, 'big island'). A spring settlement of Padlimiut Eskimo at the end of Howe bay, Baffin island.—Boas in 6th Rep. B.A.E., map, 4888.

Kekertaujang (Qeqertaujang, 'like an island'). A winter village of the Saumingmiut, a subtribe of the Okomiut Eskimo, on Cumberland penin., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Kekerten ('islands'). The winter village of the Kingnaitmiut Eskimo on the E. side of Cumberland id., Baffin island:pop. \$2 in 1883. K'eyerten.—Boas in Petermanns Mitt., no. \$0, 70, 1885. Kikkerton.—Kumlien in Bull. U. S. Nat. Mus., no. 15, 15, 1879. Qeqerten.—Boas in 6th Rep. B. A. E., 425, 1888.

Kekertukjuak (Qequituqdjuaq, 'big island') A spring settlement of Nugumiut Eskimo on an island in Frobisher bay, s. E. Baffin island. —Boas in 6th Rep. B. A. E., map, 1888.

Kekios. A Squawmish village community on the right bank of Skwamish r., s. B.C.

Qaqiō's.—Boas, MS., B. A. E., 1887. —Qā'qīōs.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kekwaiakin (*Qek'wai'akin*). A Squawmish village community on the left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kelatl (Qelā'd). The uppermost Cowichan subtribe on Fraser r., Brit. Col. Their town was Asilao, above Yale.—Boas in Rep. Brit. A. A. S., 454, 1894.

Keles (Qē'les). A Chilliwak town on upper Chilliwak r., Brit. Col.—Boas in 64th Rep. Brit. A. A. S., 454, 1894.

Kelketos (QE'lke!ōs, 'painted'). A Squaw-mish village community on the E. coast of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Kelsemaht ('rhubarb people'). A Nootka tribe on Clayoquot sd., Vancouver id.; pop. 80 in 1911. Their principal village is Yahksis. Kel-seem-aht.—Can. Ind. Aff., 186, 1884. Kel-sem-aht.—Ibid., 357, 1897. Keltsmä'ath.—Beas in 6th Rep. N. W. Tribes Can., 31, 1890. Killsmaht.—Sproat, Savage Life, 308, 1868. Kilsämät.—Mayne, Brit. Col., 251, 1861.

Keltakkaua (Ke'llāqk'aua). A division of the Nuhalk, a Bellaeoola tribe of the coast of British Columbia.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.

Kemanks. A body of Salish of Fraser superintendency, Brit. Col. (Can. Ind. Aff., 138, 1879); no longer officially reported.

Kenabig (Kinabik, 'snake'). A gens of the Chippewa.

Che-she-gwa.—Warren (1852) in Minn. Hist. Soc. Coll., v., 45, 1885 ('rattlesnake'). Ke-na'-big.—Morgan, Anc. Soc., 166, 1877 ('snake'). Kinäbik.—Wm. Jones, inf'n, 1906. She-she-gwah.—Tanner, Narrative, 175, 1830. She-she-gwun.—Ibid., 315 'rattlesnake').

Kenim Lake. A Shuswap village or band on Canim lake, which flows into North Thompson r., interior of British Columbia; pop. 87 in 1902, 72 in 1911.

Canim Lake. Can. Ind. Aff., 18, 11, 1911. Kanim Lake.—Can. Ind. Aff., 274, 1902. Kaninim Lake.—Ibid., 271, 1889. Kaninis' Tribe.—Ibid., 190, 1884. Kenim Lake.—Ibid., pt. 11, 72, 1902.

Kenipsim. A Cowichan tribe in Cowichan valley, near the s. E. end of Vancouver id; pop. 40 in 1911.

Ka-nip-sum.—Can. Ind. Aff., 308, 1879. Kee-nip-saim.—Ibid., 302, 1893. Kee-nip-sim.—Ibid., 231, 1886. Ke-nip-sim.—Ibid., 190, 1883. Khenipsim.—Ibid., pt. n., 164, 1901. Khenipsin.—Ibid., pt. n., 69, 1904. Qē'nipsen.—Boas, MS., B. A. E., 1887. Shenepsin. Can. Ind. Aff., n. 8, 1911.

Kenozhe $(Kinozhä^n, 'piekerel')$. A gens of the Chippewa. Cf. Keinouche.

Ke-noushay.—Warren (1852) in Minn, Hist, Soc. Coll., v. 44, 1885 (trans. 'pike'). Ke-no-zha.—Tanner, Narrative, 314, 1830 ('pickerel'). Ke-no'-zhe.—Morgan, Anc. Soc., 166, 1877 ('pike'). Kinōjan.—Wm. Jones, int'n, 1906.

Kente (kint'a', 'field,' 'meadow'). A Cayuga village existing about 1670 on Quintibay of lake Ontario.

Kanté.—Bruyas (1673) in N. Y. Doc. Col. Hist, IX, 792, 1855. Kenté.—Frontenac (1673), ibid., 96 Kentsia.—Homann Heirs' map, 1756. Kentsio.—Lotter, map, ca. 1770. Quenté.—La Hontan, New Voy, t, 32, 1703. Quintay.—Frontenac (1672), opcit, 93. Quinté.—Doc. of 1698 in N. Y. Doc. Coll. Hist, IX, 681, 1855.

Kepatawangachik. Given as the name of a tribe formerly living near lake St. John, Que., but driven off by the Iroquois (Jes. Rel. 1660, 12, 1858). Named in connection with Abitibi and Ouakoniechidek (Chisedee). Possibly the Papinachois.

Keremeos. A Similkameen band of the Okinagan; pop. 55 in 1897, when last separately enumerated.

2 GEORGE V., A. 1912

Kerem-eeos. Can. Ind. Mf. for 1883, 191. Keremeoos.—Ibid , 1892, 313. Keremeos.—Postal Guido, 1912. Keremeus.—Ibid , 1897, 364. Kêremya'uz.—Teit in Mem. Am. Mus. Nat. Hist , 11, 174, 1900.

Kesa (QU'sa). A Haida town on the w. coast of Graham id., Queen Charlotte group, Brit. Col.—It was occupied by the Tadjilanas before moving to Alaska.—Swanton, Cont. Haida, 281, 1905.

Kespoogwit ('land's end'). One of the two divisions of the territory of the Micmaes as recognized by themselves. According to Rand it includes the districts of Eskegawaage, Shubenacadie, and Annapolis (q. v.), embracing all of s. and E. Nova Scotia. In Frye's list of 1760, Kashpugowitk and Keshpugowitk are mentioned as two of 14 Micmae bands or villages. These are evidently duplicates, as the same chief was over both, and were intended for the Kespoogwit division. The inhabitants are called Kespoogwitnnak. See Micmae. (J. M.)

Kashpugowitk.—Fryc (1760) in Mass. Hist. Soc. Coll. 1st s, x, 115-116, 1809. Keshpugowitk.—Hold. (mentioned separately, but evidently the same). Kespoogwit.—Rand, First Micmac Reading Book, 81, 1875. Kespoogwituna'k.—Ibid. (the people of Kespoogwit).

Ket (Q!ēt, 'narrow strait'). A Haida town on Burnaby str., Moresby id., Queen Charlotte group, Brit. Col. It was occupied by a branch of the Hagi-lanas, who from their town were called Keda-lanas.—Swanton, Cont. Haida, 277, 1905.

Ketlalsm (Kë'tlals'm, 'nipping grass,' so called because deer come here in spring to eat the fresh grass). A Squawmish village community on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Ketlaynup. A body of Salish of Vancouver id., speaking the Cowichan dialect; pop. 24 in 1882.—Can. Ind. Aff. for 1882, 258.

Ketnas-hadai (K''čtnas :had'ā'i, 'sea-lion house people' [?]. Given by Boas)Fifth Rep. N. W. Tribes Canada, 27, 1889) as the name of a subdivision of the Yaku-lanas, a family of the Raven clan of the Haida of s. w. Alaska; but it is in reality only a house name belonging to that family. There seems to be an error in the designation, the word for 'sea-lion' being qa-i. (J. R. s.)

Kevilkivashalah. A body of Salish of Victoria superintendency, Vancouver id. Pop. 31 in 1882, when last separately enumerated. Kevil-Liva-sha-lah.—Can. Ind. Aff. for 1882, 258. **Keyerhwotket** ('old village'). A village of the Hwotsotenne on Bulkley r., Brit, Col., lat, 55°.

Kéyðr-hwotqðt.—Morice, Notes on W. Dénés, 27, 1902. 'Meyðlhwotqðt.—Morice in Trans. Roy. Soc. Can., x, map, 1802. Kyahuntgate.—Tolmie and Dawson, Vocabs. B.C., map, 1884. Kyahwilgate.—Dawson in Rep. Geol. Surv. Can., 20a, 1881.

Kezche. A Tatshiautin village on Taché r., Brit. Col., under the Babine and Upper Skeena River agency; pop. 24 in 1901.

Grand Rapids.—Can. Ind. Aff., pt. 2, 70, 1902. 'Keztce.—Morice, Notes on W. Dénés, 26, 1902. Kuschē-o-tin.—Dawson in Rep. Can. Geol. Surv., 30s, 1881. Kustsheotin.—Tolmic and Dawson, Vocabs. B. C., 123s, 1884.

Kezonlathut. A Takulli village on Me-Leod lake, Brit. Col.; pop. 85 in 1911.

McLeod's Lake.—Can. Ind. Aff., 1904, pt. 11, 74, 1905. Qézoñlathût.—Morice in Trans. Roy. Soc. Can., x, 109, 1892.

Kfwetragottine ('mountain people'). A division of the Kawchodinne living s. of Ft. Good Hope, along Mackenzie r., Mackenzie dist., N.W.T.

Kfwe-t a-Gottine.—Petitot, Autour du lac des Esclaves, 362, 1891.

Khaap. A body of Ntlakyapamuk under the Kamloops-Okanagan agency, Brit. Col.; pop. 23 in 1901, the last time the name appears.

Khaap.—Can. Ind. Aff. 1901, pt. 2, 166. Skaap.—Ibid., 1885, 196.

Khinonascarant ('at the base of the mountain.'—Hewitt). A Huron village in Ontario in 1637.—Jes. Rel. for 1637, 126, 1858.

Khioetoa. A former village of the Neutrals, apparently situated a short distance E. of the present Sandwich, Ontario.

(J. N. B. H.)

Khioetoa.—Jes. Rel. for 1641, 80, 1858. Kioetoa.→ Jes. Rel., nr., index, 1858. St. Michel.—Jes. Rel. for 1641, 80, 1858 (mission name).

Kiaken (K'iāke'n, 'paksade' or 'fenced village'). Two Squawmish village communities in British Columbia; one on the left bank of Skwamish r., the other on Burrard inlet.—Hill-Tout in Rep. Brit. A. A. S., 474, 475 1900.

Kianusili (Kiä'nusili, 'cod people'). A family belonging to the Raven clan of the Haida. Kiān is the name for the common cod. This family group formerly lived on the w. coast of Queen Charlotte ids., near Hippa id., Brit. Col. (J. R. S.)

Kiānōsitī.—Harrison in Proc. and Trans. Roy. Soc. Canada, 11, 123, 1895. Kiā'nusitī.—Swanton, Cont. Haida, 271, 1905. Kyā'nusia.—Boas, 12th Rep. N.W. Tribes Canada, 22, 1898.

Kiaskusis ('small gulls'). A small Cree band residing in 1856 around the fourth lake from Lac Qu'Appelle, Saskatchewan. They were formerly numerous, but had become reduced to 30 or 40 families owing to persistent Blackfeet raids.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Kicham (K'¹tcā'm). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900

Kichesipirini ('men of the great river,' from kiche 'great,' sipi 'river,' iriniouek 'men.' By the Huron they were called Ehonkeronon; from the place of their residence they were often designated Algonouins of the Island, and Savages of the Island. Once an important tribe living on Allumette id., in the Ottawa river, Quebec. They were considered as the typical Algonkin, and in order to distinguish them from the other tribes included under the term in this restricted sense were ealled "Algonquins of the Island," a name first applied by Champlain (see Algonkin). As Ottawa r. was the line of travel between the Upper Lake country and the French settlements, the position of the tribe made it at times troublesome to traders and voyageurs, although as a rule they appear to have been peaceable. In 1645 they, together with the Hurons, made a treaty of peace with the Iroquois; but it was of short duration, for 5 years later both the Hurons and the Kichesipirini fled for safety to more distant regions. What became of them is not known. It is probable that they were consolidated with the Ottawa or with some other northwestern Algonquian tribe. (J. M. J. N. B. H.)

Algommequin de l'Isle.—Champlain (1632), Œuvres, v. pt. 2, 193, 1870 (see Algonkin for various forms of the word). Ehonkeronons.—Jes. Rel. 1630, 88, 1858. Héhonquerenon.—Sagard (1632), Hist Can., iv, cap. 'Nations,' 1866. Honqueronons.—Sagard (1636), ibid., iii, 620, Honquerons.—Ibid., i. 247. Kichesipiiriniouek.—Jes. Rel. 1658, 22, 1858. Kichesipirini.—Ibid., 1640, 34, 1858. Kichesipiriniwek.—Ibid., 1646, 34, 1858. Nation de l' Isle.—Ibid., 1633, 34, 1858. Sauvages de l' Isle.—Ibid., 1646, 34, 1858.

Kidnelik. A tribe of Central Eskimo living on Coronation gulf, Arctic ocean.

Copper Eskimo.—Schwatka in Science, 543, 1884. Kidelik.—Rink, Eskimo Tribes, 33, 1887. Kidnelik.—Schwatka in Science, 543, 1884. Qidneliq.—Boas in 6th Rep. B. A. E., 470, 1888.

21A - 16

Kigicapigiak ('the great establishment,' or 'great harbour'). A former Micmac village on Cascapedia r., Bonaventure co., Quebec.—Vetromile, Abnakis, 59, 1866.

Kigiktagmiut ('island people'). A tribe of Eskimo inhabiting the islands of Hudson bay off the Ungava coast, between lat. 56° and 61°. They wear the skins of seals and dogs instead of reindeer skins, use the bow and arrow and the spear instead of firearms, and often suffer for want of food.

Ki'giktag'myut.—Turner in 11th Rep. B. A. E., 180, 1894. Kigukhtagmyut.—Turner in Trans. Roy. Soc. Can., 1887, sec. II, 99.

Kikait (Kīkait). A Kwantlen village at Brownsville, opposite New Westminster, on lower Fraser r., Brit. Col.; pop., together with the New Westminster village, 65 in 1902.—Hill-Tout in Ethnol. Surv. Can., 51, 1902.

Kikwistok. A Nakoaktok village on Seymour inlet, Brit. Col.

Kē-ques-ta.—Boas in Bull. Am. Geog. Soc., 226, 1887. Kikwistoq.—Ibid. Të'-kwok-stai-e.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. 11, 65.

Kil (K!il, 'sand-spit-point [town]'). A small Haida town formerly on Shingle bay, Skidegate inlet, Queen Charlotte ids., Brit. Col. It was occupied by the Lanachandus, who owned it, and the Gitingidjats, two family groups of very low social rank.—Swanton, Cont. Haida, 279, 1905.

Kilinigmiut ('people of the serrated country'). A subtribe of the Suhinimiut Eskimo inhabiting the region about cape Chidley, N. Labrador and Ungava. Pop. fewer than 40. Ki lin'ig myut.—Turner in 11th Rep. B. A. E, 176, 1894.

Kilistinons of the Nipisiriniens. Mentioned by the Jesuit Rel. of 1658 (Thwaites ed., XLIV, 249, 1898) as one of the 4 divisions of the Cree, so called because they traded with the Nipissing. They lived between lake Nipigon and Moose r., Ontario, though they were not very stationary. Their population at the date given was estimated at 2,500.

Killikinnick. See Kinnikinnick.

Kilpaulus. A Cowichan tribe in Cowichan valley, Vancouver id., consisting of only 4 people in 1911.

Kil-pan-hus.—Can. Ind. Aff. for 1883, 190. Kilpanlus.—Ibid., 1901, pt. 2, 164, 1902. Kilpaulus.— Ibid., 1911, 207. Tilpā'les.—Boas, MS., B. A. E. 1887. Tilp-pah-lis.—Can. Ind. Aff. for 1880 31 Tilp-pat-lis.—Ibid., 1879, 308.

2. GEORGE V., A. 1912

Kils-haidagai (K!ils xā'-idaga-i, 'peninsula people'). A branch of the Kagials-kegawai, a family group belonging to the Raven clan of the Haida. They took their name from a point at the outer end of the tongue of land on which the Skedans formerly stood, and where were most of their houses.—Swanton, Cont. Haida, 269, 1905.

Kilstlai-djat-takinggalung (Ki'lsta-i djat t'ak!i'ngalaā, 'chieftainess' children'). A subdivision of the Hlgahetgu-lanas, a family of the Rayen clan of the Haida.—Swanton, Cont. Haida. 270, 1905.

Kilutsai (*Gyilōts'ā'r*, 'people of the river's arm'). A Tsimshian family and town near Metlakatla, on the N.W. coast of British Columbia.

Gyilōts'ä'r.—Boas in Zeitschr. für Ethnel, 232, 188 Kel-ut-sah.—Kane, Wand. in N. A. app., 1859. Kill,on,chan.—Howard, Notes on Northern Tribes, 1854, Ms., B. A. E., Killoosa.—Horetzky, Canada on Pacific, 212, 1874. Killowitsa.—Brit, Col. map, 1872. Killūtsār.—Krause, Tlinkit Ind., 318, 1885. Kilootsā.—Tolmie and Dawson, Vocabs. Brit. Col., 114n, 1884. Kill-utsai.—Dorsey in Am. Antiq., Mx, 281, 1897.

Kimaksuk. A Kinguamiut Eskimo village on Cumberland sd., lat. 65°, Baffin island.— McDonald, Discovery of Hogarth sd., 86, 1841.

Kimissing (Qimissing). A fall settlement of Talirpingmiut Eskimo, of the Okomiut tribe, on the s, side of Cumberland sd., Baffin island.—Boas in 6th Rep. B.A E., map. 1888.

Kimsquit probably from Ki'm-kuitx, applied to the Bellacoola of Dean channel by the Heiltsuk. Given as the name of part of the "Tallion nation" or Bellacoola.

Athlankenetis.—Brit Col map, Ind. Aff, Victoria, 1872. Kemsquits.—Ibid. Ki'mkuitq.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Kinisquit.—Can. Ind. Aff, pt. 11, 162, 1901. (perhaps identical). Kinisquitt.—Ibid., 272, 1889. Kui-much-qui-toch.—Kane, Wand in N. A., app., 1859.

Kimus ('brow' or 'edge'). A village of the Ntlakyapamuk on the E. side of Fraser r., between Yale and Siska, Brit. Col. Pop. in 1901 (the last time the name appears), together with Suk, 74.

Kamus.—Can Ind Aff for 1886, 230 Kimu's.— Teit in Mem Am. Mus Nat. Hist, n, 169, 1900, Sk mūc.—Hill-Tout in Rep. Brit. Ass. Adv. Sci., 5, 1899. Sook-kamus.—Can. Ind. Aff. for 1901, pt. 2, 164 (name combined with that of Suk, q. v.). Suukkamus.—Ibid , 418, 1898. Kinagingeeg (Gyinaxangyi'ek 'people of the mosquito place'). A Tsimshian town and local group near Metlakatla, N. w. coast of British Columbia.

Gyfnayangyi'ek.—Boas in Zeitschr. fur Ethnol, 232, 1888. Kenchenkieg.—Kane, Wand. in N. A., app., 1859. Kinagingeeg.—Dorsey in Am. Antiq, xix, 281, 1897. Kinahungik.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kinkhankuk.—Howard, Notes on Northern Tribes, 1854, MS., B. A. E. Kin-nachangik.—Krause, Tlinkit Ind., 318, 1885. Kinnakangeck.—Brit. Col. map, 1872.

Kinbaskets. A body of Shuswap who forced themselves into the Kootenay country near Windermere, Brit. Col., from North Thompson r., about 50 years ago and maintained themselves there with the help of the Assiniboin until the whites appeared and wars came to an end. Pop. 41 in 1891, 63 in 1911.

Kinbaskets.—Can. Ind. Aff. 1902, 253, 1903.—Shuswap Band.—Ibid.

Kincolith (place of scalp). A mission village on Nass inlet, Brit, Col., founded in 1867 and settled by the Niska. Pop. 267 in 1902, 250 in 1911.

Kingasereang (Qingascareang). A spring settlement of Kinguamiut Eskimo on an island near the entrance to Nettilling flord, Cumberland sd., Baffin island.—Boas in 6th Rep. B. A. E., map. 1888.

Kingmiktuk (Qingmiktuq). The winter settlement of the Ugjulirmiut in King William island.—Boas in 6th Rep. B.A.E., map. 1888.

Kingnaitmiut. One of the 4 branches of the Okomiut Eskimo of Baffin id., formerly settled at Pagnirtu and Kignait fiords, but now having their permanent village at Kekerten; pop. 86 in 1883. Their summer villages are Kitingujang, Kordlubing, Niutang, and Nirdlirn.—Boas in 6th Rep. B.A.E., 437, 1888.

Kingnelling. A spring settlement of Padlimiut Eskimo at the s. end of Home bay, Baffin island.—Boas in 6th Rep. B.A.E., map, 1888.

Kingua (its head). A Kinguamiut Okomiut summer village at the head of Cumberland sd., s. E. Batin id.

Kingawa.—Boas in Bull. Am. Mus. Nat. Hist., vv., pt. 1, 126, 1901. Kingoua.—McDonald, Discov. of Hogarth 8d., 86, 1841. Qingua.—Boas in 6th Rep. B. A. E., map. 1888.

Kinguamiut Cinhabitants of its head'. A subtribe of the Okomiut Eskimo living in the

villages of Anarnitung, Imigen, and Kingaseareang, at the head of Cumberland sd., and numbering 60 in 1883. Kimaksuk seems to have been a former village.

Kignoamiut.—Boas in Geog. Blatt, viii, 33, 1885-K'inguamiut.—Boas in Petermanns Mitt, no. No, 69, 1885. Qinguamiut.—Boas in 6th Rep. B. Λ. E., 426, 1888.

Kinipetu ('wet country'). A central Eskimo tribe on the w. coast of Hudson bay, extending s. from Chesterfield inlet 250 m. They hunt deer and musk-oxen, using the skins for clothing and kaiak covers, coming to the coast only in winter, when seals are easily taken.

Agutit.—Petitot in Bib. Ling et Ethnog Am., III, A' 1876. Kiaknukmiut.—Boas in Bul. Am. Mus. Nat. Hist., xv., 6, 1901 (own name). Kimnepatoo.—Schwatka in Century Mag., xxii, 76, 1881. Kinipetu.—Boas in 6th Rep. B. A. E., 450, 1888. Kinnepatu.—Boas in Trans Anthrop. Soc. Wash., III, 96, 1885. Kinnipetu.—Boas in Petermanns Mitt., no. 80, 72, 1885.

Kinuhtoiah (*Gyidnadà'cks*, 'people of the rapids'). A former Tsimshian division and town near Metlakatla, Brit. Col.

Gyidnada'eks.—Boas in Zeitsch, für Ethnol , 232, 1888. Keen-ath-toix.—Kane, Wand, in N. Am., app., 1859. Kenath tui ex.—Howard, Notes on Northern Tribes visited in 1854, MS, R. A. E. Kinnatō-iks.—Krause, Tlinkit Ind., 318, 1885. Kinnstoucks.—Brit. Col. map., 1872. Kinuhtōiah.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884.

Kioch's Tribe. A body of Salish of Williams Lake agency, Brit. Col., numbering 45 in 1886, the last time the name appears.—Can. Ind. Aff. for 1886, 232.

Kishgagass. ('place of ancestor Gagass'). A Kitksan division and town on Babine r., an E. tributary of the Skeena, Brit. Col.; pop. 234 in 1911.

Kis-ge-gas.—Can Ind. Aff., 415, 1898. Kisgegos.—Can. Ind. Aff. 1904, pt. 2, 73, 1905. Kis-go-gas.—Ibid., 431, 1896. Kish-ga-gass.—Dorsey in Am. Antiq., xix, 278, 1897. Kishgahgahs.—Brit. Col. map., 1872. Kishkeg-as.—-Can. Ind. Aff., 272, 1889. Kiskagāhs.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kissgarrase.—Horetzky, Canada on Pacific, 212, 1874. Kiss-ge-gaas.—Can. Ind. Aff., 252, 1891. Kit-ka-gas.—Dawson in Geol Surv. Can., 208, 1879-80. Kitsagas.—Scott in U.S. Ind. Aff. Rep. 1869, 563, 1870. Kits-ge-goos.—Can. Ind. Aff., 358, 1895. Kits-go-gase.—Ibid., 280, 1894.

Kishpachlaots (Gyispeqla'ots, 'people of the place of the fruit of the cornus'). A Tsimshian division and town formerly at Metlakatla, Brit. Col. The people have now removed to Port Simpson.

 $21A-16\frac{1}{2}$

Gpaughettes.—Howard, Notes on Northern Tribes visited in 1854, M8., B. A. E. Gyispaqlá'ots.—Boas in 5th Rep. N. W. Tribes Canada, 35, 1889. Gyíspey lá'ots.—Boas in Zeitschr. für Ethnol, 232, 1888. Kisch-pāch-lā-óts.—Krause, Tlinkit Ind, 317, 1885. Kischpachalots.—Brit. Col. map, 1872. Kischpachalots.—Dorsey in Am. Antiq, xix, 281, 1897. Kischachalaidy.—Kane, Wand, in N. Am, app, 1859. Kispachlohts.—Gibbs in Cont. N. A. Ethnol, 1, 143, 1877. Kitspukaloats.—Tolmic and Dawson, Vocabs. Brit. Col., 1148, 1884. Kyspyox.—Horetzky, Canada on the Pacific, 212, 1874

Kispiox ('place of ancestor Piyeoux'). A Kitksan division and town at the junction of Kispiox and Skeena rs., Brit. Col. According to Boas there were two class there, Rayen and Bear. Pop. 222 in 1911.

Gyispayò'kc.—Boas in 10th Rep. N. W. Tribes Canada, 50, 1895. Kish-pi-yeoux.—Dorsey in Am. Antiq, Mix, 278, 1897. Kispaioohs.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kispiax.—Can. Ind. Aff. 1904, pt. 2, 73, 1905. Kish-pi-youx.—Jackson, Alaska, 300, 1880. Kispyaths.—Downie in Jour. Roy. Geog. Soc., XXXI, 253, 1861. Kispiox.—Geog. Board, 71, 1911. Kispyox.—Tolmie and Dawson, Vocabs. Brit. Col. map, 1884. Kitspayuchs.—Scott in U. S. Ind. Aff. Rep. 1800, 563, 1870. Kits-pioux.—Ibid., 359, 1895. Kits-pioux.—Ibid., 359, 1895. Kits-piox.—Ibid., 415, 1898. Kits-pyonks.—Ibid., 304, 1893.

Kisthemuwelgit. An old Niska town on the N. side of Nass r., Brit. Col., near its mouth, and numbering about 50 inhabitants. There is some question about the correctness of the name. See Kitangata.

Kis-themn-welgit.—Dorsey in Am. Antiq, xix, 279, 1897.

Kitahon. A former Niska village on Nass r., Brit. Col., a few miles from tidewater.

Kit-a-hon.—Kane, Wand, in N. Am, app., 1859. Kitawn.—Heretzky, Canada on the Pacific, 132, 1874.

Kitaix. A Niska village near the mouth of Nass r., Brit. Col.; pop. 28 in 1903, the last time it was separately enumerated. In 1904 the combined strength of the Kitaix and Andeguale people was 80.

Git!ē'ks.—Swanton, field notes, 1900-01. Kit-aix.— Dorsey in Am. Antiq, xix, 279, 1897. Kitax.—Can. Ind. Aff., 416, 1898. Kitlax.—Ibid., 280, 1894. Kit-tak.—Ibid., 251, 1891. Kit-tek.—Ibid., 360, 1897. Kitten.—Ibid., 1903, pr. 2, 72, 1904. Kit-tex.—Ibid., 432, 1896.

Kitamat. See Kilimat.

Kitangata. A Niska town on Nass r. or inlet, Brit. Col.; pop. 30 in 1903, the last time the name appears. Probably identical with either Lakungida or Kisthemuwelgit.

Kitangata.—Can. Ind. Aff, pt. 11, 68, 1902. Kitangataa.—Ibid., 416, 1898.

Kitanmaiksh. An old town and division of the Kitksan just above the junction of Skeena and Bulkley rs., Brit. Col. The new town is now called Hazelton and has become a place of some importance, as it stands near the Grand Trunk Pacific Ry, crossing of the Skeena Pop. 251 in 1911.

Get-an-max.—Can Ind. Mf., 415, 1898 Git-an-max.—Bid., 252, 1891. Git-au-max.—Bid., 304, 1893. Gyit'anmā'kys.—Boas in 10th Rep. N. W. Tribes Can., 50, 1895. Kit-an-maiksh.—Dorsey in Am. Antiq., x1x, 278, 1897. Kitināhs.—Tolmie and Dawson, Vorabs. Brit. Col., 1148, 1884.

Kitchigami ('great water,' from kitchi, 'great,' gami 'water,' the Chippewa name for lake Superior'. A tribe living in 1669-70, about central or s. w. Wisconsin, with the Kickapoo and Mascoutens, with which tribes they were ethnically and linguistically related. Little has been recorded in relation to the Kitchigami, and after a few brief notices of them. chiefly by Fathers Allouez and Marquette, they drop from history, having probably been absorbed by the Mascoutens or the Kickapoo. The first mention of them is in a letter written by Marquette, probably in the spring of 1670 (Jes. Rel. 1670, 90, 1858), in which he says: "The Illinois are thirty days' journey by land from La Pointe, the way being very difficult. They are southwestward from La Pointe du Saint Esprit. One passes by the nation of the Kitchigamis, who compose more than 20 large lodges and live in the interior. After that the traveller passes through the country of the Miamiouek [Miami], and traversing great deserts (prairies he arrives at the country of the Illinois." It appears from his statement that they were at this time at war with the Illinois. In the same Relation (p. 100) it is stated that along Wisconsin r. are numerous other nations; that 4 leagues from there "are the Kickapoos and the Kitchigamis, who speak the same language as the Mascoutens." Tailhan, who is inclined to associate them with the Illinois, says the above statement is confirmed by the inedited relation of P. Beschefer. As neither Marquette nor Allouez speaks of them when they reach the section indicated, but mention the Kickapoo, Mascouten and Illinois, and as it appears that they had been at war with the Illinois, it is probable that the Kitchigami formed a part of the Kickapoo or the Mascoutens tribe. They are not noted on Marquette's true map, but are located on Theyenot's so-called Marquette map, under the name Kithigami, as immediately w. of

the Mississippi, opposite the mouth of Wisconsin r. The fact that they drop so suddenly and entirely from history would indicate that they became known under some other name.

(c. r.)

Ketchegamins.—Perrot (1718-20), Mémoire, 221, 1861. Ketchigamins.—Jes. Rel., index, 1858. Ketehigamins.—Hold., 1670, 90, 1858. Kischigamins.—Jes. Rel. 1683, Thwaite's ed., LNR, 193, 1900. Kittamarks.—Downie in Mayne, Brit. Col., app., 452, 1862. Kit-ta-muat.—Kane, Wand. in N. Am., app., 1859 (erroneously included under the Chim-

mesyan Sabassa' Kittimat.—Fleming, Can. Pac. R. R. Rep. Prog., 138, 1877. Kittumarks.—Horetzky, Can. on Pacific, 212, 1874. Qāisla'.—Beas, 6th Rep. N. W. Tribes Can., 52, 1890. Xa-isla'.—Beas in Rep. Nat. Mus. 1895, 328, 1897 (own name).

Kitingujang. A summer settlement of the Kingnaitmint Eskimo at the head of Kingnait fiord, Cumberland sd.—Boas in 6th Rep. B. A. E., map, 1888.

Kitkadusshade. According to Krause (Tlinkit Indianer, 304, 1885), the name of a branch of the Haida. Unidentified.

Kitkahta ('people of the poles'; so called from their salmon weirs). A Tsimshian division and town on Douglas channel, N. w. coast of British Columbia. Although formerly a large town, its inhabitants are said by Boas to have been subject to the chief of the Kitwilgioks, to whom they paid tribute. Pop. 92 in 1911.

Gyitg'ā'ata.—Boas in 5th Rep. N. W. Tribes, Canada 9, 1889. Hartley Bay.—Can. Ind. Aff. 1904, pt. 2, 70, 1905. Kil-cah-ta.—Kane, Wand, in N. A., app., 1859. Kitha-ata.—Can. Ind. Aff., 271, 1889. Kitha-ata.—Ibid., 432, 1896. Kithäda.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kithäët.—Krause, Tlinkit Ind., 318, 1885. Kithaht.—Brit. Col. may. Victoria, 1872. Kit-kahta.—Dorsey in Am. Antiq., xix, 280, 1897. Kit-kats.—Scott in U. S. Ind. Aff. Rep., 316, 1868.

Kitkatla ('people of the sea'). A leading Tsimshian division and town on Porcher id., N. w. coast of British Columbia; pop. 225 in 1902, 210 in 1911.

Gyitqā'tla .-- Boas in 5th Rep. N. W. Tribes Canada, 9, 1889. Keek heat la .- Schoolcraft, Ind Tribes, v. 487, 1855. Keet-heat-la.—Kane, Wand, in N A, app , 1859. Keethratlah.-Mayne, Brit. Col., 279, 1861. Kitatels .- Scott in U.S. Ind. Aff. Rep., 312, 1868 Kitcathla .- Mohun in Can. Ind. Aff., 133, 1881 Kitchatlah .- Scouler (1846) in Jour. Ethnol. Sec. Lond , 1, 233, 1848. Kithātlā.—Tolmie and Dawson, Vocabs Brit. Col., 114B, 1884. Kithkatla.-Can. Ind Aff., 251, 1891. Kitkathla.-Brit. Col. map, Victoria, 1872. Kitkatla.-Can. Ind. Aff., 432, 1896. Kitkhall-ah.-Howard, Notes on Northern Tribes visited in 1854, MS, B. A. E. Kit-khatla.-Dorsey in Am. Antiq., xix, 280, 1897. Kitoonitza.-Tolmie and Dawson, Vocabs. Brit. Col., 1158, 1884 Kwakiutl name). Kittrālchlā.-Krause, Tlinkit Ind., 318, 1885. Sibapa.-Howard, Notes on Northern Tribes visited in 1854, MS., B. A. E., (probably the name of the chief, Diebasa).

Kitksan ('people of Skeena [Ksian] river'. One of the three dialectic divisions of the Chimmesyan stock, affiliated more closely with the Niska than with the Tsimshian proper. The people speaking the dialect live along the upper waters of Skeena r., Brit. Col. Dorsey enumerates the following towns:

Kauldaw, Kishgagass, Kishpiyeeux, Kitanmaiksh, Kitwingach, Kitwin-kole, and Kitzegukla. To these must be added the modern mission town of Meamskinisht. A division is known as the Glen-Vowell band. Pop. 1.314 in 1914.

Gyikshan.—Beas in 10th Rep. N. W. Tribes Can., 50, 1895. Gyitksain.—Beas in 5th Rep. N. W. Tribes Can., 8, 1889. Gyitkshan.—Beas in 10th Rep. bid. 50, 1895. Kiksàn.—J. O. Dersey in Am. Antiq., xix, 277, 1897. Kit-in-shian.—Toland and Dawson, Vocabs. Brit. Cel., 1149, 1884. Kitksain.—Dersey in Am. Antiq., xix, 277, 1897. Kit-ksum.—Can. Ind. Aff., 359, 1897. Kit-ksum.—Can. Ind. Aff., 359, 1897. Kit-ksun.—Can. Ind. Aff., 359, 1895. Kitsun.—Ibid., 194, 1941.

Kitlakaous "peeple on the sandy point"). A former Niska village on Nass r., Brit. Col., near its mouth. It was entirely abandoned in 1885.—Dorsey in Am. Antiq., xix, 279, 1897.

Kitlakdamix. A division and town of the Niska on Nass r., Brit. Col., about 25 m. from tidewater; pop. 169 in 1898, 126 in 1904. 84 in 1911.

Gitladamax.—Can. Ind Aff., pt. 11, 12, 1911.
Gyit'laqdā'mikc.—Boas in 10th Rep. N. W. Trībes
Can., 49, 1895. Kilawalaks.—Tolmie and Dawson,
Vocabs. Brit. Col., map., 1884. Kin-a-roa-lax.—
Schoolcraft, In I Tribes, v, 487, 1855. Kinna-wa-lax.—
Prit. Col., map., 1872. Kitlacdamax.—Can. Ind.
Aff., 1804, pt. 2, 69, 1905. Kitlach-damak.—Can. Ind.
Aff., 271, 1889. Kitlach-damax.—Fbid., 416, 1898.
Kit-lak-damix.—Dersey in Am. Antiq., xix., 280, 1897. Kitlatamox.—Horetzky, Canada on Pacific, 128, 1874.

Kitlani (Gyi'la'n, 'the people who paddle stern first'. A former Tsimshian division and town near Metlakatla, N. w. coast of British Columbia; now at Port Simpson.

Gyitlä'n.—Boas in Zeitschr für Ethnol, 232, 1888. Ketlane.—Kane, Wand in N. A., app., 1859. Kitlan.—Telmie and Dawson, Vocabs. Prit. Col., 1148, 1884. Kitlani.—Dersey in Am. Antiq., XIX, 281, 1897. Kitlan Kilwilpeyot.—Prit. Col., map. of Ind. Tribes, Victoria, 1872. Kittlään.—Krause, Tlinkit Ind., 318, 1885.

Kitlope T-inshian: 'people of the rocks'). A Kwakiutl tribe living on Gardiner channel Brit. Col.: pop. 84 in 1901, 71 in 1904, 68 in 1911.

Gi'manoitx.—Boas in Rep. Nat. Mus., 1895, 328, 1897. Gyimanoitq.—Boas in 5th Rep. N. W. Tribes Can., 9, 1889. Gyitlō'p.—Ibid. Keimanoeitoh.—Tolmie and Dawson, Vecabs. Brit. Col., 1178, 1884. Kitloop.—Brit. Col. map, 1872. Kitlop.—Tolmie and Dawson, op. cit. Kit-lope.—Kane, Wand. in N. A., app., 1859 wrongly classed as Sabassal. Kittlope.—Can. Ind. Aff., 315, 1892. Xanā'ks'iala.—Boas in Rep. Nat. Mus. 1895, 328, 1897. own name).

Kitrauaiiks (Kitraŭ-ai-iks.) G.ven by Krause (Tlinkit Ind., 318, 1885) as a division of the Tsimshian on Skeena r., Brit. Col., and southward: they are not now identifiable.

Kitsalas ('people of the canon,' i.e., of A Tsimshian division. The two Skeena r. towns successively occupied by them bore their name. The first, just above Kitsalas cañon of Skeena r., Brit. Col., has been abandoned, the people having moved, mainly in 1893, to New Kitsalas, just below the cañon. of the latter town, 144 in 1902; in 1911, 79. Gyits'ala'ser. - Boas in 5th Rep. N. W. Tribes Canada, 9, 1889. Kisalas.-Can. Ind. Aff., 416, 1898. Kitalaska.-Downie in Jour Roy. Geog. Soc., xxxi, 252, 1861. Kitchu lass.-Howard, Notes on Northern Tribes visited in 1854, MS, B.A.E. Kitsalas.-Scott in U.S. Ind. Aff. Rep. 1869, 563, 1870. Kitsalass.—Can. Ind. Aff., 252, 1891. Kitsallas.-Brit. Col. map, Victoria, 1872 Kit-se-lai-so.-Kane, Wand, in N. A., app., 1859. Kitselässir.-Krause, Tlinkit Ind., 318, 1885 Kitsellase. -- Horetzky, Canada, on Pacific, 212, Kit zilas.-Dorsey in Am. Antiq, xix, 279, 1897. Kit-zilass.-Ibid , map.

Kitzimgaylum. See Kitsumgallum.

Kitsalthlal (Gyidzaxılda'ıl, 'people of the salmen-berries'). A Tsimshian division and town on the coast of British Columbia, between Nass and Skeena rs., probably near Metlakatla.

Gyidza \ta'tl.—Boas in Zeitschr. für Ethnol , 232, 1888 Kitch-a-clalth.—Kane, Wand. in N. A., app., 1859. Kitche kla la.—Howard, Notes on Northern Tribes visited in 1854, M8, B. A. E. Kīts-āch-lā-āl'ch.—Krause, Tlinkit Ind., 317, 1885. Kitsaga-tala.—Downee in Jour Roy. Geog. Soc., xxxi, 253, 1861. Kitsalthlal.—Tolmie and Dawson, Vocabs Brit. Col., 1148, 1884.

Kitsanaka. Given by Dawson (Queen Charlotte Ids., 134, 1880) as the name of one of four Haida clans, the word being supposed to signify "crow." As there are only two Haida clans, the Raven (Hoya) and the Eagle (Got), and the word for crow is k!áldjida, it is evident that Dawson misunderstood his informant. (J. R. S.)

Kitsumgallum ('people on the upper part of the river.'—Boast. A Tsimshian division and town on the N. side of Skeena r., Brit. Col., below the cañon. These people were originally Tongas, of the Koluschan stock, who fled from Alaska on account of continual wars, and settled at this point. In course of time they came to speak the Tsimshian language. Pop. 69 in 1902; in 1911, together with Port Essington, 160.

Gyits umra'lon.—Poas in 5th Rep. N. W. Tribes Canada, 9, 35, 1889. Kee-chum-a-kai-lo.—Kane, Wand in N. A., app., 1859. Kee-chum akarlo.— Schoolcraft, Ind. Tribes, v., 487, 1855. Kitchemkalem.—Can. Ind. Aff., 271, 1889. Kitchimkale.—Howard, Notes on Northern Tribes visited in 1854, MS., B. A. E. Kitsumkalem.—Can. Ind. Aff., 416, 1898. Kitsumgallum.—Geog Board, 72, 1911. Kitsumkalum.—Horetzky, Canada on Pacific, 212, 1874. Kit-zim-gay-lum.—Dorsey in Am. Antiq., xix, 279, 1897

Kittizoo. The southernmost division and town of the Tsimshian, on the s. side of Swindle id., N. w. of Milbanke sd., Brit. Col. The town is now almost deserted.

Gyidesdzo'.—Boas in 5th Rep. N. W. Tribes Can., 9, 1889. Ketyagoos.—Colyer in U.S., Ind. Aff. Rep. 1869, 534, 1870. Kitestues.—Brit. Col. map, Victoria, 1872. Kitistzoo.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kit-tist-zū.—Gibbs in Cont. N. A. Ethnol., 1, 143, 1877. Kit-tizoo.—Dorsey in Am. Antiq., NIN, 280, 1897. Kityagoos.—Scott in U.S. Ind. Aff. Rep., 316, 1868. Whiskläleitoh.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. ('people across the sea': Heiltsuk name).

Kittsawat. A Ntlakyapamuk village near Lytton, Brit. Col., with 4 inhabitants in 1897 (Can. Ind. Aff. Rep.), the last time the name appears.

Kituitsach-hade, A name given by Krause (Tlinkit Indianer, 304, 1885) to a supposed branch of the Haida on Queen Charlotte ids., Brit. Col. Unidentified.

Kitunahan Family. A linguistic family established by Powell (7th Rep. B. A. E., 85, 1891) to include the single Kutenai tribe (q.v.). The name is adopted from Hale's term, Kitunaha, applied to the tribe. This family has since been found to consist of two tribes with slightly differing dialects, viz., the Upper Kutenai and the Lower Kutenai, the former being properly the Kitōnā' qā, the latter the Āqkōqtl'ātlqō. Certain other minor differences exist between these two sections. The following family synonyms are chronologic.

(A. F. C.)

= Kitunaha.—Hale in U. S. Expl. Exped., vt, 204, 535, 1846 between the forks of the Columbia); Gallatin in Trans. Am. Ethnol. Soc., tt, pt. 1, c. 10, 77, 1848 (Flatbow : Berghaus (1851), Physik, Atlas, map 17, 1852; Latham in Trans. Philol Soc. Lond., 70, 1856; Latham, Opuscula, 338, 1860; Latham, Elem. Comp. Am.), app., 460, 474, 1878 (includes Kootenais Flatbows or Skalzi). = Kitunahan. —Powell in 7th Rep. B. A. E., 85, 1891.

Kitunto (Gyit'endâ, 'people of the stock-aded town'). A Tsimshian division and town formerly near the mouth of Skeena r., Brit. Col. The people were related to the Kishpaehlaots.

Gyit'endâ.—Boas in 5th Rep. N. W. Tribes Canada, 35, 1889. Ket-an-dou.—Kane, Wand. in N. A., app., 1859. Kitadah.—Dorsey in Am. Antiq., xix, 281, 1897. Kit, an, doh.—Howard, Notes on Northern Tribes visited in 1854, M8, B. A. E., Kittandó.—Krause, Tlinkit Ind., 318, 1885. Kitunto.—Telmie and Dawson, Vocabs. Brit. Col., 1148, 1884.

Kitwilgioks (Gyitwulgyā'ts, 'people of the camping place'). A Tsimshian division in the neighbourhood of the mouth of Skeena r., Brit. Col. Their chief outranked all other Tsimshian chiefs.

Gyitwulgyâ'ts.—Boas in 5th Rep. N. W. Tribes Canada, 35, 1889. Kitwilgiöks.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884. Kit-will-coits.—Kane, Wand. in N. A. app., 1859. Kitwill quoitz.—Howard, Notes on Northern Tribes visited in 1854, MS, B. A. E. Kit-wulg-jats.—Krause, Tlinkit Ind., 317, 1885.

Kitwilksheba (Gyitwulkŝçbā'). A Tsimshian division in the neighbourhood of Metlakatla and the mouth of Skeena r., Brit. Col. In 1884 it was almost extinct.

Gyitwulkŝębā'.—Boas in Zeitschr. fur Ethnol, 232, 1888. Ket-wilk-ci-pa.—Kane, Wand in N. A., app., 1859. Kitwilksheba.—Tolmie and Dawson, Vocabs. Brit. Col., 114g., 1884. Kit,will,su,pat.—Howard, Notes on Northern Tribes visited in 1854, MS., B. A. E. Kit-wūlkse-bē.—Krause, Tlinkit Ind., 318, 1885.

Kitwinga ('people of place of plenty of rabbits'). A division and town of the Kitksan on the N. bank of Skeena r., Brit. Col., just above the rapids; pop. 151 in 1904, 155 in 1911.

Gyitwung -ā'.—Boas in 10th Rep. N. W. Tribes Canada, 50, 1895. Kilgonwah.—Brit. Col. map, Victoria, 1872. Kitcoonsa.—Downie in Jour. Roy. Geog. Soc., xxxi, 253, 1861. Kitswingahs.—Scott in U.S. Ind. Aff., Rep. 1869, 563, 1870. Kit-wang-agh.—Can. Ind. Aff., 415, 1898. Kitwanga.—Ibit , 193, 1911. Kitwangar.—Horetzky, Canada on the Pacific, 212, 1874. Kit-win-gach.—Dorsey in Am. Antiq , xix, 279, 1897. Kitwungā.—Tolmie and Dawson, Vocabs. Brit. Col., 1148, 1884.

Kitwinshilk ('people of the place of lizards') A Niska town on the middle course of Nass r., N. w. British Columbia. According to Boas there were four divisions: Laktiaktl, Lakloukst, Gyitsack, and Gyisgahast. The first of these belonged to the Wolf clan, the second and third to the Eagle clan, and the fourth to the Bear clan. Pop. 77 in 1898, 62 in 1904, 48 in 1911.

Gyitwunksë'tlk.—Boas in 10th Rep. N. W. Tribes Canada, 49, 1895. Ke toon ok shelk.—Schooleraft, Ind. Tribes, v, 487, 1855. Kitwanshelt.—Horetzky, Canada on the Pacife, 129, 1874. Kit-win-shilk.—Dorsey in Am. Antiq., xix, 280, 1897. Kitwintshieth.—Can. Ind. Aff., 271, 1889. Kitwintshilth.—Ibul., 416, 1898.

Kitwinskole ('people where the narrows pass'). A Kitksan division and town on a w. branch of upper Skeena r., Brit. Col.; pop. exclusive of about 115 living at Ayensk, Kimeolith and Fishery bay, Nass., was 47 in 1911.

Gyitwuntlkö'l.—Boas in 10th Rep. N. W. Tribes Canada, 49, 1895. Kitswinscolds.—Scott in U.S. Ind. Aff. Rep. 1869, 563, 1870. Kitwancole.—Horetzky, Can. ada on the Pacific, 116, 1874. Kit-wan-cool.—Can. Ind. Aff., 415, 1898. Kit-wan Cool.—Ibid., 252, 1891. Kit-win-skole.—Dorsey in Am. Antiq., xix, 279, 1897. Kit-wun-kool.—Dawson in Geol. Surv. of Can., 208, 1879-80.

Kitzeesh ($Gyidz\bar{\imath}'s$, 'people of the salmon weir'). A Tsimshian division and town formerly near Metlakatla, Brit. Col. According to the Haida, this family was descended from a woman of their tribe.

Gittci's.—Swanton, field notes, 1900-01. Gyidzi's.—Boas in Zeitschr. f. Ethnol., 232, 1888. Kee-ches.—Schoolcraft, Ind. Tribes, v. 487, 1855. Kee-chis.—Kane, Wand. in N. A., app., 1859. Keshase.—Howard, Notes on Northern Tribes visited in 1854, MS. B. A. E. Kitseesh.—Brit. Cel. map. Victoria, 1872. Kitsiisch.—Krause, Tlinkir Ind., 318, 1885. Kitsis.—Tolmie and Dawson, Vocalss. Brit. Cel., 1149, 1884. Kitzeesh.—Dorsey in Am. Antiq., xix, 284, 1897.

Kitzegukla ('people of Zekukla mountain'). A Kitksan division and town on upper Skeena r., a short distance below Hazelton, Brit. Col. There is an old and also a new town of this name. According to Boas there were two clans here, Raven and Bear, the people of the latter being called specifically Gyisg'ā'hast. Pop. of both, 91 in 1904, 63 in 1911.

Gyitsigyu'ktla.—Boas in 10th Rep. N. W. Tribes Canada, 50, 1895. Kitseguecla.—Dawson in Geol. Surv. Canada, 20a, 1879—80. Kitse-gukla.—Can. Ind. Aff., 252, 1891. Kitsenelah.—Brit. Col. map. Victoria. 1872. Kit-se-quahla.—Can. Ind. Aff., 415, 1898. Kit-se-quak-la.—Ibid., 358, 1895. Kitsigeuhlé.—Horetzky, Canada on Pacific, 116, 1874. Kitsiguchs.—Scott in U. S. Ind. Aff. Rep. 1869, 563, 1870. Kitsi-

2 GEORGE V., A. 1912

8uhli.—Tolmie and Dawson, Vocabs, Brit. Col., 114r,
1884. Kits-se-quec-La.—Can. Ind. Aff., 304, 1893.
Kitzegukla.—Dorsey in Am. Antiq., xrx, 278, 1897.

Kitzilas. See Kitsalas.

Kiusta. (K!iv̄'sl.i., 'where the trail comes out' [2]). A former Haida town on the N.W. coast of Moresby id., opposite North id., Queen Charlotte ids., Brit. Col. It was owned by the Stustas. Possibly the town given in John Wark's list as 'Lu-lan-na,' with 20 houses and 296 inhabitants in IS36-40, included this place and the neighbouring town of Yaku. The old people remember 9 houses as having stood here and 8 at Yaku. After the population of Kiusta had decreased considerably, the remainder went to Kung, in Naden harbour. (J.R.S.)

Kioo-sta.—Dawson, Queen Charlotte Ids., 162, 1880-Küstä Häade.—Harrison in Proc. and Trans. Roy. Soc-Can., sec. II, 125, 1895. Ky'iū'st'a.—Boas, 12th Rep. N. W. Tribes Canada, 22, 1898.

Kivitung. A settlement of Akudnirmiut Eskimo on Padh fiord, Baffin id.

Qivitung.—Boas in 6th Rep. B. A. E., 441, 1888.

Kiyis (Ki'yis, 'dried meat'). A division of the Piegan tribe of the Siksika.—Grinnell, Blackfoot Lodge Tales, 209, 225, 1892.

Klahosaht. A Nootka tribe formerly living N. of Nootka sd., Vancouver id. (Sproat, Sav. Life, 308, 1869). Boas was unable to learn anything about them, but the name seems to occur in Jewitt's Narrative as the designation of a small tribe that had been "conquered and incorporated into that of Nootka."

Klahars.—Jewitt, Narr, 74, 1849. Klahosaht.— Sproat, Sav. Life, 308, 1869. Tlahosath.—Boas, 6th Rep. N. W. Tribes Can, 31, 1890.

Klamatuk. An old village, probably belonging to the Comox, on the E, coast of Vaneouver id., opposite the s. end of Valdes id.

Kla-ma-took.—Dawson, Geol. Surv. Can., map, 1888.

Klaskino ('people of the occan'). A Kwakiutl trike on Klaskino inlet, x, w, coast of Vancouver id.,; pop. 13 in 1888, when last separately enumerated.

Klarkinos.—Can. Ind. Aff., 145, 1879. Klās'-kaino.
—Dawson in Trans. Roy. 8oc. Can. for 1887, sec. 11, 65.
Klass-ki-no.—Can. Ind. Aff., 189–1884. Ļ'ā'sq'ē-nôx.—Boas in Rep. Nat. Mus. for 1895, 329, 1897.
Ł'ā'sq!ēnoXu.—Boas in Mem. Am. Mus. Nat. Hist, v, pt. 2, 354, 1902. Tla'sk'ēnoq.—Boas in 6th Rep. N. W. Tribes Canada, 53, 1890. Tlats'ē'noq.—Boas in Petermanns Mitt., pt. 5, 131, 1887 (misprint).

Klatanars. A band of Cowichan on Fraser r., Brit. Col. Pop. 36 in 1886, when last enumerated separately.

Klatanars.—Can. Ind. Aff. for 1886, 229 Klatawars.—Ibid, for 1879, 309.

Klatwoat. A village on the w. bank of Harrison r., near its junction with Fraser r., Brit. Col.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Kleaukt (Klēau'kl, 'rocky bar'). A village of the Ntlakyapamuk on Fraser r., below North Bend, Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Kliksiwi (Lix's $\bar{i}'w\bar{c}^{\bar{i}}$, 'clover root at mouth of river.'—Boas). A former Kwakiutl village at the mouth of Kliksiwi r., on the E. side of Vancouver id. All traces of it have disappeared.

Ktik-sī-wi.—Dawson in Trans. Roy. Soc. Can. for 1887. sec. 11, 72. _tix'sī'wē'.—Boas, inf'n, 1905.

Klodesseottine (hay river people'). A division of the Etcharcottine on Hay r., Mackenzie dist., N.W.T. In 1904 there were 247 enumerated on the upper and 115 on the lower river.

Gens de la rivière au Foin.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Slaves of Lower Hay River.— Can. Ind. Aff. 1904, pt. 2, 82, 1905. Slaves of Upper Hay River.—Ibid.

Klokegottine ('prairie people'). A Nahane division living between Mackenzie r. and lakes La Martre, Grandin, and Tache, Mackenzie dist., N.W.T.

Klô-kkè-Gottinè.—Petitot, Autour du lac des Esclaves, 362, 1891. Klô-kkè-ottinè.—Petitot, MS. vocab, B. A. E., 1865. Kl'o-ke-ottiné.—Ibid. Thlo-co-chassles.—Campbell quoted by Dawson in Rep. Geol Surv. Can., 200n, 1889. Tlòtœne.—Morice, MS. letter, 1890. 'Takulli name). Tlo-to"-na.—Ibid. (trans. 'grass people').

Klondike (el dorado, a rich strike, a fortune). This word, which entered the English language of America during the Yukon gold fever of I896-1900, is the name of a tributary of the Yukon in the territory of Yukon. Klondike is a corruption of the name of this stream in one of the Athapascan dialects prevailing in that region. In the literature of the day, 'Klondiker,' and even 'to Klondike' also occur. Of the name Baker (Geog. Diet. Alaska, 244, 1902) says: "This [Klondike] river was named Deer river by the Western Union Telegraph Expedition, in 1867, and so appeared on various maps. Later it was ealled Raindeer and afterwards Reindeer. Ogilvie, writing Sept. 6, 1896, from Cudahy, says: 'The river known here as the Klondike' in a footnote says: 'The correct name is Thron

Duick.' It has also been called Clondyke and Chandik, or Deer."

(A. F. C.

Kloo Xen, 'southeast,' the name of a town chief. A former Haida town at the Elend of Tanu id. Queen Charlotte ids., Brit. Col. It was one of the largest towns in the Haida country and was occupied by three families, the Kona-kegawai, Djiguaald-lanas, and Kadusgo-kegawai, to the first of which the town chief belonged. JohnWark (1836-41) assigned 40 houses and 545 inhabitants to this town; old people still remember 26 houses. Although abandoned, the houses and poles here are in better condition than in most uninhabited Haida villages.

Clew.—Can. Ind. Aff. 1894, 280, 1895. Cloo.—Schoolcraft, Ind. Tribes, v. 489, 1855 fafter Wark, 1836—41). Kloo.—Common geographic form. Klue.—Poole, Queen Charlotte Ids., passim, 1872. Klue's Village.—Dawson, Queen Charlotte Ids., 169, 1880 (so called from chief). Lay-skik.—Ibid.—Chimmesyan name; Laxkikey='those of the Eagle clan'). T'anó.—Boas in 12th Rep. N. W. Tribes Can., 25, 1898. Tanoo.—Dawson, op. cit. (own name; the name of a kind of sea grass). Tanū Hāadē.—Harrison in Proc. and Traus. Roy. Soc. Can., 125, 1895. Thu.—Ibid.

Kloo. A temporary settlement on the N. side of Cumshewa inlet, occupied by Ilaida from the older town of Kloo for a few years before they passed on to Skidegate.(J. R. S.)

KItlasen (Qltlå'sen). A Songish band at MeNeill bay, s. end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Klukluuk (from Lowi'q, 'slides,' applied to places where gravel, small stones, or sand slides or falls down). A village of the Spence Bridge band of the Ntlakyapanuk, on Nicola r., 8 m. from Spence Bridge, Brit. Col.

Klūklū'uk,—Hill-Tout in Rep. Ethnol. Surv. Can, 4, 1899. LoLowù'q.—Teit in Mem. Am. Mus Nat. Hist, n, 173, 1900.

Knives. Cutting tools are indispensable to primitive men, and the greatest ingenuity was exercised by the northern tribes in their manufacture. Every material capable of taking and retaining an edge was utilized—wood, reed, bone, antler, shell, stone, and metal. Teeth are nature's cutting tools and the teeth of animals (shark, beaver, etc.) were much employed by primitive men, as also were sharp bits of stone and splinters of wood and bone, the natural edges of which were artificially sharpened, and natural forms were modified to make them more effectual. The uses of the knife are innumerable; it served

in war and was indispensable in every branch of the arts of life, in acquiring raw materials, in preparing them for use, and in shaping whatever was made. Knives served also in symbolism and ceremony, and one of the most cherished symbols of rank and authority was the great stone knife chipped with consummate skill from obsidian or flint. According to Culin the stone knife is used among the Pueblos as a symbol of divinity, especially of the war gods, and is widely used in a healing ceremony called the "knife ceremony." Differentiation of use combined with differences in material to give variety to the blade and its hafting; the so-called ulu, or woman's knife of the Eskimo, employed in various culinary arts, differs from the man's knife, which is used in carving wood and for various other purposes (Mason); and the bone snow knife of the Arctic regions is a species by itself (Nelson). The copper knife is distinct from the stone knife, and the latter takes a multitude of forms, passing from the normal types in one direction into the club or mace, in another into the scraper, and in another into the dagger; and it blends with the arrowhead and the spearhead so fully that no definite line can be drawn between them save when the complete haft is in evidence. The flaked knife blade of flint is straight like a spearhead or is curved like a hook or sickle, and it is frequently beyelled on one or both edges. The ceremonial knife is often of large size and great beauty. *

Two or three tribes of Indians, various clans, and some towns received their names from the knife, as Conshae Creed knife, a name for the Creeks; the town of Kusa among the Choctaw, and the Ntlakyapamuk of Thompson r., Brit. Col.

Consult Boas (1) in 6th Rep. B. A. E., 1888, (2) in Nat. Mus. Rep. 1895, 1897; Fowke in 13th Rep. B. A. E., 1896; Goddard in Pub. Univ. of Cal., Anthrop. ser., I, 1903; Holmes in Nat. Mus. Rep. 1901, 1903; Mason (1) in Rep. Nat. Mus. 1890, 1891; (2) ibid., 1897, 1901; (3) ibid., 1886, 1889; Moorchead, Prehist. Impls., 1900; Murdoch in Rep. B. A. E., 1892; Nelson on 18th Rep. B. A. Anthrop., VII, 688, 1905; Thruston, Antiq. of Tenn., 1897; Wilson in Rep. Nat. Mus. 1897, 1899.

W. H. H.,

Knots. The Indians, and especially the Eskimo, whose difficulties with unfastening lines in a frozen area made them ingenious, tied for various purposes many kinds of knots and splices in bark, stems, roots, sinews, thongs, strings, and ropes. There were knots and turk's heads in the ends of lines for buttons and toggles and for fastening work. loops and running nooses for bowstrings and tent fastenings, knots for attaching one line to another or to some object, the knots in netting for fish nets and the webbing in snowshoes and rackets, knots for attaching burdens and for packing and einching, decorative knots in the dress of both sexes, and memorial knots used in calendars and for registering accounts and in religion. The bight, seen on Yuman earrying baskets, was universal, and the single, square, and granny knots and the half hitch were also quite common. In 1680 the Pueblo Indians communicated the number of days before their great uprising against the Spaniards by means of a knotted string, and some of their descendants still keep personal calendars by the same means, but in North America the quiqu was nowhere so highly developed as it was in Peru. Boas (Bull. Am. Mus. Nat. Ilist., xv, 1901) illustrates the many splices, hitches, loops, and knots of the Eskimo; Murdoch (9th Rep. B. A. E., 1892 has treated the knots used in nets, snowshoes, and sinew-backed bows; Dixon (Bull. Am. Mus. Nat. Ilist., xvii, 1905) shows the knots of the northern Maidu of California; and Mason (Smithson, Rep. for 1893) gives details of those generally used on bows and arrows.

(o. T. M.

Koagaogit (Konga'ogit, 'wide and rushing waters'). A former Haida town on the N. shore of Bearskin bay, Skidegate inlet, Queen Charlotte ids., Brit. Col., in possession of the Djahui-gitinai.—Swanton, Cont. Haida, 279, 1905.

Koalcha (Qōō'l/ca). A Squawmish village community at Linn er., Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Koalekt (Koā'lEqt). A Chehalis village at the headwaters of a w. tributary of Harrison r., in s.w. British Columbia.—Boas, MS., B.A.E., 1891.

Koanalalis (Koanā'lalis). The ancestor of a Nimkish gens after whom the gens was

sometimes named.—Boas in Petermanns Mitt., pt. 5, 130, 1887.

Koapk (Q'oa'px). One of the Talio towns of the Bellacoola at the head of South Bentinek arm, coast of British Columbia.

K.'oa'pa,—Boas in 7th Rep. N. W. Tribes Can, 3, 1891. Q'oa'px.—Boas in Mem. Am. Mus. Nat. Hist., n, 49, 1898.

Koatlna ($Q'o\bar{a}'$ Lna). A Bellacoola village on a bay of the same name at the s. entrance of Bentinek arm, coast of British Columbia.

K'oā'tina.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Q'oā'tīna.—Boas in Mem. Am. Mus. Nat. Hist., 11, 48, 1898.

Kodlimarn (Qodlimarn). A summer settlement of the Eskimo of the plateau of Nugumiut, on the E. entrance to Frobisher bay, Baffin id.—Boas in 6th Rep. B. A. E., map, 1888.

Koekoaainok (Qoë'qoaainôx, 'people from the river Koais'). A gens of the Tenaktak, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. for 1895, 331, 1897.

Koekoi (Κ'δε'kōi). A Squawmish village community on the w. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Koeksotenok (people of the other side'). A Kwakiutl tribe on Gilford id., Brit. Col. The gentes are Naknahula, Memoggyins Gyigyilkam, and Nenelpae. In 1885 they lived with the Mamalelckala in a town called Memkumlis. Kwakwakas was probably a former village. Pop. 50 in 1885, the last time the name appears.

K'wē'k sōt'ēnoq.—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. Kwick-so-te-no.—Can. Ind. Aff., 189, 1884. Kwiksot'enoq.—Boas in Bull. Am. Geog. Soc., 227, 1887. Kwik'-so-tino.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. 11, 74. Qoē'xsōt'ēnôx.—Boas in Rep. Nat. Mus. for 1895, 330, 1897. Quick-sul-i-nut.—Kane, Wand. in N. Am., app., 1859. Qwē'qa sōt!ē'nox².—Boas in Mem. Am. Mus. Nat. Hist, v, pt. 1, 156, 1902.

Koetenok (Q'οē'tēnôx, 'raven'). A clan of the Bellabella, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 328, 1897.

Koga (Qō'ga). A small Haida town formerly on McKay harbour, Cumshewa inlet, Queen Charlotte ids., Brit. Col., which was occupied by a family of the same name, of low social rank, who afterward moved to Skedans.—Swanton, Cont. Haida, 279, 1905.

Kogahl-lanas $(Q\tilde{o}'qut | \tilde{a}'mas)$, 'people of the town of Koga'). A small division of the

Kagials-kegawai family group of the Haida. They were of low social rank. Their town, called Koga, once stood in McKay harbour, and they are said to have been won in a gambling contest by the Kagials-kegawai.—Swanton, Cont. Haida, 269, 1905.

Kogals-kun (K!ogā'ls kun, 'sand-spit point'). A former Haida town on Masset inlet, Queen Charlotte ids., Brit. Col., occupied by the Aostlan-lnagai.—Swanton, Cont. Haida, 281, 1905.

Kogangas (Qogā'ñas, 'sea-otters'). An extinct family group belonging to the Raven clan of the Haida. Their towns stood near the modern town of Skidegate, Queen Charlotte ids., Brit. Col. (J. R. S.)

K'ōg'ā'ngas.—Boas, 12th Rep. N. W. Tribes Canada, 24, 1898. Qogā'ñas.—Swanton, Cont. Haida, 269, 1905.

Kohatsoath. A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Canada, 32, 1890.

Koiaum ('to pick berries'). A village of the Ntlakyapamuk on the E. side of Fraser r., 25 m. above Yale, Brit. Col.

Boston Bar.—Name given by whites. Koia'um.— Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900. Quiyone.—Brit. Col. map, Ind. Aff., Victoria, 1872 (probably identical).

Koikahtenok (Qoī'k'axtēnôx, 'whale people'). A clan of the Wikeno, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. for 1895, 328, 1897.

Koikoi (Xoē' xoē, a supernatural being, sometimes described as living in ponds; used as a mask by the Lillooet, many coast Salish, and the southern Kwakiutl.—Boas). A Squawmish village community on Burrard inlet, Brit. Col.

Qoiqoi.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900. Xoē'xoē.—Boas, inf'n, 1905.

Koiskana (from $k\bar{o}\bar{e}s$, or $kw\bar{o}^{\dagger}es$, a bush the bark of which is used for making twine; some say it is a "tuwigh or Athapascan name, but this seems doubtful". A village of the Nicola band of Ntlakyapamuk near Nicola r., 29m. above Spence Bridge, Brit. Col.; pop. 52 in 1901, the last time the name appears.

Koaskunā'.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Koiskana'.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900. Kuinskanaht.—Can. Ind. Aff. for 1892, 313. Kwois-kun-a'.—Dawson in Trans. Roy. Soc. Can. for 1891, see it, 44. Pitit Creek.—Teit., op. cit. (name given by whites). Qaiskana'.—Teit., op. cit. Quinskanaht.—Can. Ind. Aff. for 1898, 419.

Quinskanht.—Ibid, for 1901, 166. Quis-kan-aht.—Ibid, for 1886, 232. Quss-kan-aht.—Ibid, for 1883, 191.

Kojejewininewug (Kuchĭchĭwĭnĭnĭwūg; from kuchĭchĭw, referring to the straits and bends of the rivers and lakes on which they resided; īnĭnĭwūg, 'people'). A division of the Chippewa formerly living on Rainy lake and river on the N. boundary of Minnesota and in the adjacent portion of Ontario.

Algonquins of Rainy Łake.—Lewis and Clark, Travels, 55, 1806. Kocheche Wenenewak.—Long, Exped. St. Peter's R., 11, 153, 1824. Ko-je-je-win-in-e-wug. Warren (1852) in Minn. Hist. Soc. Coll., v. 84, 1885. Kotchitchi-wininiwak.—Gatschet, Ojibwa MS., B. A. E., 1882. Kutcitciwininiwag.—Wm. Jones, inf'in, 1906. Łac la Pluie Indians.—Hind, Red River Exped., 1, 82, 1860. Rainy-lake Indians.—Schooleraft (1838) in H. R. Doc. 107, 25th Cong., 3d sess., 9, 1839.

Kokaia (Qō-qai'ā, 'maggot-fly,' because there are many found there in summer). An abandoned Chilliwak village on Chilliwak r., s. Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1902.

Kokaitk. A division of the Bellabella, living ou N. Milbanke sd.

K'ō'k'aitq.—Boas in 6th Rep. N. W. Tribes Can, 52, 1890. Kok-wai-y-toch.—Kane, Wand. in N. Am, app., 1859. Kook-wai-wal-toh.—Tolmie and Dawson, Vocabs. Brit. Col, 1178, 1884. Koqueightuk.—Brit. Col. map, 1872. Q'ō'qa-itx.—Boas in Rep. Nat. Mus. for 1895, 328, 1897.

Koknas-hadai ($K\bar{o}k'$ -nas:had'ā'i, 'snow-owl house people'). Given by Boas (5th Rep. N. W. Tribes Canada, 27, 1889) as a sub-division of the Yaku-lanas, a family of the Raven clan of the Alaskan Haida, but in reality it is only a house name belonging to that family group.

(J. R. S.)

Kokoaeuk (Kōkoaō'uk'). A village of the Matsqui tribe of Cowichan at the s. w. point of Sumas lake, near Fraser r., Brit. Col.—Boas in Rep. Brit. A. A. S., 454, 1894.

Kokoiap (K'okōīap', 'place of strawberries'). A village of the Ntlakyapanuk on Fraser r., above Siska, Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Koksilah. A Cowichan tribe in Cowichan valley, E. coast of Vancouver id., opposite Admiral id.; pop. 12 in 1904, 16 in 1911.

Cokesilah.—Can. Ind. Aff., lxi, 1877. Kokesailah.— Brit. Col. map. Ind. Aff., Victoria, 1872. Koksilah.— Can. Ind. Aff., pt. 11, 164, 1901. Kulkuisala.—Boas, MS., B. A. E., 1887. Koksoagmiut ('people of big river'). A subtribe of the Sukinimiut Eskimo living on Koksoak r., N. Ungaya, Que. They numbered fewer than 30 individuals in 1893.

Koakramint. Boas in Am. Antiq., 40, 1888 misprint). Koksoagmyut.—Turner in 11th Rep. B. A. E., 176, 1894. Koksoak Innuit.—Ibid., 179. Koksoak river people.—Ibid. Kouksoarmiut.—Boas in 6th Rep. B. A. E., 463, 470, 1888.

Kolelakom (Qōlē'laqōm). A Sqnawmish village community on Bowen id., Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Koltsiowotl (K'oltsi'owotl). A division of the Nanaimo on the E. coast of Vancouver id.—Boas in 5th Rep. N. W. Tribes Can., 32, 1889.

Koluschan Family. A linguistic family embracing the Tlingit (q.v.). The name is said by Dall to be derived from Russian kalushka, 'a little trough,' but by others from the Aleut word kaluga, signifying 'a dish,' the allusion being to the concave dish-shaped labrets worn by the Thingit women.

Komenok ('wealthy people'). An extinct sept of the Lekwiltok, a Kwakiutl tribe.

K''ō'm'ënoq.—Boas in 6th Rep. N. W. Tribes Can, 55, 1890. Q'ō'm'ēnôx.—Boas in Rep. Nat. Mus. for 1895, 332, 1897.

Komkonatko ('head water,' or 'head lake'). An Okinagan village 21 m. from the town of Quilchena on Nicola lake, Brit, Col.

Fish Łake.—Teit in Mein. Am. Mus. Nat. Hist, n., 174, 1900 (name given by whites). Komkona'tko.—Ibid.

Komkutis (Q'ō'mqūtis). A Bellacoola village on the s. side of Bellacoola r., Brit. Col., near its mouth. It was one of the eight villages called Nuhalk.

K-ōmōtes.—Boas in 7th Rep. N. W. Tribes Can., 3, 1898. Kougotis.—Mayne, Brit. Col., 147, 1862. Q'ō'mqūtis.—Boas in Mem. Am. Mus. Nat. Hist., п, 49, 1898.

Komkyutis ('the rich side'). A sept of the Kwakiutl proper, living at Fort Rupert, Brit. Col., and said to count 70 warriors in 1866. Boas in 1800 called them a gens of the Walaskwakiutl; in 1895 a sept of the tribe.

Cum-que-kis.—Kane, Wand, in N. Am., app., 1859. Komiū'tis.—Boas in Petermanns Mitt, 131, 1887. K''ō'mkyūtis.—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. Kum-cutes.—Lord, Natur. in Brit. Col., r, 165, 1866. Kumkewtis.—Brit. Col. map, 1872. Lō'kuīli'la.—Boas in Petermanns Mitt., pt. 5, 131, 1887. Q'ō'mk'utis.—Boas in Rep. Nat. Mus. 1895, 330, 1897. Konroyue ('the rich ones'). A division of the true Kwakiutl living at Fort Rupert, near the N. end of Vancouver id. They are more often known by the war name Kucha ('slayers'). The gentes are Gyigyilkam, Haailakyemae, Haanatlenok, Kukwakum, and Yaaihakemae. Pep. 42 in 1904, 25 in 1904, 14 in 1911.

Kueh'a.—Poas in Pull. Am. Geog. Soc., 227, 1887
"marderers"). Kuë'qa.—Boas in 6th Rep. N. W.
Tribes Can., 55, 1890. Kuë'xa.—Poas in Rep. Nat.
Mus for 1895, 530, 1897 (war name: 'the murderers').
Kuicha.—Boas in Petermanns Mitt., pt. 5, 131, 1887.
Kwe-ah-kah.—Can. Ind. Aff., 189, 1884. Kwi-ah-kah.—Ibid., 364, 1897. Q'ō'moyuē.—Boas in Rep.
Nat. Mus. for 1895, 330, 1897. Qua-kars.—Lord,
Natur. in Brit Col., t, 105, 1866. Queackar.—Can.
Ind. Aff., 143, 1879. Quee ha Qua colt.—Wark
quoted by Schoderaft, Ind. Tribes, v, 488, 1855.
Quee-ha-qua-coll.—Wark (1836—H) in Kane, Wand,
in N. A. Am., app., 1859 (=Kueha×Kwakiutb.

Komoyue. A gens of the Kueha division of the Lekwiltok. They live with the Wiweakam at the village of Tatapowis, on Hoskyn inlet, Brit. Col. Pop. 32 in 1887, the last time they were separately enumerated.

Ah-mah-oo,—Cau. Ind. Aff. 1887, 309, 1888. K''ō-mōyuē.—Boas in 6th Rep. N. W. Tribes Can., 55, 1890. Q'ō'moyuē.—Boas in Rep. Nat. Mus. for 1895, 331, 1897.

Komps (Komps). A Squawmish village community on the right bank of Skwamish r., Brit. Col.)—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kona-kegawai (Q!o'na qē'gawa-i, 'those born at Skedans'). One of the most important families of the Eagle clan of the Haida, part of whom lived at Skedans, while the remainder resided at Kloo, which was owned by their chief. The Kona-kegawai, Djiguaahl-lanas, Stawashaidagai, and Kaiahl-lanas, elaimed descent from one woman. (J. R. s.)

K"unak'ē'owai.—Boas in 12th Rep. N. W. Tribes Can, 25, 1898. Q!ō'na qē'gawa-i.—Swunton, Cont. Haida, 272, 1905.

Kontareahrnon. The Haron nome of a people mentioned in the 17th century as living s. of St. Lawrence r., on the authority of Ragueneau's map. The name evidently designated the inhabitants of the Huron village of Contarea (q. v.). See Jesuit Rel. 1640, 35, 1858. (J. N. B. H.)

Kooji ('wolf'). Given by Dawson (Queen Charlotte Ids., 134, 1880) as the name of one of the 4 Haida clans. There were only 2 clans, however, and the Wolf was not one of them.

(J. R. S.)

Kookotlane ($K\bar{o}oq\bar{v}'l\bar{a}'n\bar{\epsilon}$. A Bellacoola division at the town of Nuskelst, Bellacoola r., Brit. Col.—Boas in 7th Rep. N. W. Tribes Can. 3, 1891.

Koonahmich. A body of Salish under the Victoria superintendency. Brit. Col. Pop. 15 in 1882, when last separately enumerated.

Koo-nah-mich.—Can. Ind. Aff., 258, 1882.

Kooskoo (Koos-koo', 'crane'). A gens of the Abnaki (q.v.).—Morgan, Anc. Soc., 174, 1877.

Kootenay. See Katenai.

Kopaalk. A body of Salish under Fraser superintendency, Brit. Col.—Can. Ind. Aff., 78, 1878.

Kopagmiut ('people of the great river'). An Eskimo tribe at the mouth of Mackenzie r., Mackenzie, N.W.T. According to Dall they formerly extended up this river 200 m., but are now confined to islands at the mouth and the Arctic coast E. of Herschel id. Añénépit.-Petitot in Bib. Ling. et Ethnol, 111, 11, 1876 (='Eskimo of the east': so called by Hudson Bay, Labrador, and Greenland Eskimo . Chiglit.—Ibid., 10. Kopäg-mūt.—Dall in Cont. N. A. Ethnel , τ, 10, 1877. Kopång-meun.—Richardson, Polar Regions,
1861. Kukhpagmiut.—Eleventh Census, Alaska, 130, 1893. Kupüñmiun.-Murdoch in 9th Rep. B. A. E , 45, 1854 Kurvik.-Petitot in Bul. Soc. de Géog., 6th s., x, 182, 1875. Mackenzie River Eskimo.-Richardson, Arct. Search. Exped., 354, 1851. Tareormeut.-Petitot, Monogr, map, 1876. Taleo@meut.-Ibid, 11 (='these who live by the sea'. Tarreor-meut.--Dall in Cont. N. A. Ethnol., r. 10, 1877. Tchiglit .-Petitot, Monogr., 11 'applied to Mackenzie and Anderson r. tribes). Teiglit .- Ibid

Koprino. A Kwakiutl tribe speaking the Koskimo subdialect. They lived formerly at the entrance of Quatsino sd., and were divided into the Koprino and Kotlenok clans, but they are now amalgamated with the Koskimo proper. Pop. 14 in 1884, the last time they were separately enumerated.

G'à'p!ēnoxº.—Boas in Mem. Am. Mus. Nat. Hist, v, pt. 2, 303, 1902. G'ō'p'ēnōx.—Boas in Rep. Nat. Mus. 1895, 329, 1897. Keope-e-no.—Can. Ind. Aff., 190, 1883. Keroopinough.—Brit. Col. map, 1872, Kiāwpino.—Dawson in Trans. Roy. Soc. Can. for 1887. sec. m. 65. Koprinos. Chi. Ind. Aff., 145, 1879, Kyō'p'ēnoq.—Boas in 6th Rep. N. W. Tribes Can., 53, 1890.

Koprino. A gens of the Koprino, q. v.

Koquapilt. A Chilliwak town in lower Chilliwak valley, Brit. Col.; pop. 16 in 1904. 22 in 1911.

Co-qua-piet.—Can. Ind. Aff., 1 t. 1, 268, 1889. Co-quopiet.—Ibid., 309, 1879. Coquopilt.—Ibid., 74,

1878. Koquahpilt.—Ibid., 78. Koquapilt.—Brit. Col. map, Ind. Aff., Victoria, 1872. Kwaw-kwaw-apiet.—Can. Ind. Aff., 413, 1898. Kwawkwawapilt. Can. Ind. Aff., pt. 11, 158, 1991.

Kordlubing. A summer settlement of the Kingnaitmiut Eskimo near the head of an inlet emptying into Cumberland sd. from the N. side, Baffin id.

Qordlubing.-Boas in 6th Rep. B A. E. map, 1888.

Koskimo. An important Kwakiutl tribe inhabiting the shores of Quatsino sd., Vancouver id. The gentes are Gyekolekoa, Gyeksem, Gyeksemsanatl, Hekhalanois;?, Kwakukemalenok, Naenshya, Tsetsaa, and Wohuamis. Their winter village is Hwades; their summer village, Maate. Pop. 82 in 1904, 52 in 1911.

Kooskimo.—Telmie and Dawson, Vocabs. Brit. Col., 1188, 1884. Kosimo.—Can. Ind. Afr., 1904, pt. 2, 71, 1905. Kos-keemoe.—Ibid., 1884, 189, 1885. Kos-keemos.—Grant in Jour. Roy. Geog. Soc., 293, 1857. K'osk E'meq.—Boas, 6th Rep. N. W. Tribes Can., 53, 1890. Koskiemo.—Mayne, Brit. Col., 251, 1862. Kös'-ki-mo.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II., 60. Koskimos.—Can. Ind. Afr., 145, 1879. Kos-ki-mu.—Ibid., 1894, 279, 1895. Koskumos.—Ibid., 113, 1879. Kus-ke-mu.—Kane, Wand. in N. Am., app., 1859. Qō'sqēmox.—Boas in Rep. Nat. Mus. 1895, 329, 1897. Qō'sqīmo.—Boas in Petermanns Mitt., pt. 5, 131, 1887. Roskeemo.—Powell in Can. Ind. Afr., 130, 1879. misprint.

Koskimo. A Kwakiutl sub-dialect spoken by the Koprino, Klaskino, Koskimo, and Quat ino.

Kostun-hana Q'\(\vartheta\)' \(\vartheta'\) is \(\vartheta\)' n \(\vartheta'\) in \(\vartheta'\) in the Kogangas family group, a short distance E. of Skidegate, Queen Charlotte ids., Brit. Col. There does not appear to be space at this point for more than two or three houses.—Swanton, Cont. Haida, 279, 1905.

Kotlenok (Q'ō'Lēnox . A gens of the Koprino, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Kotlskaim (Qollskaim, 'serpent pond'). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Kouchnas-hadai Qō'utc nus shad'ā'i, '[grizzly-] bear house people'). Given by Boas 'Fifth Rep. N. W. Tribes Can., 27, 1889, as a subdivision of the Yaku-lanas, a family of the Raven clan of the Haida. It is in reality only a house name belonging to the family.

Koukdjuaq ('big river'). A Talirpingmiut Eskimo village of the Okomiut tribe formerly on Nettilling lake, Baffin id.—Boas in 6th Rep. B. A. E., map, 1888.

Kounaouons. A tribe or band, probably in Quebec near the Maine frontier, mentioned as allies of the French in 1724.

k8na8ons. -Rasle (1724) in Mass. Hist. Soc. Coll., 2d s., vm., 246, 1819.

Koungmiut ('river people'). An Eskimo tribe on the w. coast of Hudson bay, s. of the Kinipetu, in the region of Churchill.—Boas in Bull. Am. Mus. Nat. Hist., xv, 6, 1901.

Kowailchew. A coast Salish tribe said by Gibbs (Pac. R. R. Rep., 1, 433, 1855) to live N. of the Semiamu, principally if not altogether in Brit. Col. Unless intended for the Cowichan they are not mentioned elsewhere.

Krayiragottine ('willow people'). A division of the Etchaottine on Willow r., Mackenzie dist, N.W.T.

Kk ayi/a-Gottinè.—Petitot, Autour du lac des Esclaves, 319, 1991.

Kraylongottine ('people at the end of the willows'). A Nahane division living between Mackenzie r. and Willow lake, Mackenzie dist, N.W.T. Their totem is the otter.

Kk'a-lon-Gottinè.—Petitot, Grand lac des Ours, 66, 1893 ('people at the end of the willows'). Kkpay-lon-Gottinè.—Petitot, Autour du lac des Esclaves, 362, 1891.

Krimerksumalek. An Ighulirmiut Eskimo village on the w. coast of Hudson bay.—M'-Clintock, Voyage of Fox, 165, 1881.

Ksalokul (Qsa'loqul). A division of the Nanaimo on the E. coast of Vancouver id.—Boas in 5th Rep. N. W. Tribes Can., 32, 1889.

Ksapsem (Qsā'psem). A Songish division residing at Esquimalt, s. end of Vancouver id.—Boas in 5th Rep. N. W. Tribes Can., 17, 1890.

Kuaiath. A division of the Seshat, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Kuaiirnang. A winter residence of the Akuliarmiut on North bay, Paffin id.

Kuakumchen (Kuā'kumteęn). Given as a division of the Squawmish, on Howe sd., coast of British Columbia.—Boas, MS., B. Λ. Ε., 1887.

Kuaut. A Shuswap village at the head of Little Shuswap lake, interior of British Columbia; pop. 83 in 1904, 99 in 1911. Knaut.—Can Ind Aff., supp., 60, 1902. Kroaout.— Can. Ind Aff for 1883, 189. Kualt.—Ibid., 1895, 361. Kuant.—Ibid., 1898. 419. Ku-a-ut.—Ibid., 1885, 196. Kwout.—Dawson in Trans. Roy. Soc. Can. for 1891, sec. u, 44, 1892. Little Shuswap.—Can. Ind. Aff. for 1878, 74. Little Shuswap Lake.—Ibid., 1882, 259. Little Suswap Lake.—Ibid., 1879, 309. Sushwap.—Ibid., 1878, 78.

Kueha ('the murderers'). A division of the Lekwiltok living between Bute and Loughborough inlets, Brit. Col. They are divided into three gentes: Wiweakam, Komoyue, and Kueha. Pop. 25 in 1889. The Komoyue sept of the true Kwakintl have this name for their war name.

Kuế'qa.—Boas in 6th Rep. N. W. Tribes Can, 660, 1891. Kwe-ah-kah-Saich-kioie-tachs.—Can. Ind. Aff. 1889, 227, 1890 (= Kucha Lekwiltok). Kwiha.—Tolmic and Dawson, Vocabs. Brit. Col., 1198, 1884. Queeakahs.—Brit. Col. map, 1872. Quee-ha-nicul-ta.—Wark (1836-41) quoted by Kane, Wand. in N. A., app., 1859 (= Kucha Lekwiltok). Quicha Ne cub ta.—Wark as quoted by Schoolcraft, Ind. Tribes, v. 488, 1855.

Kukamukamees. A Kyuquot village on Mission id, Kyuquot sd., w. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Kukkuiks (Kūk-kūiks', 'pigeons'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe; it is made up of men who have been to war several times.—Grinuell, Blackfoot Lodge Tales, 221, 1892.

Kukoak (Ququā'q). A Songish division at McNeill bay, s. end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Kukulek (Ququ'lek). A Songish division residing at Cadboro bay, s, end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Kukutwom (K'ukutwō'm, 'waterfall'). A Squawmish village community on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kukwakum ('the real Kwakiutl'). A gens of the Kwakiutl proper, consisting of two septs, the Guetela and the Komovue.

K'kwâ'kum.—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. Kukwâ'kum.—Boas in Rep. Nat. Mus. 1895, 330, 1897. Kwakoom.—Tolmie and Dawson, Vocabs. Brit. Cel., 118a, 1884.

Kulatsen (Ku'latsen). A Squawmish village community on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kulleets. A Cowichan tribe on Chemainus bay, Vancouver id.; pop. 73 in 1911.

Ku-lees.—Can. Ind. Aff. for 1879, 308. Ku-leets.— Ibid., 1880, 316, Kulleets.—Ibid., 1901, pt. n, 164, O'alē'ts.—Boas, MS, B. A. E., 1887.

Kuna-lanas (Ku'na lā'nas, 'town people of the point'). An important family of the Raven clan of the Haida. According to one story it was so named because its people lived on a point in the legendary town of Skena (see Tadji-lanas); but more probably it refers to the point at Naikun where these people were at one time settled. The Teeskun-lnagai, Hlielungkun-lnagai, Saguikun-lnagai, and Yagunkun-lnagai were subdivisions.

(J. R. S.

Ku'na lānas.—Swanton, Cont. Haida, 270, 1905. Kun lā'nas.—Boas, 12th Rep. N. W. Tribes Canada, 23, 1898. Kwun Lennas.—Harrison in Proc. and Trans. Roy. Soc. Canada, sec. n, 125, 1895.

Kundji (Ku'ndji). A legendary Baida town on the s. shore of Copper bay, Moresby id., Queen Charlotte group, Brit. Col. The family living there is said to have been the Daiyuahl-lanas. Another town of this name formerly stood on the w. side of Prevost id., in the Ninstints country.—Swanton, Cont. Haida, 279, 1905.

Kunechin (Qunč'tcin). A Seechelt sept which formerly lived at the head of Queens reach, Jervis inlet, Brit. Co. The founder of this division is said to have come from Fort Rupert.—Hill-Tout in Jour. Anthr. Inst., 23, 1904.

Kung (Qañ). A former Haida town, owned by the Sakua-lana, at the mouth of Naden harbour, Graham id., Queen Charlotte group, Brit. Col. Possibly this is the place referred to by John Wark as Nigh-tasis (q. v.), where there were said to be 15 houses and 280 inhabitants in 1836-41. Old people remember 12 houses there. The inhabitants have all moved to Masset.

K'ang.—Boas, Twelfth Rep. N. W. Tribes Can , 23, 1898. Nigh-tasis.—Wark (1836-41) in Dawson, Q Charlotte Ids , 173g, 1880. Q vñ.—Swanton, Cont. Haida, 281, 1905.

Kungga (Q!A'ñga, 'help received unexpectedly'). A former Haida town occupied by the Kona-kegawai, on the s. shore of Dog id., Queen Charlotte group, Brit. Col. The inhabitants moved to Kloo.—Swanton, Con. Haida, 278, 1905.

Kungielung (K'u'ngielañ). A former Haida town on the w. side of the entrance to Masset inlet, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Kunhalas (Ku'nxalas). A former Haida town or camp just inside of Cumshewa pt., Queen Charlotte ds., Brit. Col. It belonged to the Kona-kegawai.—Swanton. Cont. Haida, 278, 1905.

Kunkia (Q!a'nkia). A former Haida town on the x. coast of North id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Kunnas-hadai Kon nas:had'ā'i, 'whale-house people'). Given by Boas Fifth Report N. W. Tribes Can., 27, 1889 as the name of a subdivision of the Yakulanas, a family of the Raven clan of the Haida, but in reality it is only a house name belonging to that group.

Kunstamish (Kun-sta-mish). A village of the Guauaenok Kwakiutl on the E. side of Claydon bay, Wells passage, Brit. Col.— Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 73.

Kutaiimaks 'Kut'-ai-\text{\text{\$Im\-ilks}}, 'they do not haugh' . A division of the Piegan tribe of the Siksika, q. v.

Don't Laugh.—Grannell, Blackfoor Lodge Tales, 225, 1892. Kā-ti'-ya-ye-mix.—Morgan, Anc. Soc., 171, 1877. —"never laugh!") Ko-te'-yi-miks.—Hay ien, Ethnog and Philol Mo Vai., 264, 1862. —"the ban that do not laugh!". Kut'-ai-im-iks.—Grinnell, opcit., 206. The People that don't laugh.—Cullegreson in Snuthson. Rep. 1850, 144, 1851.

Kutaisotsiman (no parfleche). A division of the Piegan tribe of the Siksika.

Kut-ai-sot'-si-man.—Granell, Blackfoot Lodge Toles, 209, 1892 No Parfleche.—Ibid., 225.

Kutchin ('people'). A group of Athapasean tribes in Canada and Alaska, inhabiting the region of the Yukon and its tributaries above Nuklukayet, the Peel River basin, and the lower Mackenzie valley. They have decreased to half their former numbers owing to wars between the tribes and the killing of female children. Chiefs and medicine-men and those who possess rank acquired by property have two or more wives. They usually live in large parties, each headed by a chief and having one or more medicinemen, the latter acquiring an authority to which even the chicfs are subject. Their dances and chants are rhythmical and their games are more manly and rational than those of their congeners. They have wrestling bouts which are begun by little boys, those next in strength coming on in turn until the strongest or freshest man in the band remains the final victor, after which the women go through the same progressive contest. They are exceedingly hospitable, keeping guests for months, and each head of a family takes his turn in feasting the whole band, on which occasion etiquette requires him to fast until the guests have departed (Hardisty in Smithson, Rep. for 1866, 313). The Kutchin tribes are Tenankutchin, Natsitkutchin, Kutchakutchin, Hankutchin, Trotsikkutchin, Tutchonekutchin Vuntakutchin, Tukkuthkutchin, Tatlitkutchin, Nakotchokutchin, and Kwitchakutchin.

Déhkèwi.-Petitot, Kutchin MS. vocab., B. A. E., 1869 (Kawchodinneh name). Dendjyć.-Petitot, MS. vocab., B. A. E., 1865. Di-go-thi-tdinnè.-Richardson, Arct. Exped., t, 378, 1851 (Kawchodinneh name). Dindjiè.-Petitot in Bul. Soc. de Géog. Paris, chart, 1875. Dindjié.-Petitot, Autour du lac des Esclaves, 361, 1891. Dindjié Loucheux.-Ibid., 289. Erkiléït. Ibid., 163 (Greenland Eskimo name). Irk/éléït.-Ibid. Koochin.—Anderson (1858) in Hind, Lab. Penin. 11, 260, 1863. Koo-tchiu'.--Morgan in N. Am. Rev., 58, 1870. Küchin.-Ibid. Kutchin.-Richardson, Arct. Exped., 214, 1851. Ku-t'gin .- Morice, Notes on W. Dénés, 15, 1893. Kutshi.-Latham, Nat. Races, 293, 1854. Kutshlu.—Ibid., 292. Loo-choos. Schooleraft, Ind. Tribes, n. 27, 1852. Loucheux.— Franklin, Journ. Polar Sea, 11, 83, 1824 (Canadian French, 'squint-eyes'). Louchioux.—Ross, MS. notes on Tinne, B. A. E. Louchoux.-Ibid. Quarrelers. Schoolcraft, Ind. Tribes, 11, 27, 1852. Sharp-eyed Indians.-Richardson in Franklin, Second Exped. Polar Sea, 165, 1828. Squint Eyes.-Franklin, Journ. Polar Seas, 11, 83, 1824. Zänker-Indianer.-Buschmann, Spuren der aztek. Sprache, 713, 1859.

Kutenai (corrupted form, possibly by way of the language of the Siksika, of Kūtonāqa, one of their names for themselves). A people forming a distinct linguistic stock, the Kitunahan family of Powell, who inhabit portions of s. E. British Columbia and N. Montana and Idaho, from the lakes near the source of Columbia r. to Pend d'Oreille lake. legends and traditions indicate that they originally dwelt E. of the Rocky mts., probably in Montana, whence they were driven westward by the Siksika, their hereditary enemies. The two tribes now live on amicable terms, and some intermarriage has taken place. Before the buffalo disappeared from the plains they often had joint hunting expeditions. Recollection of the treatment of the Kutenai by the Siksika remains, however, in the name they give the latter, Sahantla ('bad people'). They entertained also a bad opinion of the Assiniboin (Tlutlamaeka, 'cut-throats'), and the Cree (Gutskiawe, 'liars').

The Kutenai language is spoken in two slightly differing dialects, Upper and Lower Kutenai. A few uncertain points of similarity in grammatical structure with the Shoshonean tongues seem to exist. The language is incorporative both with respect to the pronoun and the noun object. Prefixes and suffixes abound, the prefix aq(k)- in nouns occurring with remarkable frequency. As in the Algonquian tongues, the form of a word used in composition differs from that which it has independently. Reduplication is very rare, occurring only in a few nouns, some of which are possibly of foreign origin. There are a few loan words from Salishan dialects.

The Upper Kutenai include the following subdivisions: Akiskenukinik, Akamnik, Akanekunik, and Akiyenik.

The lower Kutenai are more primitive and nomadic, less under the influence of the Catholic church, and more given to gambling. They have long been river and lake Indians, and possess peculiar bark canoes that resemble some of those used in the Amur region in Asia (Mason in Rep. Nat, Mus., 1899). Of late years many of them have taken to horses and are skilful in their management. The Upper Kutenai keep nearer the settlements, often obtaining a living by serving the settlers and miners in various ways. Many of them have practically ceased to be canoeman and travel by horse. Both the Upper and Lower Kutenai hunt and fish, the latter depending more on fish for food. Physically, the Kutenai are well developed and rank among the taller tribes of British Columbia. Indications of race mixture seem to be shown in the form of the head. Their general character from the time of De Smet has been reported good. Their morality, kindness, and hospitality are noteworthy, and more than any other Indians of the country they have avoided drunkenness and lewd intercourse with the whites. Their mental ability is comparatively high, and the efforts of the missionaries have been rewarded with success. They are not excessively given to emotional instability, do not lack a sense of interest, and can concentrate attention when necessary. Their social system is simple, and no evidence of the existence of totems or secret societies has been found. The chieftainship, now more or less elective, was probably hereditary, with limitations; slavery of war prisoners was formerly in vogue; and relatives were responsible for the debts of a deceased person. Marriage was originally polygamous; divorced women were allowed to marry again, and adultery was not severely punished. Adoption by marriage or by residence of more than a

year was common. Women could hold certain kinds of property, such as tents and utensils. A wergild was customary. Religion was a sort of snn worship, and the belief in the ensoulment of all things and in reincarnation prevailed. The land of the dead was in the sun, from which at some time all the departed would descend to lake Pend d'Oreille to meet the Kutenai then living. In the old days the medicine-men were very powerful, their influence surviving most with the Lower Kutenai, who still paint their faces on dance occasions; but tatooing is rare. Except a sort of reed pipe, a bone flute, and the drum, musical instruments were unknown to them; but they had gambling, dancing, and medicine songs. The Lower Kutenai are still exceedingly addicted to gambling, their favourite being a noisy variety of the wide-spread guess-stick game. The Kutenai were in former days freat buffalo hunters. Firearms have driven Git the bow and arrow, save as children's tovs or for killing birds. Spearing, the basket trap, and wicker weirs were much in use by the Lower Kutenai. Besides the bark canoe. they had dugouts; both skin and rush lodges were built; the sweat house was universal. Stone hammers were still in use in parts of their country in the last years of the 19th century. The Lower Kutenai are still noted for their watertight baskets of split roots. In dress they originally resembled the Plains Indians rather than those of the coast; but contact with the whites has greatly modified their costume. While fond of the white man's tobacco, they have a sort of their own made of willow bark. A large part of their food supply is now obtained from the whites. For food, medicine and economical purposes the Kutenai use a large number of the plant products of their environment (Chamberlain in Verh. d. Berl, Ges. f. Anthr., 551-6, 1895. They were gifted also with asthetic appreciation of several plants and flowers. The diseases from which the Kutenai suffer most are consumption and ophthalmic troubles; venereal diseases are Interesting maturity ceremonies still survive in part. The mythology and folk-lore of the Kutenai consist chiefly of cosmic and ethnic myths, animal tales, etc. In the animal tales the covote, as an adventurer and deceiver, is the most prominent figure, and with him are often associated the chicken-hawk, the grizzly bear, the fox, the cricket, and the wolf. Other creatures which appear in these stories are the beaver, buffalo, caribou, chipmank,

deer, dog. moose, mountain lion, rabbit, squirrel, skunk, duck, eagle, grouse, goose, magpie, owl. snowbird, tomtit, trout, whale, butterfly, mosquito, frog, toad, and turtle. Most of the cosmogonic legends seem to belong to the N. W. Pacific cycle; many of the coyote tales belong to the cycle of the Rocky Mt. region, others have a Siouan or Algonquian aspect in some particulars. Their deluge myth is peculiar in several respects. A number of tales of giants occur, two of the legends, "Seven Heads" and "Lame Knee" suggesting Old World analogies. The story of the man in the moon is probably borrowed from French sources.

While few evidences of their artistic ability in the way of pictographs, birchbark drawings, etc., have been reported, the Kutenai are no mean draughtsmen. Some of them possess an idea of map making and have a good sense of the physical features of the country Some of their drawings of the horse and the buffalo are characteristically lifelike and quite accurate. The ornamentation of their moccasins and other articles, the work of the women is often elaborate, one of the motives of their decorative art being the Oregon grape. They do not seem to have made pottery, nor to have indulged in wood carving to a large extent. The direct contact of the Kutenai with the whites is comparatively recent Their word for white man, Sūvapi, is identical with the Nez Percé Suēapo Parker, Jour, 381, 1840), and is probably borrowed. Otherwise the white man is called Nütlu'gene, 'stranger' They have had few serious troubles with the whites, and are not now a warlike people. The Canadian Kutenai are reservation Indians. The United States seems to have made no direct treaty with the tribe for the extinguishment of their territorial rights (Royce in 18th Rep. B. A. E., 856 .

Within the Kutenai area, on the Columbia lakes, live a colony of Shuswap (Salishan known as Kinbaskets, numbering 63 in 1911. In that year the Kutenai in British territory were reported to number 517, as follows: Lower Columbia Lake, 72; Lower Knotenry (Flatbow), 154, 8t. Mary Ft. Steele., 212; Tobacco Plains, 57; Arrow lakes. West Koctenay; 22. These returns indicate a decrease of about 185 in 20 years. The United States census of 1890 gave the number of Kutenai in Idaho and Montana as 400 to 500; in 1905 those under the Flathead agency, Mont., were reported to number 554. The Kutenai have

given their name to Kootenay r., the districts of East, West, and North Kootenay, Brit. Col., Kootenay lake, Brit. Col., Kootenay pass, in the Rocky nits., Kootenai co. and the town of Kootenai, Idaho, and to other places on both sides of the international boundary (Am. Anthrop., iv. 348-350, 1902.

Consult Boas, First Gen. Rep. on the Inds. of Brit. Col. in Rep. B.A.A.S., 1889; Chamberlain, Rep. on the Kootenay Inds. in Rep. B. A. A. S., 1892, also various articles by the same author since 1892 in Am. Anthrop., Jour.

Kutssemhaath (Ku'tssemhaath). A division of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Canada, 32, 1890.

Knu-lana (K'ā'u lā'na). A Haida town occupied by the Koetas, in Naden harbour, Graham id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Kwae $(Kw\bar{a}'-\epsilon)$. A summer village of the Tsawatenok at the head of Kingcome inlet, Brit. Col.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 73.

Kwakiutl (according to their own folketymology the name signifies 'smoke of the world,' but with more probability it means 'beach at the north side of the river'). In its original and most restricted sense this term is applied to a group of closely related tribes or septs living in the neighbourhood of Fort Rupert, Brit. Col. These septs are the Guetela, Komkutis, Komoyue, and Walaskwakiutl, and their principal village Tsahis, surrounding Fort Rupert. Other former towns were Kalokwis, Kliksiwi, Noohtamuh, Tsaite, and Whulk, of which the last two were summer villages shared with the Nimkish during the salmon season. Those who encamped at Tsaite belonged to the Komoyue sept. In comparatively recent times a portion of the Kwakiutl

separated from the rest and are known as Matilpe. These and the Komoyue are enumerated separately by the Canadian Department of Indian Affairs, thus limiting the term Kwakiutl to the Guetela, Komkutis, and Walaskwakiutl. In one place it is applied to the Guetela alone. The population of the Kwakiutl proper in 1904 was 163.

In more extended senses the term Kwakiutl is applied to one of the two great divisions of the Wakashan linguistic stock (the other being the Nootka), and to a dialect and a subdialect under this. The following is a complete classification of the Kwakuitl divisions and subdivisions, based on the investigations of Boas: Haisla Dialect-Kitémat and Kitlope. Heiltsuk dialect—Bellabella. China Hat, Nohuntsitk, Somehulitk, and Wikeno. KWAKICTL DIALECT-Koskino subdialect-Klaskino, Koprino, Koskimo, Nawiti subdialect-Nakomgilisala Quatsino. and Tlatlasikoala. Kwakiutl subdialect-Awaitlala, Goasila, Guauaenok, Hahuamis, Koeksotenok, Kwakiutl (including Matilpe), Lekwiltok, Mamalelekala, Nakoaktok, Nimkish, Tenaktak, Tlauitsis, and Tsawatenok. The Hovalas were an extinct Kwakiutl division the minor affinities of which are unknown.

The total population of the Kwakiutl branch of the Wakashan stock in 1904 was 2,173, and it appears to be steadily decreasing.

Consult Boas, Kwakiutl Inds., Rep. Nat. Mus. 1895, 1897. For further illustrations, see Koskimo.

Kwantlen. The main Kwantlen village, situated at Langley, on lower Fraser r., Brit. Col.; pop. 39 in 1911.

Kwa'ntlen.—Hill-Tout in Ethnol. Surv. Can., 54, 1902. Langley.—Can. Ind. Aff., pt. 11, 72, 1902.

Kwatsi. A Kwakiutl village at Macdonald pt., Knight inlet, Brit. Col., inhabited by the Tenaktak and Awaitlala; pop. 171 in 1885.

Kwā-tsl. "Dawson in Trans Roy. Soc. Can for 1887, sec п. 65 — Qoatse. Roas in Bul Am Geog Soc., 229, 1887

Kwaustums | Gwā''gyasdemsē, 'feasting place,'-Boas', A winter village of the Koeksotenok on Gilford id., Brit. Col.; pop. 263 in 1885.

Gwā yasdemsē,—Boas in Mem. Am. Mus. Nat. Hist, v. pt. 1, 156, 1902 Gwayasdums.—Can. Ind. Aff, 218, 1911. Kwā-us-tums.—Dawson in Trans Roy. Soc Can for 1887, sec. n, 73. Qoaiastems.— Boas in Bul Am. Geog. Soc., 228, 1887. Qua-yastums.—fbid

Kwekweakwet ('blue'). A Shuswap village near upper Fraser r., 11 m. above Kelley cr., Brit. Col. Probably the town of the High Bar band, which numbered 54 in 1904.

ttigh Bar.—Can. Ind. Aff., 274, 1902. Kwe-kwe-a-kwet'.—Dawson in Trans. Roy. Soc. Can, sec. 11, 44, 1891.

Kwichtenem (Kwi'tctenem). A Squawmish village community on the w. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kwikoaenok · K ri'konênôx, 'those at the lower end of the village'). A gens of the Guauaenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Kwikooi. A Shuswap village at the outlet of Adams lake, upper South Thompson r., interior of British Columbia; pop., with Slahaltkam (q. v.), 195 in 1910.

Adams Lake, +Can Ind. Aff., 259, 1882 Kwikooi', +Dawson in Trans Roy, Soc. Can. for 1891, sec. 11, 44.

Kwilchana (Qwillea'no, sig. doubful., A village of the Nicola band of the Ntlakyapamuk, on Nicola lake, Brit. Col.; pop. 111 in 1901, the last time the name appears.

Kinsaatin.—Can. Ind. Aff., 302, 1893. Kõiltea'na. Hill-Tout in Rep. Ethnol. Surv. Can., 1, 1899. Kuisaatin.—Can. Ind. Aff., 313, 1892. Quilchena.—Name of post office. Quinshaatin.—Ibid., pt. 11, 106, 1901. Quittea'na.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900.

Kwitchakutchin ('people of the steppes'), A Kutchin tribe inhabiting the country between Mackenzie and Anderson rs., lat. 68°, Mackenzie, N.W.T.

Kodhelf-vén-Konttchin.—Petitot, Autour du lac des E-claves, 361, 1891; = people of the margin of the sterile Eskinto lande). Kūtchi-a kūtchi-in.—Ross, MS notes on Tinne, B. A. E.—people in a country without mountains! Kwitcha-Kuttchin.—Petitot, in Bull. Soc. de Géog. Paris, chart, 1875.

Kwolan $(K'mr'l\bar{u}n, (car'), A)$ Squawmish village community on the right bank of Skwa-

mish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Kwoneatshatka. An unidentified division of the Nootka near the N. end of Vancouver id.—Hale in U. S. Expl. Exped., vt. 569, 1846.

Kyekykyenok $(K^*ek^*k^*)\tilde{e}u\delta x)$. A gens of the Awaitlala, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Kyuquot. A Nootka tribe on Kyuquot sd., w. coast of Vancouver id.; pop. 305 in 1902, 226 in 1911. Its principal villages are Aktese and Kukamukamees.

Laalaksentaio. A gens of the true Kwakiuth, embracing the subdivisions Laalaksentaio, Alkunwea, and Hehametawe.

Laa'laqsent'aiō.—Boas in 6th Rep. N. W. Tribes Can, 54, 1890 Lā'alaxsent'aiō.—Boas in Rep. Nat. Mus. 1895, 330, 1897. Lālachsent'aiō.—Boas in Petermanns Mitt, pt. 5, 131, 1887.

Labrets. Ornaments worn in holes that are pierced through the lips. Cabeza de Vaca notes of Indians of the Texas coast: "They likewise have the nether lip bored, and within the same they carry a piece of thin cane about half a finger thick." It is quite certain that this custom prevailed for some distance inland along the Colorado r. of Texas and in the neighbouring regions, while large labrets were also found by Cushing among the remains on the w. coast of Florida. Outside of this region they were almost restricted to an area in the N. W., the habitat of the Aleut, Haida, Heiltsuk, Tlingit, Tsimshian, and Eskimo tribes, extending from Dean inlet to Anderson r. on the Arctic coast. They were also adopted by some of the western Athapascans. Here the lower lip alone was pierced. While the southern tribes made a single aperture in the middle of the lip, and consequently used but one labret, the Alcut and Eskimo usually punctured a hole below each corner of the mouth and inserted two. Moreover, among the southern tribes the ornament was worn only by women, while Alcut men used it occasionally and Eskimo men more and more generally, as one proceeded northward, until beyond the Yukon the use of labrets was confined to males. Among the Haida, Heiltsuk, Tlingit, and Tsimshian the labret was a mark of high birth, superseding in this respect the headflattening of the tribes living farther s. The piercing was consequently done during potlatches, a small aperture being bored first. which was enlarged from year to year until

it sometimes became so great that the lip proper was reduced to a narrow ribbon, which was liable to break, and sometimes did. The labrets were made of wood, stone, bone, or abalone shell, often inlaid, and present two general types, namely, a long piece inserted into the lip at one end, or a round or oval stud hollowed on each side and protruding but slightly from the face. George Dixon noted one of this latter type that was $3\frac{\pi}{8}$ in, long by $2\frac{\pi}{8}$ in. broad. The last labrets used were small plugs of silver, and the custom has now been entirely abandoned. On account of the use of these ornaments the Tlingit were called Koloseh by their northern neighbours and the Russians, whence the name Koluschan, adopted for the linguistic stock.

Among the Eskimo and Aleut bone labrets predominated, though some very precious specimens were of jade. They were shaped like buttons or studs, or, in the case of some worn by women, like sickles. The lips of men were pierced only at puberty, and the holes were enlarged successively by means of plugs, which were often strung together afterwards and preserved.

Consult Dall (1) in 3d Rep. B. A. E., 1884, (2) in Cont. N. A. Ethnol., 1, 1877; Dawson, Rep. on Queen Charlotte Ids., Geol. Surv. Canada, 1880; Murdoch in 9th Rep. B. A. E., 1892; Nelson in 18th Rep. B. A. E., 1899.

J. R. S.

Lachalsap. A village of the Ilwotsotenne on Bulkley r., Brit. Col.; pop. 164 in 1911. Lachalsap.—Can. Ind. Aff., pt. 2, 70, 1932. Lackalsap.—Ibid., 1903, pt. 2, 73, 1904. Moricetown.—Ibid., 70, 1902.

Laenukhuma (*Lot'norχuma*). Given by Boas (Petermanns Mitt., pt. 5, 131, 1887) as the ancestor of a gens of the Quatsino; also applied to the gens itself.

Lahaui (Lā'qauī'. A village of the Nicomen tribe of Cowichan at the mouth of Wilson er., on the s. side of Fraser r., Brit. Col.—Boas in Rep. Brit. A. A. S., 454, 1894.

Lahave (named from Cap de la llève, France). A Miemac village in 1760 near the mouth of Lahave r., Lunenburg co., Nova Scotia.

Chachippé.—Jes. Rel. (1610-13), r. 153, 1896. La Have.—Frye (1760) in Mass. Hist. Soc. Coll. 1st s., r., 115-116, 1809. Lahave.—Present name of adjacent island. La Heve.—Doc. of 1746 in N. Y. Doc. Col. Hist., r. 70, 1858. Port de la Hève.—Lescarbot (1609) quoted by Thwaites, Jes. Rel., r. 153, note, 1896.

Lakkulzap ('on the town'). A modern Chimmesyan town, founded in 1872 by a Mr. Green from Niska, the inhabitants having been drawn from the villages of Kitaix and Kitkahta. Pop. 183 in 1902, 145 in 1911.

Greenville.—Can Ind Aff. for 1889, 272 (name given by whites). Kach-als-ap.—Dorsey in Am Antiq., XIX, 281, 1897 (misquoted from Can Ind. Aff.). Lach-alsap.—Can. Ind. Aff., 416, 1898. Lack-al-sap.—Did., 272, 1889. Lak-kul-zap.—Dorsey in Am. Antiq., XIX, 281, 1897.

Lakloukst (Laqlō'akst. A Niska division of the Lakskiyek clan, living in the town of Kitwinhilk, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Lakseel (Lagsë'el, 'on the ocean'). A Niska division belonging to the Kanhada elan, living in the towns of Andeguale and Kitlakdamix on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can , 49, 1895.

Lakskiyek (Laqski'yek, 'on the eagle'). One of the 4 Chiunnesyan clans. Local subdivisions bearing the same name are found in the Niska towns of Lakkulzap and Kitlakdamix, and in the Kitksan town of Kitwingach.—Boas in 10th Rep. N. W. Tribes Can. 49, 50, 1895.

Laktiaktl [Laqt'ui'k'tl). A Niska division of the Lakyebo (Wolf) clan, settled in the town of Kitwinshilk, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Laktsemelik *Lnyts' Emī'lliH, 'on the beaver'. A Niska division of the Lakskiyek clan, living in the town of Kitlakdamix, on Nass r., Brit. Col.—Boas in 10th Rep. N. W. Tribes Can., 49, 1895.

Lakungida (perhaps a Haida name). A Niska town near the mouth of Nass r., Brit. Col. In 1870 its inhabitants exceeded 400, but in 1897 it contained not more than 50.—Dorsey in Am. Antiq., XIX, 279, 1897.

Lakweip (Niska: Lāq'uyi'p, 'on the prairie.' —Boas). An isolated Athapascan tribe, related to the Tahltan, formerly living on Portland canal, Alaska, but having quarrelled with the Niska are now on the headwaters of Stikine r., Brit. Col. Their chief village is Gunakhe.

Lackweips.—Scott in U.S. Ind. Aff. Rep. 1869, 563, 1870. Laq'uyi'p.—Boas in 10th Rep. N.W. Tribes Can., 34, 1895. Naqkyina.—Ibid.—Tsetsaut namer on the other side').

Lakyebo (*Laqkyebö*, 'on the wolf'). One of the 4 clans into which all the Chimmesyan are divided. The name is applied specifically

2 GEORGE V., A. 1912

to various local subdivisions as well, there being one such in the Niska town of Lakkulzap and another in the Kitksan town of Kispiox.

—Boas in 10th Rep. N. W. tribes Can., 49, 50, 1895.

Lalanitlela (Lā'làuiLEla, 'always crossing the sea'). A gens of the Tlatlasikoala, subdivided into the Gyegyote and Hahekolatl.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

La Montagne (Fr.: 'the mountain'). A mission village established in 1677 for Caughnawaga and other Catholic Iroquois on a hill* on Montreal id., Quebec. They were afterward joined by others, many of whom were not Christians. The village was temporarily deserted in 1689 on account of the Iroquois. In 1696 a part of the converts established a new mission village at Sault-au-Recollet, and were joined by the others until in 1701 La Montagne was finally abandoned.

(J. M.)

The Mountain.-Shea, Cath. Miss., 309, 1855.

Lana-chaadus (Lā'na teā'adAs). A family of low social rank belonging to the Eagle clan of the Haida. Before becoming extinct they occupied, with the Gitingidjats, a town on Shingle bay, Queen Charlotte ids., Brit. Col. Some are said to have lived with the Kaiiahllanas.—Swanton, Cont. Haida, 274, 1905.

Lanadagunga (Lā'na dā'qAña, 'bad [or common] village'). A former Haida town, owned by the Saki-kegawai, on the coast of Moresby id. s. of Tangle cove, Queen Charlotte ids., Brit. Col. It was so called by the people of Hagi, opposite, because the Lanadagunga people used to talk against them.— Swanton, Cont. Haida, 277, 1905.

Lanagahlkehoda (Lānā'ga lqē'xoda, 'town that the sun does not shine on'). A Haida town on a small island opposite Kaisun, w. coast of Moresby id., Queen Charlotte ids., Brit. Col. It was so named becauses it faces N. This is a semi-mythical town, said to have been occupied by the Kas-lanas.—Swanton, Cont. Haida, 280, 1905.

Lanagukunhlin-hadai (Lā'na gu qA'nlin xā'da-i, 'resting-the-breast-on-a-town people'). A subdivision of the Chaahl-lanas, a family of the Eagle clan of the Haida. Lanagukunhlin was the name of a chief.—Swanton, Cont. Haida. 276, 1905.

Lanahawa (La'na xā'wa, 'swampy village'). A former Haida town on the w. coast of Graham id., opposite Hippa id., Queen Charlotte group, Brit. Col. It was also called Lanaheguns (Lā'na xē'-gAns, 'town where there is a noise [of drums]') and Lanahltungua (Lā'-na ltA'ngua, 'town where there are plenty of feathers'). It was occupied by the Skwahladas and Nasto-kegawai before they moved to Rennell sd., and afterward by the Kianusili.—Swanton, Cont. Haida, 280, 1905.

Lanahawa. A former Haida town on the w. coast of Burnaby id., Queen Charlotte ids., Brit Col., s. of the Ninstints town of Ket.—Swanton, Cont. Haida, 278, 1905.

Lanahilduns (Lā'na hi'ld.ns, 'moving village'; also ealled Chaldolnagai, from the name of the inlet on which it was situated). A former Haida town on the s. w. side of Rennell sd., Graham id., Queen Charlotte group, Brit. Col.; occupied by the Nasto-kegawai or the Skwahladas family group.—Swanton, Cont. Haida, 280, 1905.

Lanashagai (Lā'nus lnagā'-i, 'peoples' town'). The name of three distinct Haida towns on Queen Charlotte ids., Brit. Col. One stood on the E. coast of Graham id., s. of cape Ball, and was owned by the Naikun-kegawai; another belonged to the Kuna-lanas and was on the w. side of Masset inlet, where it broadens out; the third, which belonged to the Yagunstlanlangai, was on Yagun r.—Swanton, Cont. Haida, 280, 281, 1905.

Lanaungsuls (Lā'na⁸A'ñsAls, 'town [that] hides itself'). A Haida town on Masset inlet, Queen Charlotte ids., Brit. Col., belonging to the Aoyaku-Inagai.—Swanton, Cont. Haida, 281, 1905.

Lances. As an implement of the chase or of war the lance had a wide distribution among the ancient and the modern tribes of the North America. Though none of the objects of chipped stone called lance-heads that have been found in numbers on widely separated archæological sites are attached to shafts, there is reason to believe that many of the leafshaped blades were lance-heads. The only survivals of the use of the ancient lance are found among the Hupa of California and the western Eskimo, but earlier writers have mentioned their existence among various tribes. Lances for the chase were used occasionally in war by the Eskimo, but the Plains Indians, whenever, possible used two distinct varieties

^{*} Probably Montreal mountain.

for war and for hunting, the hunting lance blade being shorter and heavier. The lance appears to have originated through the need of striking animals from some distance in order to escape personal danger and to produce surer results than were possible with a stone knife or other implement used at close quarters. The efficiency and range of the lance when thrown from the hand was increased by the throwing stick, and the original lance or spear developed into a number of varieties under the influences of environment, the habits of animals, acculturation, etc. The greatest number of forms sprang up among the Eskimo, whose environment was characterized by a great variety and alteration of animal life, while in most other regions a simple lance was perpetuated.

The Plains tribes, as a rule, living in a region conducive to warfare and aggression through its lack of physical boundaries, made more use of the lance in war than did, coast, woodland, desert, or mountain tribes. Since the general occupancy of the plains appears to have been coincident with the introduction of the horse, the use of the war lance has been associated with that animal, but it is evident that the tribes that occupied the plains were acquainted with the lance with a stone head as a hunting implement before they entered this vast region. A Kiowa lance in the U.S. National Museum is headed with a part of a sword blade and is reputed to have killed 16 persons.

In accord with the tendency of objects designed for especially important usuage to take on a religious significance, the lance has become an accessory of ceremonies among the Plains Indians. Elaborately decorated sheaths were made for lances, varying according to the society or office of the owner. At home the lance was leaned against the shield triped, tied horizontally above the tipi door, or fastened lengthwise to an upright pole behind the tipi. In both earlier and recent times offerings of lance-heads were made to springs, exquisitely formed specimens having been taken from a sulphur spring at Afton, Okla.

Consult Holmes (1) in 15th Rep. B. A. E., 1897, (2) in Am. Anthrop., IV, 108-129, 1902; Mooney in 14th Rep. B. A. E., 988-990, 1896. (W. H.)

Languages. The American languages show considerable variety in phonetics and structure. While some are vocalic and appear melodious to our ear, others contain many consonant sounds to which we are unaccustomed and which seem to give them a harsh character. Particularly frequent are sounds produced by contact between the base of the tongue and the soft palate, similar to the Scotch ch in loch, and a number of explosive l's, which are produced by pressing the tongue against the palate and suddenly expelling the air between the teeth. Harshness produced by clustering consonants is peculiar to the N. W. coast of America. Sonorous vocalic languages are found in a large portion of the Mississippi basin and in California. Peculiar to many American languages is a slurring of terminal syllables, which makes the recording of grammatical forms difficult.

Contrary to the prevalent notion, the vocabularies are rich and their grammatical structure is systematic and intricate. Owing to the wealth of derivatives it is difficult to estimate the number of words in any American language; but it is certain that in every one there are a couple of thousand stem words and many thousand words, as that term is defined in English dictionaries.

A considerable variety of grammatical structure exists, but there are a few common traits that seem to be characteristic of most American languages. The complexity of grammar is often great because many ideas expressed by separate words in the languages of other continents are expressed by grammatical processes in the languages of the Indians. The classification of words differs somewhat from the familiar grouping in Indo-European languages. The demarcation between noun and verb is often indistinct, many expressions being both denominative and predicative. Often the intransitive verb and the noun are identical in form, while the transitive verb only is truly verbal in character. In other languages the transitive verb is nominal, while the intransitive only is truly verbal. These phenomena are generally accompanied by the use of possessive pronouns with the nominal and of personal pronouns with the verbal class of words. In other eases the verbal forms are differentiated from the noun, but the close relationship between the two classes is indicated by the similarity of the pronominal The intransitive verb generally includes the ideas which Indo-European languages express by means of adjectives. Independent pronouns are often compounds, and the pronoun appears in most cases subordinated to the verb.

In the singular are distinguished self (or speaker), person addressed, and person spoken of; in the plural, corresponding to our first person, are often distinguished the combination of speaker and persons addressed, and speaker and persons spoken of, the so-called inclusive and exclusive forms.

The demonstrative pronouns are analogous to the personal pronoun in that they are generally developed in three forms, indicating respectively the thing near me, near thee, near him. Their development is sometimes even more exuberant, visibility and invisibility, present and past, or location to the right, left, front and back of, and above and below the speaker, being distinguished.

The subordination of the pronoun to the verb is often carried to extremes. In many languages the pronominal subject, the object, and the indirect object are incorporated in the verb, for which reason American languages have often been called "incorporating languages." There are, however, numerous languages in which this pronominal subordination does not occur. In some the process of incorporation does not cease with the pronoun; but the noun, particularly the nominal object, is treated in the same manner. Where such incorporation is found the development of nominal cases is slight, since the incorporation renders this unnecessary.

The occurrence of other classes of words depends largely on the development of another feature of American languages, which is probably common to them all, namely, the expression of a great number of special ideas by means of either affixes or stem modification. On account of the exuberance of such elements American languages have been called "polysynthetic." The character of the subordinated elements shows great variations. In some languages most of the ideas that are subordinated are instrumental (with the hand, the foot, or the like; with the point or the edge of something, etc.); in others they include all kinds of qualifying ideas, such as are generally expressed by auxiliary verbs, verbal compounds, and adverbs. The Eskimo, for instance, by composition of other elements with the stem "to see," may express "he only orders him to go and see"; a Chimmesyan composition with the verb to go is, "he went with him upward in the dark and came against an obstacle." The existence of numerous subordinate elements of this kind has a strong effect in determining the series of stem words

Whenever this method of in a language. composition is highly developed many special ideas are expressed by stems of very general significance, combined with qualifying elements. Their occurrence is also the cause of the obviousness of Indian etymologies. These elements also occur sometimes independently, so that the process is rather one of coordinate composition than of subordination. forms of words that enter composition of this kind sometimes undergo considerable phonetic modification by losing affixes or by other processes. In such cases composition apparently is brought about by apocope, or decapitation of words; but most of these seem to be reducible to regular processes. In many languages polysynthesis is so highly developed that it almost entirely suppresses adverbs, prepositions, and conjunctions.

The categories of Indo-European languages do not correspond strictly to those of Indian languages. This is true particularly of the ideas of gender and plurality. Grammatical gender based on sex distinction is very rare in America. It is based on other qualities, as animate and inanimate, or noble and ignoble, and often relates only to shape, as round, long or flat. Complete absence of such classification is frequent. Physality is seldom clearly developed; it is often absent even in the pronoun; its place is taken by the ideas of collectivity and distribution, which are expressed more often than plurality. Tense is also weakly developed in many languages, although others have a complex system of tenses. Like other adverbial ideas tense is often expressed by affixes. Moods and voice of the verb are also sometimes undeveloped and are expressed by adverbial elements.

In the use of grammatical processes there is great diversity. Suffixes occur almost everywhere; prefixes are not quite so frequent. Infixes seem to be confined to the Siouan languages, although infixation by metathesis occurs in other languages also. Reduplication is frequent, sometimes extending to triplication; but in some groups of languages it does not occur at all. Other forms of modification of stem also occur.

Indian languages tend to express ideas with much graphic detail in regard to localization and form, although other determining elements which Indo-European languages require may be absent. Those languages are, therefore, not so well adapted to generalized statements as to lively description. The power to

form abstract ideas is nevertheless not lacking. and the development of abstract thought would find in every one of the languages a ready means of expression. Yet, since the Indian is not given to purely abstract speculation, his abstract terms always appear in close connection with concrete thought; for instance, qualities are often expressed by nominal terms, but are never used without possessive pronouns.

According to the types of culture served by the languages we find holophrastic terms, expressing complex groups of ideas. These, however, are not due to a lack of power to classify, but are rather expressions of form of culture, single terms being intended for those ideas that are of prime importance to the people.

The differentiation of stocks into dialects shows greater variation, some stocks comprising only one dialect, while others embrace many that are mutually unintelligible. While the Eskimo have retained their language in all its minor features for centuries, that of the Salish, who are confined to a small area in the N. Pacific region, is split up into innumerable dialects. The fate of each stock is probably due as much to the morphological traits of the language itself as to the effects of its contact with other languages. Wherever abundant reduplication, phonetic changes in the stem, and strong phonetic modifications in composition occur, changes seem to be more rapid than where grammatical processes are based on simple laws of composition. Contact with other languages has had a farreaching effect through assimilation of syntactic structure and, to a certain extent, of phonetic type. There is, however, no historical proof of the change of any Indian language since the time of the discovery comparable with that of the language of England between the 10th and 13th centuries.

A few peculiarities of language are worth mentioning. As various parts of the population speaking modern English differ somewhat in their forms of expression, so similar variations are found in American languages. One of the frequent types of difference is that between the language of men and that of women. This difference may be one of pronunciation, as among some Eskimo tribes, or may consist in the use of different sets of imperative and declarative articles, as among the Sioux, or in other differences of vocabulary; or it may be more fundamental, due to the foreign origin of the women of the tribe. In incantations and in the formal speeches of priests and shamans a peculiar vocabulary is sometimes used, containing many archaic and symbolic terms.

(F. B.

The first mission village of Laprairie. the Catholic Iroquois, established in 1668 on the s. bank of the St. Lawrence, at Laprairie, Laprairie co., Quebec. The first occupants were chiefly Oneida with other Iroquois. but it soon contained members of all the neighbouring Iroquoian and Algonquian tribes. The Mohawk, from Caughnawaga, N. Y. finally gained the leading position and their language came into vogue in the settlement. In 1676 the Indians removed to Portage r., a few miles distant, and built the present Caughnawaga, q. v.

N.W. Tribes Can., 80, 1890. Stla'tlumq.—Boas as quoted by Dawson in Trans. Roy. Soc. Can. for 1891, sec. 11, 5.

Lillooet. A band and town of Upper Lillooet on Fraser r., where it is joined by Cayoosh er. The Canadian Reports on Indian Affairs give two divisions of the Lillooet band of which one numbered 86 and the other 13 in 1911.

Lillooet.—Can. Ind. Aff. Rep., pt. 11, 72, 1902. Set.t.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900 (native name of the village of Lillooet).

Lilmalche (Lçmā'tlca). One of the two Cowichan tribes on Thetis id., off the s. E. eoast of Vancouver id.; pop. 19 in 1904. Given as a band of the Penelakut (q. v.) by the Canadian Dept. of Indian Affairs.

Lemü'tlca.—Boas, MS, B. A. E., 1887. Lilmalche.—Can. Ind. Aff. for 1901, pt. 11, 161 Ll-mache.—Ibid., 1897. 362, 1898. Ll-mal-che.—Ibid., 1898, 417. Llmalches.—Ibid., 1883, 190.

Linguistic families. The linguistic diversity of the Indians is perhaps the most remarkable feature of American ethnology. While certain general features, such, for example, as incorporation, use of verb and pronoun, employment of generic particles, use of nongrammatical genders, etc., usually occur, most of the languages of the New World exhibit analogies justifying their classification, on psychic grounds at least, as a single family of speech; nevertheless, the comparison of their vocabularies leads to the recognition of the existence of a large number of linguistic families or stocks having lexically no resemblance or connection with each other. Boas (Science, XXIII, 644, 1906) is of the opinion however, that, considering the enormous differences in the psychological bases of morphology in American Indian languages, such psychic unity in one family of speech can hardly be predicated with confidence. Also, it may be that the Paleo-Asiatic languages of Siberia may, perhaps, belong with the American tongnes. This linguistic diversity was perceived and commented on by some of the early Spanish historians and other writers on American subjects, such as Hervas, Barton, and Adelung; but the "founder of systematic philology relating to the North American

Indians" (in the words of Powell) was Albert Gallatin, whose Synopsis of the Indian Tribes within the United States East of the Rocky Mountains and in the British and Russian Possessions in North America was published in 1836 in the Transactions and Collections of the American Antiquarian Society (Archæologia Americana, 11', of Worcester, Mass. The progress of research and of linguistic cartography since Gallatin's time are sketched in Powell's epoch-marking article, "Iudian linguistic families" [7th Rep. B. A. E., 1-142, 1891), with accompanying map, embodying the author's own researches and those of the experts of the Bureau. Taking vocabulary and dictionary as the factors of discrimination, Powell recognized, n. of the Mexican boundary, the following 58 "distinct linguistic families" or stocks: Adaizan (since determined to be a part of the Caddoan), Algonquian*, Athapascan, Attacapan, Beothukant, Caddoan, Chimakuan, Chimarikan, Chimmesyan, Chinookan, Chitimachan, Chumashan, Coahuiltecan, Copehan, Costanoan, Eskimauan, Esselenian, Iroquoian, Kalapooian, Karankawan, Keresan, Kiowan, Kitunahan, Koluschan, Kulanapan, Kusan, Lutuamian, Mariposan, Moquelumnan, Muskhogean, Natchesan, Palaihnihan (since consolidated with Shastan), Piman, Pujunan, Quoratean, Salinan, Salishan, Sastean (Shastan), Shahaptian, Shoshonean, Siouan, Skittagetan, Takilman, Tanoan, Timuquanan, Tonikan, Tonkawan, Uchean, Waiilatpuan, Wakashan, Washoan, Weitspekan, Wishoskan, Yakonan, Yanan, Yukian, Yuman, Zuñian. This is the working list for students of American languages, and, with minor variations, will remain the authoritative document on the classification of American linguistic stocks. (See Kroeber in Am. Anthrop, VII, 570-93, 1905, where modifications are proposed.) A revised edition of the map, containing the results of the latest investigations, appears in this Handbook.*†

A marked feature of the distribution of Indian linguistic families N. of Mexico is the presence or former existence in what are now the states of California and Oregon of more

than one-third of the total number, while some other stocks (Algonquian, Athapascan, Siouan, Shoshonean, Eskimauan) have a very wide distribution. The Pacific coast contrasts with the Atlantic by reason of the multiplicity of its linguistic families as compared with the few on the eastern littoral. The distribution of the Eskimauan family along the whole Arctic coast from Newfoundland to Bering sea, and beyond it in a portion of Asia, is remarkable. The Uchean and the extinct Beothuk of Newfoundland are really the only small families of the Atlantic slope. Catawba and related tribes in the Carolinas prove the earlier possession of that country by the primitive Siouan, whose migrations were generally westward. The Tuscarora and related tribes of Virginia and southward show the wanderings of the Iroquois, as do the Navaho and Apache those of the Athapascans. In 1896 McGee The Smithson, Inst., 1846-96, 377, 1897) estimated the number of tribes belonging to the various linguistic families as follows: Algonquian, 36, Athapascan 53. Attacapan 2, Beothukan 1, Caddoan 9, Chimakuan 2, Chimarikan 2, Chimmesvan (Tsimshian) 8, Chinookan 11, Chitimachan 1, Chumashan 6, Coahuiltecan 22, Copehan 22, Costanoau 5, Eskimauan 70, Esselenian, 1, Iroquoian 13. Kalapooian S. Karankawan 1, Keresan 17, Kiowan 1, Kitunahan 4, Koluschan 12, Kulauapan 30, Kusau 4, Lutuamian 4, Mariposan 24, Moguelumnan 35, Muskhogean 9, Nahuatlan ?, Natchesan 2, Palaihnihan 8, Piman 7, Pujunan 26, Quoratean 3, Salinan 2, Salishan 64, Sastean 1, Serian 3, Shahaptian 7, Shoshonean 12, Siouan 68, Skittagetan (Haida: 17. Takilman 1, Tanoan 14, Timuquanan 60, Tonikan 3, Tonkawan 1, Uchean 1, Waiilatpuan 2. Wakashan (Kwakiutl-Nootka 37, Washoan 1, Weitspekan 6, Wishoskan 3, Yakonan 4, Yanan 1, Yukian 5, Yuman 9, Zuñian 1. Of this large number of tribes, some are of little importance, while others may be local divisions and not tribes in the proper sense of the term. This is true, for example, of two at least of the divisions of the Kitunahan family, and of not a few of the Algonquian "tribes." Some families, it will be seen, consist of but a single tribe: Beothukan, Chitimachan, Esselenian, Karankawan, Kiowan, Takilman, Tonkawan, Uchean, Washoan, Yanan, Zuñian; but of these a few (such as Zuñian and Kiowan' are very important. The amount of linguistic variations serving as an index of tribal division varies considerably.

Names in italies are linguistic families found in Canada.

[†] In Newfoundland only.

^{*†} A map showing the distribution of the Aborigines of Canada, Newfoundland, Greenland and Alaska, has been specially compiled and has been inserted in fieu of the Bureau of Ethnology map.

and in many cases, especially with the older writers, the delimitations are very imperfect. Researches now in progress will doubtless chicidate some of these points.

Besides the classification noted above, based on vocabulary, certain others are possible which take into consideration grammatical peculiarities, etc., common to several linguistic families. Thus, groups may be distinguished within the 56 families of speech, embracing two or more of them which seem to be grammatically or syntactically related, or in both these respects, while in nowise resembling each other in lexical content. From considerations of this sort Boas finds resemblance between several of the N.W. Pacific coast Grammatically, the Koluschan families. (Tlingit) and Skittagetan (Haida) and the Athapasean seem to be distantly related, and some lexical coincidences have been noted. The occurrence of pronominal gender in the Salishan and Chimakuan stocks is thought by Boas to be of great importance as suggesting relationship between these two families. The Wakashan (Kwakintl-Nootka), Salishan, and Chimakuan stocks all possess suffix-nouns and inflected adverbs, similarities pointing, perhaps, to a common source (Mcm. Internat. Cong. Anthrop., 339-346, 1894).

Morphological peculiarities, possessed in common, according to some authorities, indicate a relationship between Piman, Nahuatlan (Mexican), and Shoshonean. The Kitunahan of N. Idaho and S. E. British Columbia has some structural characteristics resembling those of the Shoshonean, particularly the method of object-noun incorporation. Gatsehet, in 1891 (Karank, Inds., 1891), suggested the probability of some relationship between the Karankawan, Pakawa (Coahuiltecan), and Tonkawan. It is nearly certain also, as supposed by Brinton, that Natchez is a Muskhogean dialect. The now extinct Beothukan of Newfoundland has been snspected of having been a mixed and much distorted dialect of one or other of the great linguistic families of the region adjacent. Brinton (Amer. Race, 68, 1891) was of opinion that "the general morphology seems somewhat more akin to Eskimo than to Algonkin examples."

The amount of material extant in the languages of the various stocks, as well as the literature about them, is in nowise uniform. Some, like the Beothukan, Esselenian, and

Karankawan, are utterly extinct, and but small vocabularies of them have been preserved. Of others, who still survive in limited or decreasing numbers, like the Chimakuan, Chimarikan, Chitimachan, Chumashan, Coahuilteean, Costanoan, Kalapooian, Mariposan, Moquelumnan, Natchesan, Pujunan, Salinan, Shastan, Takilman, Washoan, Weitspekan, Yakonan, and Yukian, the vocabularies and texts collected are not very extensive or con-The Algonquian, Athapascan, Esclusive. kimauan, Iroquoian, Muskhogean, Salishan, Skittagetan, Koluschan, and Siouan families are represented by many grammars, dictionaries, and native texts, both published and in manuscript. The extent and value of these materials may be seen from the bibliographies of the late J. C. Pilling, of the Algonquian, Athapascan, Chinookan, Eskimauan, Iroquoian, Muskhogean, Salishan, Siouan, and Wakashan stocks, published as bulletins by the Bureau of American Ethnology.

(A. F. C.)

Lintchanre ('flat sides of dogs'). A clan or division of the Thlingchadinne living N. and E. of the N. arm of Great Slave lake, in Mackenzie dist., N.W.T.

Klin-tchange.—Petitot, Autour du lac des Esclaves, 363, 1891. Klin-tchangèh.—Ibid, 363. Lin-tchangè.—Petitot in Bul. Soc. de Géog. Paris, chart, 1875. Lin-tchangè.—Petitot, MS. vocab., B. A. E., 1865. L'in-tchangè.—Petitot, Diet. Dénè-Dindjié, xx, 1876. Plats-côtés-de-chien du fort Raë.—Ibid.

Llons Creek. The local name for a former band of Salish under Fraser superintendency, Brit. Col.

Leon's Creek.—Can. Ind. Aff. for 1878, 78. Lion's Creek.—Ibid., 1879, 138.

Long Lake. A Chippewa band on Lo lake N. of lake Superior, between lake Nipigon and Pic. r., Ontario; pop. 311 in 1884, 278 in 1911.

Lorette. A Huron village situated 8 m. n. w. of Quebec, Canada. The present village, properly distinguished as Jeune Lorette, is some miles distant from Ancienne Lorette, the old village w. of, and nearer to, Quebec, which was abandoned for the present location after 1721. The inhabitants are a remnant of the Hurons (q.v.) who fled from their country on account of the Iroquois about 1650. After stopping on the island of Orleans, they removed in 1693 to Ancienne Lorette. In 1884 they numbered 289; in 1904, 455. See Huron Missions. (J. M.)

Lorett.—German Flats conf (1770) in N. Y. Doc. Col Hist, viii, 229, 1857. Loretta.—Jefferys, Fr. Don., pt 1, map, 1761. Lorette.—Clinton (1745) in N. Y. Doc. Col. Hist, vi. 276, 1855. Loretto.—Doc. of 1693, ibid., ix, 557, 1855. Pematnawiak.—Gatschet, Penobscot MS., B. A. E., 1887 (Penolscot name).

Loucheux (Fr.: 'squinters'). The Kutchin speaking the dialect of the Tukkuthkutchin. This language, which resembles more nearly the Chipewyan than the intervening Etatchogottine and Kawchogottine dialects, is spoken by the Tatlitkutchin, Vuntakutchin, Kutchakutchin, Natsitkutchin, and Trotsikkutchin (Hardisty in Smithson, Rep. 1866, 311, 1872). The term was extended by the Hudson's Bay Co, men to include all the Kutchin, though the Tukkuthkutchin, or they and the Tatlitkutchin together, constituted the Loucheux proper.

The Loucheux of Alaska are reported by Hardisty to have been divided into three castes, Chitsah, Tangecsatsah, and Natsingh, names which seem to signify 'fair,' 'partly swarthy,' and 'swarthy,' respectively. Those of the first caste lived principally on fish, and those of the last mentioned by hunting. They occupied different districts, and marriage between two individuals of the same caste was almost prohibited. Petitot gives the names of these bands as Etchian-Kpét, men of the left,' Nattsein-K ρ et, 'men of the right,' and Tsendjidhaettset- $K\rho\acute{e}t$, 'men of the middle.' As the children belonged to the mother's clan, but lived usually with that of the father, these people are said to have exchanged countries slowly in successive generations. The three clans or castes are now represented by the Chitsa, Tangesata, and Natesa. According to Strachan Jones (Smithson, Rep., op. cit., 326), this system of castes of successive rank prevailed generally among the Kutchin. For the synonomy, see Kutchin.

Lower Kutenai. A division of the Kutenai (q.v.) living on Kootenay lake and r., and in the neighbouring plains of Idaho and British Columbia. From the time of their earliest contact with the whites they have been called Flatbows, for what reason is not known. There are four bands in British Columbia, viz.: St. Mary, pop. 212; Tobacco Plains, 57; Lower Columbia Lake, 72; Lower Kootenay, 154; the Arrow Lake band, pop. 22, are Shuswaps that married into a Kootenay family. They numbered 495 in British Columbia in 1911, and 79 from Idaho were connected with the Flathead agency, Montana.

Akoklako. - Tolmie and Dawson, Comp. Vocabs , 1248, 1884 (corruption of Aqköqtlá'tlqö). Akuchāklactas.— Wilson in Trans. Ethnol. Soc. Lond., 304, 1866 corruption of Aqkoqtla'tlqo. Aqkoqtla'tlqo. Chamberlain in 8th Rep. N. W. Tribes Can , 6, 1892. Aquqenu'kqō. Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Aquqtla'tlqo.-Boas, ibid. Arc Plattes.-Mayne, Brit Col., 298, 1862. Arcs-a-plats.—De Smet, Oreg. Miss., 112, 1847. Arcs Plats.-Duflot de Mofras, Expl., II. 335, 1844 Arcs-plattes.—Anderson quoted by Gibbs in Hist. Mag., 80, 1863. Flachbogen.-Berghaus, Physik. Atlas, map 17, 1852. Flat Bow.—Can. Ind. Aff. for 1902, pt. 2, 74. Flat-bows.—Hale in U. 8. Expl. Exped., vi, 204, 1846 (said to be a translation of Aqköqtlåtl, the Kutenai name of Kootenay r, but this is doubtful). Indians of the Lower Kootenay .-Chamberlain, op. cit, 6. Kertani,-Kingsley, Stand. Nat. Hist, vr. 140, 1883. Lake Indians.-Henry (1811) quoted by Marlean, Canad. Sav. Folk, 138, 1896 Lower Kootanais.-Mayne, Brit Col., 298, 1862. Lower Kootanie.-Tolmie and Dawson, Comp. Vocabs, 1248, 1884 Lower Kootenay.-Boas, op cit, 10 Lower Kootenays.—Chamberlain, op. cit , 6.

Lower Thompson Indians. The popular name for the Ntlakyapamuk living on Fraser r., between Siska and Yale, Brit. Col.

Cañon Indians.—Teit in Mem Am. Mus Nat. Hist, n, 168, 1900. Lower Thompson Indians.—Hid. Lower Thompsons.—Ibid. Utā'mqt.—Boas, inf'n, 1906 (own name). Utā'mqtamux.—Teit, op eit 'people below' own name).

Lulanna. A Haida town referred to by Wark in 1836-41. It is perhaps intended for Yaku, opposite Graham id., Queen Charlotte ids., Alaska, or it may have been that town and Kiusta considered as one. Its population was estimated by Wark at 296 in 20 houses.

Lu Ian na.—Wark in Schooleraft, Ind. Tribes, v. 489, 1855. Su-Ian-na.—Kane, Wand. N. A., app., 1859. misprint from Wark)

Lunge. An abbreviation in common use among the English-speaking people of the region of the Great lakes, particularly the N. shore of lake Ontario, for muskelunge, a variant of maskinonge (q.v.). The form longe represents another variant, maskalonge. The name is applied also to the Great Lake trout (Salvelinus namayoush).

(A. F. C.)

Lytton band. One of 4 subdivisions of the Upper Thompson Indians, in the interior of British Columbia. In 1911 they numbered 470, under the Kamloops agency.

Lkanitci'nemux.—Teit in Mem Am. Mus. Nat. Hist., II, 170, 1900 ('people of Lkanitei'n [Lytton]'). Lytton band.—Hod. Nlak'a'pamux.—Ibid. (generally used for all the Ntlak'apamuk). Nlak apamux'ō'ē.—Ibid. (the Nlak'a'pamux proper).

Maakoath (Maa'kōath). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

2 GEORGE V., A. 1912

Maamtagyila. A gens of the Kwakiutl, found in two septs, the Guetela and the Matilpe.

Maa'mtag'ila,—Boas in Rep. Nat. Mus. 1895, 330, 1897. Mataki'la,—Boas in Petermanns Mitt, pt. 5, 131, 1887.

Maate $(M\bar{a}\cdot\bar{a}t\bar{\epsilon})$. A summer village of the Koskimo on the s. side of Quatsino sd., Vancouver id.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. 11, 69.

Magic. There are authentic accounts from various observers in many parts of the New World, from the earliest historical period to the present time, that the Indians practised so-called magic arts, or sorcery. The earlier writers marvelled at these arts, and evidently wished their readers to marvel. They often attributed the power of the Indians to Satan. Father Acosta, in the 16th century, spoke in awe of the Mexican magicians flying through the air, assuming any form they pleased and having telepathic knowledge of events occurring at distant places, and the same may be said in a general way of the Eskimo. The Rev. Peter Jones wrote in the first decade of the 19th century: "I have sonetimes been inclined to think that, if witcheraft still exists in the world, it is to be found among the aborigines of America." His personal experience was among the Chippewa. Nipissing were called Jongleurs by the French on account of the expertness in magic of their medicine men. Some writers of the present day marvel as much as did their predecessors; but instead of attributing the phenomena to Satan, seek the cause in spirits or something equally occult. The feats of Indian magicians, as a rule, may be easily explained as sleightof-hand tricks, and their prophecy and telepathy as the results of collusion. Their tricks are deceptions, very ingenious when it is eonsidered how rude their tools and appliances are, but not to be compared with the acts of civilized conjurors who make no claim to superhuman aid.

Distinct from such tricks of illusion and deceit, there is evidence that the Indians were and still are versed in hypnotism, or, better, "suggestion." Carver (1776-78) speaks of it among the Sioux, and J. E. Fletcher observed it among the Menominee about the middle of the last century. Mooney describes and pictures the condition among modern Indians.

Sleight-of-hand was not only much employed in the treatment of disease, but was used on many other occasions. A very common trick among Indian charlatans was to pretend to suck foreign bodies, such as stones, out of the persons of their patients. Records of this are found among many tribes, from the lowest in culture to the highest, even among the Aztecs. Of course such trickery was not without some therapeutic efficacy, for it, like many other proceedings of the shamans, was designed to cure disease by influence on the imagination. A Hidatsa residing in Dakota in 1865 was known by the name Cherry-in-the-mouth beeause he had a trick of producing from his mouth, at any season, what seemed to be fresh wild cherries. He had found some way of preserving cherries, perhaps in whiskey, and it was easy for him to hide them in his mouth before intending to play the trick; but many of the Indians considered it wonderful magic.

The most astonishing tricks of the Indians were displayed in their fire eeremonies and in handling hot substances, accounts of which performances pertain to various tribes. It is said that Chippewa soreerers could handle with impunity red-hot stones and burning brands, and could bathe the hands in boiling water or syrup; such magicians were called "fire-dealers" and "fire-handlers." There are authentic accounts from various parts of the world of fire-dancers and fire-walks among barbarous races, and extraordinary fire acts are performed also among widely separated Indian tribes. Among the Arikara of what is now North Dakota, in the autumn of 1865, when a large fire in the center of the medicine lodge had died down until it became a bed of glowing embers, and the light in the lodge was dim, the performers ran with apparently bare feet among the hot coals and threw these around in the lodge with their bare hands, causing the spectators to flee.

Consult the works of H. H. Baneroft, Carver, Catlin, Fewkes, Fletcher, Hoffman, Peter Jones, Lummis, Matthews, Mooney, M. C. Stevenson, and others, in the Bibliography.

(w. m.)

Maguhleloo ('caribou'). A gens of the Abnaki, q.v.

Magalibò.—J. D. Prince, inf'n, 1905 (modern St. Francis Abnaki form). Mä-guh-le-loo'.—Morgan, Anc. Soc., 174, 1877.

Mahcoah. The principal village of the Toquart (q.v.) on Village passage, Barkley sd., w. coast of Vancouver id.— Can. Ind. Aff., 263, 1902.

Mahktosis. The principal village of the Ahousaht (q. v.), on Matilda er., Clayoquot sd., w. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Mahsolamo. Given as the name of a body of Salish on the s. side of Chemainus lake, near the E. coast of Vancouver id.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Maktlaiath (Mā'kil'aiath). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Makwa ('bear'). A gens of the Chippewa, q. v.

Mä-kwä'.—Morgan, Anc. Soc., 166, 1877. Mukkwaw.—Tanner, Narrative, 314, 1830. Muk-wah.— Ramsey in U.S., Ind. Aff. Rep., 91, 1850.

Malakut (Mā'lexaL). A Salish tribe on Saanich inlet, s. E. end of Vancouver id., speaking the Cowichan dialect; pop. 14 in 1901, 10 in 1904.

Mal-a-hut.—Can. Ind. Aff. 1889, 270, 1890. Malakut.—Ibid., 1901, pt., ir, 164. Mā'leqad —Boas, M8, B. A. E., 1887.

Malashaganay. A name of the sheepshead or fresh-water drum (Haplodinotus grunniens). Through Canadian French malashigané or malashigane, from manashigan in the Chippewa-Nipissing dialects of the Algonquian stock, signifying 'ugly ashigan.' The ashigan is the black bass of Canadians. (A. F. C.)

Male (Mā'lē). A village of the Musqueam, a Cowichan tribe, situated x. of Seabird id., in the delta of Fraser r., Brit. Col. According to Hill-Tout it was claimed by the Squawmish. Mā'lē.—Hill-Tout in Rep. Brit. A. A. S., 54, 1894. Mā'-li.—Ibid., 473, 1900.

Malecite. Various explanations of this name have been given. According to Chamberlain it is from their Micmac name Malisit, 'broken talkers'; Tanner gives the form as Mahnesheets, meaning 'slow tongues'; Baraga derives it through the Cree from mayisit or malisit, 'the disfigured or ugly foot'; Lacombe (Dict. Cris, 707) agrees with Baraga and gives the etymology as mayi or mal, 'deformed,' and sit, 'foot.' Maurault's explanation is radically different from all, as he says it is from Maroudit or Malouidit, 'those who are of Saint Malo.' Vetromile says it "comes from malike, which in old Abnaki and also in Delaware means

witcheraft," but adds, "hence the French name Micmae is a substitute for Marcschite," as he writes the name. According to Chamberlain the name they apply to themselves is Wulast kwiuk, 'dwellers on the beautiful river,' or, as given by Maurault, Ouarastegoviaks, 'those of the river whose bed contains sparkling objects.'

The Malecite belong to the Abnaki group of the Algonquian stock. Maurault makes a distinction between the Malecite and the Etchimin, but adds that "the remnants of this tribe and the Etchimins are called at the present day Malecites." Their closest linguistic affinity is with the Passamaquoddy, the language of the two being almost identical, and is closely allied to the New England dialects, but more distant from that of the Miemae.

Although the New Brunswick coast was visited by or soon after the middle of the 16th century, and St. John r. indicated on maps as early as 1558, making it quite probable that the people of this tribe had come in contact. with the whites at that early date, the earliest recorded notice of them is in Champlain's narrative of his voyage of 1604. He found the country along the banks of the St. John in the possession of Indians named "Les Etchemons," by whom his party was received with hospitality and rejoicing, and says they were the "first Christians" who had been seen by these savages, which may have been true of the particular party he met, but doubtful in the broader sense. That these were Malecite there is no reasonable doubt. "When we were seated," says Champlain, "they began to smoke, as was their custom, before making any discourse. They made us presents of game and venison. All that day and the night following they continued to sing, dance, and feast until day reappeared. They were clothed in beaver skins.'

Early in the 17th century Ft. La Tour was built on St. John r., which became the rallying point of the tribe, who there learned the use of firearms, and first obtained cooking vessels of metal and the tools and instruments of civilized life. The few French settlers on this river intermarried with the Indians, thus forming a close alliance, which caused them to become enemies of the New England settlers, between whom and the French there was almost constant warfare. After the English came into possession of the country there were repeated disputes between them and the Malecite in regard to lands until 1776.

Afterward lands were assigned them. In 1856, according to Schooleraft, "the Tobique river, and the small tract at Madawaska. Meductic Point, and Kingselear, with their small rocky islands near St. John, containing 15 acres," constituted all the lands held or claimed by them in the country which was formerly their own. In 1884 they numbered 767, of whom 584 were in New Brunswick and the others in Quebec province. According to the report of Canadian Indian Affairs for 1901 their number was 805, of whom 103 were in Quebec province and 702 in New Brunswick.

Amalecites.--Chauvignerie (1736) in N. Y. Doc. Col Hist, 18, 1052, 1855. Amalicites.—Clinton (1749). ibil, vt, 540, 1855. Amalingans.—Shea, Cath. Miss., 144, 1855. Amalistes.—Am. Mamalelekam. A gens of the Mamalelekala.

Mā'fēlēqala.—Boas in Petermanns Mitt., pt. 5, 130, 1887. Mā'malēlēk'am.—Boas in 6th Rep. N. W. Tribes, Can., 54, 1890. Ma'malēleqala.—Boas in Rep. Nat. Mus. for 1895, 330, 1897.

Mameoya ('fish-eaters'). A former?) (division of the Kainah tribe of the Siksika, q.v. Fish Eaters.—Culbertson in Smithson. Rep. for 1850, 144, 1851. Mä-me-o'-ya.—Morgan, Anc. Soc., 171, 1877. Mum-i'-o-yiks.—Hayden, Ethnog. and Philol. Mo., Val., 264, 1862.

Mamikininiwug ('lowland people'). A subdivision of the Paskwawininiwug, or Plains

Mamikiwininiwag.—Wm. Jones, inf'n, 1906 Mamikiyiniwok.—Lacombe, Dic. Langue Cris, x, 1874

Mamtum. Given as the name of a body of Indians on Cowichan lake, s. end of Vaucouver id. (Brit. Col. map, Ind. Aff., Victoria. 1872). Perhaps the Quamichan or the Comiakin of Cowichan valley.

Mamun-gitunai (Mā'm⁴n git⁴nā'-i, 'Gi'-tuns of Mamun r.'). The most important division of the Gituns, a family of the Eagle clan of the Haida, living at Masset, Queen Charlotte ids., Brit. Col. They derived their name from that of a small stream which falls into Masset inlet near its head, where they used to camp. A subdivision in the town of Yaku was called Ao-gitunai.—Swanton, Cont. Haida, 275, 1905.

Manabozo. See Nanabozo.

Manito. The mysterious and unknown potencies and powers of life and of the universe. As taken over from Algonquian into the vocabulary of the white man, it has signified spirit, good, bad, or indifferent: Indian god or devil, demon, guardian genius loci, fetish, etc. The spelling manitou indicates French influence, the earlier writers in English using manitto, manetto, manitoa, etc. Cuoq says that the Nipissing manito was formerly Some writers use pronounced manitou. manito, or good manito, for Good or Great Spirit, and evil manito for the devil. It is declared by some that the signification of such terms as Kitchi manito, Great Spirit, has been modified by missionary influence. The former manito of English literature comes from one of the E. Algonquian dialects. the Massachuset manitto, he is a god, the Narraganset (Williams, 1643) manit, god, or The form manitou the Delaware manitto. comes with French intermediation from the central dialects, the Chippewa, and Nipissing, or Cree manito (Trumbull in Old and New, 1. 337, 1870). The term has given rise to many place-names in Canada and the United States. For a discussion of manito from the Indian point of view, consult Jones in Jour. Am. Folk-lore, xvIII, 183-190, 1905.

(A. F. C.)

Manosaht ('houses-on-spit people'). A Nootka tribe formerly dwelling at Hesquiat pt., between Nootka and Clayoquot sds., w. coast of Vancouver id. In 1883, the last time their name appears, they numbered 18.

Mānnā-wõusūt.—Mayne, Brit Col., 251, 1862. Manoh-ah-sahts.—Can. Ind Aff., 52, 1875. Mā'nōosath.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890. Mano-saht.—Sproat, Sav. Life, 308, 1868. Manosit. Swan, MS., B. A. E. Mau-os-aht.—Can. Ind. Aff. 1883, 188, 1884.

Manumaig (Myànamàk, 'eatfish'). A gens of the Chippewa, q.v.

Cat Fish.—Morgan, Anc. Sec., 186, 1877 — Man-umaig.—Warren in Minn. Hist. Soc. Coll., v. 44, 1885. Myänamäk.—Wm. Jones, inf.n, 1906.

Many Horses. A Piegan Siksika chief. sometimes mentioned as 'Dog' and also as Sits in the Middle'; born about the close of the 18th century. He was noted not only for his warlike character but for the large number of horses he acquired; hence his name. According to the account given by the Indians to Grinnell (Story of the Indian, 236, 1895). he commenced to gather and to breed horses immediately after the Piegan first came into possession of them from the Kutenai 1804-06. and also made war on the Shoshoni for the purpose of taking horses from them. His herd became so extensive that they numbered more than all the others belonging to the tribe and required a large number of herders to take care of them. Many Horses was a signer of the first treaty of his tribe with the whites, on the upper Missouri, Oct. 17, 1855. which he signed as "Little Deg." He was killed in 1867 at the battle of Cypress Hills between the Piegan and the allied Crows and Hidatsa, at which time he was an old man.

C. T.

Maple sugar. In some of the Eastern States and parts of Canada the production of maple sugar and syrup is one of the thriving industries of the country. The census statistics of 1900 show that during the year 1899 there were made in the United States 11,928,770 pounds of maple sugar and 2,056,611 gallons of syrup. The total values of the sugar and syrup for 1899 were, respectively, \$1,074,260 and \$1,562,451. The production of maple syrup seems to have increased somewhat, while that of maple sugar appears to have declined. This industry is undoubtedly of American Indian origin. The earliest extended notice of maple sugar is "An Account of a sort of Sugar made of the Juice of the Maple in Canada," published in the Philosophical Transactions of the Royal Society for 1684-85, where it is stated that "the savages have

2 GEORGE V., A. 1912

practised this art longer than any now living among them can remember." In the Philosophical Transactions for 1720-21 is printed an account of sugar-making in New England by a Mr. Dudley. The Indian origin of maple sugar is indicated also by notices in Joutel; Lafiteau, who states directly that "the French make it better than the Indian women from whom they have learned how to make it"; Bossu, who gives similar details about French sugar-making in the Illinois country; and other early writers. In various parts of the country the term "Indian sugar" (Canad. Settlers' Guide, 66, 1860) has been in use, affording further proof of the origin of the art of making maple sugar among the aborigines. Some of the Indian names of the trees from which the sap is obtained afford additional evidence, while maple sap and sugar appear in the myths and legends of the Menominee, Chip-The technique of pewa and other tribes. maple-sugar making also reveals its Indian origin, not merely in the utensils employed, but also in such devices as straining through hemlock boughs, cooling on the snow, etc. For maple sugar cooled on the snow the Canadian-French dialect has a special term, tire, besides a large number of special words, like sucrerie, 'maple-sugar bush'; toque, 'sugar snowball'; trempette, 'maple-sugar sop,' etc. The English vocabulary of maple-sugar terms is not so numerous. Humbo, a New Hampshire term for 'maple syrup,' is said to be of Indian origin. The details of the evidence of the Indian origin of this valuable food product will be found in H. W. Henshaw, "Indian Origin of Maple Sugar," Am. Anthrop., 111, 341-351, 1890, and Chamberlain, "The Maple amongst the Algonkian tribes," ibid., IV, 39-43, 1891, and "Maple Sugar and the Indians," ibid., 381-383. See also Loskiel, Hist. Miss. United Breth., 179, 1794. (A. F. C.)

Maquinna. A chief of the Mooachaht, a Nootka tribe, who attained notoriety as the chief who captured the brig Boston, in Mar., 1803, and massacred all of her crew except the blacksmith, John Jewitt, and a sailmaker named Thompson. After being held in captivity until July, 1805, they were liberated by Capt. Hill of the brig Lydia, also of Boston. The story of the captivity of these two men was afterward extracted from Jewitt by Roland Alsop, of Middletown, Conn., and published in America and Europe. A point near the entrance of Nootka sd. is now called

Maquinna pt. See Narrative of the Adventures and Sufferings of John R. Jewitt, in various editions from 1815 to 1869.

(J. R. S.)

Marameg (from Man-um-aig, Chippewa for 'catfish.'-Verwyst). Evidently a band or division of the Chippewa, which seems to have been, at the dawn of the history of the Upper Lake region, in the process of disintegration. The first notice of them is that given by Dablon in the Jesuit Relation of 1670, at which time they resided on take Superior, apparently along the E. half of the N. shore. They were then in close union with the Sauteurs, or Chippewa of Sault Ste. Marie. Dablon, speaking of the Chippewa of the Sault, says: "These are united with three other nations, who are more than 550 persons, to whom they granted like rights of their native country. These are the Noquets who are spread along the s. side of lake Superior, where they are the originals; and the Outehibous with the Marameg of the N. side of the same lake, which they regard as their proper country." Here the Chippewa of the N. side of the lake are distinguished from those of Sault Ste. Marie to the same extent as are the Marameg and Noquet. The Chippewa settlement at the Sault, where the fishing was excellent, seems to have drawn thither the other divisions, as this gave them strength and control of the food supply. The early notices of the Marameg and Noquet appear to indicate that these two tribes became absorbed by the Chippewa and their tribal or subtribal distinction lost, but there are reasons for believing that these two peoples were identical. Tailhan, in his notes on Perrot's Mémoire, assumes without question that the two tribes were incorporated with the Chippewa of the Sault, who were distinguished by the name Pahouitigouchi-The Marameg are mentioned under the name Malamechs in the Proces-verbal of the Prise de Possession in 1671 as present at the conference on that oceasion. According to Shea they are mentioned in the MS. Jesuit Relation of 1672-73 as being near the Mascoutin, who were then on Fox r., Wis. If, as supposed, the people of this tribe are those referred to by La Chesnaye (Margry, vi, 6) under the name "Malanas ou gens de la Barbue," they must have resided in 1697, in part at least, at Shaugawaumikong (the present Bayfield, Wis.), on the s. shore of

lake Superior. The attempt to identify them with the "Miamis of Maramek" mentioned in a document of 1695 (N. Y. Doc. Hist., IN, 619) as residing on Maramec (Kalamazoo) r., in Michigan, is certainly erroneous. (J. M. C. T.)

Gens de la Barbue.—La Chesnaye (1697) in Margry, Déc., vr. 6, 1886. Malamechs.—Prise de Possession (1671), ibid., r. 97, 1875. Malanas.—La Chesnaye, op. cit. Marameg.—Jes. Rel. 1669-70, Thwaites ed., ptv, 133, 1899.

Maria. A Micmae settlement in Maria township, Bonaventure co., Quebec, containing 80 Indians in 1884, 110 in 1911.

Marian. The Christian Hurons, so called by their pagan brethren on account of their frequent repetition of the name of Mary.— Shea, Cath. Miss., 183, 1855.

Marriage. Except that marital unions depend everywhere on economic considerations, there is such diversity in the marriage customs of the natives of North America that no general description will apply beyond a single great cultural group.

The Eskimo, except those tribes of Alaska that have been led to imitate the institutions of neighbouring tribes of alien stocks, have no clan organization. Accordingly the choice of a mate is barred only by specified degrees of kinship. Interest and convenience govern the selection. The youth looks for a competent housewife, the girl for a skilled hunter. There is no wedding ceremony. The man obtains the parents' consent, presents his wife with garments, and the marriage is consummated. Frequently there are child betrothals, but these are not considered binding. Monogamy is prevalent, as the support of several wives is possible only for the expert hunter. Divorce is as informal as marriage; either party may leave the other on the slightest pretext, and may remarry. The husband may discard a shrewish or miserly wife, and the wife may abandon her husband if he maltreats her or fails to provide enough food. In such cases the children generally remain with the mother.

On the N. W. coast marriage between members of the same clan is strictly forbidden. The negotiations are usually carried on by the parents. The Kwakiutl purchases with his wife the rank and privileges of her family, to be surrendered later by her father to the children with interest, depending on the number of offspring. When the debt is paid the father has redeemed his daughter, and the marriage is annulled unless the husband renews his payment. Among the other tribes

of the group an actual sale of the girl is rare. The Tlingit, Tsimshian, coast Salish, and Bellacoola send gifts to the girl's parents; but presents of nearly equal or even superior value are returned. Monogamy predominates. In ease of separation Salish parents divide their children according to special agreement. Among the Tlingit, Haida, Tsimshian, and Heiltsuk the children always belong to the mother. If a husband expels his wife from caprice he must return her dowry; if she has been unfaithful he keeps the dowry and may demand his wedding gifts.

Of the Plains Indians some had the gentile system, while others lacked it completely. They seem to have practised polygamy more commonly, the younger sisters of a first wife being potential wives of the husband. Among the Pawnec and the Siksika the essential feature of the marriage ceremony was the presentation of gifts to the girls' parents. In case of elopement the subsequent presentation of gifts legitimized the marriage and removed the disgrace which would otherwise attach to the girl and her family (Grinnell). The men had absolute power over their wives, and separation and divorce were common. The Hidatsa, Kiowa, and Omaha had no purchase. The women had a higher social position, and the wishes of the girls were consulted. Wives could leave cruel husbands. Each consort could remarry and the children were left in the custody of their mother or their paternal grandmother. Separation was never accompanied by any ceremony

East of the Mississippi the clan and gentile systems were most highly developed. The rules against marriage within the clan or gens were strictly enforced. Descent of name and property was in the female line among the Iroquoian, Muskhogean, and s. E. Algonquian tribes, but in the male line among the Algonquians of the N. and W. Among some tribes, such as the Creeks, female descent did not prevent the subjection of women. As a rule, however, women had clearly defined rights. Gifts took the place of purchase. Courtship was practically alike in all the Atlantic tribes of the Algonquian stock; though the young men sometimes managed the matter themselves, the parents generally arranged the match. A Delaware mother would bring some game killed by her son to the girl's relatives and receive an appropriate gift in return. If the marriage was agreed upon, presents of

this kind were continued for a long time. A Delaware husband could put away his wite at pleasure, especially if she had no children, and a woman could leave her husband. The Hurons and the Iroquois had a perfect matriarchate, which limited freedom of choice. Proposals made to the girl's mother were submitted by her to the women's council, whose decision was final among the Hurons. Iroquois unions were arranged by the mothers without the consent or knowledge of the couple. Polygamy was permissable for a Huron, but forbidden to the Iroquois. Divorce was discreditable, but could easily be effected. The children went with the mother.

Monogamy is thus found to be the prevalent form of marriage throughout the continent. The economic factor is everywhere potent, but an actual purchase is not common. The marriage bond is loose, and may, with few exceptions, be dissolved by the wife as well as by the husband. The children generally stay with their mother, and always do in tribes having maternal clans.

Maskāsinik. A division of the Ottawa, mentioned in the Jesuit Relation for 1657-58 with the Nikikouek, the Michesaking (Missisauga), and others, as nations long known to the French in Canada. There is no other known reference to them. They may possibly be the same as the Achiligouan.

(J. N. B. H.)

Maskegon (Mŭskīqōk, 'they of the marshes or swamps.'-W. J.). An Algonquian tribe so closely related to the Cree that they have appropriately been called a subtribe. According to Warren the Maskegon, with the Cree and the Monsoni, form the northern division of the Chippewa group, from which they separated about eight generations before 1850. The traders knew them as Swampy Crees. From the time the Maskegon became known as a distinct tribe until they were placed on reserves by the Canadian government they were scattered over the swampy region stretching from take Winnipeg and take of the Woods to Hudson bay, including the basins of Nelson, Haves, and Severn rs., and extending s. to the watershed of lake Superior. They do not appear to be mentioned in the Jesuit Relations or to have been known to the early missionaries as a distinct people, though the name "Masquikoukiaks" in the Proces-verbal of the Prise de Possession of 1671 (Perrot, Mém., 293, 1864) may refer to the Maskegon. Tailhan, in his notes to Perrot, gives as doubtful equivalents "Mikikoueks ou Nikikoueks," the Otter Nation (see Amikwa), a conclusion with which Verwyst (Missionary Labours) agrees. Nevertheless their association with the "Christinos" (Cree), "Assinipouals" (Assiniboin), and "all of those inhabiting the countries of the north and near the sea" (Hudson bay), would seem to justify identifying them with the Maskegon. If so, this is their first appearance in history.

Their gentes probably differ but little from those of the Chippewa. Tanner says that the Pezhew (Besheu) or Wildeat gens is common among them. No reliable estimate can be formed of their numbers, as they have generally had no distinct official recognition. In 1889 there were 1,254 Maskegon living with Chippewa on reservations in Manitoba at Birch, Black, Fisher, Berens, and Poplar rs., Norway House, and Cross lake. The Cumberland band of Saskatchewan and the Shoal Lake, Moose Lake, Chemawawin, and Grand Rapids bands of Manitoba, numbering 621 in 1911, consisted of Maskegon, and they formed the majority of the Pas band, numbering 427, and part of the John Smith and James Smith bands of Duck Lake agency, numbering 392. There were also some under the Manitowpah agency and many among the 1,201 Indians of St. Peter res., in Manitoba.

Maskinonge. A species of pike (Esox estor) found in the Great lakes and the waters of the adjacent regions. The word is variously spelled maskinonge, mascalonge, muskellunge, muskellunge, etc., and abbreviated into lunge or longe. As one of the earlier forms of this word, masquinongy, and the Canadian French

masquinongé and maskinongé, indicate, the terminal e was once sounded. The origin of the word is seen in mashkinonge or maskinonge, which in the Chippewa and Nipissing dialects of Algonquian is applied to this fish; although, as the etymology suggests, it might also be used of other species. According to Cuoq (Lex. Algonq., 194, 1886), mashkinonje is derived from mash, 'big,' and kinonje, 'fish.' This is perhaps better than the etymology of Lacombe and Baraga, which makes the first component to be māshk or māsk, 'ugly.' The folk-etymological masque allangé of Canadian French has been absurdly perpetuated in the pseudo-Latin mascalongus of ichthyologists.

(A. F. C.)

Masks. Throughout North America masks were worn in ceremonies, usually religious or quasi-religious, but sometimes purely social in character. Sometimes the priests alone were masked, sometimes only those who took part. and again the entire company. In all cases the mask served to intensify the idea of the actual presence of the mythical animal or supernatural person. The simplest form of mask was one prepared from the head of an animal, as the buffalo, deer, or elk. These realistic masks did not stand for the actual buffalo, deer, or elk, but for the generic type, and the man within it was for the time endowed with or possessed of its essence or distinctive quality where the belief obtained that the mask enabled the wearer to identify himself for the time being with the supernatural being represented. A ceremony of purification took place when the mask was removed (Culin). Among the Eskimo the belief prevailed "that in early days all animated beings had a dual existence, becoming at will either like man or the animal form they now wear; if an animal wished to assume its human form the forearm. wing or other limb was raised and pushed up the muzzle or beak as if it were a mask, and the creature became manlike in form and features. The idea is still held, and it is believed that many animals now possess this power. The manlike form thus appearing is called the inner, and is supposed to represent the thinking part of the creature, and at death becomes its shade."Many of the masks of the N. and the Pacific coast are made with double faces to illustrate this belief. "This is done by having the muzzle of the animal fitted over and concealing the face of the inna below, the outer mask being held in place by pegs so

arranged that it can be removed quickly at a certain time in the ceremony, thus symbolizing the transformation." Sometimes the head of a bird or animal towered above the face mask; for instance, one of the sand-hill erane was 30 inches long, the head and beak, with teeth projected at right angles, about 24 inches; the head was hollowed out to admit a small lamp which shone through the holes representing the eyes; below the slender neck, on the breast, was a human face. The shaman who fashioned this mask stated that once when he was alone on the tundra he saw a sandhill crane standing and looking at him. As he approached, the feathers on the breast of the bird parted, revealing the face of the bird's In certain ceremonies women wore inna. masks upon the finger of one hand. mask festival was held as a thanksgiving to the shades and powers of earth, air, and water for giving the hunters success." (Nelson in 18th Rep. B. A. E., 1899.)

In the N., on the Pacific coast, in the S.W., among some of the tribes of the plains, and among probably all the eastern tribes, including the ancient pile dwellers of Florida, masks made of wood, basketry, pottery or hide were carved, painted, and ornamented with shell, bark fibre, hair, or feathers. They might be either male or female. The colours used and the designs carved or painted were always symbolic, and varied with the mythology of the tribe. Frequently the mask was provided with an interior device by which the eyes or the mouth could be opened or closed, and sometimes the different parts of the mask were so hinged as to give the wearer power to change its aspect to represent the movement of the myth that was being ceremonially exemplified. With the sacred masks there were prescribed methods for consecration, handling, etc.; for instance, among the Hopi they were put on or off only with the left hand. This tribe, according to Fewkes, also observed rights of bodily purification before painting the masks. Some of the latter were a simple face covering, sometimes concealing only the forehead; to others was attached a helmet, symbolically painted. Hopi made their masks of leather, cloth, or basketry, and adorned them with appendages of wood, bark, hair, woven fabries, feathers, herbs, and bits of gourd, which were taken off at the close of the ceremony and deposited in some sacred place or shrine. The mask was not always worn; in one instance it was

carried on a pole by a hidden man. Altars were formed by masks set in a row, and sacred meal was sprinkled upon them. The mask of the plumed serpent was spoken of as "quiet"; it could never be used for any purpose other than to represent this mythical creature; nor could it be repainted or adapted to any other purpose, as was sometimes done with other masks. Masks were sometimes spoken of as kachinas, as many of them represented these ancestral and mythical beings, and the youth who put on such a mask was temporarily transformed into the kachina represented. Paint rubbed from a sacred mask was regarded as efficacious in prayer, and men sometimes invoked their masks, thanking them for services rendered. Some of the Hopi masks are very old; others are made new yearly. Certain masks belong to certain clans and are in their keeping. No child not initiated is allowed to look upon a kachina with its mask removed, and certain masks must never be touched by pregnant women. Among the Hopi also a mask was placed over the face of the dead; in some instances it was a mere covering without form, in others it was made more nearly to fit the face. "A thin wad of cotton, in which is punched holes for the eyes, is laid upon the face. . . and is called a raincloud, or prayer to the dead to bring the rain." (Fewkes in 15th Rep. B. A. E., 1897.)

Young people sometimes indulged in festivities and made queer masks with which to disguise themselves; for example, masks of bladder or rawhide representing the head of the Thunder-bird were made by the boys of the poorer classes among some of the Siouan tribes when the thunder was first heard in the spring. Covering their heads and faces with the masks, the boys proceeded to their uncles' tents and, imitating the sound of thunder, struck the doorflaps with sticks. Then, with much merriment at the expense of the boys, the uncles invited them in and gave them presents of leggings, moccasins, or blankets. On the N. W. coast masks were occasionally made as toys for the amusement of children. But generally the mask was a serious representation of tribal beliefs, and all over the country the fundamental idea embodied in it seems to have been that herein described.

In addition to the authorities cited, consult Boas in Rep. Nat. Mus. for 1895; Dall in 3d Rep. B. A. E., 1884; Dorsey and Voth in Field Columb. Mus. Pub. Nos. 55, 56, 1901,

1902; Matthews in Mem. Am. Mus. Nat. Hist.,vi, 1902; Nelson in 18th Rep. B. A. E., 1899.(A. C. F.)

Massassauga. A western species of rattlesnake (Sistrurus catenatus). This reptile is more properly termed Mississauga (q.v.) and derives its appellation from the place and ethnic name Missisauga (Chamberlain, Lang. of Mississagas, 59, 1892). from the Chippewa misi, 'great,' and sâg or sauk, 'river mouth.' (A. F. C.)

Masset. A Haida town on the E. side of Masset inlet, near its mouth, Queen Charlotte ids., Brit. Col. Its name in the Masset dialect is Ataiwas (gatgewas, white slope, which in the Skidegate dialect appears as Gatgai'xiwas). According to the inhabitants the sea formerly came in over the ground now occupied by houses, but the latter were then situated on higher ground just back of the present site. At that time, too, there was an independent town around a hill called Edjao (El'djao), which stands at the eastern end. Until lately the band holding possession was the Skidaokao. According to John Wark's estimate made between 1836 and 1841 there were 160 houses and 2,473 people at Masset, but this enumeration must have included all the neighbouring towns, and probably numbered the smokehouses. The number of houses, enumerated by old people, in the two towns, Masset proper and Edjao (27 and 6 respectively) would indicate a total population of about 528, 432 in the former and 96 in the latter. Adding to these figures the estimated numbers in the two neighbouring towns of Yan and Kayung, the grand total would be 1,056, or less than half of Wark's figure. It is probable. however, that the population had decreased between Wark's time and that which the old men now recall. According to the Canadian Report of Indian Affairs for 1911 there were 372 people at Masset; these include the remnant of all the families that lived once between Chawagis r. and Hippa id. A few people have moved to the neighbouring town of Kayung. A mission of the Anglican Church is maintained at Masset, the oldest on the Queen Charlotte ids., and all the Indians are nominal Christians. (J. R. S.)

3Atē'was.—Swanton, Cont. Haida, 281, 1905 (native name). G'at'aiwa's.—Boas, Twelfth Report N. W. Tribes, Canada, 23, 1898. Gatgayiwas.—Ibid. (Skidegate dialect). Maasets.—Scouler (1846) in Jour. Ethnol. Soc. Lond., 1, 233, 1848. Masseets.—Scouler up Jour. Roy. Geog. Soc., xi, 219, 1841. Massets.—Dunn, Hist. Oregon, 281, 1844. Massett.—Can Ind.

Aff. 1904, pt. 2, 69, 1905. Massetta.—Schoolcraft, Ind. Tribes, v, 489, 1855 (after Wark, 1836-41). Massettes.—Scouler in Jour. Roy. Geog. Soc. (xr, 219, 1841. Māss hāde.—Krause, Tlinkit Indianer, 304, 1885. Mossette.—Kane, Wand. in N. Am., app., 1859 (after Wark, 1836-41). Ut-te-was.—Dawson, Q. Charlotte Ids., 183, 1880.

Mastohpatakiks (Ma-stoh'-pa-ta-kīks, 'raven bearers'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe of the Siksika.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Mataitaikeok (Ma-tái-tai-ke-ók, 'many eagles'). A former Cree band, named from their chief, who was known to the French as Le Sonnant. In 1856 they roamed and hunted in the country along Wood mt., s. Saskatchewan and traded with the Hudson's Bay Co. and with the fur companies on the Missouri near the mouth of the Yellowstone. They numbered about 300 lodges.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Matawachkarini ('people of the shallows.'—Hewitt). A small tribe or band living in 1640 on middle Ottawa r., but found in 1672 in the vicinity of the s. end of Hudson bay, near the Monsoni. They were doubtless one of the bands, known to the French as Algonkin, which were broken and dispersed by the Iroquois invasion about 1660. See Mattawa.

Madaouaskairini.—Champlain, Œuvres, III, 302, 1870. Mataouachkariniens.—Jes. Rel. 1643, 61, 1855. Mataouachkairinouek.—Ibid , 1672, 54, 1858. Mataouachkairini.—Ibid , III, index, 1858. Mataouachkairinik.—Ibid , 1658, 22, 1858. Mataouachkairiniouek.—Ibid., 1646, 34, 1858. Mataouachkairiniwek. Ibid , 1646, 145, 1858. Mataouachkairini.—Ibid., 1640, 34, 1858. Matawachkairini.—Ibid., III, index, 1858. Matawachwairini.—Ibid. Matou - ouescarini.—Champlain (1613), Œuvres, III, 302, 1870.

Matchedash.—A name formerly used to designate those Missisauga living at Matchedash bay, s. Georgian bay, Ontario.

Matchedach.—Chauvignetie (1736) in N. Y. Doc. Col. Hist., ix, 1056, 1855. Matchedash.—Henry, Travels, 35, 179, 1809. Matchitashk.—Ibid. Matchitache. Memoir of 1718 in N. Y. Doc. Col. Hist., ix, 889, 1855.

Matilpe ('head of the Maamtagyila'). A Kwakiutl sept which has recently branched off from the rest of the true Kwakiutl. The gentes are Maamtagyila, Gyeksem, and Haailakyemae. The principal village is Karlukwees. Pop. of the Matilpe and Klawatsis bands in 1911, 97.

Mah-tee-cetp.—Can. Ind. Aff., 189, 1884. Mahtilpi. Ibid., pt. 2, 166, 1901. Mahtulth-pe.—Sproat in Can. Ind. Aff., 145, 1879. Mar-til-par.—Kane, Wand. in N. Am., app., 1859. Matelpa.—Tolmie and Dawson,

Comp. Vocabs. Brit. Col., 118n, 1884. Matelth-pahs. Brit. Col. map, Victoria, 1872. Mā-tilhpi.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. n, 65. Mā'til-pē.—Boas in 6th Rep. N. W. Tribes Can., 51, 1890. Matilpl.—Can. Ind. Aff. Rep. 1911–219. Mā'tilpis.—Boas in Petermanns. Mitt., pt. 5, 130, 1887. Mat-ul-pal.—Tolmic and Dawson, Comp. Vocabs. Brit. Col., 118n, 1884. Mur. til. par.—Schoolcraft, Ind. Tribes, v, 488, 1855.

Matlaten (Mat-la-ten). A summer village of the Wiweakam between Bute and Loughborough inlets, Brit. Col.; pop. 125 in 1885.—Boas in Bull. Am. Geog. Soc., 230, 1887.

Matsqui $(M\bar{a}'\varsigma_{\Omega}ui)$. A Cowichan tribe on Fraser r. and Sumas lake, Brit. Col. Their villages are Mamakume and Kokoaeuk. Pop. 40 in 1911.

Mä'çqui.—Boas in 64th Rep. Brit. A. A. S., 454, 1894. Maisqui.—Brit, Col. map, Ind. Aff., Victoria, 1872. Mamskey.—Custer quoted by Gatschet, notes, B. A. E. Matsqui.—Can. Ind. Aff. for 1901, pt. п, 158.

Mattawa ('river of shallows.' — Hewitt). A popular name for the Algonquian Indians living on Mattawa r., a branch of upper Ottawa r., Ontario. They are probably a part of the Nipissing or of the Timiskaming, q. v.

Mataoüiriou.—Jes Rel. 1672, 46, 1858. Mataovan. La Hontan (1703), New Voy, map, 1735. Mätawäng. Wm. Jones, inf'n, 1905 (correct form). Matawin.— McLean, Hudson Bay, 4, 87, 1849.

Mauthæpi ('dirty river.' — Hewitt). A Montagnais tribe in 1863 on the reservation at Manikuagan, on St. Lawrence r., Saguenay co., Quebec.—Hind, Lab. Penin., 11, 124, 1863.

Mayne Island. The local name for a body of Sanetch on the s. E. coast of Vancouver id.; pop. 20 in 1911.—Can. Ind. Aff. for 1902 and 1911.

Meamskinisht ('porcupine-foot grove'). A Tsimshian mission village founded in 1889 and settled by the Kitksan. In 1897 the population was about 50.—Dorsey in Am. Antiq., xix, 280, 1897.

Measurements. Among civilized people, previous to the introduction of the metric system, linear measurements were derived mostly, if not exclusively, from the human body, and although in later centuries these measurements became standardized, it is not long since they were all determined directly from the human frame. It is still common, even for white men, in the absence of a graduated rule, to compute the inch by the transverse dimension of the terminal joint of the thumb, and for women to estimate a yard by

stretching cloth from the nose to the tips of the fingers—the arm being extended and thrown strongly backward—or to estimate an eighth of a yard by the length of the middle finger. The use of the span as a standard of lineal measure is also still quite common. Within the last 30 years it has been a custom for traders to sell cloth to Indians by the natural yard or by the brace, and although this measure on a trader of small stature might be much less than 3 feet, the Indians preferred it to the vardstick. Below is given a list of what may be called natural measures which are known to have been employed by Indians. Some of the larger measures have been in general use among many tribes, while some of the smaller ones have been used by the Navaho and Pueblo shamans in making sacrificial and other sacred objects and in executing their dry-paintings. Some are also employed by Pueblo women in making and decorating their pottery.

Linear measures.—1. One finger width: the greatest width of the terminal joint of the little finger in the palmar aspect. 2. Two finger widths; the greatest width of the terminal joints of the first and second fingers held closely together, taken in the palmar aspect. 3. Three finger widths: the greatest width of the terminal joints of the first, second, and third fingers, taken as above. 4. Four finger widths: the width of the terminal joints of all four fingers of one hand, taken under the same conditions. 5. The joint: the length of a single digital phalanx, usually the middle phalanx of the little finger. 6. The palm: the width of the open palm, including the adducted thumb. 7. The finger stretch: from the tip of the first to the tip of the fourth finger, both fingers being extended. S. The span: the same as our span, i. e., from the tip of the thumb to the tip of the index finger, both stretched as far apart as possible. 9. The great span: from the tip of the thumb to the tip of the little finger, all the digits being extended, while the thumb and little finger are strongly adducted. 10. The cubit: from the point of the elbow to the tip of the extended middle finger, the arm being bent. 11. The short cubit: from the point of the elbow to the tip of the extended little finger. 12. The natural yard: from the middle of the chest to the end of the middle finger, the arm being outstretched laterally at right angles with the body; this on a tall Indian equals 3 feet or more; among some tribes the measure is taken

from the mouth to the tip of the middle finger. 13. The natural fathom, or brace: measured laterally on the outstretched arms, across the chest, from the tip of one middle finger to the tip of the other; this is twice the natural yard, or about 6 feet. The stature of white men usually equals or exceeds this measure, while among Indians the contrary is the rule—the arm of the Indian being usually proportionally longer than the arm of the white. This standard was commonly adopted by Indian traders of the N. in former days. They called it "brace," a word taken from the old French. There seems to be no evidence that the foot was ever employed by the Indians as a standard of linear measure, as it was among the European races; but the pace was employed in determining distances on the surface of the earth.

Circular measures.—1. The grasp: an approximate eircle formed by the thumb and index finger of one hand.—2. The finger circle: the fingers of both hands held so as to enclose a nearly circular space, the tips of the index fingers and the tips of the thumbs just touching.—3. The contracted finger circle: like the finger circle but diminished by making the first and second joints of one index finger overlap those of the other.—4. The arm circle: the arms held in front as if embracing the trunk of a tree, the tips of the middle fingers just meeting.

Scales and weight were not known on the western continent previous to the discovery. There is no record of standards of dry or liquid measure, but it is probable that vessels of uniform size may have been used as such.

(W, M,

From time immemorial loyalty Medals. has been rewarded by the conferring of land and titles of nobility, by the personal thanks of the sovereign, the presentation of medals, and the bestowal of knightly orders, the insignia of which were hung on the breast of the recipient. With the Indian chief it was the same. At first he was supplied with copies of his own weapons, and then with the white man's implements of war when he had become accustomed to their use. Brass tomahawks especially were presented to the Indians. Tecumseh carried such a tomahawk in his belt when he was killed at the battle of the Thames, in s.w. Ontario, and his chief warrior, John Naudee, removed it and the silver belt buckle from the body. There were also presented to the Indian

chiefs silver hat-bands, chased and engraved with the royal arms; silver gorgets to be worn suspended from the neck and having the royal arms and emblems of peace engraved upon them; and silver belt buckles, many of which exceeded 3 in. in diameter. The potency of the medal was soon appreciated as a means of retaining the Indian's allegiance, in which it played a most important part. While gratifying the vanity of the recipient, it appealed to him as an emblem of fealty or of chieftainship, and in time had a place in the legends of the tribe.

The earlier medals issued for presentation to the Indians of North America have become extremely rare from various causes, chief among which was the change of government under which the Indian may have been living. as each government was extremely zealous in searching out all medals conferred by a previous one and substituting medals of its own Another cause has been that within recent years Indians took their medals to the nearest silversmith to have them converted into gorgets and amulets. After the Revolution the United States replaced the English medals with its own, which led to the establishment of a regular series of Indian peace medals. Many of the medals presented to the North American Indians were not dated, and in many instances were struck for other purposes.

French Canadian Medals.—The earliest record of peace medals in connection with the Canadian Indians is found in Canada Correspondence General, vol. IV, in which mention is made of "a Caughnawaga chief, November 27, 1670, who holds preciously a medal presented to him by the king." Leroux (p. 14) includes a medal caused to be struck by Cardinal Richelieu in 1631 for presentation to Canadian Indians. A large medal was issued in France in commemoration of the reigning family; this example proved so acceptable to the Indians that a series of six, varying slightly in design and in size from $1\frac{5}{16}$ to $3\frac{1}{16}$ in., was issued for presentation to them. Very few of the originals are now known to exist, but many restrikes have been made from the dies in the Musée Monetaire at Paris.

1693. Obverse, head of the king to right, laurented; legend, Ludinicus Mispair Rex Christianssima: Reverse, four busts in field: legend, Felicius Domnes Augusta: Seren Dolph, Lud. D. Burg. Ph.d D. Card D. Bitar, M.D.C.X.C.III.

After the death of the Dauphin, in 1712, the reverse type was changed, two figures replacing the four busts of Louis, the Dauphin, and his two sons. Of this medal only restrikes are now known.

171-. Obverse, bust of king to right; legend, Ludoticus XIIII, D. G. FR. NAV. REX. Reverse, two Roman warriors; legend, HONOR ET VIRTUS. Silver; bronze, $\mathfrak{snze},\ 2_4^4$ in.

In the succeeding reign a smaller medal of similar design was issued, bearing on the obverse the head of the king to the right, draped and laureated; legend, Louis XV Rex Christianissimus. A copy of this medal has been found with the legend erased and George III stamped in its place (McLachlan, p. 9). Silver; bronze; size, 2 in.

The General de Lévis medal of 1658, and that of the first Intendant-General of Canada, Jean Varin, of 1683, though included by Leroux (p. 15) among the peace medals, are excluded by Betts and other writers. Leroux (p. 17) figures the French Oswego medal of 1758 as belonging to the peace medal series. "As medals were freely distributed about this time, some of them may have been placed in Indian hands" (Beauchamp, p. 64.)

1758. Obverse, head of king to left, nude and hair flowing; legend, Ludoricus XV Orbis Imperator; in exergue, 1758. Reverse, in field four forts; legend, Wesel, Oswego, Port Mahon; in exergue, Expung. Sti Davidis Arce et Solo Equato. Silver; brass; size, 14 in

British Medals.—The earliest medals presented to American Indians by the English colonists are those known as the Pamunkey series. By Act 38, Laws of Virginia, in the 14th year of King Charles II, March, 1661 (see Hening's Statutes, II, 185), there were caused to be made, possibly in the colony, "silver and plated plaques to be worn by the Indians when visiting the English settlements." They were plain on the reverse, in order to permit the engraving of the names of the chiefs of the Indian towns.

On the capture of Montreal by Sir Jeffrey Amherst, Sept. 8, 1760, an interesting series of medals, known as the conquest medals, was issued. McLachlan says they "were evidently made in America, and presented to the Iroquois and Onondagas, and other chiefs who assisted in the campaign." To each of the 23 chiefs, though they did but little fighting, was presented a medal by Sir William Johnson, who, in his diary, under date of July 21, 1761, says: "I then delivered the medals sent me by the General for those who went with us to Canada last year, being twenty-three in number." Beauchamp (p. 61) says: "In 1761 Johnson

had similar medals for the Oneidas, but none of them have been found."

1760. Obverse, view of a town, with bastions, on a river front, five church spires, island in river; in foreground, to left, a bastion with flag of St. George; in exergue, in an incused oval, D. C. F.; this side is cast and chased. Reverse, in field engraved, Montreal, remainder plain for iosertion of name and tribe of the recipient. Silver; size, 1¼ in. Pewter; size, 1¼ in.

Beauchamp (p. 66) says: "Two medals, relating to the capture of Montreal and conquest of Canada, seem more likely to have been given by Johnson to the Indians in 1761. As the two medals have Indian symbols, and one Amherst's name, and that of Montreal, they seem to suit every way Johnson's lavish distribution of medals at Otsego, when sent by his leader."

1761. Obverse, a laureated nude figure, typifying the St. Lawrence, to right, reclining, right arm resting on the prow of a galley, paddle in left hand, a beaver climbing up his left leg; in background a standard inscribed Amherst within a wreath of laurel, surmounted by a lion. In exergue, a shield with fleur-de-lis; above, a tomahawk, bow, and quiver; legend, Conquest of Canada. Reverse, a female figure, to right, seated beneath a pine tree; an eagle with extended wings standing on a rock; before the female a shield of France, with club and tomahawk; legend, Montreal Taken, MDCCLX; in exergue, Soc. Promoting Arts and Commerce. Silver; size, 1½ in.

1761. Obverse, head of King George, to right, nude, with flowing hair, laureated; legend, George II. King. Reverse, female figure seated beneath a pine tree, to left, weeping, typical of Canada; behind her a beaver climbing up a bank; legend, Canada Subdued; in exergue, MDCCLX.; below, S. P. A. C. Silver; bronze; size; [1] in.

To commemorate the marriage of George III and Queen Charlotte a small special medal was struck, in 1761, for general distribution to insure the allegiance of the savages in the newly acquired province (McLachlan, p. 13).

1761. Obverse, bust of king and queen facing each other; above, a curtain with cords and tassels falling midway between the heads. Reverse, the foyal arms, with ribbon of the Garter, and motto on ribbon below, Dieu et Mon Droit. Silver; size, 13 in., pierced for suspension.

The following series of medals is supposed to have been struck for presentation to Indian chiefs in Canada at the close of the French and Indian wars. There were five in the series, differing in size and varying slightly in design; they were formed of two shells joined together; one of lead and others of pewter, with tracings of gilding, have been found.

1762. Obverse, youthful bust of king, to right, in armour, wearing ribbon of the Garter, hair in double curl over ear; legend, *Dei Gratia*. Reverse, the royal arms encircled by the ribbon of the Garter, surmounted by a

crown, supported by the lion and the unicorn; legend, Honi Soit qui Mal y Pense; on a ribbon below the motto, Dieu et Mon Droit. Silver; size, 1½ by 3½ in.

In 1763 Pontiac rebelled against British rule, and the Government entered into treaty with the remaining friendly chiefs. A council was held at Niagara in 1764, at which time the series of three medals known as the "Pontiac conspiracy medals" was presented to the chiefs and principal warriors.

1764. Obverse, bust of king, to left, in armour and in very high relief, long hair tied with ribbon, laureated; legend, Georgius III. D.A.M. BRI. FRA. ET HIB. REX. F.D. Reverse, an officer and an Indian seated on a rustic bench in foreground; on the banks of a river, to right, three houses on a rocky point; at junction of river with ocean, two ships under full sail. The Indian holds in his left band a calumet, with his right grasps the hand of the officer; at left of Indian, in the background, a tree, at right a mountain range; legend, Happy While United: in exergue, 1764. In field, stamped in two small incused circles, D.C.F. and N York. Silver; size, $3\frac{3}{18}$ by $3\frac{1}{3}$ in.; loop, a calumet and an eagle's wing.

In 1765 a treaty was made with the British and Pontiae, and his chiefs were presented by Sir William Johnson, at Oswego, with the medals known as "the lion and wolf medals." A large number of these were distributed, and two reverse dies have been found. The design represents the expulsion of France from Canada (see Parkman, Pontiae Conspiracy, chap. xxxi; Betts, p. 238; Leroux, p. 156; McLachlan, p. 13).

1765. Obverse, bust of king to right, in armour, wearing the ribbon of the Garter; legend, Georgius III Dei Gratia. Reverse, to left, the British lion reposing under a tree; to right, a snarling wolf; behind lion, a church and two houses; behind wolf, trees and bushes. Silver; size, 23 in.

A large body of Indians assembled in general council at Montreal, Aug. 17, 1778, representing the Sioux, Sauk, Foxes, Menominee, Winnebago, Ottawa, Potawatomi, and Chippewa. It is generally supposed that at this time the presentation of the medals took place, in consideration of the assistance rendered the British in the campaigns of Kentucky and Illinois and during the War of the Revolution. Gen. Haldimand, commander in chief of the British forces in Canada, also gave a certificate with each medal (see Hoffmau in 14th Rep. B. A. E., 1896; Betts, p. 284–286).

1778. Obverse, bust of king to right, wearing ribbou of the Garter. Reverse, the royal arms, surrounded by ribbon of the Garter and motto, surmounted by a crown, supported by the lion and the unicorn; at bottom ribbon, with motto, Dieu et Mon Droit; shield of pretense crowned. Silver; size, 2] in., with loop for suspension.

The following medals were presented, until about the time of the war of 1812, to Indian chiefs for meritorious service, and continued in use possibly until replaced by those of 1814 (Leroux, p. 157):

1775. Obverse, bust of the king, to left, with hair curled, wearing ribbon of the Garter; legend, Georgius III Dei Gratia. Reverse, the royal arms with supporters; surmounted by crown and ribbon of the Garter; below, ribbon with motto, Dieu et Mon Droit. Silver; size, 2½ in , with loop for suspension.

1794. Obverse, bust of king to right, in armour, wearing ribbon of the Garter, hair long, cloak over shoulders; two laurel branches from bottom of medal to height of shoulders of bust; legend, Georgius III Dei Gratia; in exergue, 1794. Reverse, on plain field, the royal arms with supporters, surmounted by belmet and crest, encircled by ribbon of the Garter, and below ribbon and motto. Silver; size, 11 in.

At the close of the war of 1812, the Government, desirous of marking its appreciation of the services rendered by its Indian allies, besides making other presents and grants of land, caused the following medal, in three sizes, to be struck in silver for presentation to the chiefs and principal warriors (Leroux, p. 158):

1814. Obverse, bust with older head of king to right, laureated, draped in an ermine mantle, secured in front with a large bow of ribbon, wearing the collar and jewel of St. George; legend, Georgius III Dei Gratia Britanniarum Rex F. D.; under bust, T. Wyon, Jun. S. Reverse, the royal arms of Great Britain with shield of pretense of Hanover, surmounted by a crown and crested helmet, all encircled by ribbon of the Garter and supporters, below a ribbon with motto, Dieu et Mon Droit; above ribbon, a rose, thistle, and shamrock; behind helmet on both sides, a display of acanthus leaves; in exergue, 1814. Silver; size, 23 to 415 in.

The following medal, in three sizes, was struck in 1840 for participants in the early treaties of the Queen's reign. It is possible that it may have been presented also to the Indians of Lower Canada who took no part in the abortive uprising of 1837 (McLachlan, p. 36; Leroux, p. 161):

1840. Obverse, bust of Queen, to right, crowned; legend, Victoria Dei Gratia Britanniarum Regina F. D.; under neck W. Wyon, R. A. Reverse, arms of Great Britain, surmounted by crown and crested helmet, encircled by ribbon of the Garter, supported by the lion and the unicorn; below, ribbon with motto, Dicu et Mon Droit, the rose and thistle; in exergue, 1840. Silver; sizes, 23 to 43 in.
